In addition, the act provides for a study by the Bureau of Federal Credit Unions of the desirability of establishing Federal central credit unions. A report on this study was filed with Congress on June 10, 1960.

The House passed H.R. 8305 on July 30, 1959. The Senate passed it with amendments on September 9, and the House agreed to the Senate amendments on September 10. The bill became Public Law 86-354 on September 22, 1959.

Housing Act of 1959

Public Law 86-372—No House Report; S. 2654

Three general housing bills were passed by Congress in 1959. The first two (S. 57 and S. 2539) were vetoed by the President. Finally, S. 2654 was introduced and passed the Senate September 9. It passed the House September 10 without amendment and was signed into law on September 23, 1959. Following are the major provisions of that act:

Title I increased FHA's general insurance authorization by $8 billion and extended the home improvement insurance program for 1 year (until October 1, 1960). This title

also gave the FHA Commissioner authority to reduce minimum downpayment requirements on sales housing financed under FHA. The FHA put the new, lower schedule into effect in April 1960. The new schedule keeps the requirement of 3 percent down on the first $13,500 of value as in prior law, but above that it requires only 10 percent down on any amount between $13,500 and $18,000 (in place of 15 percent between $13,500 and $16,000), and 30 percent of any amount over $18,000. The maximum mortgage on low-cost housing in outlying areas financed under section 203(i) is raised from $8,000 to $9,000, and existing construction is made eligible for this insurance. In order to facilitate trade-in home financing, the act permits a nonoccupant owner to close a loan in the full amount available to an owner occupant, provided 15 percent of the mortgage proceeds are placed in escrow pending resale of the house. This provision will avoid duplication of closing costs on trade-in arrangements. Unnecessary foreclosures on FHA mortgages will be avoided by provisions which encourage lenders to show forbearance in case of default, and which give the FHA Commissioner discretionary authority to take over the loan in deserving cases. Also, the FHA is permitted to accept VA construction inspections. The act raises the dollar limitations on per room, per unit, and total mortgage amounts on FHA rental and cooperative housing programs, and increases the permissible interest rates on these programs. Also equity requirements are reduced in the case of cooperative housing. Among other provisions, this title adds a new section 232 to the National Housing Act authorizing FHA to insure loans on proprietary nursing homes.

Title II authorized two programs to provide housing for the elderly. First a new section 231 was added to the National Housing Act authorizing liberal FHA mortgage insurance for new and rehabilitated housing for older people. Nonprofit sponsors can obtain loans up to 100 percent of value, while profitmaking sponsors are limited to loans up to 90 percent of value. Second, a new program of direct loans is authorized. These loans bear interest at not more than the average annual interest rate on all obligations of the United States, plus one-fourth of 1 percent. They may cover up to 98 percent of total development cost, and carry a maturity up to 50 years. The amount of $50 million is authorized to be appropriated for these loans.

Title III made a number of improvements in the FNMA program. The maximum mortgage which FNMA can purchase was increased from $15,000 to $20,000 in the case of secondary market operations; from $15,000 to $17,500 under the special assistance function; and the ceiling was removed in the case of FHA section 220 mortgages (urban renewal housing). The FNMA special assistance fund for cooperative housing was increased by $25 million, divided equally between consumer cooperatives and builder-sponsored cooperatives. The act also authorized FNMA to make advance commitments on existing construction.

Title IV relates to the urban renewal programs. Capital grant authority was increased by $350 million upon enactment, and an additional $300 million became available on July 1, 1960. The act also provides for a more realistic method of determining the extent of use of the borrowing authority provided in the Housing Act of 1949. Under the new law, the Housing and Home Finance Administrator is permitted to authorize land acquisition and slum clearance prior to the signing of the loan-and-grant contract. Also, local improvements started up to 3 years before the signing of the loan-and-grant contract can be counted toward the local share of the cost of the project provided such improvements meet all other requirements for eligibility. Public housing in urban renewal project areas will receive more equitable treatment under the provision which allows the local tax exemption of the housing project to be counted as the community's share of the net cost of the urban renewal land. The law permits the expenditures of colleges and universities to be counted as part of the community's share of urban renewal costs, and removes the "predominantly residential" requirements for projects involving an educational institution. Among other provisions of this title are more liberal relocation payments (raised from $100 to $200 for individuals and families, and from $2,500 to $3,000 for businesses); a requirement that urban renewal developers must publish certain information; and an authorization of $10 million for appropriation for the urban planning grant program.

Title V authorized the Public Housing Administration to enter into contracts for an additional 37,000 federally aided low-rent housing units. It also encourages greater local autonomy in the low-rent program; liberalizes the eligibility requirements for families displaced by Government action; reduces the minimum age for admission of elderly persons; and authorizes local public agencies using public services for which separate charges are normally made to pay such charges.

Title VI provided an additional $250 million for college housing loans, of which $25 million is reserved for student nurse-intern housing and $25 million is reserved for "other educational facilities." Also, nonprofit student housing cooperative corporations are made eligible for loans.

Title VII contains provisions relating to armed services housing. The program of mortgage insurance under section 803 of the National Housing Act was extented for 2 years (until October 1, 1961), and the maximum maturity of mortgages under this program is increased from 25 to 30 years. This title also authorized a new section 810 under which the FHA Commissioner can insure mortgages on single family and multifamily projects for which the need is certified by the Secretary of Defense. This program is limited to not more than 5,000 units.

Title VIII includes a number of miscellaneous provisions. The farm housing research program was extended for 2 additional years (until June 30, 1961) and an appropriation of $100,000 was authorized for the 2 years. The authority for loans and grants for hospital construction under the Defense Housing and Community Facilities and Services Act of 1951 was extended. The Home Owners' Loan Act of 1933 was amended to make more liberal provisions for the purchase of participating interests in mortgages by savings and loan associations. Also insured associations are permitted to invest up to 5 percent of their withdrawable accounts in loans to finance the acquisition and development of land for residential use. The voluntary home mortgage credit program was extended 2 years (to October 1, 1961). The act also provides that mortgage loans insured by FHA under section 203 will not be taken into account in applying the limitation on real estate loans which a national bank may make in relation to its capital and surplus or its time and savings deposits.

Voluntary home mortgage credit program extension

Public Law 86–119—No House Report; Senate Joint Resolution 124

The voluntary home mortgage credit program facilitates the flow of private funds for housing credit into remote areas and small communities. Established originally by the Housing Act of 1954, with an expiration date of June 30, 1957, the program has been extended from time to time. The last previous extension, in the Housing Act of 1957, provided for a termination date of July 31, 1959. Inasmuch as the general housing bill (S. 57) containing a provision to extend the life of the VHMCP was vetoed and action on another general housing bill could not be completed before July 31, the Senate on July 28 and the House on July 29, 1959, passed Senate Joint Resolution 124 extending this program to September 30, 1959. This extension was approved July 31, 1959. As explained above, the Housing Act of 1959 later extended the program to October 1, 1961.

Increase in U.S. subscriptions to International Monetary Fund and World Bank

Public Law 86–48—House Reports 225 and 435; S. 1094 (H.R. 4452)

This act authorized an increase of $1,375 million in the U.S. quota in the International Monetary Fund and an increase of $3,175 million in the U.S. subscription to the capital stock of the International Bank for Reconstruction and Development. This amounted to a 50-percent increase in our quota in the Fund and a 100-percent increase in our subscription to stock of the Bank. Of the increase in the Fund quota, 25 percent (or about $344 million) was paid in gold; the balance is held by the Fund in non-interest-bearing notes, to be used only at such times as the Fund may need cash to meet drawings by its members. The increase in our subscription to the Bank's stock is not expected to result in any actual cash payments by the United States to the Bank; it amounts to a guarantee of the Bank's obligations which are marketed to private investors and is callable only if needed to pay off these obligations.

The International Monetary Fund is a permanent international financial institution. By accepting the Fund's articles of agreement the members have undertaken to promote international monetary cooperation and sound foreign exchange practices. Since the beginning of its operations in 1946, the Fund has assisted its members to maintain or move toward convertible currencies with unified exchange rates and to eliminate restrictions on international financial transactions. The Fund extends short-term financial assistance to members to help them meet temporary balance-of-payments deficits. At the time the act was enacted, the 68 member countries of the Fund had subscribed to quotas totaling approximately $9 billion. The subscription of each member is equal to its quota and is payable one-fourth in gold and three-fourths in the member's own currency.

The International Bank for Reconstruction and Development has assisted the economic development of its member countries by making sound loans for capital projects. As of December 31, 1958, the Bank had made over $4.3 billion in loans to 49 different countries and territories. In the first few years of its operation, the Bank loaned $500 million for reconstruction efforts. Since that time the Bank has devoted its loans entirely to economic development. Most of these loans have been in Asia, Latin America, and Africa. Disbursements have been primarily for construction of electrical power facilities, improvement of ports and transportation facilities, and various industrial, agricultural reclamation, and other improvement projects. The Bank has had no defaults. This activity by the Bank serves the important U.S. policy objective of assisting the economic development of less developed countries.

The increases authorized by this act were part of a general increase recommended by the Boards of Governors of the Bank and the Fund in February 1959, to take effect only if member countries having about 75 percent of the 1958 Fund quotas and Bank capital agreed to the increases. The President on February 12, 1959, sent a message to Congress

approving the proposed increases and recommending enactment of the necessary legislation on the part of the United States.

The Fund quotas were originally set on the basis of international trade and financial conditions as they existed before World War II. The tremendous increases in international financial transactions in the past 10 years made these original quotas inadequate. Heavy drains on the Fund's resources in 1957 and 1958 left it with only $1.4 billion in gold and dollars available at the end of 1958. The contemplated increases would add about $900 million in gold through contributions from other member countries, in addition to the $344 million paid in by the United States.

The increase in Bank stock subscriptions was needed to facilitate borrowing by the Bank in the private market to obtain funds for loans. Such borrowings were approaching the point where they would equal the uncalled subscription of the United States to the Bank's stock. There were indications of increasing hesitancy on the part of the market to take up new issues of the Bank's obligations as this point was approached. It was estimated that the increase provided in the act would augment the guarantee fund sufficiently to cover borrowing for the next 8 to 10 years.

S. 1094 passed the Senate on March 19, 1959, 1 day after the House Banking and Currency Committee reported a similar bill, H.R. 4452. The House passed S. 1094 on March 25, with an amendment making it conform to the provisions of H.R. 4452 as reported to the House. The differences between the House and Senate bills were resolved with the adoption of the conference report on the bill by both Houses on June 5. It became Public Law 86-48 when the President signed the bill on June 17, 1959.

Inter-American Development Bank

Public Law 86-147—House Report 678; S. 1928 (H.R. 7072)

This act authorized the President to accept membership on behalf of the United States in the Inter-American Development Bank; authorized appropriations of $450 million for the U.S. subscription to the Bank; contained several provisions necessary to make our membership effective, including provisions relating to the marketing of the Bank's securities in the United States; and provided for the coordination of the activities of U.S. representatives to the Bank by the National Advisory Council on International Monetary and Financial Problems.

The Bank's organizational meeting was held in San Salvador in February 1960. Of the 21 American Republics eligible for membership in the Bank, all except Cuba accepted membership. Officials of the Bank were elected at the meeting.

The Bank is designed to expand the economic growth of Latin America. It will make loans for projects in these countries to supplement other sources of credit. It will also assist these countries in formulating development programs and in engineering and organizing projects. Its technical assistance will help these countries obtain capital from other sources, as well as from the Bank.

The Bank will have resources of approximately $1 billion, of which $850 million will be the ordinary capital of the Bank and $150 million will be placed in a Fund for Special Operations. These two kinds of resources will be strictly segregated. Of the $850 million capital of the Bank, $450 million will be uncalled subscriptions, which in effect constitute a guarantee fund against which the Bank expects to sell securities in the financial markets of the member countries.

The U.S. subscription to the ordinary capital of the Bank will amount to $350 million; $150 million of paid-in capital and $200 million in callable capital. Our contribution to the Fund for Special Operations will be $100 million. The balance of the subscriptions to the ordinary capital of the Bank will be apportioned among the other members in approximate proportion to their revised quotas in the International Monetary Fund. In addition, the Latin American countries will subscribe $50 million (half in gold or dollars and half in their national currencies) to the Fund for Special Operations.

SUMMARY OF FINANCING

TABLE 1.—*Resources of the Inter-American Development Bank*

[In millions of U.S. dollars]

	United States	Latin American countries	Total
Bank capital:			
Paid in (in 3 installments):			
Gold or dollars	75	125	200
National currency	75	125	200
	150	250	400
Callable	200	250	450
Total	350	500	850
Proportion (percent)	41.2	58.8	100
Funds for Special Operations (in 2 or more installments):			
Gold or dollars	50	25	75
National currency	50	25	75
Total	100	50	150
Total (Bank capital and Fund for Special Operations)	450	550	1,000

TABLE 2.—*Timing of U.S. payments to the Inter-American Development Bank*

[In millions of U.S. dollars]

	Initial payment (not later than Sept. 30, 1960)	On or after Sept. 30, 1961	On or after Sept. 30, 1962	Total
Bank capital	30	60	60	150
Fund for Special Operations	50	[1] 50		100

[1] Payments on this portion of the quota in the Fund for Special Operations could be required by the Bank at any time subsequent to 1 year after the Bank has begun operations.

In its ordinary operations, the Bank will make normal banking loans repayable in the currency borrowed and at interest rates similar to those charged by other lending institutions. It will sell its securities on terms and conditions similar to the securities sold by the International Bank for Reconstruction and Development.

The Fund for Special Operations will make loans on terms and conditions appropriate for dealing with special circumstances arising in particular countries or with respect to specific projects. Such loans may be repayable, in whole or in part, in the currency of the borrowing country.

The bill passed the Senate July 15; passed the House July 27; and was approved August 7, 1959.

One hundredth anniversary of the first significant discovery of silver in the United States

Public Law 86-29—No House Report; S. 1559

This law authorizes and directs the Secretary of the Treasury to strike medals to commemorate the 100th anniversary of the first significant discovery of silver in the United States, which took place in Nevada in June 1859. The law also authorizes the manufacture and sale by the mint to the public of silver duplicates of the medals upon authorization from the Nevada Silver Centennial Committee.

S. 1559 passed the Senate and House May 11, and became public law May 20, 1959.

One hundredth anniversary of the settlement of Colorado and in commemoration of the establishment of the U.S. Air Force Academy

Public Law 86-65—House Report 402; H.R. 7290

This act directs the Secretary of the Treasury to strike and furnish to the Colorado Rush to the Rockies Centennial Commission not more than 10,000 silver medals to commemorate the 100th anniversary of the settlement of the State of Colorado and to commemorate the establishment of the U.S. Air Force Academy.

The act also authorizes the mint to manufacture and sell to the public silver duplicates of the medals upon authorization from the Colorado Rush to the Rockies Commission.

The bill passed the House June 1, passed the Senate June 12, and was approved June 23, 1959.

One hundredth anniversary of statehood for West Virginia

Public Law 86-184—House Report 881; S. 2099

This act honors the 100th anniversary of the admission of West Virginia into the Union as a State by directing the Secretary of the Treasury to strike a national medal commemorating the event.

The Secretary of the Treasury is authorized to furnish to the West Virginia Centennial Commission not more than 200,000 of such medals which are to be made and delivered to the commission in quantities of not less than 2,000; but no medal will be made after December 31, 1963.

The bill passed the Senate July 6, passed the House August 17, and was approved by the President on August 24, 1959.

Gold medal honoring the late Professor Robert H. Goddard

Public Law 86-277—House Report 882; House Joint Resolution 19

This law authorized the chairmen of the House Committee on Science and Astronautics and the Senate Committee on Aeronautical and Space Sciences to present a gold medal on behalf of Congress to the family of the late Dr. Robert H. Goddard, who is generally recognized as the "father of modern rocketry."

House Joint Resolution 19 passed the House August 17, passed the Senate September 9, and became Public Law 86-277 on September 16, 1959.

Regulation of savings and loan holding companies

Public Law 86-374—House Report 679; H.R. 7244

In 1955, the committee reported a bill designed to regulate holding companies in the field of commercial banking. It was subsequently enacted as the Bank Holding Company Act of 1956. Shortly after the committee had reported that bill a new holding company was formed in the savings and loan field. In the succeeding 4-year period, about a dozen holding companies were formed, each of which controlled two or more insured savings and loan associations. They operate in six States, where State law permits formation of permanent-stock savings and loan associations. All Federal savings and loan associations are mutuals, as are most State savings and loan associations, but in some States, particularly California, holding companies have acquired control of a number of stock associations by buying a controlling interest in their permanent stock. In view of the rapid growth of these holding companies, the committee unanimously voted in favor of this legislation, designed to preserve the traditional pattern of independent, locally managed savings and loan associations.

This act prohibits any holding company from acquiring control of two or more sav-

ings and loan associations if the savings accounts in the associations are insured by the Federal Savings and Loan Insurance Corporation. It also denies FSLIC insurance to any uninsured savings and loan association if it is controlled by a holding company which also controls an insured association. As a protection against self-dealing, the act also prohibits any insured savings and loan association controlled by a holding company from making any loan to the holding company or any of its other subsidiaries.

The act does not have any retroactive effect. That is, it does not require any holding company to divest itself of an insured association it controlled before enactment. But such a company cannot acquire control of any additional insured association.

As enacted, this law contained a termination date of May 31, 1961. As explained below, this was repealed in 1960, making the legislation permanent.

H.R. 7244 passed the House on July 27 and passed the Senate with amendments on September 11. The House agreed to the Senate amendments on September 12, and the bill became Public Law 86-374 on September 23, 1959.

Additional directors for Federal home loan banks

Public Law 86-349—House Report 947; S. 2517 (H.R. 8591)

This law permits the Federal Home Loan Bank Board by regulation to increase up to 13 the number of elective directors of a Federal home loan bank in a district which includes five or more States, and to increase the number of appointive directors. The law made it possible for the Board to provide for three elective directors of the Home Loan Bank of San Francisco for California. California had 3 directors until Alaska and Hawaii were admitted as States, but when the 2 new States each became entitled to elect a director California was reduced to 1 director in order to stay within the former limit of 11 elective directors per bank.

S. 2517 passed the Senate September 9, passed the House September 12, and became Public Law 86-349 on September 22, 1959.

FSLIC insurance coverage in community property States

Public Law 86-112—House Report 572; H.R. 7789

This act corrects the inequity that existed in community property jurisdictions by amending the law relating to insurance of accounts in savings and loan associations so as to provide for husbands and wives in community property States insurance coverage comparable to that which is available to husbands and wives in other States.

Under the FSLIC Act, generally no member or investor of any one insured institution may be insured for more than $10,000. In States that do not have community property laws, one account may be insured up to $10,000 in the name of a husband, one account in the name of his wife may be similarly insured, and a third account may also be insured up to $10,000 if it is held by the husband and wife as joint tenants with right of survivorship or as tenants by the entireties.

Under community property laws, an account in the name of a husband, an account in the name of his wife, and an account in the name of both could all be community property. In these cases there is identical ownership of all three accounts. Consequently until this act was enacted only $10,000 total coverage could be obtained by a husband and wife in community property jurisdictions when all of their savings were community property, as opposed to $30,000 in other States. The act provided for insurance coverage up to $30,000 in community property States, similar to that available in other States.

The bill passed the House July 6, passed the Senate on July 15, and was approved by the President on July 28, 1959.

Small business loans

Public Law 86-367—House Report 946; H.R. 8599

This law provided an additional $75 million for the Small Business Administration's revolving fund for its regular business loan program, by raising the ceiling on such loans outstanding at any one time from $500 to $575 million. It also provides authority for appropriations to continue, beyond 1960, the programs of grants for studies, research, and counseling concerning the managing, financing, and operation of small-business enterprises, as authorized by section 7(d) of the Small Business Act.

H.R. 8599 passed the House August 24 and passed the Senate with amendments on September 10. The House agreed to the Senate amendments on September 11 and the bill became Public Law 86-367 on September 22, 1959.

LAWS ENACTED, SECOND SESSION

Regulation of bank mergers

Public Law 86-463—House Report 1416; S. 1062

This act provides for Federal regulation of mergers of federally insured banks, under uniform standards. Before this act was enacted, controls over bank mergers were incomplete and confusing, particularly with respect to the competitive factors involved. There were gaps in the controls exercised by the Federal banking agencies, and even where agency approval was required before a merger could take place, the standards governing approval or disapproval were not clearly spelled out.

To remedy this situation, Public Law 86-463 prohibits mergers of federally insured banks without the approval of the appropriate Federal bank supervisory agency. If the merger is to result in a national bank or a District of Columbia bank, approval must be obtained from the Comptroller of the Currency; if it is to result in a State bank that is a member of the Federal Reserve System, approval must be obtained from the Federal Reserve Board; if it is to result in an insured nonmember State bank, approval must be obtained from the Federal Deposit Insurance Corporation. In acting on a merger application, the agency having jurisdiction over the transaction will consider the following factors: The financial history and condition of each of the banks involved, the adequacy of its capital structure, its future earnings prospects, the general character of its management, the convenience and needs of the community to be served, whether the bank's corporate powers are consistent with the purposes of the Federal Deposit Insurance Act, and the effect of the transaction on competition (including any tendency toward monopoly). Approval will not be given unless, after considering all such factors, the agency finds the transaction to be in the public interest. Except where immediate action is needed to save a failing bank, the agency having jurisdiction over the transaction will request a report on the competitive factors involved from the other two banking agencies and from the Attorney General.

The act requires that notice of a proposed merger shall be published in a newspaper of general circulation in the community or communities where the main offices of the banks involved are located. It also provides that each of the three bank supervisory agencies shall include in its annual report to Congress a description of the mergers it has approved during the period covered by the report. The report is to include the following information: The name and total resources of each bank involved; whether a report has been submitted by the Attorney General and, if so, a summary of its substance prepared by him; and a statement by the banking agency of the basis for approval.

S. 1062 passed the Senate May 14, 1959; passed the House with amendments April 4, 1960; and the Senate agreed to the House amendments on May 6, 1960. This bill became Public Law 86-463 on May 13, 1960.

Federal deposit insurance assessments

Public Law 86-671—House Report 1827; H.R. 12465

In general, this act takes two steps to simplify the procedures for determining the amount of assessment an insured bank must pay to the Federal Deposit Insurance Corporation for deposit insurance. First, it bases FDIC assessments on items in the reports of condition insured banks make to their supervisory authorities, rather than on special reports filed with FDIC for that purpose. Second, it simplifies the computation of assessments by authorizing a single, uniform deduction by all banks, on account of "float" and other deductions formerly allowed, of 16⅔ percent of demand deposits and 1 percent of time deposits. The act makes no change in the annual assessment rate (which remains one-twelfth of 1 percent of total deposit liabilities), but it increases the rebate made to insured banks from FDIC's net assessment income from 60 percent to 66⅔ percent.

Before this act was enacted, insured banks were required to furnish their supervisory agencies with certain information concerning their condition and operations, on forms known as "reports of condition," and to file separate, special reports with FDIC for assessment purposes. The information filed with FDIC for assessment purposes was based on fixed dates, specified in the law, whereas the information filed in the reports of condition was based on "surprise call" dates. Also, there were differences between the way deposits were reported in the reports of condition and the way they were reported for assessment purposes. The new act eliminates these differences, and bases FDIC assessments on the information submitted in the reports of condition, thereby eliminating the need for special records for assessment purposes. Under the act, insured banks will submit two certified statements each year showing the amount of assessments due for each semiannual period. Every item to be used in the computation of the assessment will appear in the regular reports of condition except for the percentage deductions. The reports of condition will be made on "surprise call" dates, to be determined by the heads of the three Federal banking agencies.

Formerly, banks were permitted to make certain deductions from their deposit liabilities in order to determine their assessment base. The new act eliminates these deductions from the assessment base provisions of the Federal Deposit Insurance Act. Some of the old deductions are reflected in the new definition of "deposit" and the new provisions on reports of condition, but others are eliminated, and instead a new flat percentage deduction is authorized (16⅔ percent of demand deposits and 1 percent of time deposits). The principal deduction eliminated by the new act was for "float," or cash items in process of collection.

Since 1950, the Federal Deposit Insurance Act has provided that as of the end of each calendar year FDIC shall transfer part of its net assessment income to its capital account (insurance fund), and credit the balance of its net assessment income pro rata to the insured banks, based upon the assessments of each bank becoming due in that year. "Net assessment income" is determined by subtracting from FDIC's total assessment income for the year its operating costs, any losses for the year (or additions to reserve necessary to provide for such

losses), and any such charges for any previous year not fully covered by previous years' income. Under the old law, net assessment income was split 40–60; that is, 40 percent went to the insurance fund and 60 percent was credited to the insured banks. Under the new act, one-third will go to the insurance fund and two-thirds to the banks.

H.R. 12465 passed the House June 28, 1960; passed the Senate July 2, 1960; and became Public Law 86–671 on July 14, 1960.

Treasury sales of securities to Federal Reserve

Public Law 86–567—House Report 1825; H.R. 12346

This act extends until June 30, 1962, the authority of the Federal Reserve banks to purchase securities directly from the Treasury in amounts totaling not more than $5 billion outstanding at any one time.

Prior to 1935 Federal Reserve banks could purchase Government obligations either in the market or directly from the Treasury. The Banking Act of 1935, however, required that all purchases of Government securities by Federal Reserve banks be made in the open market. In 1942 the authority of the Federal Reserve banks to purchase securities directly from the Treasury was restored, but a limit of $5 billion was placed on the amount outstanding at any one time. The $5 billion authority was granted initially only through 1944, but the Congress has extended it from time to time so as to provide continuous limited direct borrowing authority ever since.

This authority permits the Treasury to operate with lower cash balances than would otherwise be prudent; gives the Treasury more leeway in timing new Treasury issues; provides a useful device for minimizing the effects on the economy of short-run fluctuations in the Treasury's cash balance, particularly during periods immediately preceding the peak of tax collections; and provides an immediate source of funds for temporary financing in the event of a national emergency.

H.R. 12346 passed the House June 24, 1960; passed the Senate June 28, 1960; and became Public Law 86–567 July 1, 1960.

Defense Production Act extension

Public Law 86–560—House Report 1739; H.R. 12052

This act extends for 2 additional years, through June 30, 1962, the remaining powers of the President under the Defense Production Act of 1960. These include power to establish priorities for defense contracts, limited power to allocate materials for defense purposes; authority to guarantee loans made in connection with defense contracts; authority to make loans and purchases to build up our defense capacity and assure adequate supplies of defense materials; authority for businessmen to cooperate voluntarily in meeting defense needs without violating antitrust laws; and provision for establishment of a reserve of trained executives to fill Government positions in time of mobilization.

Some of these powers are needed now to maintain production schedules on missiles and other defense contracts; others are needed for longer range preparedness programs; and other powers must be maintained in readiness for possible future emergencies.

H.R. 12052 passed the House June 6, 1960; passed the Senate with an amendment June 18, 1960; and the House concurred in the Senate amendment on June 28, 1960. This bill was signed by the President on June 30, 1960, as Public Law 86–560.

Export Control Act extension

Public Law 86–464—House Report 1415; H.R. 10550

This act extends the Export Control Act of 1949 for a further period of 2 years to June 30, 1960. That act, which is administered by the Secretary of Commerce, authorizes the regulation of exports to the extent necessary (1) to protect the domestic economy from excessive drain of scarce commodities, (2) to safeguard the national security insofar as it might be adversely affected by exports of strategic commodities, and (3) to further our foreign policy.

Controls under the Export Control Act are basically of two types—"security" and "short supply" export controls.

Security export controls are designed to regulate the flow of strategic commodities from moving directly or indirectly to the Sino-Soviet bloc.

Short-supply controls are applied in order to carry out the policy of protecting the domestic economy from an excessive drain of scarce materials.

At present the Secretary is applying export controls only for necessary national security and foreign policy purposes. The controlling of exports for short-supply reasons has been discontinued because there are no important commodities leaving the country in such quantities as to cause any serious shortages to the domestic economy. Authority for short-supply controls was retained in the act, however, because experience shows that our domestic supply of a commodity can change suddenly and it may become desirable to have such controls reinstituted.

H.R. 10550 passed the House April 4, 1960; passed the Senate May 5, 1960, and became Public Law 86–464 on May 13, 1960.

Extension of housing and public facility loan programs

Public Law 86–788; House Joint Resolution 784

As explained below, the committee reported out two housing bills in 1960, the Emergency Home Ownership Act and the Housing Act of 1960, but neither bill became law. Instead, during the last days of the session the Senate adopted a simple extension of three programs, as a rider to House Joint Resolution 784, a resolution relating to the U.S. Constitution 175th Anniversary Commission. The House agreed to the Senate amendment on August 31, and the President approved the resolution on September 14, 1960.

The resolution as enacted extended the title I FHA home improvement insurance program for 1 year (until October 1, 1961). It also provided an additional $500 million for college housing loans, of which $50 million is reserved for student nurse-intern housing and $50 million is reserved for "other educational facilities" (such as cafeterias and student centers). Finally it provided an additional $50 million for the public facility loan program established by the Housing Amendments of 1955, under which the Community Facilities Administration of the Housing and Home Finance Agency makes loans to local communities for needed public facilities, primarily for sewer and water facilities in smaller municipalities.

Housing at NASA installations

Public Law 86–578—House Report 1820; S. 3226

This act restored to essential civilian employees of the National Aeronautics and Space Agency the benefits of home mortgage insurance under section 809 of the National Housing Act. These employees lost their eligibility for this assistance when certain research and development installations were transferred from the Department of Defense to NASA. Section 809 was enacted to help solve the housing problems of essential civilian employees of the armed services at research and development installations. It is needed because in some cases homes built for such employees near such installations exceed the number needed for the normal economic growth of the community. In the opinion of the Federal Housing Administration, homes built in excess of those needed for normal growth do not meet the test of economic soundness fixed by statute as a prerequisite for FHA mortgage insurance. Section 809 permits the economic soundness test to be waived in such cases.

S. 3226 passed the Senate May 25, 1960; passed the House June 24, 1960; and became law on July 5, 1960.

International Development Association

Public Law 86–565—House Report 1766; H.R. 11001

This act authorized the President to accept membership on behalf of the United States in the International Development Association. The Association offers a new approach to a longstanding problem: Through it, other highly developed nations will join with the United States in providing development financing geared to the special needs of the less developed areas of the free world.

The International Development Association will be an international organization whose members must be members of the International Bank for Reconstruction and Development. It will be an affiliate of the International Bank so far as organization and management are concerned; the Governors and Executive Directors of the Bank are to serve ex officio in corresponding capacities for the Association. The Association will, however, be a separate financial entity whose funds must be kept apart from those of the Bank.

In general, the International Development Association will make loans on terms which bear less heavily on the balance of payments of the borrower than is the case with conventional loans. The Association may make loans which are wholly or partly repayable in the borrower's own currency. Or, loans may be made payable in the currency lent but for longer maturities or at lower interest rates than conventional loans.

The financing provided by the Association must be used to further development in the less-developed areas of the world included within the Association's membership. Financing can thus be provided to less-developed member countries or to less-developed dependent and associated territories of members of the Association, but not to countries or their territories which are not members. Whenever financing is provided by the Association, it must be for purposes which are of high developmental priority in the light of the needs of the area or areas concerned, and, except in special circumstances, financing must be for specific projects. The Association will not provide financing if it concludes that such financing can be obtained from private sources on reasonable terms for the recipient. Private enterprises, as well as governments or public bodies, are eligible to receive financing from the Association. Projects such as pilot housing, sanitation, water supply, etc., are eligible, although the major portion of the Association's resources will probably be devoted to basic economic projects, such as railway programs or a group of integral parts of a country's or region's development program.

The initial resources of the International Development Association will total $1 billion, if all members of the International Bank join. Member countries are divided into two groups for subscription purposes: 17 countries designated in part I of schedule A will contribute about $763 million in gold or convertible currencies, while the other 51 nations in part II will provide the remaining $237 million, 10 percent in gold or convertible currencies and the balance in their own national currencies. The IDA subscriptions are based upon the relative capital subscriptions to the International Bank, and, as in the Bank, voting rights are roughly proportionate to subscriptions. The

90-percent portion contributed by the less-developed countries may not be converted into other currencies by the International Development Association or used to finance exports from the country concerned without its consent. The following schedule lists the contributions to be made by each proposed Association member:

Total	32,029,000	288,261,000	320,290,000

[1] 50 percent of 10-percent portion (5 percent of total subscription) payable within 30 days after date on which Association begins operations, or on date on which original member becomes a member, whichever is later.

[2] 12½ percent of 10-percent portion (1¼ percent of total subscription) payable 1 year after beginning of operations of Association, and at annual intervals thereafter until 10-percent portion fully paid.

[3] 20 percent of 90-percent portion (18 percent of total subscription) payable within 30 days after date on which Association begins operations, or on date on which original member becomes a member whichever is later.

[4] 20 percent of 90-percent portion (18 percent of total subscription) payable 1 year after beginning of operations of Association, and at annual intervals thereafter until 90-percent portion fully paid.

[5] 23 percent of total subscription (5 percent plus 18 percent).

[6] 19¼ percent of total subscription (1¼ percent plus 18 percent).

H.R. 11001 passed the House on June 29, 1960; passed the Senate on June 29, 1960; and became Public Law 86-565 on June 30, 1960.

One hundredth anniversary of Idaho becoming a Territory

Public Law 86-696—House Report 1976; S. 3160

This act directs the Secretary of the Treasury to strike and furnish to the Idaho Territorial Centennial Commission not more than 10,000 medals commemorating the 100th anniversary of the founding of the State of Idaho as a Territory. It also authorizes coining and sale of duplicates of the medals upon authorization from the commission.

S. 3160 passed the Senate June 18, 1960, passed the House August 23, and became law on September 2, 1960.

One hundredth anniversary of statehood for Kansas

Public Law 86-393—House Report 1261; S. 2431

This act authorizes the manufacture and sale to the Kansas Centennial Commission of not more than 20,000 medals to commemorate the 100th anniversary of statehood of Kansas. It also authorizes coining and sale of duplicates of the medals upon authorization from the commission.

S. 2431 passed the Senate September 9, 1959, passed the House March 7, 1960, and was approved by the President March 18, 1960.

One hundredth anniversary of founding of the pony express

Public Law 86-394—House Report 1262; S. 2454

This act directs the Treasury Department to strike not more than 500,000 medals commemorating the 100th anniversary of the founding of the pony express, and to furnish them to the National Pony Express Centennial Association.

S. 2454 passed the Senate September 9, 1959, passed the House March 7, 1960, and became law on March 18, 1960.

Century 21 Exposition

Public Law 86-697—House Report 1977; S. 3532

This act directs the Secretary of the Treasury to strike and furnish to the Century 21 Commission not more than 500,000 medals in commemoration of the Century 21 Exposition to be held in Seattle, Wash., in 1962.

S. 3532 passed the Senate June 18, 1960, passed the House August 23, 1960, and became law on September 2, 1960.

Gold medal in honor of Robert Frost

Public Law 86-747—House Report 2118; S. 3439

This act authorizes the President to present a gold medal in the name of Congress to Robert Frost in recognition of his poetry, which has enriched the culture of the United States and the philosophy of the world. It authorized an appropriation of $2,500 for the purpose.

S. 3439 passed the Senate June 18, 1960, passed the House August 30, 1960, and became law on September 13, 1960.

Savings and loan holding companies

Public Law 86-746—House Report 2119; S. 3619

As explained above, the Savings and Loan Holding Company Act enacted September 23, 1959, contained a termination date of May 31, 1961. Public Law 86-746 repealed this termination date, thereby making the Savings and Loan Holding Company Act permanent law. The principal effect of this legislation is to prevent any holding company from acquiring control of two or more savings and loan associations whose savings accounts are insured by the Federal Savings and Loan Insurance Corporation.

S. 3619 passed the Senate July 1, 1960, passed the House August 30, 1960, and was signed into law on September 13, 1960.

Small Business Investment Act amendments

Public Law 86-502—H. Report 1608; S. 2611

The Small Business Investment Act of 1958 was enacted primarily to make equity-type capital and long-term credit more readily available for small business concerns, through encouraging the establishment of privately owned small business investment companies (referred to below as SBIC's). Public Law 86-502 amended this 1958 act in order to remove certain obstacles which have impeded the realization of this goal.

The new law did away with a number of restrictions formerly in section 304 of the 1958 act, relating to SBIC's providing equity capital for small business concerns. It amended section 304 to provide that SBIC's may furnish equity capital to incorporated small business concerns "in such manner and under such terms as the small business investment company may fix in accordance with the regulations of the (Small Business) Administration." Thus, the following changes were made in the 1958 act:

(1) Equity capital formerly could be furnished only in the form of convertible debentures, callable by the borrower on 3 months' notice. The new law allows SBIC's to furnish capital in other forms to be authorized by SBA regulation (such as by directly buying stock in the small business, or by buying debentures with severable or "detachable" stock rights).

(2) Section 304 formerly stated it "shall be a primary function" of each SBIC to provide equity capital for small business. The new law strikes out "primary." This conforms SBA's practice of allowing SBIC's to engage solely in the business of making long-term loans, without actually offering equity capital in any form, so long as their charters contain authority for engaging in, and they are thus available for both types of operation.

(3) The 1958 act requires a small business concern to purchase stock in any SBIC from which it gets equity capital. The new law eliminates this requirement, but grants the small business concern an option (exercisable in whole or in part) to buy stock in the SBIC equal to 5 percent of the capital supplied to it.

Section 5 of the new law relates to bank holding companies, and grows out of an interpretation of the Bank Holding Company Act of 1956 by the Federal Reserve Board. The Board interprets that act, in combination with the Small Business Investment Act of 1958, as permitting a bank holding company to invest up to 1 percent of its capital and surplus in an SBIC. At the same time, it ruled that a bank holding company's subsidiary bank cannot invest in an SBIC, where the SBIC is or will become a subsidiary of the bank holding company. The new law allows a bank that is a holding company subsidiary to invest up to 1 percent of its capital and surplus in any SBIC even though the SBIC is a subsidiary of the same holding company.

The new law also extends the operation of the Small Business Investment Act to possessions of the United States, such as Guam, and exempts SBIC's from the District of Columbia's small-loan law.

S. 2611 passed the Senate September 10, 1959; passed the House with amendments on May 16, 1960; and was approved June 11, 1960.

BILLS REPORTED BUT NOT ENACTED

Area Redevelopment Act

House Report 360; S. 722

(This bill passed the Senate on March 23, 1959, and passed the House with amendments on May 4, 1960. The Senate agreed to the House amendments on May 6, but the President vetoed the bill on May 13, 1960. It failed to become law when the Senate on May 24, 1960, voted 45 to 39 to override the veto, thus falling short of the two-thirds vote needed.)

The bill was designed to help areas of chronic unemployment or underemployment. It would have been administered by a new, independent Area Redevelopment Administration. The Administrator could designate two types of areas—industrial and rural—for assistance under the bill. It provided that any area suffering from substantial and persistent unemployment could be designated as an industrial redevelopment area; designation would have been mandatory for any area with current unemployment of 6 percent or more, plus a history of unemployment of at least 6 percent for 18 out of 24 months, or 9 percent for 15 out of 18 months, or 12 percent for 12 months. The bill also provided that any rural area with heavy concentrations of low-income families and substantial and persistent unemployment or underemployment could be designated as a rural redevelopment area; designation would be mandatory under the bill for any rural county among the 500 counties ranked lowest in level of living of farm-operator families or among the 500 counties with the highest percentage of low-income commercial farms.

The bill contemplated that an overall program for the economic development of the area would be prepared by the leaders of the area, with the help of local authorities and the Area Redevelopment Administration. Appropriations of $4.5 million a year were authorized by the bill for providing technical assistance in these areas. This would include studies evaluating the potentialities of the area for economic growth.

The bill authorized loans for industrial projects, and loans and grants for public facilities, in these redevelopment areas, in accordance with these overall programs. Loans for industrial projects could cover land acquisition and development, construction or improvement of plants, and machinery and equipment. Appropriations of $150 million were authorized by the bill for such loans; $75 million for a revolving fund for loans in industrial redevelopment areas and $75 million for a revolving fund for rural redevelopment areas. It also authorized appropriations of $50 million for loans for public facilities in both industrial and rural redevelopment areas, where needed to bring industries into the area. Finally, another $35 million would have been authorized for grants to help finance needed public facilities in areas that cannot provide them otherwise.

To help clear space for new plants in industrial redevelopment areas, the bill provided for grants and loans to be made to such areas under the urban-renewal program now administered by the Housing and Home Finance Agency, without regard to certain existing requirements. Planning advances authorized by the Housing Act of 1954 would also have been made available for such areas without regard to population limitations that would otherwise apply.

Finally, the Department of Labor and the Department of Health, Education, and Welfare would have been authorized to help in providing needed training programs to prepare workers for new jobs provided under the bill in redevelopment areas, with appropriations up to $1.5 million a year authorized for this purpose. Appropriations of $10 million would have been authorized for subsistence payments to unemployed workers undergoing such training, if they were not entitled to unemployment compensation. Such payments would have been equal to the average weekly unemployment-compensation payment in the State and would have been limited to 13 weeks' duration.

Emergency Home Ownership Act

House Report 1394—H.R. 10213

(This bill was passed by the House on April 28, 1960, but was not acted upon by the Senate.)

The purpose of this bill was to halt the decline in homebuilding activity by providing additional mortgage credit and by other provisions designed to lower the cost of housing to the buyer. The principal provision of the bill would have authorized the Federal National Mortgage Association to invest up to $1 billion in FHA and VA mortgages on new homes. These funds could only be used to aid moderately priced new homes—up to $13,500 in normal-cost areas or $14,500 in high-cost areas. The bill would have prohibited FNMA from charging discounts on any loan purchased under its special assistance function, including loans purchased by the $1 billion fund provided in the bill.

The bill also would have authorized a $50 million revolving fund in FNMA for the purchase of FHA section 203(i) loans. These loans, which are available to finance lowest cost housing in outlying areas, carry an extra one-half of 1 percent service charge (making total financing costs to the borrower of 6¾ percent). The bill would have lowered financing costs to the borrower by prohibiting FNMA from collecting this one-half of 1 percent service charge. In addition, the bill would have authorized a $25 million FNMA special assistance fund to support section 810 mortgages (the new FHA insurance program for defense housing in impacted areas).

In order to lower home buyers' monthly charges, the FHA Commissioner would have been given discretionary authority to reduce the FHA insurance premium from the present minimum of one-half of 1 percent per annum to as low as one-fourth of 1 percent.

The bill would have made it clear that the FHA had authority to insure home mortgage loans held by individuals. Also the benefits of FHA's section 809 would have been extended to employees of the new civilian space agency, the National Aeronautics and Space Administration. (This was also provided in another bill reported by the committee (S. 3226) which was enacted as Public Law 86–578.)

Other provisions of the bill would have directed FNMA to aid in the stabilization of the mortgage market; limited FNMA sales during the period of tight money; limited FNMA fees and charges and stock purchase requirements; and directed the FHA and VA to require that discounts be reported by lenders.

Housing Act of 1960

House Report 1924; H.R. 12603

(This bill was reported by the committee with amendments on June 20. However, a rule was denied. A general housing bill, S. 3670 had been passed by the Senate on June 16.)

H.R. 12603 was a comprehensive housing bill which provided for extensions and improvements in our basic housing legislation and was designed to expand new home construction in all price classes. The FHA homeownership programs would have been liberalized through lower downpayments, extended maturities, and increased maximum loan amounts. A number of improvements were included to encourage the production of rental and cooperative housing, and a new program of mortgage insurance on older residential neighborhoods would have been established. The bill also would have extended the home improvement loan insurance program for 2 years and provided an additional $4 billion for FHA's general insurance authority.

The new program of long-term low-interest rate loans for housing for the elderly would have been given an additional $50 million (to be appropriated), and the maximum ratio of loan to development cost would have been raised from 98 percent to 100 percent.

A number of changes would have been made in FNMA operations to make it more of a true central mortgage bank facility. A three-man management board appointed by the President, by and with the advice and consent of the Senate, and a 12-man advisory council would have been established, and the agency would have been permitted to make short-term loans on the security of FHA mortgages. Increased authorizations to FNMA's special assistance operations would have included $75 million for the general fund to be used at the discretion of the President; $10 million for the purchase of cooperative housing mortgages; $15 million for a new fund to aid nursing homes; and a new $25 million fund to assure the successful launching of the program of FHA financing of older neighborhoods.

A new Government-assisted secondary market for conventional loans would have been established. Utilizing capital contributions from the Federal home loan banks, the bill would have set up a new Home Mortgage Corporation under the supervision of the Federal Home Loan Bank Board to buy and sell conventional first mortgage loans and to issue debentures to the public in order to raise additional capital.

In an effort to counter the sharp increase in land prices which has taken place in recent years, the bill would have authorized a new experimental program of FHA mortgage insurance for loans to developers and builders for the acquisition and development of land for housing construction. Appropriate safeguards to prevent abuse were provided.

The fund for college housing loans would have been increased by a total of $500 million, of which $50 million was reserved for "other educational facilities" (such as cafeterias and student centers), and $50 million was reserved for student-nurse and intern housing.

An additional $450 million would have been provided for Federal grants under the urban renewal program. It also would have established a new pilot program under which local redevelopment authorities could acquire and repair a limited number of dwelling units to be resold after rehabilitation. In addition, the bill would have given public and nonprofit hospitals the same advantage under the urban renewal program as was given colleges and universities in the Housing Act of 1959, by counting as part of the local community's one-third share of the net cost of slum clearance eligible expenditures for urban renewal made by the hospitals.

The bill contained a number of provisions designed to meet the critical problem of relocating families and small business firms displaced by urban renewal. Maximum relocation payments permitted to displaced families and businesses would have been increased. In order to provide relocation housing under FHA's section 221 at rentals which low-income families could afford, the bill provided that these loans could be made to nonprofit corporations at 4-percent interest and for a 45-year term. (At present the financing costs for rental housing projects under section 221 total 5¾ percent and the maximum loan term is 40 years.) To assure the availability of financing for this program, the bill would set up a special $100 million support fund under FNMA's special assistance program. In a further attempt to reduce the rentals, the bill would have encouraged tax abatement by local communities by giving credit for the amount of such exemption toward the community's one-third share of the cost of the urban renewal project.

The bill would also have provided an additional $100 million for the public facility loan program which assists small communities in the construction of water and sewer systems.

Small business loans

House Report 1738; H.R. 11207

The main purpose of H.R. 11207 was to increase the authority of the Small Business Administration to make loans under its regular business loan program. Present law limits the amount of SBA business loans outstanding to $575 million. The bill would have increased this limit to $725 million.

In addition, H.R. 11207 would have made three minor amendments to (1) authorize SBA to make prepayments of rentals on safety deposit boxes, (2) permit SBA to file reports on its operations annually, instead of every 6 months, and (3) repeal an unnecessary provision concerning surveys of SBA operations by the Attorney General.

The bill passed the House on June 6, 1960, and passed the Senate with amendments on July 1, 1960. When the House and Senate conferees met in August of 1960 to resolve the differences between the House bill and the Senate amendments, it had become apparent that the Small Business Administration would not reach the $575 million ceiling on its business loan authorization until after the 87th Congress convenes in 1961. Accordingly, further action was postponed until that time.

Surplus grains to feed wildlife

House Report 1978; House Joint Resolution 713

This resolution would have made surplus grain held by the Commodity Credit Corporation available to feed wildlife threatened by starvation as a result of adverse weather conditions. The resolution provided that the Secretary of the Interior, upon finding that an emergency exists warranting such assistance, could requisition grain for use in a feeding program, and make it available to State fish and game agencies. It authorized appropriations to reimburse CCC for its investment in the grain, but provided for the State involved to reimburse CCC for expenses of packaging and transporting the grain.

The resolution passed the House on August 23, 1960, but was not acted upon by the Senate.

Activities of the Committee on the Judiciary, 86th Congress

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CELLER. Mr. Speaker, it is again my pleasure, as chairman, to give a full report on the activities of the Committee on the Judiciary during the 86th Congress.

Of the 15,506 bills and resolutions introduced in the House, 4,438 House bills were referred to the Committee on the Judiciary. Thus, 28.6 percent of all House bills introduced in the 86th Congress were referred to this committee. This is a somewhat smaller percentage than had been the case in the previous Congress. The smaller percentage is explained by the fact that a greater number of bills were introduced in the 86th Congress than were in the 85th Congress. Moreover, due to general legislation in the areas of immigration and claims, there was less need for the introduction of private legislation which fell into the category of general bills enacted into law.

In the 85th Congress, 3,483 private immigration bills were introduced as against 2,283 in the 86th Congress. This holds true of private claim bills as well. In the 85th Congress, 993 private claim bills were introduced; in the 86th Congress, 827 such claim bills were placed before the committee.

Approximately 305 days of hearings were held by the subcommittees in addition to 47 meetings of the full committee.

A total of 730 bills were considered by the subcommittees. Of the public bills thus considered by the subcommittees, 345 were reported to the full committee. Of that total, 82 ultimately became public law.

Of course, these statistics cannot give an accurate picture of the major accomplishments of this committee. For example, the enactment into public law of the Civil Rights Act of 1960 occasioned intensive activity and can certainly be cited as one of the most significant enactments of the 86th Congress.

Also, the enactment of many liberal immigration measures, which are set forth in the detailed analysis, is a major accomplishment for both this committee and the Congress.

I point to the constitutional amendment granting suffrage to the residents of the District of Columbia, and to the many bills enacted into law which will serve to relieve court congestion as among those major achievements of the committee and the 86th Congress.

The streamlining of the operation of the bankruptcy court was accomplished by the enactment of close to a dozen bills in the bankruptcy area.

A careful reading of the detailed reports of the subcommittees will reveal the intensive nature of the work of this committee. Without the unfailing cooperation of the members of the committee, their attention to the detail of the complex legislation before it and their conscientious attendance at both subcommittee and full committee meetings, much of this work could not have been done.

I would also like to call attention to the unflagging devotion of our staff.

SUBCOMMITTEE NO. 1, GENERAL JURISDICTION OVER JUDICIARY BILLS AS ASSIGNED—SPECIAL JURISDICTION OVER IMMIGRATION AND NATIONALITY

In the field of immigration and nationality, Subcommittee No. 1 has acted on the following bills:

H.R. 2807 creates a single, separate, statutory form of judicial review of administrative orders for the deportation and exclusion of aliens from the United States. Aliens may seek judicial review of an order of deportation by filing a petition in the U.S. Circuit Court of Appeals, orders of exclusion to be reviewed exclusively by writs of habeas corpus. Such orders shall not be reviewed until all administrative remedies have been exhausted. The bill provides for trial de novo of substantial claims to American nationality by persons who have been ordered deported. The bill passed the House on July 6, 1959.

H.R. 3088 amends certain provisions of sections 353 and 354 of the Immigration and Nationality Act which specify exemptions from the loss of U.S. citizenship by naturalized citizens by including parent or parents of a U.S. citizen who is or are accompanying such citizen for the purpose of remaining with him while he has his residence abroad for reasons specified in the law. Honorably discharged veterans who served during the Korean conflict are included in the exemption from automatic loss of citizenship by reason of residence abroad, which exemption is enjoyed by veterans of the Spanish-American War, World War I, and World War II. The bill changes from 25 to 15 years the residence requirement which precludes the loss of citizenship by naturalized citizens residing in a foreign country. The bill was enacted into law on August 4, 1959—Public Law 86–129.

H.R. 5896 reclassifies close relatives of U.S. citizens and aliens admitted for permanent residence in the United States in the preference portion of the immigration quotas and expedites reuniting of certain families. Alien adult unmarried sons and daughters of U.S. citizens are reclassified to the second preference reclassification; alien adult unmarried sons and daughters of aliens admitted into the United States for permanent residence are placed in the third preference classification. Immigrants registered on the consular waiting lists prior to an established date, who have a preferential quota status, and spouses and minor children of aliens admitted into the United States under the Refugee Relief Act of 1953, who have a preference

status, are considered to be nonquota immigrants; accompanying spouses and minor children are held to be nonquota immigrants. Spouses and minor children accompanying fourth preference beneficiaries are included in that category. The number of alien children adopted by U.S. citizens in whose custody they remained for over 2 years is limited to two unless necessary to prevent the separation of brothers and sisters. The bill passed the House on July 6, 1959, and was enacted into law September 22, 1959—Public Law 86–363.

H.R. 6118 extends for 2 years section 6 of the act of September 11, 1957, the discretionary authority vested in the Attorney General to grant waivers of exclusion in the case of spouses, parents, and minor children, including minor adopted children of U.S. citizens or of aliens lawfully admitted for permanent residence, notwithstanding the fact that such close relatives are afflicted with tuberculosis.

The same bill also extended the law relating to the immigration of orphans. The bill authorizes the Attorney General to investigate the facts in each case to determine the validity of the adoption and the good moral character of the interested parties. The bill was enacted into law September 9, 1959—Public Law 86–253.

H.R. 7209 grants the veterans of the Korean hostilities the same naturalization rights and privileges as are extended under the Immigration and Nationality Act to veterans of World War I and World War II. Under the bill, an alien veteran who served honorably in an active duty status in the military, naval, or air forces of the United States during the period beginning June 25, 1950, and ending July 1, 1955, may be naturalized if first, at the time of enlistment or induction such alien was physically present in the United States or its outlying possessions, regardless of whether or not he was a permanent resident of the United States; or, second, at any time subsequent to enlistment or induction such alien was lawfully admitted to the United States for permanent residence. The bill passed the House on June 24, 1960.

H.R. 9385 provides for, first, the exclusion and deportation from the United States of aliens convicted of violation of the narcotic laws as they affect illicit possession of marijuana; second, the extension of the privilege of adjustment of nonimmigrant status to that of the status of an alien admitted for permanent residence to aliens who have been inspected at the time of their entry into the United States, excepting crewmen; third, nonquota status for spouses and children of beneficiaries of approved first preference visa petitions, if accompanying or following to join them in the United States; and fourth, temporary admission to the United States of fiances and fiancees of U.S. citizens for the purpose of marriage within 90 days, and for departure or deportation of such fiances or fiancees if the marriage is not contracted. The bill passed the House on January 18, 1960.

H.R. 10419 increases the allocation of nonquota immigrant visas for the Dutch expellees from Indonesia and for victims of the natural calamity in the Azores, and extends the period of time in which they may enter the United States. The same bill also extends for 1 year the period during which certain alien orphans adopted by a U.S. citizen and spouse may be issued nonquota immigrant visas. The bill passed the House on March 7, 1960.

House Joint Resolution 397 enables the United States to participate in the resettlement of refugee-escapees by admitting into the United States a proportionate number of refugees who are under the mandate of the United Nations High Commissioner for Refugees, such number being predicated on the total number of refugees admitted at stated periods of time by countries other than the United States. The admission procedure is based on the parole authority contained in section 212(d)(5) of the Immigration and Nationality Act and the special authority granted the Attorney General under this joint resolution, which will expire on July 1, 1962. The bill passed the House on April 4, 1960. The Senate amended the bill by including in it the provisions of H.R. 9385 and H.R. 10419 relating to the Dutch expellees from Indonesia, the victims of the natural calamity in the Azores, the trafficking in marijuana, the adjustment of status of nonimmigrants in the United States who desire to obtain permanent residence in the United States, and the nonquota admission of adopted orphans. The amended bill was enacted into law on July 14, 1960—Public Law 86–648.

Under the general jurisdiction of Subcommittee No. 1, the following bills were considered:

H.R. 1992 extends the application of chapter 37, title 18, United States Code, relating to espionage and censorship, to acts committed anywhere in the world by repealing section 791 of that title, which provides that the provisions of chapter 37 shall apply only within the admiralty and maritime jurisdiction of the United States, on the high seas, and within the United States. The bill passed the House on March 2, 1959.

H.R. 4154 permits the indictment and trial of an offender or joint offenders who commit offenses abroad against the United States, in the district where any of the offenders is arrested or first brought; and also prevents the statute of limitations from tolling in cases where an offender or any of the joint offenders remain beyond the bounds of the United States by permitting the filing of an information or indictment in the last known residence of any of the offenders, or in the event that the residence of any of the offenders in the United States is not known, by filing indictment or information in the District of Columbia. The bill passed the House on March 16, 1959.

H.R. 8461 amends the act of September 2, 1958, establishing a Commission and Advisory Committee on International Rules on Judicial Procedure by extending the life of the Commission for an additional 2 years, to December 31, 1961. The purpose of the Commission is to investigate and study existing practices of judicial assistance and cooperation between the United States and foreign countries with a view to achieving improvements. The bill passed the House on August 17, 1959, and was enacted into law September 16, 1959—Public Law 86–287.

S. 355 adds a new section to title 18 of the United States Code to prohibit the use by collecting agencies or private detective agencies of any emblem, insignia, or name, or the words "national," "Federal," or "United States," or the initials "U.S.," for the purpose of conveying, or in a manner reasonably calculated to convey, the false impression that such business is a department, agency, bureau, or instrumentality of the U.S. Government. The bill passed the House amended on August 17, 1959, and was enacted into law on September 21, 1959—Public Law 86–290.

S. 1947—House companion bill, H.R. 7126—confers on the Customs Court the authority to appoint various clerks and other employees and to authorize the appointment of a marshal and deputy marshal, which appointments are intended to be in accordance with presently prevailing laws relating to such appointments in other U.S. courts. The bill passed the House on August 31, 1959, and was enacted into law September 9, 1959—Public Law 86–243.

H.R. 10598 amends sections 42 and 43 of title 18, United States Code, by revising provisions relating to the importation or shipment of injurious mammals, birds, amphibians, fish and reptiles, and relating to the transportation or receipt of wild mammals or birds so as to reduce more effectively the hazards arising from the importation and traffic in such species. The bill passed the House on June 24, 1960, and was enacted into law on September 2, 1960—Public Law 86–702.

Action by Subcommittee No. 1 in the field of private legislation is reflected in the following table:

House bills:	
Private laws:	
Individual bills	95
House bills incorporated in 17 House joint resolutions which became private law	236
Pending in Senate:	
Individual bills	7
Bills incorporated in 1 House joint resolution	4
Adverse action by Senate:	
Individual bills	4
Bills deleted from House joint resolutions	18
Passed Senate amended:	
Individual bills	1
Bills in 1 House joint resolution	5
Tabled	590
Tabled, Senate bills passed in lieu	23
Deferred	33
Pending	1,244
Total	2,260
House joint resolutions:	
Private laws (joint resolutions, referred to above, incorporating individual bills)	17
Pending in Senate	1
Passed Senate amended	1
Not acted upon	1
Total	20

House concurrent resolutions: Confirming the findings of the Attorney General in cases submitted to the Congress under the provisions of sec. 6 of the Refugee Relief Act, as amended, and sec. 4 of the Displaced Persons Act of 1948, as amended (sec. 6: of the 86 cases considered, 55 were approved; 27 were not approved; 1 was withdrawn by the Attorney General; 1 was considered in a previous Congress; and 2 were held for further information) (sec. 4: of the 23 cases considered, 12 were approved and 11 were not approved)	2
Total	2
House resolutions (H. Res. 384 opposed the granting of permanent residence to 2 applicants for adjustment of their immigrant status under section 6 of the Refugee Relief Act of 1953, as amended)	1
Total	1
Senate bills:	
Private laws:	
Individual bills	148
Senate bills incorporated in House bills or House joint resolutions by Senate amendments which became private law	7
Tabled	92
Deferred	9
Pending	27
Passed House, amended	2
Total	285
Senate concurrent resolutions: Two of the Senate concurrent resolutions covered cases submitted to Congress under the provisions of section 19(c) of the Immigration Act of 1917, as amended. Of the 102 cases considered, 86 were approved, 8 were not approved, 1 was approved earlier, 1 was held for further study, and 6 were withdrawn by the Attorney General. One concurrent resolution covered cases submitted to Congress under the provisions of section 244(a)(5) of the Immigration and Nationality Act. Of the 67 cases considered, 55 were approved, 4 were withdrawn by the Attorney General, 1 was incorrectly referred and 7 were not approved. Three Senate concurrent resolutions rescinded suspension of deportation in three cases previously approved under sec. 19(c) of the Immigration Act of 1917, as amended. Final action was taken on the Senate concurrent resolutions referred to above. One concurrent resolution (S. Con. Res. 108) also covered cases referred to Congress under sec. 244(a)(5) of the Immigration and Nationality Act. Seventy cases were considered. The resolution passed the House, amended, and the Senate did not concur in the House amendments	7

SUBCOMMITTEE NO. 2, GENERAL JURISDICTION OVER JUDICIARY BILLS AS ASSIGNED—SPECIAL JURISDICTION OVER CLAIMS

During the 86th Congress, the subcommittee conducted hearings on 57 different days. These covered public as well as private claims measures.

Consideration was given to a total of 693 bills and resolutions.

The subcommittee considered a number of bills providing for the amendment of the tort claims provisions of title 28 of the United States Code. H.R. 6000, providing for an increase in the administrative settlement authority of section 2672 of that title, was introduced in accordance with the recommendations of an executive communication of the Post Office Department. The bill passed the House in the form recommended by the subcommittee with amendments increasing the authority of heads of agencies to settle tort claims against the Government by payments up to $2,000. The limit was increased to $2,500 in the Senate and the House agreed to that amendment. The bill became Public Law 86–238.

H.R. 7577 and several companion bills concerned the problem of the personal liability of Government drivers. The subcommittee held an extensive hearing on H.R. 3283, which was introduced in accordance with an executive communication from the General Services Administration, and related bills on the same subject. The subcommittee's recommendations as to amendments to H.R. 3283 were accepted by the full committee and were embodied in H.R. 7577 which was reported by the committee and passed the House. The bill was passed by the Senate in an amended form, but was the subject of a Presidential veto on June 13, 1960. The veto message indicated approval of the bill in the form it originally passed the House and, therefore, a new bill with those provisions, H.R. 12620, was introduced and reported by the committee. This bill passed the House on June 15, 1960, but no action was taken by the Senate prior to adjournment.

H.R. 4821, providing for amendments to the Texas City Disaster Relief Act, was the subject of a hearing before the subcommittee. The subcommittee recommended amendments to the bill to limit the proposed changes to certain categories of claims. The bill was reported with those amendments and passed the House and Senate in that form. The bill became Public Law 86–381.

A bill to implement the settlement of claims arising out of a crash of an Air Force airplane at Little Rock, Ark., on March 31, 1960, H.R. 11644, was reported by the committee. A similar Senate bill, S. 3338, was passed in lieu of the House bill and became Public Law 86–476.

The subcommittee considered two bills amending section 2734 of title 10 of the United States Code concerning claims arising in foreign countries as a result of the noncombat activities of the Armed Forces of the United States. H.R. 2741 provided that the Secretary of the Treasury would have the same authority to act in behalf of the Coast Guard in the settlement of such claims as only the Secretaries of the military departments previously possessed. The bill passed the House and Senate, and became Public Law 86–223. The other bill, H.R. 2740, would increase the period during which such claims might be filed from 1 to 2 years, and was introduced in accordance with the recommendations of an executive communication from the Department of Defense. The bill passed the House and Senate and became Public Law 86–411.

A bill, H.R. 470, which would permit the settlement of claims arising as the result of the use of a motor vehicle anywhere, or the use of property of the United States on a Government installation when the claims would not be cognizable under any other law, was favorably considered by the subcommittee and was reported to the House by the full committee. The bill passed the House, but no action was taken in the Senate prior to adjournment.

The subcommittee also considered a bill, H.R. 7529, which would confer jurisdiction on the Comptroller General to waive indebtedness based on erroneous payments by the Government to its employees, members of the military services, or persons formerly in such categories, when the department concerned recommends relief and collection would be against equity and good conscience. The bill passed the House, but no action was taken in the Senate prior to adjournment of the Congress.

H.R. 471, granting the Secretary of the Navy the same authority as that previously possessed by the Secretaries of the Army and Air Force concerning the remission of indebtedness of enlisted personnel upon discharge, passed the House and Senate and become Public Law 86–511.

The Committee on the Judiciary reported several bills validating certain payments to Armed Forces personnel, their dependents, or Government employees. H.R. 2975 validated certain quarters allowances to civilian employees who served in London, England, between January 1, 1949, and August 16, 1953. That bill passed the House and Senate and became Public Law 86–26. H.R. 4615 validated a group of about 80 transportation requests and payments of mileage or per diem, or both, to members of the naval service for travel performed in accordance with the terms of the bill. The bill became Public Law 86–25. H.R. 8106 provided statutory authority for all temporary storage of household effects of members of the Navy under an interpretation of the joint travel regulations of the uniformed forces which was subsequently challenged by the Comptroller General. The bill passed the House and Senate and became Public Law 86–414. H.R. 9921, which became Public Law 86–586, provided for the validation of sea pay received by certain Coast Guard enlisted men prior to June 30, 1956. The validation of payments of night shift differential pay to a group of employees at the Naval Weapons Plant was provided for in H.R. 10060. That bill passed the House but no action was taken in the Senate prior to adjournment. H.R. 4271 provided for the validation of compensation to Government personnel due to erroneous retroactive wage increases under the Federal Employees Salary Increase Act of 1955. It passed the House but no action was taken in the Senate prior to adjournment.

A number of bills granting relief to State or political subdivisions within States were referred to the subcommittee. Among the bills recommended favorably was H.R. 322, compensating

Monmouth County, N.J., for damage to a bridge, which became Public Law 86–128. H.R. 7605, for the relief of the State of Oklahoma, which was introduced in accordance with the recommendations of the Court of Claims in a congressional reference case, provided for the payment of $652,019.71 in settlement of the claims of that State based on the agreement embodied in a stipulation between the State and the Federal Government. That bill became Public Law 86–369.

The bill, S. 1330, providing for an additional payment of $4,000 to the city of Fort Myers, Fla., by an amendment to an act passed in 1958, was reported by the committee. That bill became Public Law 86–180. The bill, H.R. 2390, for Madeira Beach, Fla., settled the city's claim for the cost of erosion control, and became Public Law 86–353.

A bill compensating the Albertson Water District of Nassau County, N.Y., for reimbursable civil defense expenses, H.R. 8868, became Public Law 86–467. A jurisdictional bill authorizing an action against the Government based on the claim of Ford City, Pa., for alleged flooding of its sewer system, H.R. 5850, became Public Law 86–538.

The subcommittee also considered the bill, S. 3053, concerning the claim of the State of Connecticut for reimbursement of amounts it paid out as the result of damage due to National Guard aircraft operation. The bill was reported, passed the House, and became Public Law 86–692.

Two bills concerning counties passed the House but were pending in the Senate at the close of the Congress. These were H.R. 11136 concerning a claim of the Princess Anne County School Board of Virginia, and H.R. 5726 involving Hood County, Tex.

Two bills involving municipalities were referred to the Court of Claims for findings of fact and recommendations in accordance with the procedures provided for congressional reference cases in title 28 of the United States Code. House Resolution 309 referred the bill H.R. 4583, involving the County of Cuyahoga, Ohio, to the Court of Claims, and House Resolution 470 referred the bill H.R. 10919, concerning Kure Beach, N.C., to that court.

A bill, H.R. 10978, to extend to all agencies of the Government the same authority as that now possessed by the military departments concerning the settlement of claims of personnel of the military departments for loss of personal property incident to their service, passed the House but remained pending in the Senate at the adjournment of Congress.

The subcommittee considered a number of bills which did not relate to its special jurisdiction over claims. The bill, H.R. 2725, barring the use of aircraft or motor vehicles in the hunting or capture of wild horses or burros, and similarly barring the pollution of water holes used by such animals to kill them or effect their capture, was such a bill. It was reported by the committee, passed the House and Senate, and became Public Law 86–234. A bill, H.R. 4012, providing for the observance of the centennial of the establishment of the Department of Agriculture, and the establishment of land-grant colleges, was reported by the committee after being favorably recommended by the subcommittee. The bill passed the House, was reported in the Senate, but no further action was taken in that body prior to adjournment.

The subcommittee considered and recommended favorably the bill, S. 1321, authorizing the Attorney General to consent to a modification of the terms of a trust concerning the University of Vermont. The bill passed the House and became Public Law 86–712.

House Resolution 431, a resolution expressing the sense of the House that the President should call a White House Conference on narcotics problems, was the subject of a hearing before the subcommittee which recommended the resolution favorably. It was reported by the full committee, and subsequently passed the House on April 4, 1960.

H.R. 4390 provided for the relief of persons harmed as the result of the negotiation of forged or fraudulent Government checks issued at Parks Air Force Base, Calif. The bill passed the House but was not acted upon in the Senate.

The subcommittee conducted a 2-day hearing on bills dealing with the problem of claims arising from activities of the National Guard. The subcommittee recommended that the bill, H.R. 5435, be amended to include the language recommended by the Department of the Army providing for administrative settlement in a manner similar to the Military Claims Act provisions of title 10, United States Code, presently applicable to claims arising as the result of the noncombat activity of active duty personnel of the Armed Forces. The bill was reported and a similar Senate bill, S. 1764, was substituted on the floor, which became Public Law 86–74.

The subcommittee held hearings on bills concerning standards to be observed in the establishment of congressional districts, and also on bills to provide representation of indigent defendants in criminal proceedings in the Federal courts.

The subcommittee also considered the bill H.R. 8107, which was the subject of a 2-day hearing. This bill, which would have imposed criminal penalties for the use of U.S. savings stamps for trade promotion, was adversely acted upon by the subcommittee.

The following tabulation reflects the workload of the subcommittee.

Referred to subcommittee:	
Private, House bills	809
Private, House joint resolutions	2
Private, House resolutions	16

Sent 10 private claims bills of the House to the Court of Claims by House resolution, and 2 public claims bills to that court by House resolutions.

SUBCOMMITTEE NO. 3, GENERAL JURISDICTION OVER JUDICIARY BILLS AS ASSIGNED—SPECIAL JURISDICTION OVER PATENTS, TRADEMARKS, COPYRIGHTS, AND REVISION OF THE LAWS

Subcommittee No. 3 handles such general legislation as is referred to it as well as patents, trademarks, and copyrights, and revision of laws.

In all, 199 bills were referred during the 86th Congress. A total of 23 days of hearings were scheduled on 76 bills. Of the bills referred 26 were reported favorably to the full committee, 24 passed the House and 12 were approved by the President and became law.

The subcommittee, in addition to processing bills, has, during the 86th Congress, given special attention to certain areas of the laws over which it has legislative jurisdiction. A member of the subcommittee attended the Revision of The Hague Arrangement, which deals with international protection of designs. As a result a draft convention has been adopted by a Committee of Experts, which is now under study by the Department of State. See Report on the Revision of The Hague Arrangement on Design, committee print, January 1960; also Public Law 86–614.

The committee also was represented at the Sentencing Institute Conference at Boulder, Colo., which was called by the Chief Justice and the Attorney General of the United States. The purpose of this meeting was to develop guides for our Federal judges with the hope that they will bring about a lessening in the present disparity of sentences. This institute or conference was held pursuant to the Federal Sentencing Act, which the subcommittee reported favorably in 1958—Public Law 85–752.

Another undertaking concerned the implementation of the Paris Convention on the International Protection of Patents and Trademarks. See report on International Patent and Trademark Conference, Lisbon, Portugal, committee print, March 30, 1959. As a result of the meetings the subcommittee has pending H.R. 11070 to carry out the provisions of the convention when it becomes operative.

In addition, a member of the subcommittee visited Federal prisons in Atlanta, Ga.; Terre Haute, Ind.; Chillicothe, Ohio; Ashland, Ky., as well as the Cook County jail in Chicago, Ill. These trips were for both inspection and indoctrination purposes, to acquaint the subcommittee with the functions, activities, and needs of our Federal prison system. See report of Representative LIBONATI: "Inspection of Federal Prisons," CONGRESSIONAL RECORD, p. 18892, September 2, 1960.

The staff, aside from working on legislation, serviced the daily requests of Members of Congress, Government agencies, and the public. The law revision duties of the subcommittee, encompassing as they do the entire body of Federal laws, bring calls and inquiries made initially to other committees of Congress to the subcommittee's staff for answering.

The following statement of the subcommittee describes in part its functions and highlights the major legislation processed by it.

GENERAL LEGISLATION

The subcommittee acted on a number of major bills in the first session of the Congress. Without discussing them, since they are covered in the committee's report of September 30, 1959, it may nevertheless be well, for convenience and purposes of reference, to list them:

H.R. 3, Federal preemption; H.R. 15, bombing of churches, schools, and synagogues, and so forth; H.R. 2739, patent and trademark fees; H.R. 4957, Mallory bill relating to unnecessary delay between arrest and arraignment; H.R. 2369, Yates legislation defining the term "organize" in our internal security laws; H.R. 3216, habeas corpus; H.R. 2978, peremptory challenges; H.R. 7559, interlocutory relief; H.R. 6817, foreign agents registration act; S. 1647, penitentiary imprisonment; S. 1645, prisoners' good time allowances; H.R. 5711, Wabash Valley interstate compact; House Joint Resolution 465, Missouri-Illinois interstate compact; H.R. 7474, Virginia-West Virginia interstate compact.

The subcommittee, in this session of the Congress, acted favorably upon the Washington Metropolitan Area Transit Commission compact—House Joint Resolution 402—which is an interstate arrangement among Maryland, Virginia, and the District of Columbia for the regulation of mass public transportation in the greater Washington metropolitan area. Vehicular traffic in the Nation's Capital has become a major problem of ever-growing proportions. The population growth has been accompanied by a physical expansion of the urban and suburban areas. Because of three sovereign entities involved with their individual jurisdictions, it became necessary for the development of a single regulatory body to coordinate traffic conditions on a regional basis. This legislation became Public Law 86–794.

Another bill acted upon favorably by the subcommittee is S. 1806 which revises and brings up to date the provisions of the Transportation Explosives Act. This legislation, among other things, brings the transportation of radioactive materials and etiologic agents—viruses, vaccines, and so forth—under the jurisdiction of the Interstate Commerce Commission. It also extends the penalties for violations of the Explosives Act, now applicable only to common carriers, to private and contract carriers—Public Law 86–710.

H.R. 9523, which the subcommittee considered, provides a simplified procedure for the payment of judgments of State and foreign courts and also authorizes the payment of compromise settlements effected by the Attorney General on behalf of the United States. Increased overseas activities of this country has resulted in a substantial increase in foreign litigation. This and other considerations emphasize the desirability of establishing a simplified procedure for the payment of routine judgments. This legislation passed the House.

Public Law 86–546 incorporates the judicial review provisions of the Federal Aviation Law, Public Law 85–726, and the Food Additives Law, Public Law 85–929, into the Uniform Judicial Review Act of 1958. The 1958 act set up uniform procedures for court review of Government agency orders. This action is in line with the subcommittee's program for developing, where indicated, standard judicial and quasijudicial procedures.

The subcommittee held hearings on H.R. 11845 and a number of similar bills which would prohibit courts from appointing monitors to manage or administer the internal affairs of labor unions.

S. 2932—H.R. 12208—which became Public Law 86–691 provides that credit is to be given prisoners toward service of sentence for time spent in custody for want of bail, prior to imposition of sentence. Oftentimes the sentencing court lacks authority to differentiate between the offender who must stay in jail for want of bail and the one who is free, pending trial and sentence, simply because the latter has been able to raise bail money. The bill seeks to eliminate this disparity.

The subcommittee also has under consideration H.R. 8138—S. 3560—the purpose of which is to provide for protection against the willful or malicious destruction of any communication facility used or intended for military or civil defense functions. Study will continue on this legislation during the congressional recess, since its provisions vitally concern the internal security of the United States.

PATENTS, TRADEMARKS, AND COPYRIGHTS

There is pending in the subcommittee H.R. 5448 and a number of similar bills relating to the rights of the United States in inventions made in the course of performance of a Government contract. This question has engendered much interest and several congressional committees have had it under consideration. The subcommittee will further study this legislation during the congressional recess to determine, among other things, whether patent provisions of Government contracts should be dealt with on an overall uniform basis or seriatim by individual Government agencies.

In the copyright area the subcommittee processed H.R. 4059, which became Public Law 86–726. This bill waives the sovereign immunity of the United States where the Government infringes on the copyright owned by another. It has long been an established principle that the Federal Government should not appropriate private property without making just compensation to the owner thereof. This principle is firmly established in our patent laws—title 28, United States Code, section 1498—as well as other fields of the law, such as admiralty, contracts, and torts.

Extensive hearings were held on H.R. 5921, a bill to remove the present exemption in the copyright law relating to coin-operated machines, and thus permit songwriters to charge the owners of the jukeboxes royalty fees for the public playing of songs.

In the trademark area, the subcommittee has under consideration H.R. 7234, which would change the present law in several respects, the principal feature being the removal of the right to restrict the importation into the United States of any foreign merchandise where such merchandise bears a mark registered in the U.S. Patent Office.

REVISION OF THE LAWS

CLASSIFICATION OF LAWS TO UNITED STATES CODE AND THE DISTRICT OF COLUMBIA CODE

The primary aspect of the subcommittee's functions regarding the revision of the laws is the classification of the public laws to the United States Code and the District of Columbia Code. During this Congress there have been enacted 800 public laws, comprising about 1,700 pages in the Statutes at Large that have

been reviewed, or will be reviewed, during the recess to determine their appropriate classification to the respective code.

The laws of a general and permanent nature enacted at the 1st session of the 86th Congress were classified and incorporated in the first supplement of the United States Code, 1958 edition, which consisted of more than 800 pages and was the largest first supplement in the history of the United States Code. Similarly, the laws relating to the District of Columbia were classified and incorporated in cumulative supplement VIII of the District of Columbia Code, also consisting of more than 800 pages. Inasmuch as the District of Columbia Code is an annotated code, the reports of the decisions of the Supreme Court of the United States, the U.S. courts of appeals, and district courts since July 1, 1958, through July 31, 1960, have been reviewed for the purpose of incorporating notes to decisions affecting the sections of the code. The laws enacted during the 2d session of the 86th Congress and the decisions since July 31, 1959, will be incorporated in a new edition of the District of Columbia Code, since the supplement to the 1951 edition is becoming unwieldy and expensive to reprint each year. The work of preparing copy for the new edition has been started and will be continued during the recess. This entails consolidating the laws contained in supplement VIII with the laws contained in the 1951 edition with the voluminous editorial and manuscript work involved. Editorial notes will be enlarged and other improvements made. The new edition will comprise two or three volumes and will contain all the general and permanent laws relating to the District of Columbia in force at the beginning of the 87th Congress.

ENACTMENT OF TITLES INTO LAW

In continuing its program of making the codes more useful the subcommittee has devoted its attention to the preparation of bills to enact particular titles into law. Early in the first session the committee reported favorably a bill (H.R. 2339) to enact into law title 39 of the United States Code, entitled "The Postal Service." The House passed this bill in March 1959, and it was amended by the Senate in July 1960. The House concurred in the Senate amendments and the bill became Public Law 86–682, approved September 2, 1960. This complete title will be set out in Supplement II of the United States Code and will constitute the 16th title of the United States Code, enacted into law in the furtherance of the committee's program. Inasmuch as Public Law 86–682 contains the laws only up to March 1959, it will be necessary to introduce a cleanup bill incorporating the postal laws enacted since that time. The bill is in the process of preparation and will be introduced early in the 87th Congress.

For several years the law revision staff of the subcommittee has been collaborating closely with the General Counsel's office of the Civil Service Commission in the preparation of a bill to enact into law title 5, relating to the executive departments and employees generally. A bill (H.R. 8748) was introduced in the first session and the subcommittee has received many suggestions with respect to the bill in response to its request addressed to all the executive departments and regulatory agencies. As a result a new bill is being prepared and it is hoped that it will be ready for introduction early in the 87th Congress.

Similarly, the staff has been cooperating closely with the office of the General Counsel of the Department of Defense in the preparation of a bill to enact into law title 37 of the United States Code, "Pay and Allowances of the Uniform Services." It is expected that this draft will be completed during the recess and that a bill will be ready for introduction early in the 87th Congress.

The subcommittee has extended its program of improving the codes to the District of Columbia Code and a bill (H.R. 8857) has been introduced to enact into law part II of the District of Columbia Code, "Judiciary and Judicial Procedure," comprising titles 12 to 17. The staff has had numerous conferences with representatives of the courts and the bar association and many suggestions received will be incorporated in a new bill to be introduced in the 87th Congress.

The Governor of the Panama Canal Zone appointed the committee's law revision counsel as an adviser on the preparation of a new Canal Zone Code. The present code was enacted in 1934 and has not been kept up to date by a subsequent amendment. The committee's law revision counsel has attended several meetings of the advisory committee and it is hoped that a bill will be ready for introduction in the next Congress.

STAFF REPORTS

During the Congress the subcommittee published several reports concerning matters within the jurisdiction of the committee.

Because of the growing concern over the effect of interim or recess appointments to Federal judges, the staff prepared a report containing a history of recess appointments and an analysis of the constitutional as well as practical problems involved therein. Recess appointment of Federal judges: Committee print, January 1959.

The staff also brought up to date the listing of State applications asking Congress to call a Federal constitutional convention. In recent years Congress has been in receipt of a number of petitions from various States requesting the calling of a convention to amend the Constitution limiting the power of the Federal Government over the taxation of incomes. Since the Constitution's adoption 170 years ago, there have been over 200 State applications calling for conventions on a wide variety of subjects. While the Constitution has been amended there has never been a constitutional convention, and unfortunately there is no statutory authority to guide the Congress in classifying applications or in setting up a procedure for calling a convention. The staff report discusses in summary form the many problems presented by a constitutional convention method of amendment. "State Applications Asking Congress To Call a Federal Constitutional Convention," committee print, January 1959.

Other reports which were prepared by members of the subcommittee have already been referred to at the beginning of the instant report of this subcommittee's activities:

Bills referred	201
Bills on which hearings were held	76
Bills reported favorably to full committee	26
Bills reported adversely to full committee	95
Bills pending in subcommittee	80
Bills reported to House	26
Bills passed House	24
Bills pending in House	2
Bills pending in Senate	12
Bills which became law	12

SUBCOMMITTEE NO. 4, GENERAL JURISDICTION OVER JUDICIARY BILLS AS ASSIGNED—SPECIAL JURISDICTION OVER BANKRUPTCY AND REORGANIZATION

In an effort to streamline the operation of the bankruptcy courts to meet the increasing demand upon their services, the subcommittee considered a large number of bills. Many of these have now become public law, including H.R. 4340, which simplifies the filling of vacancies among referees in bankruptcy; H.R. 4345, which eliminates the requirements that referees transmit certain papers to the clerk of the court prior to bankruptcy; H.R. 4692, providing for automatic adjudication and reference in bankruptcy cases; H.R. 4693, which consolidates the referee's expense and salary funds into a single fund; H.R. 7726, which eliminates the present requirement for the transmission of numerous papers each year to the Secretary of the Treasury and the General Accounting Office.

In addition to these matters of administration, the subcommittee acted on a number of bills directed at improving and simplifying bankruptcy procedures for the parties involved. Of these, the following have been enacted into law: H.R. 6816, which eliminates the requirement that proofs of claim must be submitted under oath; S. 1944, identical to H.R. 8858, which the subcommittee considered in the first session of this Congress, eliminates the need for the verification of pleadings under oath, and thus makes a procedure in bankruptcy consistent with the Federal rules of civil procedure; H.R. 6556, which clarifies the filing time for review of orders of referees.

In addition, the subcommittee acted favorably upon H.R. 7233. This bill passed the House but not the Senate. Its purpose is to require claims in chapter 13 proceedings to be filed within 6 months after the first meeting of creditors.

In order to eliminate a number of abuses which have arisen in bankruptcy proceedings, the subcommittee considered a number of measures and acted favorably on several of these. The following have become public law:

H.R. 5747: This act strengthens the provisions of the criminal code in respect to the concealment of assets by individuals in contemplation of bankruptcy.

S. 2052: By increasing the closing fee of trustees in nominal asset cases, this act is directed at achieving a closer scrutiny of the assets of bankrupts in these cases in order to assure a fair distribution to creditors.

H.R. 4346: This act eliminates false financial statements as a bar to the discharge of an individual, nonbusiness bankrupt, and thus removes the possibility of the use of such statements to intimidate the debtor and to secure favored treatment by creditors who have not been harmed thereby.

Two other bills directed at eliminating certain abuses in bankruptcy proceedings passed the House but did not become law. These are H.R. 8708, which empowers referees to scrutinize the fees paid to attorneys in order to insure that they are fair and reasonable; and H.R. 4150, which authorizes the bankruptcy court to determine the effect of a discharge, upon the application of the creditor and the bankrupt.

Two bills of major substantive consequence to the Bankruptcy Act were also considered by the subcommittee and both have passed the House. They are H.R. 2236 and H.R. 7242. H.R. 2236 places a 3-year limitation on the priority and the nondischargeability of taxes. This bill failed to pass the Senate. H.R. 7242 is a highly complex, multipurpose piece of legislation. In general, it would clarify the status of liens in bankruptcy. It would also clarify the powers which the trustee has in assembling the assets of the estate. Although this bill passed both the House and Senate, it was vetoed by the President after the adjournment of Congress.

In order to encourage wider use of the wage-earner-plan type of proceeding under chapter 13, the subcommittee approved H.R. 2237, which eliminates the monetary limitation on eligibility for filing under chapter 13. This has become public law.

In addition to its activities in the field of bankruptcy, the subcommittee considered a number of other varied bills. In the field of Federal courts and Federal jurisdiction, the subcommittee acted upon the following legislation:

H.R. 2979: This bill authorizes district court judges to appoint law clerks without first obtaining the approval of the chief judge of the circuit. It has become public law.

H.R. 5396: This bill authorizes the transfer between the district court and the Court of Claims of actions arising out of certain maritime transactions. The bill was amended in the Senate to clarify the law in respect to the standards for determining where such cases are to be brought. The House concurred in the Senate amendments and this bill has also become public law.

H.R. 12622: This bill would accomplish a number of significant and necessary changes in the field of Federal jurisdiction. Its purpose is to make it possible to bring actions against Government officials and agencies in U.S. district courts outside the District of Columbia. Because of certain existing limitations on jurisdiction and venue, it is now necessary for many such actions to be brought only in the U.S. district court for the District of Columbia. This bill passed the House in the closing days of the Congress and was not acted upon in the Senate.

Among the miscellaneous bills referred to the subcommittee and acted upon, were the following two bills, both of which have become public law:

H.R. 4060, which relieves the Comptroller General of the responsibility for fixing the date on which the statute of limitations commences to run for certain purposes under the Miller Act.

H.R. 5789, which provides a Federal charter for an Agricultural Hall of Fame.

A statistical summary of the work of the subcommittee during the 86th Congress follows:

Number of bills referred to Subcommittee No. 4	131
Number of bills on which hearings were held	57
Number of bills reported to full committee	74
Number of bills on which reports were filed	34
Number of public bills passed House	34
Number of public bills pending in Senate	6
Number of Senate bills disposed of	8
Number of bills approved by President	24
Number of bills vetoed by President	1

SUBCOMMITTEE NO. 5, GENERAL JURISDICTION OVER JUDICIARY BILLS AS ASSIGNED—SPECIAL JURISDICTION OVER ANTITRUST MATTERS

This subcommittee exercises jurisdiction over a variety of subjects, including such topics as civil rights, the Federal judicial system, criminal statutes, and particular jurisdiction over antitrust matters.

During the 86th Congress, this subcommittee had referred to it 252 legislative proposals.

Over 30 days were spent in conducting hearings on various bills referred to this subcommittee. This subcommittee devoted considerable time to the consideration of a number of proposals relating to various civil rights measures. During the course of the hearings over a thousand pages of testimony were taken from various witnesses, including Representatives and Senators in the Congress, members of the Cabinet, State, and local officials, as well as private individuals and association representatives. At the conclusion of the hearings the subcommittee recommended to the full committee a civil rights proposal which was reported to the House and finally enacted into law during the second session of the Congress. This act is now known as the Civil Rights Act of 1960.

Among the bills enacted into law was a proposal which raised the travel and subsistence allowance of Federal judges from $15 to $25 per day maximum. Another public law established a new official station for retired judges, and a third waived existing provisions of the judicial code so as to permit new court facilities to be constructed at Durant, Okla. Another new law provided for a U.S. Park Commissioner for Grand Canyon National Park. A new public law amended the existing provisions of the Federal Judicial Code so as to permit noncitizens to exercise the privilege of filing actions in forma pauperis.

Another public law granted the consent of the Congress to an interstate compact between New York and New Jersey relating to transportation. Another new public law broadened the authority of the Attorney General to acquire land adjacent to Federal penal institutions.

During the 2d session of the 86th Congress this subcommittee considered 30-odd bills which provided, among other things, for the creation of additional circuit and district judges, the creation of new districts and new divisions in our judicial system, authorizing new additional places for holding terms of Federal courts, and permitting the expenditure of Federal funds for new court facilities. After extensive hearings and executive sessions on the part of the subcommittee, a bill, H.R. 12552, was reported to the House. Although a rule was granted for consideration of this proposal, no action was taken by the House prior to the adjournment of this Congress. This bill would have provided 3 new circuit judges and 32 district judges, 4 of whom would be temporary judges.

The subcommittee also recommended a legislative proposal which would have broadened the scope of the Fugitive Felon Act by repealing the specific crimes contained in that statute and inserting the broad language which would include flight involving a crime punishable for a term exceeding 1 year. This bill passed the House and was pending before the Senate Judiciary Committee on the date of adjournment.

This subcommittee processed and recommended favorably the enactment of the constitutional amendment to provide the citizens of the District of Columbia with the right to cast a vote for President and Vice President of the United States. This proposal would provide the District of Columbia with a number of electors in the electoral college equal to that of the least populous State. This legislation passed both the House and the Senate and is now before the State legislatures for ratification. To date two States, Hawaii and Michigan, have already ratified this constitutional amendment.

ACTIVITIES OF THE ANTITRUST SUBCOMMITTEE IN THE 86TH CONGRESS

Legislative

Forty-one bills were assigned to the Antitrust Subcommittee during the 86th Congress. The subcommittee considered 25 of these bills during 19 days of hearings. One bill, S. 726, was reported to the House and, on approval by the President on July 23, 1959, became Public Law 86–107.

On May 27 and 28, 1959, the subcommittee held hearings on H.R. 432, H.R. 2977, H.R. 6049, and S. 726, bills designed to facilitate enforcement of the prohibitions of the Clayton Act against price discrimination, tie-in arrangements, mergers, and interlocking directorates. These bills changed Clayton Act enforcement procedures to make final the cease-and-desist orders issued by the commissions and boards with jurisdiction under section 11 in the same

manner as cease-and-desist orders become final when issued by the Federal Trade Commission Act. Automatic finality of its Clayton Act orders had been requested by the Federal Trade Commission for more than 20 years.

Previous enforcement procedures of the Clayton Act permitted a defendant to engage in the same illegal practices three times before effective legal penalties could be applied as a result of action by the Commission or Board vested with jurisdiction. These procedures were changed to permit the Commission's or Board's cease-and-desist order to become final and conclusive 60 days after its issuance, or upon completion of judicial review.

Once final, the cease-and-desist order is enforced through direct referral to the Attorney General of the facts of the violation. Punishment is by fine recovered in a civil action brought by the United States. S. 726 became Public Law 86-107 on July 23, 1959.

On June 25 and 26, 1959, the Antitrust Subcommittee conducted hearings on a series of identical bills, which would amend section 2(a) of the Clayton Act so as to provide for mandatory functional discounts—H.R. 848, H.R. 927, H.R. 2788, H.R. 2868, and H.R. 4530. These bills would make it necessary for a manufacturing seller to grant in good faith a reasonably adequate price differential to wholesalers. The bills would require such differential to be reasonably calculated to allow the wholesalers' customers to compete with like firms which purchase directly from the seller. During the hearings, the subcommittee received testimony from the sponsors of the bills, representatives of the Federal Trade Commission and the Department of Justice, and from spokesmen from the National Association of Tobacco Distributors, National Frozen Food Distributors Association, National Candy Wholesalers Association, National Oil Jobbers Council, and the American Bar Association.

On August 20 and 21, 1959, the subcommittee conducted hearings on two bills, H.R. 7191 and S. 753, which would authorize cooperative associations of milk producers and marketing agencies owned by such associations to bargain in concert for the sale of milk and milk products with groups of dealers, processors, or other purchasers. These bills would expand the exemption from the antitrust laws that has been granted in the Capper-Volstead Act to agricultural cooperative associations, to additional marketing arrangements by milk producer cooperatives. S. 753 had been passed by the Senate on April 30, 1959.

During the hearings, the subcommittee received testimony from the sponsors of the bills, representatives of the Department of Justice and the Federal Trade Commission, and spokesmen of the National Milk Producers Federation, as well as from representatives from a number of milk cooperative associations and independent dairies.

In September 1959, the Antitrust Subcommittee held 3 days of hearings on a series of bills designed to exempt from the antitrust laws a number of activities in the organized professional team sports of baseball, basketball, football, and hockey—H.R. 2266, H.R. 2370, H.R. 2371, H.R. 2372, H.R. 2373, H.R. 2374, and H.R. 8658.

During the hearings the subcommittee devoted particular attention to the problems involved in extending the antitrust exemptions for these sports to arrangements that affect other industries, particularly the broadcasting and telecasting industry. The subcommittee received testimony from several Members of the Congress, from the Commissioner of Organized Baseball, and from the representatives of television stations in Topeka, Kans.; Buffalo, N.Y.; Terre Haute, Ind.; and New Orleans, La.

On February 17, 18, 19, 24, 25, and 26, March 2 and 3, May 25, and June 1, 1960, the subcommittee held hearings on a series of bills designed to strengthen and implement the criminal laws relating to conflicts of interest and to promote ethics in Federal Government employment—H.R. 1900, H.R. 2156, H.R. 2157, H.R. 7556, H.R. 10575, H.R. 11571, and H.R. 11657. At these hearings the subcommittee received testimony from 6 Members of Congress and from representatives of 13 Federal agencies and 4 bar associations.

Investigative

On May 26, 1959, the Antitrust Subcommittee issued its report on the investigation it had conducted during the 85th Congress on the consent decree program of the Department of Justice. This 379-page report was based on a record of hearings which contained more than 4,500 pages of testimony from 34 witnesses. In its report, the subcommittee concentrated its attention on first, Department of Justice policy and procedures relative to consent settlements in antitrust cases; second, negotiation and enforcement of the 1956 consent decree in the A.T. & T. case; and third, the negotiation and enforcement of the 1941 consent decree in the oil pipeline—Atlantic Refining—case.

In the administration of the antitrust program of the Department of Justice, the subcommittee ascertained that approximately 75 percent of all proceedings that have been instituted by the Attorney General to enforce the antitrust laws have been terminated by negotiation rather than by litigation. Since World War II there has been a general trend toward more consent judgments, and in recent years the practice of negotiating settlements has accelerated markedly.

As a result of its study, the subcommittee concluded that, as it now operates, the consent decree program of the Department of Justice results in the judicial function being superseded by an administrative procedure in which there are no rules to safeguard the public interest and the interests of persons who are not involved as parties in the Government's case.

The Antitrust Subcommittee recommended that the Department of Justice revise its consent decree procedures: First, to provide notice to the public of the terms of proposed consent decrees; second, to establish a waiting period between agreement by the Government and the defendant and entry of the decree; third, to afford private parties affected by the terms of the decree an opportunity to intervene in the Government's case in order to present to the court objections to the terms of the consent decree; and, fourth, to require that when a consent decree is submitted to the court for approval, an accompanying written statement shall be filed setting forth the facts involved in the litigation, the defendants' position, the meaning of the provisions used in the decree and the reasons that are the basis for the Department's compromise.

To supplement its survey of the Antitrust Division's general consent decree policies and procedures, the subcommittee made two case studies. For these studies the subcommittee selected the oil pipeline consent decree, United States against the Atlantic Refining Co., et al., civil case No. 104060, District of Columbia, December 23, 1941, and the A.T. & T. consent decree, United States against Western Electric Co. and American Telephone & Telegraph Co., District Court of New Jersey, January 24, 1956.

A.T. & T. consent decree

The subcommittee selected the A.T. & T. consent decree for particular attention in order to ascertain the reasons for the wide disparity between relief demanded in the Government's complaint and the relief ultimately obtained in the consent decree. In its complaint the Government charged that Western Electric had monopolized the manufacture, distribution, and sale of telephones, telephone apparatus, equipment, material, and supplies. This monopolization allegedly had resulted from the ownership and control of A.T. & T.'s subsidiary, Western Electric Co., which manufactured and sold more than 90 percent of all telephones and telephone equipment sold in the United States, and directly controlled the production of a substantial part of the remaining 10 percent.

In order to restore competition in the manufacture and sale of telephone equipment, the Attorney General sought in his complaint to separate Western from A.T. & T. and to dissolve Western into three competing manufacturing concerns. Additional relief would have required A.T. & T. and its operating companies to buy telephone equipment only under competitive bidding, and Western Electric to dispose of its 50-percent stock ownership in Bell Telephone Laboratories.

In the consent decree, however, Western's manufacturing activities are permitted to remain part of the Bell System on the ground that Western is indirectly subject to supervision by public regulatory bodies. Although the consent decree provides patent relief and requires that licenses be granted to any applicant for all existing and future patents of the Bell System, no provision requires the Bell System to open its markets to any manufacturer that may receive such a license. The consent decree, in brief, assures to Western Electric the unfettered control of the markets that comprise the Bell System.

In its report, the subcommittee ascertained the value of the consent decree and the reasons for its ineffectiveness.

The report concluded that the A.T. & T. decree "stands revealed as devoid of merit ineffective as an instrument to accomplish the purpose of the antitrust laws," and that the consent decree is a blot on the enforcement history of the antitrust laws.

The subcommittee recommended that the Department of Justice reevaluate all the facts and circumstances leading to the A.T. & T. consent decree and promptly to move the court for relief from the decree's inadequacies.

In connection with its investigation of the Federal Communications Commission's relationship to negotiations for the A.T. & T. consent decree, the subcommittee ascertained that the Commission had failed, despite repeated recommendations by its staff over a number of years, to investigate telephone rates or even to conduct a general telephone rate inquiry. The subcommittee noted, also, that as a result of a $65 million long-distance telephone rate that had been authorized by the FCC in 1953 without a hearing, long-distance telephone users may have been overcharged $159 million in the years 1955, 1956, and 1957.

To remedy this situation, the subcommittee recommended that the FCC institute "promptly a comprehensive formal rate investigation." Shortly after the report was issued, the FCC acted upon the subcommittee's recommendation. As a result, on July 24, 1959, the FCC ordered A.T. & T. to cut long-distance telephone rates by $50 million a year.

Oil pipeline consent decree

The oil pipeline consent decree was a settlement of an industrywide antitrust program started in 1940 to eliminate in one proceeding all of the restraints that affected commerce in the oil industry. Inasmuch as the oil pipeline consent decree had been in effect since 1941, it was selected by the subcommittee for individual study primarily because it reflected a prolonged enforcement record and delineated the problems that arise when a consent decree becomes the standard for an entire industry.

Although virtually all of the negotiations for the settlement were devoted to the discussions of the antitrust issues that are involved in oil industry operations unrelated to the operation of oil pipelines, the subcommittee ascertained that pressures from the industry caused a consent decree that contained no antitrust relief to be submitted to the Court. Not only were all antitrust issues thus compromised; the Government in the consent decree also abandoned claims in excess of $1.5 billion for violations of the Elkins Act.

The subcommittee ascertained that the Department of Justice had failed to enforce compliance with the decree's requirements, even though according to the Department, its terms had been violated continuously from its entry in 1941. This failure had made the oil pipeline consent decree ineffective even within that limited area of industry operations to which it applied.

As a consequence, in 1958, the subcommittee concluded, the oil companies that owned oil pipelines enjoyed virtually the same discriminatory advantages over the other elements of the petroleum industry that the shipper-owners had in 1940 when the Attorney General first launched his oil industry antitrust program. The oil pipelines continue, for the most part, to be operated as private carriers for the benefit of their shipper-owners and as plant facilities to the refineries to which they connect.

It is beyond dispute that the record of the Department of Justice, in its efforts to enforce the oil pipeline consent decree, is bad. From the initial reports to the Attorney General in 1943, the Department of Justice believed that some of the defendants continuously had violated the terms of the judgment. Despite repeated recommendations throughout the history of the oil pipeline consent decree from the staff of the Antitrust Division for judicial enforcement of its terms, no action in court was taken by the Department of Justice until after the Antitrust Subcommittee announced its intention to hold public hearings on the enforcement of this particular decree.

As a result of the subcommittee's investigation, the Department of Justice brought four cases to enforce the provisions of the oil pipeline consent decree. In three of these cases the defendants agreed to the Department's interpretation and stipulated that they would follow the Attorney General's rulings in the future. On the remaining issue, the Supreme Court, on June 8, 1959, ruled against the Department of Justice. This particular issue, the shipper-owner share question, was one of the most important that had arisen under the consent decree. The adverse decision of the Supreme Court underscores the need for additional action by the Justice Department if the goal of common carrier pipeline transportation in the oil industry is to be realized.

In connection with its investigation of the oil pipeline consent decree, the subcommittee studied the effects of Interstate Commerce Commission regulation on enforcement of that decree. The subcommittee concluded that while the ICC nominally is responsible for regulation of the oil pipeline industry, in practice the industry itself decides what the ICC will do, and is able to determine the extent and character of its own Federal regulation. As a result, the interests of the general public have been subordinated to the private interests of the oil pipeline companies.

On the basis of the subcommittee recommendations, the ICC terminated two longstanding practices which have contributed materially to the orientation of its activities to the oil industry viewpoint. The ICC no longer permits personnel of the pipeline companies to work in the Commission offices in order to assist in the preparation of ICC records and recommendations. In addition, the ICC has severed its relationship, which had existed since 1933, with the engineers-accountants valuation subcommittee of the American Petroleum Institute. In its report, the subcommittee commended the ICC for these actions.

Shipping investigation

In October and November 1959 and May 1960, the Antitrust Subcommittee conducted 16 days of hearings on antitrust problems in the operation of ocean shipping conferences. This inquiry was started on August 1, 1958. The main focus of the subcommittee in the ocean shipping inquiry has been upon the inter-relationship between the principles of free competition underlying the antitrust laws and the antitrust exemption of the Shipping Act of 1916. For more than 14 months staff counsel examined thousands of documents in files of 53 ocean freight conferences and 9 American and 4 foreign steamship lines in an effort to study as many of the restrictive agreements and practices employed by the industry as time would permit. At the hearings, the subcommittee received testimony from officials of the Federal Maritime Board and from 23 representatives of 13 private corporations and associations.

The subcommittee's hearings disclosed that the shipping lines frequently have conducted their operations without regard for the requirements of Federal law. There have been numerous examples of predatory actions against other shipping lines and numerous instances in which shippers have been victimized.

The efforts of the Federal Maritime Board to secure compliance with the requirements of Federal law were revealed by the hearings to have been largely ineffectual over a period that commenced long before World War II. In addition to what members of the subcommittee characterized as incredible regulatory neglect by the Federal Maritime Commission, the shipping industry was shown to have disregarded the requirements of the Shipping Act to a degree that may well have injured our foreign commerce, caused American consumers to pay more for imported goods and been detrimental to American manufacturers and exporters.

When the 1959 portion of the hearings was recessed, the subcommittee referred 127 possible instances of violations of the Shipping Act to the Federal Maritime Board and 26 possible other violations of law to the Department of Justice. These referrals met with prompt response.

The Attorney General, on the basis of the subcommittee's hearings record to that time, embarked upon grand jury investigations of steamship industry practices in San Francisco, and in Washington. Numerous subpenas duces tecum were issued, directing more than 150 firms to produce documents for use of the grand jury. Preliminary litigation, seeking to quash the subpenas, initiated by approximately 60 of those served, was terminated favorably to the Government in June 1960 and the investigations are under way.

The Federal Maritime Board, in response to the subcommittee's referral of possible violations, opened a number of important investigative and rulemaking dockets. On May 5, 1960, the Vice Chairman of the Federal Maritime Board wrote to Chairman CELLER in part, as follows:

During the hearings held in New York last October and November, the subcommittee brought to light a variety of incidents and practices that may have been in violation of

the shipping statutes. Since then, the Board and its staff have reviewed the transcript and documentary evidence adduced at the hearings, together with the list of possible violations prepared by the subcommittee staff. We have used this material as a basis for further investigations into the practices of the shipping industry, and for the promulgation of rules of general applicability.

The list of possible violations prepared by the subcommittee staff contained 127 separate items. As of this date, we have reviewed all of the items and have initiated action in regard to most of them. The Board has instituted formal investigations, before hearing examiners, in regard to 13 of these items, and 2 more are in preparation. Field investigations remain in progress in regard to 12 of the instances set out on the list; and orders requiring the submission of verified information under section 21 of the Shipping Act of 1916 have been issued to numerous parties in 3 of these cases, and another such order is now ready for issuance. We have referred 17 cases to the Department of Justice for appropriate judicial proceedings. Twelve of the items are the subject of rulemaking proceedings, and such proceedings are under active consideration that will include six additional items. Eighteen cases are in the process of review by our staff. As suggested by the subcommittee we have increased the coordination of our activities with those of the Antitrust Division. * * *

I would particularly like to express the Board's appreciation for the assistance and cooperation provided by the professional staff of the subcommittee. We will look forward to continued coordination of the efforts of the subcommittee and the Board in connection with information that may be brought out in the resumed hearings.

A number of the new investigative dockets opened by the Federal Maritime Board in response to the subcommittee's referrals concern unfiled agreements required by section 15 of the Shipping Act to be filed with and approved by the Board. The importance of these investigations lies in the fact that Federal Maritime Board approval of agreements between carriers is a legal prerequisite to the exemption of the carriers from the prohibitions of the antitrust laws.

Also, the Federal Maritime Board, pursuant to section 21 of the Shipping Act, has issued an order requiring the more than 350 shipping lines forthwith to file with it their rate and other agreements.

In addition, the Federal Maritime Board has instituted investigative dockets and rulemaking proceedings affecting such matters as the filing of rates, the distribution of tariffs, relations with travel agents, and the like.

Port of New York Authority inquiry: Contempt citations

In March 1960, at the request of members of the New Jersey congressional delegation, the staff of the Antitrust Subcommittee was directed to make a study of the activities and operations of the Port of New York Authority, including a review of the scope of the authority's major operations.

The Port of New York Authority is an interstate, regional development authority established under bistate compacts between the States of New York and New Jersey approved by Congress in 1921 and 1922, for the purpose of dealing with the planning and development of terminal and transportation facilities and improving the commerce of the port district. It was the declared expectation of Congress that the effectuation of these compacts would "better promote and facilitate commerce between the States and between the States and foreign nations and provide better and cheaper transportation of property and aid in providing better postal, military, and other services of value to the Nation." The operations of the authority exercise a far-flung influence on interstate commerce. They yield tax exempt revenues in excess of $100 million annually from tunnels, bridges, terminals, airports, and shops, valued at more than $900 million. The port authority's operations affect the economic lives of millions of Americans living outside as well as inside the port development area and the States of New York and New Jersey. They intimately affect the operation of Federal agences responsible, among other things, for the national defense, navigable waterways, and air, rail, and highway traffic. In short, they profoundly affect Federal interests of many and various kinds.

Nevertheless, although there were 2 days of hearings before the subcommittee in 1952 on a resolution that would have withdrawn congressional consent from the compacts and the authority, neither the Judiciary Committee, to which is assigned responsibility for interstate compacts of this character, nor any other congressional committee, has ever conducted a general investigation of the Port of New York Authority to determine its conformance or nonconformance to the limits of its authority or the extent or adequacy of its performance of its responsibilities in the public interest.

What is more, in recent months, complaints varying widely in character and gravity concerning the operations of the port authority under the compacts, have come to the attention of the subcommittee. For example, it has been alleged that the port authority, in combining revenues for financing purposes from all its facilities, rather than reducing tools on each facility as it is amortized, places an undue burden on the channels of interstate commerce and is contrary to national transportation policy. It has been alleged that the port authority has extended its operations beyond the geographic limits contemplated by the Congress. It has been alleged that in the letting of certain service and construction contracts, the port authority has not permitted competition and has failed to grant the award to the lowest qualified bidder. It has also been asserted that the overall operations of the port authority have at no time been subjected to a comprehensive independent audit by any governmental agency.

By letter dated March 11, 1960, Chairman CELLER initiated the inquiry by requesting the executive director of the port authority to make certain of the authority's files available for examination by committee staff members. Notwithstanding this request, the port authority failed for the most part to make available the documents requested. Rather, it limited itself to supply documents virtually all of which were already matters of public record.

Against this background, the subcommittee voted on June 8, 1960, to begin a full inquiry into the activities and operations of the Port of New York Authority under the 1921 and 1922 compacts. Also on the same date, the subcommittee addressed a letter to the executive director of the authority requesting him to make available for examination by subcommittee staff representatives specified documents dating from January 1, 1946, and indicating that counsel for the subcommittee would call at the offices of the authority on June 15 for the purpose of examining these files at that time.

Two days later, by letter dated June 10, the executive director of the authority raised a number of objections to the request for inspection of documents in the port authority's files. In the same letter he nevertheless expressed the hope that when subcommittee counsel called at the offices of the authority and met with its general counsel, those present would reach agreement as to the materials to be furnished in aid of the subcommittee's inquiry. On June 15, counsel for the subcommittee met with the executive director and the general counsel of the authority at its office. The port authority failed to make the requested documents available.

Accordingly, on June 15, 1960, subpenas duces tecum were served upon Austin J. Tobin, executive director, S. Sloan Colt, chairman, board of commissioners, and Joseph G. Carty, secretary to the board of commissioners, of the Port of New York Authority, directing them to appear before the subcommittee on June 29, 1960, and to bring with them certain records and documents of the port authority.

On June 29, the three port authority officials appeared before the subcommittee and brought with them part of the documents demanded in the subpenas, but failed and refused to produce certain other documents in compliance with the subpenas or as ordered by the subcommittee. The withheld documents are necessary to the subcommittees' inquiry. On the same day, following the appearance of the witnesses, the subcommittee unanimously resolved to report the failure of the officials to honor the subpenas to the Committee on the Judiciary and to recommend that the committee report this conduct to the House with recommendation that the port authority officials be cited for contempt. On June 30, 1960, the Committee on the Judiciary adopted this recommendation. On August 23, 1960, the Committee on the Judiciary filed its reports—Reports Nos. 2117, 2120, and 2121—on the matter and the House of Representatives adopted House Resolution 606, House Resolution 607, and House Resolution 608, whereby the Speaker of the House was directed to and did certify the reports of the Committee on the Judiciary to the U.S. attorney for the District of Columbia.

It is now the duty of the U.S. attorney to bring the matter before the grand jury for its action—title II, United States Code, section 194. By citing the port authority officials for contempt the House has thus cleared the way for a

judicial determination of certain constitutional and legal issues concerning the scope of the investigative powers of Congress which the port authority has seen fit to raise.

Liaison with antitrust enforcement agencies

In addition to the foregoing legislative and investigative activities, the Antitrust Subcommittee maintains continuing liaison with the Antitrust Division of the Department of Justice and with the Federal Trade Commission in connection with the enforcement by those agencies of the antitrust laws. In its report on corporate and bank mergers, issued in 1955, the subcommittee had occasion to state:

> The Celler-Kefauver Antimerger Act adopted on December 29, 1950, was designed precisely to limit future increases in the level of economic concentration resulting from corporate mergers and acquisitions. However, enforcement activity by the Federal Trade Commission and the Department of Justice has been negligible for the most part. These agencies have filed all told but 11 merger cases since the passage of the Celler-Kefauver Antimerger Act almost 5 years ago. Viewed against the backdrop of over 3,000 corporate mergers, this paucity of proceedings indicates to the subcommittee that the Department of Justice and the Federal Trade Commission have made but a token gesture at enforcement. Indeed, it appears to the subcommittee that both enforcement agencies have failed to execute the provisions of law promptly, vigorously, or effectively.

Since the issuance of the subcommittee's 1955 report, the intensity of Federal enforcement activities with respect to mergers has increased materially. Thus in less than 4 years, commencing January 1, 1956, the Department of Justice instituted 17 antitrust prosecutions, and the Federal Trade Commission 23. Enforcement of the Antimerger Act is currently the most important activity of the Antitrust Division of the Department of Justice and one of the principal activities of the Federal Trade Commission.

In the 86th Congress, as in past Congresses, the Antitrust Subcommittee has referred numerous specific complaints of antitrust violations to the Justice Department and to the FTC, including violations of the Celler-Kefauver Act. In many instances the subcommittee stimulated the initiation of investigative and prosecutory proceedings by these agencies.

Miscellaneous reports

On March 16, 1959, Chairman CELLER released the report on his study of television broadcasting in the United Kingdom, France, and Italy. This report, entitled "Aspects of Television in Western Europe," was based on Mr. CELLER's firsthand study in the fall of 1958 of European television operations. It supplements the Antitrust Subcommittee's investigations during the 84th and 85th Congresses of the American television broadcasting industry.

Also early in 1959, the subcommittee published a report prepared by the subcommittee staff, constituting a revision of the subcommittee's 1950 publication entitled "The Antitrust Laws: A Basis for Economic Freedom." This revision collates to date all of the amendments to the basic antitrust legislation, and includes all related statutes. Since 1950, the subcommittee has had a constant demand for copies of this publication from educational institutions and business organizations. The up-to-date compilation of these laws in the subcommittee's publication should be of material assistance to the Congress in its consideration of antitrust matters as well as to students, educational institutions, and business organizations.

Publications, 86th Congress

Reports: "The Antitrust Laws: A Basis for Economic Freedom," a staff report to the Antitrust Subcommittee, January 1, 1959; "The Consent Decree Program of the Department of Justice," January 30, 1959: "Aspects of Television in Western Europe," committee print, January 1959; "Finality of Clayton Act Orders," House Report No. 580, June 26, 1959; "Proceedings against Austin J. Tobin," House Report No. 2117, August 23, 1960; "Proceedings against S. Sloan Colt," House Report No. 2120, August 23, 1960; "Proceedings against Joseph G. Carty," House Report No. 2121, August 23, 1960.

Hearings: "Finality of Clayton Act Orders, Serial No. 3, 1959"; "Functional Discounts, Serial No. 7, 1959"; "Group Bargaining by Milk Producers, Serial No. 12, 1959"; "Ocean Freight Industry, Serial No. 14, 1959–60"; "Federal Conflict of Interest Legislation, Serial No. 17, Parts 1 and 2, 1960"; "Return of Subpenas: Port of New York Authority, Serial No. 20, 1960."

Twentieth Anniversary, Ukrainian Congress

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RODINO. Mr. Speaker, it is my great pleasure today to pay tribute to the Ukrainian Congress Committee of America, which this fall will celebrate its 20th anniversary. The Congress speaks for over 2 million Americans of Ukrainian descent, many of whom are my friends and neighbors in the 10th District of New Jersey.

This organization has filled an important function in the past two decades by focusing attention upon the cause of the Ukraine, as well as that of all the captive nations. The Congress has been in the forefront in pointing up the fact that there are captive nations within the Soviet Union itself, as well as throughout Eastern Europe. The realization that Soviet unity is a myth, and that there are many separate nations within the Soviet Union yearning for independence, is, of course, of vital significance to our national strategy.

By dramatizing the plight of the oppressed non-Russian nations, the Ukrainian Congress has served the cause of liberty and freedom. May the Congress continue to play its vital role in the never-ending struggle against Communist imperialism in the future.

Address by Secretary of Agriculture Ezra Taft Benson Before Illinois State Chamber of Commerce

EXTENSION OF REMARKS
OF
Hon. EVERETT McKINLEY DIRKSEN
OF ILLINOIS
IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. DIRKSEN. Mr. President, I ask unanimous consent to have placed in the CONGRESSIONAL RECORD an excellent address by the Secretary of Agriculture, the Honorable Ezra Taft Benson, which he delivered before the Illinois State Chamber of Commerce. In this address, he presented the facts in a direct, effective fashion and received widespread favorable comment.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SECRETARY OF AGRICULTURE EZRA TAFT BENSON BEFORE ILLINOIS STATE CHAMBER OF COMMERCE, 1960 STATEWIDE AGRICULTURE-BUSINESS CONFERENCE, CHICAGO, ILL., AUGUST 31, 1960

I deeply appreciate being your guest at this statewide agriculture-business conference. It is good to meet again my friends of the Illinois Chamber of Commerce—and I see here many other friends, both rural and city. May I take this opportunity to commend you of the Illinois Chamber and the farmers of this State for the sound position you have held on farm questions through the years. I thank you in particular for the firm support you have given to me in my humble efforts.

This, no doubt, is my last appearance before you as Secretary of Agriculture. So it is appropriate that we think back over the past 7½ years—and that we ask ourselves what has been learned that can be applied to the future.

What have we learned? It seems to me we have learned some old lessons anew.

We have learned that the supreme test of any Government policy, agricultural or other, is this: "How will it affect the character, morale, and well-being of our people?"

We have learned that the future of agriculture and the preservation of a sound economic system depend upon the vigorous reemphasis of the principles, benefits, and values of private competitive enterprise. No group in America is in a better position to contribute to this need than those who live on the farms and ranches of America.

We have learned that price supports on storable commodities can be useful in providing protection to the farm-producing plant and helping to stabilize national food supplies. But price supports which prevent

production shifts toward a balanced supply in terms of demand—price supports which encourage uneconomic production and result in continuing heavy surpluses and subsidies—these must be avoided.

We have learned that the principles of economic freedom are applicable to farm problems. We need a minimum of restrictions on farm production and marketing to permit the maximum of dependence on competitive free market prices as the best guides to production and consumption. Farmers should not be placed in a position of working for Government bounty rather than producing for a free market.

We have learned that inefficiency should not be subsidized in agriculture or any other segment of our economy. Relief programs should be operated as such—not as an aid to the entire agricultural industry. Emergency programs should be terminated as soon as the emergency is over.

And above all, I hope we have learned anew that freedom is a God-given, eternal principle vouchsafed to us under the Constitution. It must be continually guarded as something more precious than life itself. It is doubtful if any man can be politically free who depends upon the State for sustenance. A completely planned and subsidized economy weakens initiative, discourages industry, destroys character, and demoralizes the people. An uncorrupted citizenry builds a great State. No State ever built an uncorrupted citizen.

I say we have learned these things. By that I mean that the great majority of those who have studied the farm problem recognize these things as true.

But this does not mean that the facts are no longer being misrepresented.

There are those in this land who are still striving with all their energies to make the farm problem a political issue. This is deplorable. Our agriculture is neither Republican nor Democratic. It is American.

There are a few who think the way to win favor with rural people is by promises of unsound, unworkable, pie-in-the-sky policies and programs. But farm people are not on the auction block. Their votes are not for sale to the highest bidder. Those who believe otherwise insult the intelligence and integrity of our farmers.

Farm problems will never be resolved by passionate charges and countercharges—by flagrant misrepresentation—or by seeking out scapegoats.

Farm problems will finally be solved only through honest appraisal, frank and sincere discussion, adherence to sound economic principles, and devotion to the best interests of this country. I have faith in the people of this Nation. They will not be deceived by false promises and false charges.

The pessimists who predicted 1960 would be a bad year for farmers are being disappointed.

The outlook for hogs is favorable.

Cattle producers are experiencing a good year—on top of some of the best years in their history.

Milk prices are running above a year ago and dairy income in 1960 will hit an alltime high.

Exports for the 12 months that ended June 30 set a new record for volume and were close to the record of 1957 in dollar value.

Wheat exports have been sharply increased during the past 12 months.

A million bales were cut from the cotton carryover this year, and cotton stocks on August 1 were the smallest since 1953.

These are some of the specific facts. What about the overall picture?

Farmers' assets are at a record high of $204 billion, up $41 billion since 1953.

Farm debts are less than 12 percent of farm assets.

The standard of living among our rural people was never better.

On the other hand, as a farmer for many years, I do not minimize the seriousness of the very real problems our farmers are still facing: Notably the cost-price squeeze, inflation, and continuing Government-stimulated surpluses of a few commodities. But the cure for these ills is not to give the patient another dose of what made him sick in the first place. Yet that is precisely what some are urging today.

This situation that is called the farm problem is not just a farm problem—it is a national problem.

It is a national problem because of the heavy drain of tax dollars that it entails. And it is a national problem because past efforts to deal with it have carried the country far along the road to Government regimentation and control over agriculture. Many of our farmers have lost far too much of their freedom to plant, to compete, to market, and to make their own decisions.

This is what is back of our repeated appeals for sound new farm laws.

Farmers are not to blame for the troubles the Nation is having—in wheat, for example. The American farmer deserves our unstinting praise for his amazing productivity. Never in history have so many been fed so well by so few.

The difficulties we are having are largely the result of old laws and the refusal of the Congress to make long-needed changes.

Now let me take issue right here with a false statement that has been made and is still being made.

It is said, "The Congress gave Benson just about all that he asked for. This is Benson's program, and it isn't working."

That is a false statement. We do not have, and we never have had, anywhere near the full program we asked for.

When we took office in January 1953, our hands were tied for 2 years by the rigid 90-percent-of-parity price-support law then on the books.

As soon as we could, we asked the Congress as a start to provide a flexible range of supports, running from 75 to 90 percent of parity. We got a range of 82½ to 90 for the first year and 75 to 90 thereafter.

But then Congress passed a bill to restore the old 90-percent law, and the President vetoed it.

Next, Congress set up the soil bank, including the acreage reserve which we recommended as an emergency measure. But Congress made the acreage reserve applicable to 1956, despite the fact that much of the 1956 crop was already planted, and in the face of my warning that it was too late to do any good that year. And they tried to blame us for that.

In 1958 we asked that price supports be widened to a range of 60 to 90 percent of parity. What Congress gave us was a weak compromise—a fairly satisfactory program for corn; a stopgap program moving in the right direction for cotton; some improvement in rice; and nothing for wheat, tobacco, or peanuts.

And there, for all practical purposes, is where matters stand. Time and again in 1959 and this year President Eisenhower and all of us have urged Congress to choose among several alternatives which would improve the situation, but Congress refuses to act.

We do not have the program we asked for. We have a little of what we recommended, but even this came too late to be most effective.

Where we have had, or have been given, the authority to make price supports realistic, the results have been good.

Corn is an example. Corngrowers last year were finally free to plant as their own good judgment dictated. The immediate result was some increase in acreage. However, acreage has stabilized this year, and 1960 production is estimated at 6 percent below 1959. But corn consumption is running 9 percent ahead of a year ago.

Dairying is another example, even though we don't have all the flexibility needed. Supply and demand for milk are practically in balance—for the first time in 8 years. Dairy products are moving into markets rather than Government warehouses and income is at an alltime high.

Where the old price support, acreage control law did not apply—as for hogs, cattle, fruits, and vegetables, for example—farmers have generally done a good job of developing markets and adjusting supply to demand. Soybean producers especially have shown what can be done in the way of developing markets in the absence of controls and price fixing. Nationally, soybeans are the fifth most important crop as a source of income. Here in the Midwest they are second only to corn.

I am attaching to this text a rather full statement, amplifying what I have just said about how much of our recommended program was actually legislated.

Very little is to be gained at this stage, however, by documenting responsibility against our critics—even though strange as it seems, they are actually trying to blame us for the results of the programs they designed and which they refuse to change. Let us rather call attention to what has been accomplished during the past 7½ years and then chart what I consider to be a sound and safe path for the future.

As I have indicated, we have made limited progress toward sounder price support programs through the Agricultural Act of 1954—the act of 1956—and the act of 1958.

Four-fifths of agriculture is free, and doing fairly well. Out of about 250 farm commodities produced commercially only five are under acreage controls.

But we still need legislation—for wheat especially. And Congress refuses to take action.

We have made progress in extending to farm people legitimate benefits hitherto long denied them.

Social security has been extended to farm families and farm workers.

The unfair Federal tax on gasoline used on farms has been repealed. And I am immensely proud to be able to say that the rural development program, started by this administration—the first real concerted effort to deal with the special needs of low-income farmers—is progressing in over 30 States and Puerto Rico.

We have moved ahead in the conservation of natural resources. During the past 7½ years farmers have applied more conservation to their farms than in any similar period in history.

Our national forests are being developed and improved as never before. We developed new water-management programs and expanded existing programs. We established the Great Plains conservation program in 1956.

We have made progress in research.

Appropriations for agricultural research have been increased by 117 percent since 1953. A large part of these funds is being used to expand markets and find new uses for our farm abundance, and to develop new crops for current needs.

We have made progress in credit.

We made the Farm Credit Administration an independent agency, in large measure farmer owned and farmer controlled.

We substantially improved the services of the Rural Electrification Administration and the Farmers Home Administration.

We assisted ranchers with the biggest drought relief programs in U.S. history. Nearly $1 billion has been extended in disaster and drought aid since 1953—most of it during the serious droughts of 1953 through 1956. Such aid enabled many fine farm and ranch families to stay on the land.

Through various programs we have held down the accumulation of surpluses. Except for realistic adjustments in price supports, surplus disposal activities, and the soil bank, surplus accumulations might have risen $14 billion above existing totals.

More than 28 million acres of farmland have been taken out of production by the conservation reserve program of the soil bank. These acres would have otherwise added to surpluses. Instead, participating farmers are making unprecedented strides in conserving soil, water, forests, and wildlife resources.

The special milk program was inaugurated in 1954. In 1960, it operated in 83,000 school and child-care institutions where nearly 2.4 billion half pints of milk helped improve diets of our children.

The food for peace program is moving ahead. We are working closely with Canada, Australia, France, and Argentina to promote wider use of surplus wheat.

We have made an outstanding record in donating surplus food to deserving people at home and abroad. Over 20 million U.S. citizens and some 60 million people in 91 foreign countries received such donations last year.

No nation under Heaven has ever been so generous with its abundance. Every American who knows the story is proud of our record of sharing.

We have made great progress in expanding exports.

During the past 7 years the value of our farm exports was the greatest for any 7-year period in history—$26.5 billion.

In the fiscal year just past, the volume of our agricultural exports reached a new alltime high. Eight products set new all-time export records. The eight were feed grains, poultry meat, soybeans and cottonseed oil, dried beans, tallow, variety meats, and hops.

The size of the export job that American farmers are doing is indicated by the fact that half their wheat production and nearly half of their cotton production last year moved abroad.

As you know, I have just recently returned from an 18-day market development trip to Western Europe and the Middle East.

It was a fruitful trip—part of a long-range world agricultural trade and market development program which has taken me to some 35 foreign countries on 5 trade trips in the past 5 years.

We observed the agriculture of these countries. We noted the operation of our agricultural export program. We investigated the possibilities of increased agricultural trade. We met government officials and representatives of the trade and encouraged good will between the United States and these nations.

And we found that despite all the tensions in the world today and despite all the propaganda offered daily by alien ideologies to distort the image of America, this Nation is still held in high esteem and great trust by millions of citizens in virtually every land.

We not only received every courtesy and consideration by our hosts in each country; we received every assurance of true and lasting friendship.

The late Wendell Willkie once stressed the well of goodwill that abounds in the world for America. I would stress it again today. I sincerely hope that we have added a bit to the well.

We found farmers everywhere—from Flanders, to Amsterdam, to the Nile Delta, to the coastal plain of Israel—much the same in aspirations and outlook as our farmers here in Illinois and throughout the United States. Within the limitations imposed by geography, fertility of soil, and economics, they strive for the same freedom to plan, to plant, and to harvest and market that we all seek. They all pray for peace with all nations. Farm people certainly speak a common language, and in the fields of trade and agriculture I believe we will discover ways to bridge the gaps in mutual understanding so sorely needed in this world of 1960.

The farmers of the United States support multilateral trade based on comparative economic advantage. Trade is a two-way street. Everywhere we went we stressed our interest in expanding markets.

American agricultural representatives must continue to emphasize the need for trade liberalization. American farmers need to see their sales to Western Europe steadily increased in the months and years ahead. This makes economic sense.

In the Middle East there are many opportunities for opening new markets and enlarging present ones.

Our food for peace program is making a great contribution toward improving the level of living in the Middle East.

I repeat—we can all be proud of the way the products of our farms are helping people help themselves. Our agricultural productive ability is now recognized everywhere. So is our generous sharing of our abundance.

These are the facts. Such is the record of our 7½ years of stewardship. When the history of this period of our agriculture is written years hence, this will be revealed as a period of great and lasting progress. The groundwork has been laid for the kind of prosperous, expanding, and free agriculture that is so basic to a strong, virile, secure America. We have reversed the trend of 20 years toward a controlled and socialized agriculture.

We have here in the United States the most advanced agricultural plant in all history—the most skillful, best equipped farmers in the world—the finest, most abundant food supply ever. For the first time in history we dare to think about overcoming, around the world, man's ancient enemy, hunger.

We are in a cold war with communism. In this conflict, our agriculture is one of our greatest assets. The productivity of our farmers outclasses that of Russian farmers, four or five to one. This is a tremendous asset. The underdeveloped nations need our agricultural science and our food. Let us continue to put this advantage to work.

In short, let us focus on our opportunities. To do this most successfully, we need to complete the progress of the past 7½ years.

The fundamental economics of the farm dilemma is simple—it is the politics of the problem that is baffling. What farmers want and need is less Government in the farming business—less politics in agriculture.

As we move forward, especially during the next 2 politically charged months, we must ever remember that—

Farmers are also good citizens, interested in peace, fiscal integrity, balanced budgets, and a sound economy—as well as in farm prices.

Farmers know that the high prices of 1952—so often referred to by some demagogs—were not due to 90-percent supports but to war, the insatiable demands and inflation of war. Our critics who would take credit for high wartime prices might well take the responsibility for the casualty lists also.

Farmers know that Government tinkering with controls on production, marketing, and prices has been a colossal failure.

Farmers know that political hopefuls who promise pie-in-the-sky 100 percent of so-called parity income will not be able to deliver on their political promises.

Farmers know that the so-called parity index—with an ancient base of 50 years ago—is an outmoded and weak measuring rod.

Farmers know that four-fifths of agriculture is free of controls, pretty well in balance, and doing fairly well, and that most farmers want freedom to make their own decisions without Government regimentation.

Farmers know that the private competitive enterprise system is the best—that it has given us more of the good things of life than any other system—and that it must be preserved, safeguarded, and strengthened.

Farmers know that price must be permitted to play its traditional role in directing production and consumption—that Government price fixing destroys markets, regiments farmers, piles up surpluses in Government warehouses, and puts burdens on farmers and all other taxpayers.

Farmers know they must have expanding markets and that a Government warehouse is not a market.

Yes; the fundamental economics of the farm problem is simple—less Government in farming. Quit trying to fix prices unrealistically from which flow the twin evils of production for Government warehouses and control of farmers. Emphasize markets, increased efficiency, and competitive selling. Eliminate Government's stranglehold on agriculture. This is the solution.

The course is clearly charted. It is right. It is sound.

Here in broad outline is what we need to do.

First, we need to expand the food-for-peace program. Remarkable use has been made of our surplus stocks through special export programs, but there are additional steps that can be taken. Food can serve humanitarian needs in foreign lands, aid in economic development, and serve the cause of peace and freedom.

Second, we should press forward even more vigorously than at present with programs of research to develop new foreign and domestic markets, including new industrial uses, for our farm products.

Third, we need laws to improve the price-support mechanism by providing levels of price support that will allow farm commodities to move into regular marketing channels, and at the same time afford adequate price protection. This will open the way toward further relaxation of existing controls over farm production, and toward an agriculture that is on a free, sound, and profitable basis.

Fourth, we need to adjust further the use of farmland in accordance with needs by such a program as an expanded conservation reserve.

Fifth, the rural development program should be emphasized and expanded as rapidly as is feasible. Through private and public cooperation, we can improve vocational education, offer more effective employment services, and encourage local industrialization and other economic activities as well as better farming. We can help our small farmers make adjustments which they want and need to make to improve their standard of living.

These are the policies American agriculture needs: Policies that build farm markets; policies that permit dynamic adjustments to the rapidly changing science of agriculture; policies that will strengthen our family farms as sound economic units; policies which will always dignify the individual farmer and his family in the free atmosphere of a vigorous and prosperous America.

If we resolutely advance such policies, I am convinced that the most exciting decade of our entire experience lies just ahead of us. The future is filled with absorbing challenges.

Production per man will continue to increase. Living standards for all of us are bound to reach new heights. America will be secure because she remains strong and strong because she remains free.

In January, I shall go back to my full-time work as a churchman. It is natural for anyone in that position to look back

over his shoulder at the road he has traveled. As I do so, I can tell you frankly that—many times in the past 8 years—I have wished that I might have occupied this office in a period of fewer stresses and strains. But it is not ours to pick and choose entirely when and under what conditions we shall serve.

We must all do our jobs as we understand them and under such circumstances as the Lord provides.

Of one thing in particular I am proud. We have never ceased impressing upon our farm people that to exchange principles for Government handouts is a sorry bargain. Giving without earning, rights without responsibilities, and freedom without vigilance are but figments of an imagination gone wild.

It is my hope and my prayer that you, the people of this choice Nation, will never permit this land to fall prey to a mammoth, centralized, paternalistic Government on the pretext that such a Government can by decree create and dispense health, wealth, and happiness to a subservient people.

As we face the critical decisions just ahead, city people and rural alike, let us in the words of Abraham Lincoln 100 years ago "do nothing through passion and ill temper." Let us "stand by our duty, fearlessly and effectively. * * * Let us have faith that right makes might, and in that faith, let us, to the end, do our duty as we understand it."

God grant it may be so.

Pulaski: Polish and American Patriot

EXTENSION OF REMARKS

OF

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. RODINO. Mr. Speaker, on October 11, 1779, Brig. Gen. Casimir Pulaski died on the American frigate *Wasp* of a mortal wound received as he led the Pulaski legion in the defense of Savannah, Ga. When only 31 years of age, he had already won international renown as a Polish patriot. He had the reputation of a brilliant military leader under Gen. George Washington.

The memory of this man is inspiring. His place in the annals of history, based as it is on the well-merited honor of two hemispheres, stemmed from one basic fundamental of his character—a devotion to freedom. The leading motive of General Pulaski's life was liberty.

For this in Poland he fought valiantly, and was famous, before he was 25, for his ability, bravery, and leadership. In the struggle against the three invading powers, Russia, Prussia, and Austria, which resulted in the first partition of Poland, he sacrificed his home and fortune, lost his father and brothers, and finally was driven from the country.

He then dedicated his talents and his life to the cause of American liberty. Known for the brilliance of his career to Benjamin Franklin and Lafayette, he was recommended to General Washington, who named him "head of the horse." He became the "father of the American Cavalry."

The American troops under his leadership came to the rescue of Washington's forces at Brandywine, lessened the blow at Germantown, fought in the battles of the winter of 1777–78, and as Pulaski's Legion defended Charleston, S.C., and Savannah, where he was mortally wounded.

Even in death he inspired his men with his valor, his gallantry, and his once self-styled "devoted zeal for the service of the States." After he had fallen in battle they fought on with a determination and bravery extolled by their French allies.

George Washington spoke of him as "a man of real capacity, experience, and knowledge." "Light Horse Harry" Lee wrote:

> Pulaski—a name dear to the writer * * * gallant soldier * * * sober, diligent, and intrepid, gentlemanly in his manners, and amiable in his heart.

In mute witness to the debt, the respect, and the affection which the American people felt for General Pulaski there stands a statue in Savannah. Counties in 10 States have been named for him, besides cities and towns. A 1929 memorial exhibition in Newark, N.J., became a permanent part of the Museum of Newark. In that year, 1929, the U.S. Congress authorized a sesquicentennial celebration in memory of him.

As long as the battles for freedom are commemorated, Pulaski's name will be among the honored.

Legislative Review of the Achievements of Congress During Past 6 Years

EXTENSION OF REMARKS

OF

HON. LYNDON B. JOHNSON

OF TEXAS

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement by me on the legislative record, digest of achievements, and status of presidential recommendations, 86th Congress, 2d session, January 6, 1960, to September 1, 1960.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

LEGISLATIVE REVIEW OF THE ACHIEVEMENTS OF CONGRESS DURING PAST 6 YEARS

(By Senate Majority Leader LYNDON B. JOHNSON)

The close of a Congress is always a matter of great significance. It is a period of summing up; of judgment; of deciding whether the Congress has fulfilled its obligations to the American people.

But the adjournment of this session is of unusual importance in our history. It marks the close of the longest period of divided government this Nation has ever known.

SIX YEARS

For 6 years, the Congress of the United States has been controlled by one political party and the executive agencies of our Government by another. This is a situation which was not contemplated by the Founding Fathers and which political scientists have regarded with apprehension.

It would not be accurate to say that divided Government brought our country to a paralysis or to a halt. This would have resulted had the Democratic majorities sought to use their strength to hamstring and harass the President. This they did not do.

SEEK THE BEST, ATTAIN THE POSSIBLE

Instead, the Democratic majorities adopted the philosophy that Americans must make the best out of the circumstances which prevail. The result was a remarkable series of achievements that have few—if any—parallels in American history.

The guidelines for the Democratic majorities could be summed up as an effort to seek the best and to attain the possible. It was decided that the best philosophy was to attempt to resolve, rather than create, issues and that some progress was preferable to no progress at all.

FACING THE ISSUES

As a result, the Democratic Congresses succeeded in facing up to some of the most difficult issues of our times.

Two major civil-rights bills were written into law after 82 years of total inactivity in this field.

The Austrian, German, and Japanese Peace Treaties were ratified.

The United States was authorized to participate in the International Finance Corporation to help solve the problems of the underdeveloped nations of the world.

Our country was committed to the concept of atoms for peace by ratification of the statute of the International Atomic Energy Agency.

An Inter-American Development Bank was established to accelerate the economic development of the nations of the Western Hemisphere.

An East-West Center was established in Hawaii to provide a meeting ground for the intellectual and cultural leaders of the East and the West.

The minimum wage was increased from 75 cents to a dollar an hour.

The largest roadbuilding program in history was launched.

The 1958 recession was met by prompt and vigorous congressional action in the field of housing, public works, reclamation, and roadbuilding and the beneficial effects of these programs became apparent the following year.

The Small Business Investment Act was approved to provide loans to State and federally chartered small business investment companies.

A program was launched under congressional initiative to bring the United States into the development and exploration of outer space.

Congressional recommendations were made to strengthen the Nation's defenses.

A landmark social security law established the basic principle of disability compensation at age 50 and extended the coverage of the act and lowered the retirement age for women.

The Upper Colorado River Basin project—the dream of conservationists for more than 50 years—finally became a reality.

Alaska and Hawaii were both admitted to the Union as States.

The Niagara River power development program was authorized.

The cloture rules of the Senate were liberalized.

Legislation to curb racketeering that was preying upon honorable working men and women was placed on the statute books.

Broad programs were enacted to provide housing for our people and keep our economy healthy.

The greatest health research programs in all recorded history were launched to give humanity some hope for relief from the killing and crippling diseases.

The controversial Antarctic Treaty was ratified which holds forth the promise of securing one area of the world from warlike moves.

These are only a few of the achievements of the past 6 years. A more extended list will be placed in the record at the end of this statement and I ask unanimous consent to do so.

STRAINS APPARENT

Despite these achievements, however, the strains of divided government were apparent at every turn. These strains became greater as we approached the decisive year of 1960 in which the American people will have the opportunity to bring divided government to an end.

It has not been possible to work out satisfactory legislation to meet the pressing problems of agriculture.

Bills to aid the pockets of economic recession which scar the face of our country have been vetoed.

The only legislation attainable to help our senior citizens with their health problems is considered by many to be inadequate to the needs.

A needed boost in the wage floor could not be achieved—nor could extended coverage.

Legislation to help in the education of our children has become bogged down.

ISSUES MUST BE RESOLVED

These are problems which must be submitted to the American people. The 6 years of divided government have worked in many respects but it is obvious that there are issues whose resolution will be extremely difficult if divided government continues.

Furthermore, divided government—to work at all—demands the utmost in forbearance from all participants. Heated partisanship at any key position can complicate the problems of divided government beyond endurance.

It is obvious that the American people approve of the responsible approach of the Democratic Congress to the Nation's problems.

The record of the congressional Democrats has been submitted to the American people on three separate occasions since 1952. On each test, the American people have returned increasing Democratic majorities to the House and the Senate.

The full achievement of Democratic programs, however, requires close cooperation between the executive and legislative branches under our system of government. This can be determined only by the action of the people themselves.

Briefly from January 6 to July 3, when we recessed for the conventions, we had in the—

INTERNATIONAL AREA

Extended the mutual security program for 1 year and authorized $1.3 billion for economic assistance, technical assistance, and special activities ($2.7 billion for military assistance and development loan funds for 1961 previously authorized). Public Law 86–472.

Authorized U.S. participation in parliamentary conferences with Mexico. Public Law 86–420.

Extended for 2 years (June 30, 1962) authority of the President to control exports of strategic and critical materials. Public Law 86–464.

Authorized land acquisition in District of Columbia for donation to Pan-American Health Organization as headquarters site. Public Law 86–395.

Reaffirmed sense of Congress that upon achievement of disarmament agreements the United States should join with other countries in a program for peace.

Authorized payment of $6 million to Japanese nationals, formerly on Bonin Islands, in settlement of all claims against the United States. Public Law 86–486.

Provided for U.S. participation in International Development Association to help provide assistance to underdeveloped countries. Public Law 86–565.

Provided for admission of approximately 5,000 nonquota immigrants as part of the international program for resettlement of European refugees. Public Law 86–648.

Authorized agreement with Mexico under treaty of February 3, 1944, for construction of a major international storage dam on the Rio Grande. Public Law 86–605.

Authorized the President, Secretary of Health, Education, and Welfare, and the Surgeon General to conduct an international cooperative program in health research, training, and planning. Public Law 86–610.

Authorized appointment of U.S. Citizens Commission to participate in NATO Citizens Convention to explore ways to develop democratic freedom by economic and political means. Public Law 86–719, approved September 7, 1960.

Authorized funds to effect U.S. participation in International Bureau for Protection of Industrial Property, pursuant to treaty. Public Law 86–614.

Effectuated convention with Cuba for conservation of shrimp.

Ratified the Florence agreement to encourage the exchange of cultural, scientific, and educational materials.

Ratified the Mexican Broadcasting Agreement to provide AM radio frequency priorities between the United States and Mexico broadcasting stations.

Ratified Treaty of Mutual Cooperation and Security Between the United States and Japan.

Extended through June 30, 1961, suspension of duties on imports of metal scrap. Public Law 86–606.

DEFENSE—SPACE—SECURITY

Authorized $211.4 million for fiscal 1961 programs of Atomic Energy Commission, including $13 million for power reactor plants for the Antarctic. Public Law 86–457.

Authorized $1.1 billion for 1961 project construction at Army, Navy, and Air Force installations here and abroad. Public Law 86–500.

Authorized construction of 4 modern naval vessels at cost of $157.9 million as part of 1961 program involving 57 vessels. Public Law 86–471.

Authorized $970 million for NASA activities for fiscal year 1961. Public Law 86–481.

Approved transfer of Development Operations Division of Army Ballistic Missile Agency to NASA.

Extended to June 30, 1962, President's authority to allocate and fix priorities for strategic materials, grants loans and subsidies under Defense Production Act to expand industrial capacity. Public Law 86–560.

Extended authority of Secret Service to protection of Vice President, next successors in line to the Presidency, and to the Vice-President-elect.

Extended for 2 years, to June 30, 1962, authority for direct and guaranteed loans to veterans for homes, farms, or business. Public Law 86–665.

Waived payment of premiums on national life insurance policies for certain totally disabled veterans. Public Law 86–497.

Permitted conversion or exchange of national life insurance policies to a new modified plan.

Provided additional compensation for disabled veterans with more than three children. Public Law 86–499.

Authorized involuntary retirement after 20 years' service of Air Force and Army officers who fail to meet selection requirements for promotion three or more times. Public Law 86–616.

Provided for additional compensation for certain disabled veterans. Public Law 86–499.

Provided incentive pay for service on nuclear-powered submarines. Public Law 86–635.

Amended Reserve Officer Personnel Act to equalize promotion opportunity in various branches of Armed Forces. Public Law 86–559.

NATIONAL ECONOMY

Provided pay increases of 7½ percent for classified and other employees, 8.4 percent for postal workers. Public Law 86–568.

Provided Federal loans and grants for industrial redevelopment in economically depressed area. Vetoed.

Authorized $1 billion a year for fiscal 1962 and 1963 in Federal aid for primary and secondary highway systems and their urban extensions. Public Law 86–657.

Provided for temporary limit of $293 billion on national debt for 1 year to June 30, 1961. Extended to July 1, 1961, 52 percent corporate income tax rate and the existing schedule of excise taxes on alcoholic beverages, cigarettes, automobiles and parts, transportation of persons, and telephone calls. Public Law 86–564.

Authorized increase of $75 million—to $650 million—on the amount of loans Small Business Administration may have outstanding.

Facilitated extension of credit to small business enterprises by amendments to Small Business Investment Act. Public Law 86–502.

Authorized creation of an Office of International Travel and Tourism in Department of Commerce to promote travel to the United States.

Extended for 2 years, to June 30, 1962, authority of Federal Reserve Board to buy U.S. securities directly from the Treasury. Public Law 86–567.

Permitted personal income tax deduction of all medical expenses incurred by any taxpayer in care of dependent parent over 65. Public Law 86–470.

Revised method for treatment of railroad corporation income resulting from discharge of indebtedness in receivership or under bankruptcy proceedings. Public Law 86–496.

Reduced cabaret tax from 20 percent to 10 percent. Public Law 86–422.

Authorized sale of surplus cotton to domestic textile industry at prices enabling it to compete in export market.

Exempted real estate loans guaranteed by a State or a State authority from limitations of Federal Reserve Act.

Permitted tax credit on foreign income by corporations to be taken on overall instead of country-by-country basis. Public Law 86–780, approved September 14, 1960.

Increased subsidy for domestic ship construction, for 2 years, to 55 percent of cost in foreign yards. Public Law 86–607.

Provided $2½ million a year for 3 years as subsidy to meet foreign competition in construction of trawlers, to aid New England fishing industry. Public Law 86–516.

Fixed wheat price supports at 75 percent of parity, reduced acreage 25 percent, provided for payment in kind for land withdrawn and devoted to soil and water conservation uses.

Established a Commission on Problems of Rural Counties and Smaller Communities.

Extended for 3 months, to March 31, 1961, the Sugar Act of 1948, fixing quotas of domestic and foreign producers; gave President authority to readjust Cuba's quota. Public Law 86–592.

Stabilized price supports for tobacco. Public Law 86–389.

Required marketing quotas for rice be established when total supply exceeds normal. Public Law 86–408.

Authorized donation of Federal surplus property to cooperative agriculture extension agencies of States and counties. Public Law 86–570.

Created an Agricultural Research and Development Commission to find and promote new industrial uses for farm products.

Authorized $1.4 billion public works projects on rivers and harbors for flood control and improvement of navigation. Public Law 86–645.

Established Office of Water Pollution Control and increased to $90 million a year grants to local governments to pay 30 percent of cost of construction of sewage treatment works. Vetoed.

Created an Office of Coal Research to find new uses for coal, encourage production and conservation, and otherwise stimulate the industry. Public Law 86–599.

Authorized $250 million for construction of San Luis unit of Central Valley, Calif., water supply project. Public Law 86–488.

HEALTH AND WELFARE

Extended to June 30, 1964, authorization for funds under Federal Air Pollution Control Act and continuation of public hearings.

Authorized health benefits program for retired civil service workers. Public Law 86–724, approved September 8, 1960.

Extended to June 30, 1965, authorization for $2 million a year in project grants to schools training public health personnel. Public Law 86–720, approved September 8, 1960.

Established a system of licensing and control over manufacture of narcotic drugs. Public Law 86–429.

Extended special milk program for children to June 30, 1961, and authorized maximum expenditures of $85 million in fiscal 1960 and $95 million in 1961. Public Law 86–446.

Tighten control over use of coal-tar coloring in food, drugs, and cosmetics. Public Law 86–618.

Authorized $1.2 billion housing program; renewed authority of various programs; authorized funds for veterans' housing loans, farm housing loans, college dormitories, urban-renewal slum clearance, community facilities, and housing for aged.

Authorized $100 million program for loans and planning grants to aid improvement of mass commuter transportation facilities in metropolitan areas as part of urban redevelopment.

Authorized $1.8 billion 2-year program for school construction and teachers' salaries.

Increased Federal contributions to land-grant colleges for resident teaching grants. Public Law 86–658.

Amended Defense Education Act by eliminating oath disclaiming disloyalty, retaining pledge of allegiance; fixed penalty for seeking or obtaining aid under the act while a member of a subversive group.

Authorized Federal grants of $5 million a year for 5 years to local communities and nonprofit agencies to finance projects to combat juvenile delinquency; established a national advisory council.

Provided for 10-percent increase in annuities for retired Foreign Service officers and survivors. Public Law 86–612, approved July 12, 1960.

Extended the mandatory provisions of the Federal Mine Safety Act to all underground mines regardless of size.

Authorized Post Office Department to seek court orders to curb use of mails for distribution of obscene or fraudulent matter. Public Law 86–673.

GENERAL GOVERNMENT

Enacted a civil-rights measure which authorized Federal courts, through appointed referees, to safeguard voting rights; fixed penalties for obstruction of court orders and for flight to avoid prosecution for vandalism; required preservation of Federal election records for 22 months; authorized availability of funds for education of servicemen's children in areas where schools are closed by integration disputes. Public Law 86–449.

Required that bank mergers have approval of Federal Reserve Board, Comptroller of Currency, or Federal Deposit Insurance Corporation as an insurance against monopoly. Public Law 86–463.

Authorized Attorney General to compel production of documents required as evidence in civil antitrust proceedings.

Legalized community antenna booster stations to bring broadcast programs to remote areas.

Restored to States jurisdiction over voting, taxing, education, and law enforcement rights on federally owned land.

Revised Federal election laws governing campaign contributions and spending.

Established a Commission on Metropolitan Problems and Urban Development.

Authorized 5-year program of payments to State and local governments in lieu of taxes for Federal lands; established a board to administer program and report on need for permanent policy.

Amended Communications Act to limit equal time provisions for duration of 1960 presidential campaign to major party candidates. Public Law 86–677, approved August 24, 1960.

Provided for creation of a commission to plan for a national observance of the 175th anniversary of the Constitution, 1964.

Created a commission to formulate plans for a memorial to Woodrow Wilson in the District of Columbia.

Proposed constitutional amendment giving the District of Columbia three votes in the electoral college and its citizens the right to vote for President and Vice President.

Provided for an elected mayor, city council, school board, and nonvoting delegate to the House from the District of Columbia.

Following is a brief list of major actions taken between August 8 and September 1, 1960.

Antarctic Treaty: Ratified Antarctic Treaty assuring that the Antarctic Continent and surrounding areas will be used exclusively for peaceful purposes, that freedom of scientific investigation will be maintained and freezes existing territorial claims and rights in the Antarctic.

Mutual security appropriations: Appropriated $3,722 million for foreign aid. Public Law 86–704, approved September 2, 1960.

Latin American development: Authorized $500 million for assistance in the development of Latin America and $100 million for aid in the reconstruction of Chile. Public Law 86–735, approved September 8, 1960.

Minimum wage: Increased the minimum wage from $1 to $1.25 over a 3-year period and extended coverage to some 4 million workers.

Mutual security contingency fund: Provided for an increased authorization of $100 million for the President's mutual security contingency fund for fiscal 1961 to meet emergency needs in Africa and other areas of the world—contingency fund total of $250 million in authorizations.

Social security-medical care for aged: Provided increased social security coverage under existing programs and authorized a new program of Federal grants to the States for medical care for the aged. Public Law 86–778, approved September 13, 1960.

Lead-zinc mining: Provided for stabilizing the mining of lead and zinc by small producers in the United States. Vetoed September 2, 1960.

Helium: Authorized a long-range program for the conservation of helium. Public Law 86–777, approved September 13, 1960.

Public works: Provided $3,969 million for public works projects, flood control, and resources conservation and development. Public Law 86–700, approved September 2, 1960.

FCC: Amended Federal Communications Act by fixing penalties for acceptance of payola and for other abuses and questionable practices. Public Law 86–752, approved September 13, 1960.

Housing: Extended life of home repair and improvement program and lifted the ceiling on FHA insurance; increased the revolving loan for college housing loans by $500 million and increased the revolving fund for community facility loans by $50 million. Public Law 86–784, approved September 14, 1960.

Second supplemental: Appropriated $162,186,981 for various agencies and programs, including $65 million for mutual security. Public Law 86–722, approved September 8, 1960.

District of Columbia police and firemen: Unanimously approved 7.5-percent salary increases for Metropolitan Police, District of Columbia firemen, U.S. Park Police, and White House Police. Public Law 86–734, approved September 8, 1960.

Advertising charges: Unanimously approved an exclusion of local advertising charges from the sales price for purposes of manufacturers' excise taxes. Public Law 86–781, approved September 14, 1960.

District of Columbia teachers: Unanimously approved a 7.5-percent increase in salary for teachers and officials of the District school system. Public Law 86–773, approved September 13, 1960

Antikickback statute: Unanimously cleared for the White House extending the "antikickback" statute to all negotiated contracts. Public Law 86–695, approved September 2, 1960.

Transportation: Unanimously provided for licensing independent freight forwarders. This was the record of the 2d session of the 86th Congress.

AGRICULTURE

In the first session, in 1959, we:

REA: Restored authority of REA Administrator to approve or disapprove loans without supervision by the Secretary of Agriculture. Vetoed. Final passage, 60 to 27.

Wheat supports: Provided price support at 90 percent of parity; reduced acreage allotments by 25 percent below the allotment it would otherwise receive for the 1960 and 1961 crops; and limited wheat supports to $35,000 a year for each producer. Final passage, division vote. Action clearing bill for President adopted by vote of 44 to 40. Vetoed.

Tobacco supports: Stabilized and protected the level of tobacco price supports by permitting the support price to be either the 1958 level or 90 percent of new parity, whichever is lower, until 90 percent of old parity exceeds either of these levels. Voice vote. Vetoed

Special school milk program: Raised limitation on special school milk program to $80 million for 1960 and 1961. Increased to $78 million for current year. Public Law 86–163, approved August 18, 1959.

CIVIL RIGHTS

Cloture: Liberalized the cloture rule by providing that two-thirds of the Senators voting may close debate on any measure, including rule changes; and affirming the fact that the Senate is a continuing body. Final passage, 72 to 22.

Hawaii: Provided for admission of Hawaii to the Union as the 50th State. Final passage, 76 to 15. Public Law 86–3, approved March 18, 1959.

Alaska Omnibus Act: Amended various Federal laws to facilitate orderly transition from territorial to statehood status. Public Law 86–70, approved June 25, 1959.

Home rule: Provided for an elected mayor, city council, and a nonvoting delegate to the House of Representatives for the District of Columbia.

ECONOMY

Economic study: Provided $200,000 for a major study of the Nation's economy by the Joint Congressional Economic Committee. Voice vote.

Unemployment problems: Established a Commission on Unemployment Problems of 11 members, 5 to be appointed by the President and 6 by Congress, to make a study of the problems and report in 60 days. Voice vote.

Clayton Act: Amended Clayton Act to expedite procedures for enforcement by Federal Trade Commission. Public Law 86–107, approved July 23, 1959.

FOREIGN RELATIONS

World Bank and International Monetary Fund: Increased U.S. subscription to the International Monetary Fund by $1.375 billion and the World Bank by $3.175 billion. Final passage, 73 to 10. Public Law 86–48, approved June 17, 1959.

Health for peace: Authorized a $50-million-a-year program to improve health conditions through international cooperation in research, training, and planning. Final passage, 63 to 17.

Mutual security: Authorized a total of $3,543,320,000 for fiscal 1960; authorized an appropriation of $2 billion over the next 2 years for the Development Loan Fund. Established center for cultural and technical interchange between East and West in Hawaii. Final passage, 65 to 26. Public Law 86–108, approved July 24, 1959.

Inter-American Bank: Provided for U.S. membership in the Inter-American Development Bank to aid in the economic development of Latin American countries. Final passage, 89 to 3. Public Law 86–147, approved August 7, 1959.

International Wheat Agreement: Ratified an extension of the 10-year-old International Wheat Agreement for another 3 years, to July 31, 1962. Ratified, 92 to 1.

LABOR AND PUBLIC WELFARE

TV education: Authorized grants up to $1 million to each State for purchase of TV facilities and equipment upon their agreement to provide land, building, and operate and maintain an educational channel.

Railroad retirement: Provided for a 10-percent increase in benefits under Railroad Retirement and Unemployment Compensation Acts. Public Law 86–28, approved May 19, 1959.

Labor reform: Labor-Management Reporting and Disclosure Act to curb undemocratic and racketeering practices in labor unions and labor-management relations. Final passage, 90 to 1. Public Law 86–257, approved September 14, 1959.

Housing: Omnibus bill provided for a $1.375 billion housing program emphasizing low-cost housing, college housing, urban renewal, and a more realistic building program for the elderly. Final passage, 60 to 28. Conference report adopted by vote of 56 to 31. Vetoed.

A second housing bill (S. 2539) passed in 1959 was vetoed. The third housing measure, identical to S. 2539 with three exceptions, was signed into Public Law 86–372, approved September 23, 1959. Three exceptions: College classroom program, FHA insurance authorization expiration date removed, and the urban renewal capital grant authorization was modified.

Veterans' housing: Provided $100 million for direct Federal housing loans to veterans in rural and small urban areas. Permits the Administration to allow lenders to charge 5¼ percent on GI housing loans. Public Law 86–73, approved June 30, 1959.

Depressed areas: Authorized a new Federal program with an initial authorization of $389,500,000 in loans and grants for industrial redevelopment in economically depressed areas. Final passage, 49 to 46. Vetoed.

Air pollution: Extended the Federal air-pollution-control program, authorized funds, and provided for agency cooperation. Public Law 86–365, approved September 22, 1959.

Health benefits—Federal employees: Provides for a voluntary Federal civilian employees health benefit program comparable to those available to other large employee groups by authorizing payroll deductions and an equal contribution by the Government to meet the costs of the program. Final passage, 81 to 4. Public Law 86–382, approved September 28, 1959.

NATIONAL SECURITY

AEC: Authorized $165,400,000 for a total of 43 new construction projects; $7 million for the Euratom research and development program; $55,500,000 for the cooperative power reactor demonstration program; and extends for another 5 years the compulsory licensing of atomic energy. Public Law 86–50, approved June 23, 1959.

Modern Navy: Authorized $110 million construction program of modern naval vessels for 1960. Public Law 86–23, approved May 13, 1960.

Airports: Extended for 2 years, until June 30, 1961, the present Airport Act at the same level of annual authorization, $63 million for 1960 and 1961. Substitute adopted 71 to 11. Public Law 86–72, approved June 29, 1959.

NATURAL RESOURCES

TVA financing: Authorized issuance of up to $750 million revenue bonds by TVA to finance additional power facilities subject to congressional and Treasury Department approval. Public Law 86–137, approved August 6, 1959.

In 1958:

Defense reorganization: Public Law 85–559 provided for a complete reorganization of the Defense Department.

Federal-aid highways: As an antirecession measure authorized $3.2 billion in new Federal funds for highway construction and authorized a one-half of 1 percent bonus in Federal interstate highway funds to States that agree to regulate billboard advertising along the Interstate Highway System. Public Law 381.

Area redevelopment: Authorized $280 million in Federal aid for distressed areas suffering from chronic unemployment. Vetoed.

Unemployment benefits: Public Law 441 extended the duration of the period in which jobless workers could collect unemployment checks.

Social security: Increased OASI benefits by 7 percent.

Civilian Space Agency: Created a new civilian agency to direct the Nation's scientific activities relating to all nonmilitary aspects of outer space. Public Law 568.

Reciprocal trade: 4-year extension of the Reciprocal Trade Agreement Act. Public Law 686.

Postal rate-pay increases: Provided increases for first-, second-, third-, and fourth-class mail and authorized a permanent 7.5-percent pay increase for all field service employees except those in level 20. Public Law 426.

Federal pay raise: Public Law 462 provided for an average 10-percent pay increase.

National Defense Education Act: Enacted a 7-year $1 billion program of loans and grants to students and schools to enable needy students to continue their education. Public Law 864.

Emergency housing: Enacted Public Law 364 to encourage and expedite the construction and financing of a substantial number of new housing units, placing primary emphasis on expanding and amending existing programs to provide economic relief.

Aviation Agency: Created a Federal Aviation Agency to assume authority over the Nation's airways. Public Law 726.

Military pay raise: Public Law 422 increased the basic pay, by varying percentages, for nearly all military personnel with more than 2 years' service.

Superliner construction: Authorized the Federal Maritime Board to contract for the construction and sale of two superliner passenger vessels. Public Law 521.

Atomic data exchange: Public Law 479 authorized increased exchange of atomic weapons information and materials with U.S. allies.

Small business agency: Public Law 536 gave the Small Business Administration permanent status, a decided victory for small business groups.

Capital for small business: Public Law 699, the Small Business Investment Act, provided for loans to State and federally chartered small business investment companies.

Farm surplus disposal: Public Law 931 extended for 18 months, to December 31, 1959, the Agricultural Trade Development and Assistance Act and increased from $4 billion to $6.25 billion the value of surplus commodities that can be sold to friendly foreign countries for local currencies.

Alaska: After a 42-year deadlock Congress enacted Public Law 508 admitting Alaska to the Union as the 49th State.

Minerals exploration: Public Law 701 established an Office of Minerals Exploration as a permanent agency within the Department of the Interior to provide Federal assistance for mineral exploration projects.

Construction speedups: The Congress adopted two resolutions calling on the administration to accelerate all civil and military construction projects for which funds had been previously appropriated, as one means of checking a recession.

Hospital construction: Public Law 664 extended for 5 years the program of Federal grants for hospital construction.

Presidential pensions: Public Law 745 provided a pension of $25,000 a year for former Presidents and a pension of $10,000 to widows of former Presidents provided they gave up any other Federal annuity or pension.

In 1957:

Civil Rights Act: Enacted into Public Law 315 the first civil rights measure to pass the Senate since 1875: Created an executive Commission on Civil Rights; empowered the Attorney General to seek an injunction when an individual was deprived or about to be deprived of the right to vote; and allows the judge to decide whether the defendant in such cases should be tried with or without a jury.

Middle East, Public Law 7: Authorized the President to cooperate with and assist any Middle East nations desiring help in the development of economic strength, and to undertake military assistance programs with them.

Atomic Agency Treaty: Ratified the statute of International Atomic Energy Agency designed to implement the 1953 atoms-for-peace proposal.

Atomic insurance: Permitted the Government to provide indemnities of up to $500 million for damages resulting from nuclear accidents in private industry. Public Law 256.

Housing: Liberalized several existing housing programs; lowered the minimum downpayment required to buy a house with an FHA-insured mortgage and gave FNMA additional funds for buying home mortgages from banks and other private lenders to alleviate the tight-money market. Public Law 104.

Upper Colorado project: Authorized a $760-million Upper Colorado River Basin water storage and reclamation project. Public Law 485.

Health program: Enacted Public Law 911 providing traineeships for professional public health personnel; advanced training for professional nurses; practical nurse training; extension of hospital survey and construction programs; and assistance in mental health programs.

Public Law 835 provides for a 3-year $90-million construction program for health research facilities.

Flood insurance: An experimental $5 to $7.5 billion Federal flood insurance and loan contract program. Public Law 1016.

Surplus disposal: Enacted Public Law 962 increasing from $1.5 to $3 billion the limit surplus sales for foreign currencies.

Customs simplification: Enacted into law a single valuation system, based on the price at which the goods were offered for sale as exports, instead of the old system under which the higher of two values was used, the

export price or the price at which the goods would be sold in the foreign market. Public Law 927.

Seventy thousand public housing units: Provided for 35,000 units a year for 2 years but made Federal aid contingent upon a workable slum clearance program in local communities. Public Law 1020.

Atomic merchant ship: Provided for construction of an atomic-powered merchant ship to promote the peacetime application of atomic energy; estimated cost, $37 million. Public Law 848.

Mineral stockpile: Authorized a 2½-year subsidy program for mining tungsten, fluorspar, asbestos, and columbium-tantalum estimated to cost $91.7 million. Public Law 733.

Servicemen's survivors: Increased benefits for survivors of servicemen and brought 2,850,000 military personnel under social security. Public Law 881.

Water pollution: Increased Federal funds available to States for developing water pollution control programs and authorized a maximum of $500 million to assist communities to build sewage treatment works. Public Law 660.

Niagara power: Authorized power development at Niagara Falls. Public Law 159.

Deferred grazing: Enacted Public Law 25 designed to aid ranchers and farmers in drought disaster areas by paying them to keep their livestock off parched grazing lands until the drought ended and pastures reestablished.

Farm surplus disposal: Extended the Agricultural Trade Development and Assistance Act to June 30, 1958, and increased from $3 billion to $4 billion the value of surplus commodities that could be sold to friendly foreign countries.

Veterans' compensation: Public Law 168 increased compensation payments for service-connected disabilities by 10 percent with more for 100-percent disability.

Immigration laws: Public Law 316, dealing primarily with hardship cases, authorized admittance of approximately 60,000 aliens; authorized unlimited entry, for a 2-year period, of alien orphans adopted by U.S. citizens.

In 1956:

Farm bills: H.R. 12 to restore rigid supports at 90 percent of parity on basic commodities. Vetoed.

After the veto the Congress again considered and passed a farm measure retaining mandatory price supports for small feed grains and gave the Secretary of Agriculture discretionary authority to establish a two-price plan for rice; set up an acreage reserve program to compensate producers for reducing their 1956–59 crops of basic commodities below their allotments or base acreages. Public Law 540.

Social security: Liberalized the Social Security Act by reducing the retirement age for women from 65 to 62 and established a disability program at age 50; extended coverage to lawyers, dentists, chiropractors, osteopaths, veterinarians, optometrists, sharecroppers, etc. Public Law 880.

Thirteen-year highway program: Authorized the largest roadbuilding program in history: $31.5 billion in Federal-State funds over a 13-year period; also provided for new taxes scheduled to yield $14.8 billion over a 16-year period. Public Law 627.

In 1955:

Housing amendments of 1955: Authorized 45,000 public housing units through July 31, 1956, and increased the authorization for assistance in slum clearance and urban renewal by $200 million annually in fiscal 1956 and 1957. Public Law 345.

Railroad retirement: Permitted pensioners to receive both social security and railroad retirement benefit payments; and increased a spouse's maximum annuity from $40 a month to $51.80. Public Law 383.

Defense of Formosa, Pescadores: Authorized the President to use U.S. Armed Forces in defense of Formosa and the Pescadores against Chinese Communists. Public Law 4.

International finance: Authorized U.S. participation in the International Finance Corporation and authorized $35,168,000 as the U.S. subscription to IFC. IFC grew out of demands of underdeveloped countries for credits not readily obtainable from the International Bank for Reconstruction. Public Law 350.

Reciprocal trade: Extended the President's authority to negotiate reciprocal trade agreements through June 30, 1958; amended existing peril point provisions so that the Tariff Commission could recommend action if a business enterprise producing goods in commercial quantities was suffering seriously from import competition. Public Law 86.

Minimum wage increase: Raised hourly minimum wage from 75 cents to $1 effective March 1, 1956. Public Law 381.

Armed Forces pay increase: Granted to officers with more than 3 years' service and warrant officers and enlisted men with more than 2 years' service pay increases based on rank and length of service, ranging from 6 to 25 percent; provided an increase in special monthly pay for hazardous air and submarine duty; increased retired pay by 6 percent. Public Law 20.

Military reserves strengthened: Established the first comprehensive program aimed exclusively at bolstering U.S. military reserve forces; authorized up to 250,000 men between 17 and 18½ to sign up annually for 3 to 6 months' active duty providing they remain in the Ready Reserve until their service time totals 8 years. Public Law 305.

GI education: Granted full educational benefits under the Korean GI bill to members of the Armed Forces who were on active duty on or before January 31, 1955. Public Law 7.

Upper Colorado project: Authorized a $760 million Upper Colorado River Basin water storage and reclamation project. Public Law 485.

Health program: Enacted Public Law 911, providing traineeships for professional public health personnel; advanced training for professional nurses; practical nurse training; extension of hospital survey and construction programs; and assistance in mental health programs.

Public Law 835 provided for a 3-year $90 million construction program for health research facilities.

Flood insurance: An experimental $5 billion to $7.5 billion Federal flood insurance and loan contract program. Public Law 1016.

Surplus disposal: Enacted Public Law 962 increasing from $1.5 billion to $3 billion the limit surplus sales for foreign currencies.

Customs simplification: Enacted into law a single valuation system, based on the price at which the goods were offered for sale as exports, instead of the old system under which the higher of two values was used, the export price or the price at which the goods would be sold in the foreign market. Public Law 927.

Seventy thousand public housing units: Provided for 35,000 units a year for 2 years but made Federal aid contingent upon a workable slum clearance program in local communities. Public Law 1020.

Atomic merchant ship: Provided for construction of an atomic-powered merchant ship to promote the peacetime application of atomic energy; estimated cost, $37 million. Public Law 848.

Mineral stockpile: Authorized a 2½-year subsidy program for mining tungsten, fluorspar, asbestos, and columbium-tantalum; estimated to cost $91.7 million. Public Law 733.

Servicemen's survivors: Increased benefits for survivors of servicemen and brought 2,850,000 military personnel under social security. Public Law 881.

Water pollution: Increased Federal funds available to States for developing water pollution control programs and authorized a maximum of $500 million to assist communities to build sewage-treatment works. Public Law 660.

Farm loans: Public Law 878 increased from $15 million to $65 million the amount of money available for emergency loans to farmers and stockmen under the emergency Farm Loan Act.

Great Plains program: Provided a long-range program to combat soil erosion in the Great Plains area, authorizing a maximum appropriation of $150 million for the entire program and limited the payments for any one year to $25 million. Public Law 1021.

Railroad retirement: Increased benefits under the Railroad Retirement Act by 10 percent. Public Law 1013.

International Wheat Pact: Ratified a new International Wheat Agreement guaranteeing the U.S. annual sales of 132 million bushels of wheat at prices ranging from $1.50 to $2 a bushel.

Oversea voting: Urged States to enact laws permitting servicemen, Federal employees abroad, dependents of both groups, and merchant seamen to register for voting by use of uniform postcard applications and to vote by absentee ballot. Public Law 296.

Federal pay raise: Raised the pay of all but the top level of Government employees by 7.5 percent. Public Law 94.

Security Commission: Established a 12-member bipartisan commission to study the entire Government security program. Public Law 304.

Airport grants: Authorized for allocation to States and territories for airport development, Federal grants totaling $42.5 million in fiscal 1956 and $63 million in each of the 3 subsequent fiscal years, on a matching basis. Public Law 211.

Small business: Extended the life of the Small Business Agency and increased the total revolving fund from $275 million to $550 million. Public Law 268.

DIGEST OF LEGISLATION PASSED BY THE SENATE OF THE UNITED STATES

AGRICULTURE

Acreage remeasurement

S. 3117—Public Law 86-553, Approved June 30, 1960

This law provides a uniform rule for remeasuring acreage planted to allotment crops upon request of the farm operator, and provides uniform conditions under which the operator pays for remeasurement.

The remeasurement of cotton acreage is now provided for by law, which specifies that the farm operator must pay the cost of remeasurement if the planted acreage exceeds the allotted acreage. The remeasurement of acreage planted to other allotment crops is now provided for by regulation, which requires the farm operator to pay the cost only if the planted acreage exceeds the allotted acreage and the original measurement was substantially correct. Thus the farm operator is excused from paying the cost of remeasurement if the original measurement was substantially incorrect in the case of any allotted commodity except cotton. The purpose of the bill is to place cotton on the same basis as the other commodities subject to allotments.

It repeals the existing provision, which relates solely to cotton, and inserts a uniform provision for remeasurement, measurement after adjustment of excess acreage, and payment of remeasurement costs. The bill further provides that if the farmer does not take the proper steps to have the acreage measured after adjustment of excess acreage, the acreage originally measured would be considered as the acreage of the commodity for compliance purposes.

Central Bank for Cooperatives—Increase in directors

S. 2977—Public Law 86-503, Approved June 11, 1960

This law increases the number of directors of the Central Bank for Cooperatives from 7 to 13 to provide for representation of each of the 12 farm credit districts. The Central Bank for Cooperatives is a mixed ownership Government corporation, part of the Farm Credit system, which is supervised by the Farm Credit Administration. It is 1 of the 13 banks for cooperatives organized to make loans to farmers' cooperative associations. The other 12 are regional banks, 1 being located in each of the 12 Farm Credit districts. The Central Bank participates in regional bank loans, making direct loans to cooperatives only in cases where loans by regional banks are not practicable.

The terms of the present directors are to be terminated December 31, 1960, and, beginning next year, seven members will be appointed by the Governor of the Farm Credit Administration with the approval of the Federal Farm Credit Board and the remaining six will be elected by the boards of directors of designated regional banks for cooperatives. The proportion of appointed and elected directors follows generally the pattern set by existing law, varying with the Government's interest in the bank. Each of the elected directors will be elected solely by the directors of the regional bank for the district from which he comes, and cooperatives that borrow from the banks will no longer have a direct voice in the election of Central Bank directors.

Cropland—Acquisition by eminent domain

H.R. 8343—Public Law 86-423, Signed April 9, 1960

This law continues acreage allotments on lands acquired by agencies having the right of eminent domain so long as they remain leased to their former owners. It also permits Federal Government lands to be leased to their former owners for producing price-supported crops without regard to section 125 of the Soil Bank Act.

Section 125 of the Soil Bank Act prohibits leasing of Federal Government lands for producing price-supported crops in surplus supply. Thus, this measure exempts from this prohibition lands leased to their former owners.

It also gives a former owner, who is not in possession of the land at the time the bill becomes effective, 2 years instead of 1 to obtain a lease from the Government and qualify for the continuation of allotments on the land.

Extra long staple cotton

H.R. 12115—Public Law 86-566, Approved June 30, 1960

This law provides that the 1961 marketing quota for long staple cotton will be the same as the 1960 crop. This will prevent a reduction of approximately 50 percent in the acreage of long staple cotton which would otherwise take place in 1961, in spite of the fact that the United States produces less of this commodity than it consumes each year.

Hall of fame

H.R. 5789—Public Law 86-680, Approved August 31, 1960

This law confers a Federal charter on the Agricultural Hall of Fame, incorporated under the laws of Missouri on May 26, 1958, an organization designed to honor all who have made this Nation great with contributions to the advancement of agriculture.

The Hall of Fame is to be located near Kansas City, Kans., and financed entirely from private sources.

Land-grant colleges

S. 3450—Public Law 86-658, Approved July 14, 1960

This law restores the level of support by the Federal Government of teaching in the national system of land-grant colleges and universities to the level authorized by Congress in 1935. These colleges and universities, founded by Federal action, have for nearly a century carried on national functions while under the control and direction of State authorities. The land-grant institutions have received direct Federal appropriations for teaching purposes since the passage of the second Morrill Act in 1890. These funds have not been increased since 1935, although there is general agreement among all college and university officials that funds for faculty salaries are one of the most critical needs of our colleges and universities at the present time. What this bill proposes is an increase in these teaching funds simply to bring them up to the same standard, in terms of the formula on which they were appropriated in 1935, as they were 25 years ago. This would still leave the proportion of Federal funds compared to the amount appropriated by the States, far less than it was 25 years ago.

The additional funds authorized by this bill could be used only for teaching purposes and only in the subjects authorized by the original land-grant college act.

Mexican farm labor

H.R. 12759—Public Law 86-783, Approved September 14, 1960

This bill extends for 6 months (until December 31, 1961), the act under which workers are brought into the United States from Mexico under the supervision of the Department of Labor, and pursuant to an international agreement with the Government of Mexico, to assist in seasonal farm operations in the United States.

This program has been in existence since 1951 with very slight modifications and has provided seasonal help to farmers.

The present act expires on June 30, 1961, in the midst of the most active season of many crops dependent upon labor provided under the program. Its extension before the adjournment of this Congress is essential in order to permit farmers to make their 1961 production plans and obtain financing, where necessary, with assurance that labor to harvest their crops will be available. In many instances adequate financing would be impossible to obtain without this assurance.

Milk and butterfat price supports

S. 2917—Public Law 86-799, Approved September 16, 1960

This bill increases the support level for manufacturing milk and butterfat for the remainder of the current maketing year to not less than $3.22 per hundredweight for manufacturing milk and not less than 59.6 cents per pound for butterfat. The announced support prices for this year of $3.06 per hundredweight and 56.6 cents per pound are the same as have been in effect since April 1, 1958. The average price received by farmers for the marketing year ended March 31, 1960, was $3.23 for manufacturing milk and 59.5 cents for butterfat. This bill would tend to stabilize prices at about this level and prevent the possibility of a price decline which, in view of cost increases since April 1, 1958, would ruin many dairy farmers.

Multiple use

H.R. 10572—Public Law 86-517, Approved June 12, 1960

This law establishes the congressional policy that the national forests are to be administered for outdoor recreation, range, timber, watershed, and wildlife and fish purposes, naming in a single statute all of the five basic renewable surface resources. The Secretary of Agriculture is directed to administer the national forests for multiple use and sustained yield.

In administering the act, the Secretary is authorized to cooperate with State and local agencies. This expression of authority should be construed as encouragement to the Secretary to stimulate State and local agencies and others to cooperate in the development and management of the national forests, particularly where benefits to the local community and local use are great.

Pesticide chemicals

H.R. 7480—Public Law 86-537, Approved June 29, 1960

This law provides for a label on the shipping container of raw agricultural commodities declaring the presence of pesticide chemicals, but does not require a declaration while commodities are displayed for retail sale outside the shipping container.

The amendment proposed by this law to section 403 would not in any way weaken the protection which the Federal Food, Drug, and Cosmetic Act gives to consumers against the use of unsafe pesticide chemicals on raw agricultural commodities. This protection against unsafe pesticide chemicals is assured by section 408 of the act, which prohibits the use of pesticide chemicals on produce unless the Secretary of Health, Education, and Welfare has prescribed safe tolerances for these chemicals.

Rice-marketing quotas

H.R. 7889—Public Law 86-408, Approved April 4, 1960

This law provides for the proclamation of rice-marketing quotas whenever the supply exceeds normal. Existing law requires that supply exceed normal by more than 10 percent before quotas are proclaimed.

Normal supply consists of domestic consumption and exports plus a 10-percent allowance for carryover. This allowance for carryover, which amounts to about 5 million hundredweight, is adequate. Marketing quotas have been in effect for rice since 1955. Their suspension for any year could result in considerable expansion of acreage for that year followed by a difficult readjustment to quotas in the following year. This law is designed to prevent such a situation.

Special school milk program

H.R. 9331—Public Law 86-446, Approved April 29, 1960

This law increases the amount of Commodity Credit Corporation funds to be used for the special milk program from $81 to $85 million for the current fiscal year, and from $84 to $95 million for 1961 fiscal year.

Under this program, the Department of Agriculture reimburses schools participating in the school lunch program at the rate of 4 cents a half pint in excess of the half pint provided in the lunch and reimburses other schools at the rate of 3 cents a pint. Commencing with fiscal 1961, the Commodity Credit Corporation will be reimbursed by a separate and special appropriation item for any expenditure made under this act. The entire program is to expire June 30, 1961.

Tobacco price supports

H.R. 9664—Public Law 86-389, Approved February 20, 1960

To stabilize the tobacco prices for the Nation's 800,000 tobacco growers, Congress enacted this law to provide that the support level for the 1960 tobacco crop remain at the 1959 level. In 1961 and subsequent years, the support price will be adjusted from the 1959 level in direct proportion to changes in the parity index, using the previous 3-year moving average as a base.

This law ties the support price for tobacco directly to the parity index reflecting the cost of commodities farmers purchase, rather than to a 10-year moving average of farm prices.

Wheat Act of 1960

S. 2759—Passed Senate June 9, 1960. H.R. 12261 (House Companion) (Failed To Pass House June 23, 1960)

The Senate, by a vote of 44 to 36, passed this bill designed to reduce the surplus of wheat without reducing the income of wheat producers by—

Setting price supports at 75 percent of parity for 1961-63 wheat crops;

Providing for a permanent cut of 20 percent in wheat acreage allotments, beginning with the 1961 crop;

Providing payments-in-kind for the 1961, 1962, and 1963 crop years of Government-owned wheat stocks to farmers agreeing to the 20-percent acreage reduction and retiring such acreage from production or grazing; payments-in-kind would be equal to 50 percent of the average production of wheat which would have been produced on the diverted acreage;

Reducing the 15-acre exemption to the smaller of (i) 12 acres, or (ii) the highest acreage planted on the farm in any of the years 1956, 1957, 1958, 1959, or 1960;

Prohibiting price-support payments for any other commodity produced in 1961, 1962, or 1963 on a farm subject to wheat marketing quotas if the farm fails to comply with the wheat price-support requirements;

Preserving farm wheat acreage history even though no wheat is planted for the 1961, 1962, and 1963 crops;

Terminating wheat quotas and allotments and providing wheat price support at 50 percent of parity, if the 1961 wheat quota is disapproved by producers.

Wheat farmers—Allotment credit

H.R. 4874—Public Law 86-419, Signed April 9, 1960

This law provides for crediting a wheat farmer who exceeds his allotment, but fails to produce a marketing excess, with the same history he would have received if he had produced an excess and stored it to avoid penalty.

Wheat farmers who either keep within their allotments, or store any marketing excess produced by them, are credited for the purpose of future allotments with acreage history equal to their base acreage. Those who exceed their allotments and do not store their marketing excess are credited only with history equal to their allotted acreage, and lose the difference between their allotted acreage and base acreage. Thus, this law corrects this situation by providing credit for their full base acreage.

APPROPRIATIONS

Table of appropriation bills, 86th Cong., 2d sess.

Bill No.	Title	Budget estimates	Amount as passed		Final action, amount as approved	Increase or decrease compared to budget estimates

CIVIL RIGHTS

Civil Rights Act of 1960

H.R. 8601—Public Law 86-449, May 6, 1960

The Senate, by a vote of 71 to 18, passed the Civil Rights Act of 1960, after a debate which started February 15 and ended on April 8, 1960.

The major provisions are:

Obstruction of court orders: Makes it a Federal crime, punishable by a $1,000 fine and/or 1 year in prison, to use threats or force to interfere or attempt to interfere with or obstruct any Federal court order.

Antibombing: Makes it a Federal crime, punishable by a $5,000 fine and/or 5 years in prison, to flee to avoid prosecution for or testifying about the bombing of any building, structure, facility, vehicle, dwelling house, synagogue, church, religious or educational center, public or private. Makes it a Federal crime, punishable by a fine from $1,000 to $10,000 and/or 1 year to life imprisonment, depending upon the degree of injury, to (a) transport explosives in interstate or foreign commerce with intent to damage or destroy any real or personal property to interfere with its use for educational, religious, charitable, residential, business, or civic objectives or of intimidating any person pursuing such objective; and (b) intimidate by bomb threats through use of mail, telephone, telegraph, or other instrument of commerce, subject to penalty of $1,000 fine and/or 1 year in prison.

Federal election records: Requires every officer of Federal elections to preserve for 22 months from date of any general, special, or primary election all voting records, and authorizes Department of Justice to inspect the records at the principal office of the records' custodian. Violators subject to $1,000 fine and/or 1 year in prison.

Civil Rights Commission: Grants authority to each member of Commission to administer oaths and take statements of witnesses.

Education of children of military: Authorizes availability of funds to Commissioner of Education to provide local education facilities for children of military personnel in federally impacted areas.

Right to vote (referee plan): Provides that, after a court finding that a person has been deprived of his right to register or to vote because of his race or color, the court then, at the request of the Attorney General, determines whether it is an isolated instance or a pattern or practice in a given area. If the court finds such pattern or practice, the persons affected apply for and

will be entitled to a hearing within 10 days for an order declaring him qualified to vote (until the violation ceases), provided he can prove he is qualified under State law to vote, that since the court finding he has again been denied the right to register, or found not qualified to vote under color of law. Authorizes the court to appoint voting referees from qualified voters in the judicial district to receive the applications, to take evidence, and to report to the court on the applicant's qualifications. In a voting referee proceeding, the applicant shall be heard ex parte at such times and places as the court shall direct.

In the case of an application filed 20 or more days prior to an election which is undetermined by time of election, the court shall issue an order authorizing the applicant to vote provisionally provided he is qualified to vote under State law. Applications filed within 20 days prior to an election, the court, in its discretion, may make such provisional voting order. In either case the order shall provide for impounding the ballot pending determination of the application.

Provides that the State may be sued jointly or severally for violations under this act.

Constitutional amendment—House vacancies, poll tax, District of Columbia right to vote

Senate Joint Resolution 39—Before States for Ratification

This resolution as passed by the Senate would have amended the Constitution (after ratification by three-fourths of the States) to—

1. Grant to State Governors the power to fill vacancies in the House if more than 50 percent of its membership were killed in an atomic attack or other disaster.

2. Abolish the poll tax as a prerequisite to voting in a national election.

3. Provide the residents of the District of Columbia with the right to vote for President and Vice President, and nonvoting representation in the House of Representatives.

However, as returned by the House, it contained only one phase of the original resolution and it was reduced in scope. As amended by the House and adopted by the Senate, the resolution eliminates completely the provisions for District of Columbia representation in the House and provides for representation of three in the electoral college. When ratified by three-fourths of the States, within 7 years, the citizens of the District of Columbia will then have the privilege of voting for President and Vice President.

Hawaiian omnibus bill

H.R. 11602—Public Law 86–624, Approved July 12, 1960

The Hawaiian omnibus bill is a measure necessary to make complete and perfect the admission of Hawaii into the Union on a free and equal footing with the other 49 States. It amends a number of acts of Congress, some merely technically, such as changing the phraseology in a statute from "Territory of Hawaii" to "State of Hawaii." Other Federal laws are amended substantively, primarily to equalize Federal activities in the new State, especially with respect to grants-in-aid programs.

A similar omnibus law, gathering up the lose ends, so to speak, of transition from territorial status to statehood was enacted with regard to Alaska last year in the first session of this Congress (Public Law 86–70).

DEFENSE

AEC authorization

H.R. 11713—Public Law 86–457, Approved May 13, 1960

Authorizes $211,476,000 to be appropriated to the Atomic Energy Commission for fiscal 1961 for new construction projects (the administration requested $293,876,000 to cover high energy physics projects, principally the Stanford linear electron accelerator).

Limits project starts to those where the estimated cost does not exceed by more than 25 percent the estimated cost as authorized.

Authorizes to be appropriated funds for advance planning, construction, design, and architectural services in connection with projects which are not otherwise authorized by law, and AEC is authorized to use funds currently or otherwise available to it.

Authorizes funds to restore or to replace plants or facilities destroyed or otherwise seriously damaged.

Authorizes AEC to continue to use funds for projects which have been authorized by Congress in prior years.

Flight instruction

H.R. 11787—Public Law 86–597, Approved July 7, 1960

This law extends for 4 years the authority for flight instruction for members of the Reserve Officers' Training Corps.

Public Law 879, of the 84th Congress, authorized flight training in the ROTC programs of the Army, the Navy, and the Air Force. This authority was intended to attract more qualified young men to apply for flying spaces in the advanced ROTC course, to detect those who would later fail to complete pilot training after having been commissioned for that purpose, and to motivate more young Americans to become career flying officers. The original authority was for a period of 4 years and, unless extended, the authority would expire on August 1, 1960.

The Departments of the Army and the Air Force have participated in the ROTC flight instruction program since fiscal year 1957. The Department of the Navy established the program at two schools, but discontinued the program in fiscal year 1959. The Navy, however, desires to have continued authority to participate in future training.

The flight instruction program provides for approximately 70 hours of instruction—35 flight and 35 ground. The military departments contract with participating colleges and universities to provide for flight instruction. The training is offered during the senior year of the ROTC cadets.

Freedom Commission

S. 1689—Passed Senate August 31, 1960

This measure establishes a Freedom Commission—a commission which, in turn, will establish a Freedom Academy. The Commission and Academy are the organizational means to meet our cold-war development and training needs to—

Carry on research with a view to developing an integrated operational science for our side which will meet the entire Soviet political-economic attack and work toward our national objectives in a systematic manner, utilizing all potential means in the public and private sectors which are in accord with the ethics of free men faced with a Soviet-type challenge.

Train Government personnel, private citizens and foreign students in this science.

The Commission is to be composed of six full-time members and a chairman, to be appointed by the President and confirmed by the Senate. The members are to serve for staggered times of 6 years; and no more than four, including the Chairman, may be members of any one political party. The Chairman is to serve at the pleasure of the President.

Military Construction Authorization Act of 1960

H.R. 10777—Public Law 86–500, Approved June 8, 1960

To strengthen and expand our vital defenses, this law provides construction and related authority for the military departments, within and outside the United States, as well as authority for construction of facilities for the Reserve components, totaling $1,185,320,000 for fiscal 1961. This includes $1,074,554,000 in new authorizations and $110,766,000 for deficiency authorizations on projects started in previous years.

Funds authorized were:

Air Force	$727,305,000
Army	143,561,000
Defense Department	20,000,000
Navy	127,566,000
Deficiencies	109,983,000
Reserve components	56,122,000
Reserve deficiencies	783,000

Naval vessels—Construction

H.R. 10747—Public Law 86–471, Approved May 14, 1960

This law authorizes the construction of 8,000 tons of amphibious warfare vessels and landing craft, 4,000 tons of patrol vessels, and 20,000 tons of auxiliary vessels.

The vessels to be constructed are:

Amphibious transport, dock	1
Escort vessels	2
Fast combat support ship	1

The Navy's shipbuilding and conversion program for fiscal 1961 involves 35 ships and 22 craft, which is a step toward continued development and modernization to enable it to discharge its assigned missions in national defense.

Reserve components

H.R. 5132—Passed Senate, Amended, August 31, 1960

This bill provides an improved status for members of the Reserve components on active duty with the Armed Forces by authorizing an increase in payments to Reserve members who are involuntarily released to inactive duty.

Stockpile rubber—Disposal

House Concurrent Resolution 582—Passed House March 30 and Senate May 4, 1960

This resolution grants congressional consent to disposal of 470,000 long tons of natural rubber from the national stockpile.

The Strategic and Critical Materials Stockpiling Act authorizes the Director of the Office of Civil and Defense Mobilization to determine quantities of strategic and critical materials that should be stockpiled and to dispose of any materials no longer needed because of revised determinations of requirements.

The act further provides that material in the stockpile may not be disposed of without the express approval of Congress except when the revised determination is because of obsolescence. The revised determination of stockpiling objectives for rubber is not because of obsolescence; hence congressional approval was required before disposal.

UMT—Amendment

H.R. 5040—Public Law 86–632, Approved July 12, 1960

This law is designed (1) to extend to members of the National Guard who perform 3 to 6 months active duty for training the same reemployment rights available to members of the Ready Reserve performing the same type and length of training; and (2) to adjust the time period within which leave-of-absence rights must be asserted after the performance of inactive duty for training, active duty for training other than an initial period of 6 months of active duty for training, and after being examined for induction.

DISTRICT OF COLUMBIA

Alcoholic Beverage Control Act

S. 3258—Passed Senate August 30, 1960

This bill amends the District of Columbia Alcoholic Beverage Control Act to provide for payment of District of Columbia alcoholic beverage taxes (other than wine and beer) by means of a reporting or affidavit method in lieu of the present tax stamp method.

The reporting method has always been used in the District for the collection of

taxes on beer and, since the latter part of 1958, the collection of taxes on wine has been by the reporting method. In other words, this bill provides for the payment of the tax on spirits by a monthly reporting system in precisely the same manner as is now provided for beer and wine.

Alien income tax

S. 2954—Public Law 86–522, Approved June 27, 1960

This measure amends the District of Columbia Income and Franchise Tax Act of 1947 to exempt from the income tax compensation paid to alien employees by certain international organizations.

This amendment applies only to taxable years beginning after December 31, 1960.

Annuity contracts

H.R. 10964—Public Law 86–520, Approved June 12, 1960

This law requires District of Columbia life insurance companies to maintain a separate account for funds received in connection with variable annuity contracts, and gives the Superintendent of Insurance more detailed authority to regulate these accounts. It authorizes him to refuse to allow any life insurance company, whether or not incorporated in the District of Columbia, to issue variable annuity contracts if he believes that the company does not satisfy the required tests. It also permits life insurance companies issuing variable annuity contracts to invest a greater percentage of the assets held in separate accounts in common and preferred stocks and corporate bonds.

The variable annuity contract is a recent insurance innovation providing for payments to the annuitant which vary directly according to the investment experience of the insurance company.

Car sales—Finance charges

H.R. 10683—Public Law 86–431, Approved April 22, 1960

This law provides for regulating finance charges for retail installment sales of motor vehicles in the District of Columbia to halt the present trend of some "overcharging" of consumers. Testimony on the measure disclosed that charges frequently ran to 49 percent or more of the amount being financed.

Under this measure these finance charges cannot exceed the larger of $25 or from $8 to $16 a $100 per year depending on whether the vehicle is new or used.

The measure also provides that the maximum finance charge for a period less or greater than 12 months or for amounts less or greater than $100 must be decreased or increased proportionately.

The District Commissioners are authorized to require dealers and persons licensed to engage in the business of purchasing retail installment sales contracts for motor vehicles, bonds or other security which would be conditioned on observing laws and regulations in force in the District applicable to such a business.

Requires licensed dealers and finance companies to carry public liability or property damage insurance or both.

Violators of any provision of this act may be fined up to $500 and/or imprisoned up to 6 months.

Civil Defense Act strengthened

S. 2446—Passed Senate April 11, 1960. Referred to House District Committee April 12, 1960

To strengthen and increase the effectiveness of the civil defense program in the District of Columbia, this measure makes numerous changes in the Civil Defense Act of 1950, so that it will more adequately meet the needs of the District relative to planning, training, and preparation for civil defense in case of an attack, and for the exercise of emergency powers after an attack or in case a major disaster should occur in the District.

Civil War Centennial Commission

S. 3835—Public Law 86–737, Approved September 8, 1960

The purpose of this bill is to provide the necessary authorization to empower the District of Columbia Civil War Centennial Commission and the Commissioners of the District of Columbia to carry out appropriate civic programs commemorating the 100th anniversary of the Civil War, and to authorize appropriations necessary to carry out programs.

Court fees

S. 3194—Passed Senate June 8, 1960. Referred to House District Committee June 9, 1960

This bill exempts the District of Columbia from paying fees as, for example, a fee for a certified copy of a judgment, in any of the courts of the District of Columbia.

D.C. Transit

H.R. 11135—Public Law 86–669, Approved July 14, 1960

This law is to aid in the development of an improved transportation system for the District of Columbia, and is to provide for coordinating transportation with other public facilities. The bill establishes a Federal agency to be called the National Capital Transportation Agency. This Agency is to prepare a transit development program for the National Capital region and, upon the enactment of further authorizing legislation, to acquire land for transit use, to construct transit facilities, and to operate transit service.

The law also gives advance consent to negotiating an interstate compact to establish an organization which will succeed the Federal Agency, and which may perform any other function of a regional character that may be entrusted to it by the compact.

Fire and casualty insurance

H.R. 10183—Public Law 86–526, Approved June 27, 1960

This law permits a company doing business in the District of Columbia to be treated as a stock company for purposes of fire, marine, and casualty insurance provided it was chartered as a company by a special act of the legislature of its domiciliary State prior to the effective date of the Fire and Casualty Act. It must have been doing business exclusively on the stock plan and must have maintained at all times a surplus of not less than $300,000.

Indigents—Representation in courts

H.R. 10761—Public Law 86–531, Approved June 27, 1960

This law creates a Legal Aid Agency, governed by a volunteer Board of Trustees, which would "employ" paid and volunteer attorneys to be available for assignments to represent indigents in certain cases.

Insurance corporation trustees

H.R. 8737—Public Law 86–436, Approved April 22, 1960

This law eliminates a requirement that a majority of the trustees or directors of insurance companies must be citizens of the District of Columbia which, in effect, will place them on a par with other District of Columbia corporations.

Insurance mortality tables

H.R. 10684—Public Law 86–530, Approved June 27, 1960

This law provides for the use, in connection with life insurance issued in the District of Columbia, of the most modern tables of mortality developed and recommended by the National Association of Insurance Commissioners, called the 1958 Commissioners' Standard Ordinary Mortality Table and the 1958 Commissioners' Extended Insurance Table. It also allows policies issued in the District of Columbia on female lives to give effect to the lower mortality on females by rating back to the age of the insured for not more than 3 years and makes minor corrections and clarifications in the so-called standard valuation and standard nonforfeiture provisions of the District of Columbia insurance laws.

Licenses—Learners' permits

S. 3257—Passed Senate June 8, 1960. Referred to House District Committee June 9, 1960

This bill increases the fee charged for learners' permits from $1 to $2. The increased revenue is to be used to offset the expanded cost of the traffic safety education program.

Life Insurance Act

H.R. 1844—Public Law 86–579, Approved July 5, 1960

This law amends the Life Insurance Act of the District of Columbia to broaden the permissible coverage of group life insurance contracts by—

Reducing the number of persons that a group policy must cover from 25 in the cases of employees and union members and 50 in the case of Federal employees to 10 in all cases.

Increasing the maximum amount of insurance which a member of an insured group may obtain from the present maximum of $20,000 to 150 percent of his annual salary or $40,000, whichever is less.

Permitting issuance of group life insurance policies covering members of associations formed for purposes other than obtaining group insurance and allowing all of the premiums for the insurance to be paid by the members.

Providing that spouses and minor children of group insureds may be included in the group for coverage up to one-half of the member's coverage.

Metropolitan Region Development Act

Senate Joint Resolution 42—Public Law 86–527, Approved June 27, 1960

Establishes a policy for coordinating development in the District of Columbia with the development of other areas in the Washington metropolitan region.

Major problems of concern are the water supply, sewage disposal, water pollution, and transportation.

It is anticipated that this act will have the effect of bringing Congress, the Federal Government, the District government, the States of Virginia and Maryland, and the various county and city governments into a more unified plan for future development.

Motor vehicle registration

H.R. 12563—Public Law 86–716, Approved September 6, 1960

This bill amends existing law relative to motor vehicle registration in the District of Columbia, in order to—

(1) Authorize the Board of Commissioners to charge an additional fee not to exceed 50 cents for each set of motor vehicle identification tags in the event that the Commissioners prescribe and issue tags treated with special reflective materials to increase visibility of automobile tags at night.

(2) Authorize registration fees for all motor vehicles registered in the District of Columbia, regardless of type of fuel used.

(3) Change the fees for dealers' tags from the present charge of $50 for the first three sets and $10 for each additional set to $30 for the first set and $10 for each additional set.

(4) Double the registration fees for motor vehicles propelled by fuel not subject to the regular motor vehicles fuels tax.

Public assistance

S. 2363—Passed Senate June 28, 1960. Referred to House District Committee June 29, 1960

This bill consolidates into one act present statutes granting public assistance in the

District of Columbia. At the present time public assistance is administered under the following separate laws:

Old-age assistance: An act to amend the Code of Laws for the District of Columbia in relation to providing assistance against old-age want.

Aid to the blind: An act to provide aid for needy blind persons of the District of Columbia and authorizing appropriations.

Aid to dependent children: An act to provide aid to dependent children in the District of Columbia.

Aid to the permanently and totally disabled: Based on same authority as general assistance, below.

General assistance: Authorized in recent appropriation acts for the District of Columbia; e.g., in the appropriation act for 1960, item for Department of Public Welfare includes "relief and rehabilitation of indigent residents."

Authorizes the Commissioners to establish categories of public assistance;

Makes uniform in all categories a 1-year residence requirement for public assistance eligibility. At present, old-age assistance legislation specifies 5 years of the last 9 immediately preceding filing an application for assistance; aid to blind legislation requires 1 year's residence if the applicant became blind while a resident, otherwise 5 of the last 9 years immediately preceding the application for assistance is mandatory; aid to dependent children, aid to the disabled, and general assistance categories require 1 year's residence prior to filing the application;

Makes uniform the provisions of all categories of assistance regarding the responsibility of relatives to contribute to the support of the applicant.

Permits the Commissioners of the District of Columbia to prescribe by regulation the periods of time which may elapse in each category of assistance prior to a reinvestigation of the recipient's financial and physical circumstances. Present law does not permit the flexibility in this regard desired by the Commissioners.

In addition, the legislation authorizes or accomplishes the following actions or objectives which the Commissioners under existing laws cannot perform or can perform only in part:

(1) Entering into reciprocal agreements with any State for the provision of public assistance to residents and nonresidents.

(2) Penalties for fraud in obtaining public assistance are prescribed.

(3) Authorizes the Commissioners to accept voluntary services in administering the provisions of the act.

Real property purchase

S. 1159—Public Law 86-400, Approved April 4, 1960

This law repeals a provision in the District of Columbia Alley Dwelling Act which requires the National Capital Housing Authority when buying real property to pay not more than 30 percent over and above the current assessed value of all property acquired in the square.

The Authority must purchase this property in order to carry out its statutory responsibility of providing decent, safe, and sanitary housing for families of low income in the District and, in so doing, it has experienced many difficulties because of price limitation.

Redevelopment Act

S. 3688—Public Law 86-743, Approved September 13, 1960

This bill is designed to (1) authorize the District of Columbia Redevelopment Land Agency to eliminate slums and blighted areas whether characterized by residential or nonresidential uses; (2) authorize the Commissioners of the District of Columbia to sell District-owned real property to the Redevelopment Land Agency, 30 days after notice to Congress; and (3) authorize the Commissioners to lease public space over and under District streets where they find such space is not required for public travel.

Registration of births

S. 2327—Public Law 86-524, Approved June 27, 1960

This law authorizes the Commissioners of the District of Columbia to establish rules and regulations permitting certification of given names for birth records in those cases where names have never been properly certified and where, because of death or incapacity upon the part of parents, proper certification cannot be executed. The Director of Public Health would be authorized to accept such certifications and to make appropriate entries in the official records.

Salary increases—District of Columbia firemen and policemen

H.R. 13053—Public Law 86-734, Approved September 8, 1960

Authorizes a 7.5-percent salary increase for Metropolitan policemen, firemen of the District of Columbia, U.S. Park Police, and White House Police.

The measure also authorizes FBI Director J. Edgar Hoover to retire on full salary after 30 years' service.

Salary increases—Teachers

H.R. 12993—Public Law 86-773, Approved September 13, 1960

This act provides a 7.5-percent salary increase for teachers and officials of the District school system and increases the entrance salary step of District teachers from the present $4,500 a year to $4,800 a year.

Sewer system

S. 3834—Public Law 86-711, Approved September 6, 1960

This measure:

(1) Increases the maximum amount which may be borrowed by the District of Columbia for use in constructing and improving its sanitary and combined sewerage systems from the present limit of $5 million to $32 million;

(2) Permits the District of Columbia to defer the interest and principal payments on not to exceed $10 million of the amounts borrowed, when the Secretary of the Treasury finds that the income received from charges for sewerage service attributable to sewerage flowing into the District of Columbia sanitary sewage works from the Potomac interceptor is inadequate to provide for the payment of interest or principal, or both interest and principal; and

(3) Provides that if interest and principal is deferred under these conditions, then the deferred interest and principal must be added to the sums payable to the Secretary of the Treasury in later years.

Small claims—District of Columbia municipal court

S. 3304—Passed Senate June 8, 1960. Referred to House District Committee

This bill increases to $150 (from $50) the jurisdictional amount of the municipal court of the District of Columbia. This increase will allow more litigants to take advantage of the simplified procedures in such actions.

Taxes—Refunds and overpayments

H.R. 10000—Public Law 86-528, Approved June 27, 1960

This law extends the time for filing claims for refund of overpayments of District of Columbia inheritance and estate taxes from 2 to 3 years, thus making it comparable to the 3-year period allowed for Federal estate taxes.

Teachers—Retirement

S. 2439—Public Law 86-525, Approved June 27, 1960

Permits teachers of the public schools in the District of Columbia (as defined in the act entitled "An act for the retirement of public-school teachers in the District of Columbia," approved August 7, 1946), to count as creditable service for retirement, certain periods of authorized leave without pay taken by them for educational purposes.

Temporary unemployment compensation

S. 3416—Public Law 86-739, Approved September 8, 1960

This bill provides needed authorization for appropriations and procedures to enable the District of Columbia Unemployment Compensation Board to reimburse the Treasury of the United States for certain expenditures made under the provisions of the Temporary Unemployment Compensation Act of 1958, and to avoid the necessity of increasing the Federal unemployment compensation taxes upon employers of four or more employees in the District of Columbia.

The first section of the bill provides that the Secretary of the Treasury transfer from the account of the District of Columbia in the unemployment trust fund to the United States a sum equal the amount of benefits paid in the District of Columbia based upon claims exhausted under the District of Columbia Unemployment Compensation Act.

The second section of the bill appropriates $150,000 or so much of such sum as may be necessary to pay over to the United States an amount equal to the amount of costs incurred by the District Unemployment Compensation Board in connection with its administration of the Temporary Unemployment Compensation Act of 1958. This sum is to be appropriated from the moneys credited pursuant to section 903 of the Social Security Act to the account of the District of Columbia in the unemployment trust fund in the Treasury of the United States. The bill provides that the amount appropriated be paid within 2 years from the date of enactment of the bill, and in no event later than December 1, 1963.

Section 3 of the bill establishes a temporary interest and penalty fund to pay the District's share of the administrative expenses.

Traffic violations

S. 3305—Passed Senate June 8, 1960. Referred to House District Committee June 9, 1960

This measure increases from 10 to 90 days the maximum prison term for traffic violations.

Transfer of securities

H.R. 10021—Public Law 86-584, Approved July 5, 1960

This law is to simplify and facilitate the transfer of securities to and by fiduciaries by rendering unnecessary the burdensome excess documentation required by corporations and their transfer agents under existing law.

Section 3 of the Uniform Fiduciaries Act provides that in the case of a transfer of securities by a fiduciary, a corporation or its transfer agent "is not bound to inquire into whether the fiduciary is committing a breach of his obligation as fiduciary in making the transfer, or to see to the performance of the fiduciary obligation, and is liable for registering such transfer only where registration of the transfer is made with actual knowledge that the fiduciary is committting a breach of his obligation as fiduciary in making the transfer, or with knowledge of such facts that the action in registering the transfer amounts to bad faith."

Although the clear intent of the above provision of law is to relieve a corporation

and its transfer agent from any duty to inquire into the performance by a fiduciary of the terms of his obligation, court decisions construing this language have been so broad as to the fixing of liability upon corporations and transfer agents that the latter, in order to avoid liability which might result from having knowledge imputed to them from many sources in situations where a fiduciary might be in breach of trust, have been compelled to continue the extensive documentation which the above section of the Uniform Fiduciaries Act was designed to eliminate.

Vehicle safety responsibility

S. 2131—Public Law 86-730, Approved September 8, 1960

This law amends the Motor Vehicle Safety Responsibility Act of the District of Columbia to—

Authorize the District of Columbia Commissioners to suspend automobile registrations when required reports such as reporting an accident, are not filed.

Require persons injured or damaged in an automobile accident to report their injuries or damages within 50 days to receive benefits under the act.

EDUCATION

Deaf—Teacher training

Senate Joint Resolution 127—Passed Senate May 27, 1960. Referred to House Education and Labor Committee May 31, 1960

This resolution authorizes two 10-year programs of Federal grants for training. One authorizes $1.5 million for each of the first 2 years and additional amounts as may be necessary for the 8 remaining years for grants to public and nonprofit institutions engaged in training teachers of the deaf and affiliated with institutions of higher education for teacher training purposes.

The second authorizes $2 million for each of the first 2 years and additional amounts for the 8 remaining years for grants to institutions of higher education to assist them in providing advanced training of speech pathologists and audiologists.

Under each, the grants could be used to cover training program costs, and to provide scholarships and fellowships.

The national shortage of classroom teachers of the deaf began during World War II and has become more acute each year. It is the task of the teacher of the deaf to bridge the gap between the deaf child's world of silence and the world of sound and hearing, the world of language and speech. The success with which a deaf child is able to bridge this barrier, to develop language and proportionately to minimize his great educational handicap, depends upon the skill, the understanding, and the professional training of his teacher.

Disclaimer affidavit

S. 2929—Passed Senate June 16, 1960. Referred to House Education and Labor Committee June 17, 1960

This bill repeals that portion of the National Defense Education Act which requires every student who applies for a loan under the act to sign an affidavit declaring that he does not believe in and does not support any organization that believes in the overthrow of the U.S. Government by illegal or unconstitutional methods.

Continues the requirement that the student take the usual oath or affirmation to bear true faith and allegiance to the United States, the same as any public servant.

The colleges, through their representative organizations, are virtually unanimous in opposing this provision in the National Defense Education Act. The President recommended its repeal and is supported by HEW and Bureau of the Budget.

No one objects to the principle that all Americans should be loyal citizens and should be willing to swear allegiance to our country. But the disclaimer affidavit singled out students—and only those who had to borrow money to continue their education must sign an affidavit as to their beliefs.

Twenty-one universities—among which are some of the most outstanding ones—felt so strongly about the affidavit that they refused to participate in the program. Thus, in this way we were making it more difficult to "catch up or keep up" with the reputed Russian excellence in education, science, and research. In addition, this requirement worked a great hardship on institutions from an administrative standpoint.

Educational assistance for orphans

H.R. 4306—Public Law 86-785, Approved September 14, 1960

This measure:

(1) Includes within the definition of "induction period" the earlier pre-World War II and between-war periods;

(2) Broadens the eligibility criteria to incorporate a "performance of duty" standards; and

(3) Specifies the conditions under which training by open-circuit television may be recognized.

Persons covered by the eligibility provisions of this bill would receive the type of educational assistance now provided by the War Orphans Educational Assistance Act of 1956. That act provides educational assistance to the children of veterans of World War I, World War II, or the Korean conflict who died of a service-connected disability. In general, the assistance is limited to children between 18 and 23 years of age, and the monthly allowance is $110 for a full-time course not to exceed 36 months.

Library Service Act—Extended

S. 2830—Public Law 86-679 Approved August 31, 1960

This law extends the Library Services Act to June 30, 1966, and retains the present authorization for an annual appropriation of $7.5 million. This bill does, however, repeal the provision permitting funds to carry over for an additional year.

The primary purpose of the Library Services Act is to stimulate the States to provide better public library service in rural areas. It is designed to assist in remedying a serious deficiency in the educational program of the United States. Under the act each State designates a State library extension agency which prepares and submits to the Commissioner of Education a State plan to assure the most effective use of the funds.

Each State receives a basic allotment of $40,000 while Guam and the Virgin Islands each receive $10,000. The balance of the appropriation is divided among the States on the basis of their rural population as compared with the rural population of the United States. The allotment of each State must be matched on the basis of the per capita income of the State as compared with the national per capita income.

Meteorology research

S. 1235—Passed Senate May 26, 1960. Referred to House Interstate May 27, 1960

This measure has a twofold purpose. First, it clarifies the Weather Bureau's basic authority to enter into research contracts in the various meteorological fields, and second, it authorizes the Weather Bureau to install Government telephones in private residences.

At present the only specific authority for entering into research contracts in the meteorological fields is contained in the Federal Aviation Act of 1958, which authorizes the Department of Commerce, Weather Bureau, to enter into research contracts with public and private agencies to increase the safety and efficiency of air navigation. Thus a strict interpretation of this act tends to restrict research contracts to air navigation.

On the other hand, the Weather Bureau has found that in many cases the most efficient method of accomplishing its research in a particular area of meteorological science is to have all or part of the project contracted out to private agencies such as universities, in order that their highly specialized research facilities can be used. In this way the facilities and experienced personnel are made available to the Government at far less cost than if the Weather Bureau were to attempt to perform all research at its own facilities with its own personnel.

In addition to the above, this bill authorizes the expenditure of public money for telephone services installed in private residences, for use as the Chief of Bureau may direct, in carrying into effect the basic enabling laws authorizing collection and distribution of information on weather conditions throughout the United States, its territories and possessions. These installations will be made in cases where frequent need can be shown to exist, or where isolated location prevents use of public utility communication facilities to contact meteorological personnel for reports of severe storms, floods, and to disseminate emergency weather warnings.

National Science Foundation Act—Amendment

H.R. 11985—Public Law 86-550, Approved June 29, 1960

The purpose of this law is to make "nationals" of the United States eligible for certain scholarships and graduate fellowships authorized by the National Science Foundation Act.

Under the provisions of section 10 of the National Science Foundation Act, the Foundation is authorized to award, within the limit of funds made available, scholarships and graduate fellowships for scientific studies and work in the mathematical, physical, medical, biological, engineering, and other sciences at accredited nonprofit American or foreign institutions of higher education. However, section 10 restricts such awards in that the law presently reads "Persons shall be selected for such scholarships and fellowships from among citizens of the United States."

The act amends the original National Science Foundation Act to add the words "or nationals" following the word "citizens," thereby removing the exclusion from eligibility of a small class of persons, principally the inhabitants of our territory of American Samoa, who are legally classified as American nationals. The addition of the word would appear to be in order for the law directs the Foundation to make the awards of such scholarships or fellowships to the applicants in such manner as will tend to result in a wide distribution of scholarships and fellowships "among the States, territories, possessions, and the District of Columbia."

School Assistance Act of 1960

S. 8—Passed Senate February 4, 1960, by a Vote of 51 to 34. H.R. 10128 (House bill) Passed Senate June 8, 1960. Senate requested conference June 8, 1960

The Senate, for the sixth time since 1884, passed a bill authorizing Federal financial assistance for elementary and secondary schools. The Senate approved general support measures in 1884, 1886, 1888, 1948, and 1949; however, none of these measures were acted upon by the other House. Since 1949, the primary interest has been in school construction. The Senate found, despite sustained and vigorous efforts by States and local communities to build schools and to increase teachers' salaries, that there are still serious shortages of classrooms and of teachers which required action on the part of the Federal Government.

The Senate, after more than 2 days and nights of debate, passed S. 8 by a vote of 51 to 34. The major provisions are:

Provides $1.8 billion in Federal funds, over a 2-year period, for school construction and teachers' salaries, or both.

The States have freedom of choice in using allotted funds for either school construction or teachers' salaries.

Amount of funds authorized is based on the number of school-age children multiplied by $20 year.

Grants to the States are made on the basis of number of school-age children in relation to the per capita income in that State.

Equalization formula requires States to match Federal grants on a sliding formula after the first year.

Prohibits all Federal controls.

The first day's debate was highlighted by the defeat of a Democratic-sponsored proposal to double the size of Federal support, and to use the funds to increase teachers' salaries as well as for school construction, or both. This amendment lost on a 44 to 44 tie vote and on the Dirksen motion to table the Johnson motion to reconsider the rejection vote, the Vice President voted "Yea" to support the Dirksen tabling motion. The Senate subsequently won out over Republican opposition by adopting an amendment 54 to 35 to include teachers' salaries in the proposal.

FEDERAL EMPLOYEES

Armed services—Allowances

H.R. 10068—Public Law 86–638, Approved July 12, 1960

This law equalizes travel and transportation allowances and transportation of dependents and household effects for Regular and Reserve officers separated from active duty under similar circumstances.

Under Public Law 368, 84th Congress, a Regular officer who is discharged with severance pay after having completed at least 8 years continuous active duty is entitled to select his home for the purpose of his travel allowances and the transportation of his dependents and household effects. In contrast, a Reserve officer involuntarily released to inactive duty with readjustment pay is entitled to travel allowances and transportation of his dependents and household effects only to his established home of record at the time of recall to active duty or to the place from which recalled.

This bill permits a Reserve officer who is released to inactive duty after having completed 8 years active duty to select a home for the purpose of his travel allowances and the transportation of his dependents and household effects.

Since Reserve personnel who have completed at least 8 years continuous active duty frequently decide to make their home at a place different from their home of record at the time of recall to active duty, and since this right now exists for Regular personnel released under similar circumstances, it appears there is no justification for continuing the existing disparity in the election of the place to which travel allowances are payable and to which dependents and household effects may be transported.

Armed services—Household effects

H.R. 12570—Public Law 86–637, Approved July 17, 1960

This law imposes certain statutory limitations on moving household effects and baggage of members of the uniformed services by commercial air carrier.

Under existing law there is no statutory limitation on the extent to which household effects and baggage of members of the uniformed services may be transported by commercial air carrier.

This bill, in adding new language to existing law, provides that no transportation of household effects for a member may be made by commercial air carrier where this method would result in greater overall costs, unless the transportation officer has certified that this type transportation is necessary in carrying out assigned duties or to prevent undue hardship, and that no other transportation will meet the situation requirements. The bill contains further language in the form of an exception providing that under regulations issued by the Secretary of Defense unaccompanied baggage not to exceed 1,000 pounds may be transported by commercial air carrier. The need for the exception is due to the fact that a large number of military personnel and their dependents, especially in the Air Force, are transported by air to their new duty station. Since they arrive much earlier than unaccompanied baggage traveling by slower means, there is a need that they have baggage with them sufficient to prevent any undue hardship.

Armed Forces—Notaries

H.R. 12265—Public Law 86–589, Approved July 5, 1960

The purpose of this legislation is to authorize certain persons to administer oaths and perform notarial acts for the benefit of persons serving with, employed by, or accompanying the Armed Forces outside the United States.

Under existing law, officers of the armed services are authorized to perform these acts for members of the Armed Forces wherever they may be and for all other persons subject to the Uniform Code of Military Justice who are located outside the United States.

Recent decisions of the Supreme Court have held that civilian employees of the Armed Forces and dependents of members of the Armed Forces are not subject to trial by courts-martial in time of peace for either capital or noncapital offenses, and thus doubt has arisen as to whether these persons can still be considered as persons subject to the Uniform Code of Military Justice.

This measure amends the law in such a way as to permit certain officers of the armed services to perform notarial acts and administer oaths for persons serving with, employed by, or accompanying the armed services outside the United States and outside the Canal Zone, Puerto Rico, Guam, and the Virgin Islands. In other words, the legislation amends the law so as to specifically identify the individuals who may benefit by the authority of these officers who administer oaths and perform notarial acts. This becomes particularly significant with respect to absentee ballots. Because of recent decisions of the Supreme Court it is possible that many dependents and civilian employees of the armed services may not have their ballots notarized or may not have oaths administered to them by officers of the armed services, since it may be held that they are not subject to the Code of Military Justice because of the recent Supreme Court decisions.

The State laws vary on this matter and the proposed legislation, among other things, will insure that no vote is invalidated by improper administration of the required oath.

The only present method by which a dependent or civilian employee who is now located outside the United States, and who is otherwise entitled to vote, may be sure that his ballot is properly validated is to go to the secretary of a U.S. embassy or legation, or to a consular officer of the United States. This frequently is inconvenient and time consuming.

This legislation will permit the system to be resumed which was in effect prior to the decisions of the Supreme Court with regard to the performing of notarial services by officers for civilian employees and dependents.

Armed Forces—Promotion and retirement

S. 1795—Public Law 86–616, Approved July 12, 1960

The purpose of this legislation is to improve the quality of the Regular officer corps of the Army and Air Force. It will accomplish this in two ways:

First, it will permit the Air Force, which seeks the temporary authority, and the Army, which is granted the temporary authority if it wishes to exercise it, during the next 5 years, to involuntarily retire permanent colonels and permanent lieutenant colonels in the Regular Army and Regular Air Force who have three or more times failed of selection to the next higher permanent grade. The Air Force is the only service that seeks this authority and intends to use it at this time. Upon enactment, the Air Force will establish zones to consider for elimination officers who have 20 or more years of service for retirement purposes and who have been considered for permanent promotion and have failed to be selected on three or more occasions.

This portion of the legislation is temporary and expires June 30, 1965.

Except for the first selection board which meets following the enactment of the proposed legislation, not more than 20 percent of those officers who have three or more times failed of selection to the next higher grade in the grade of colonel or lieutenant colonel may be selected for involuntary retirement. In addition, if an officer has once been considered for continuation and has been selected for continuation, he will not thereafter be subject to the provisions of this temporary authority.

The second portion of the legislation amends existing law with regard to the "show cause" procedure now in existing law applying to the Army and the Air Force under which officers who fail to meet prescribed standards, or officers who are charged with professional or moral dereliction or who are security risks, may be eliminated from the active list.

Thus this legislation authorizes temporary new elimination procedures in the Air Force which will permit the Air Force to involuntarily retire about 200 colonels and about 500 lieutenant colonels, during the next 5 years, who have failed of selection three or more times to the next higher permanent grade.

No officer will be eliminated unless he qualifies for retirement pay.

The temporary authority will expire June 30, 1965. It is also applicable to the Army, if the Army decides to utilize the authority. It is not applicable to the Navy and Marine Corps.

In 1959, the Congress enacted the so-called Hump Act, which permitted the Navy and the Marine Corps to involuntarily retire, ahead of schedule, commanders and captains, and their Marine Corps equivalents, in order to create vacancies for lieutenant commanders.

Coast Guard—Additional pay

H.R. 9921—Public Law 86–586, Approved July 5, 1960

The purpose of this legislation is to validate payments of additional pay for sea duty made prior to June 30, 1956, to enlisted members of the Coast Guard who served on vessels of less than 125 feet in length. The law further permits the refund of any repayments made by any of those men relating to payments received in the above manner, and relieve the authorized certifying officers from accountability for these payments.

Coast Guard personnel

H.R. 9449—Public Law 86–474, Approved May 14, 1960

The general purpose of this proposal is to increase the efficiency and effectiveness of the Coast Guard by improving statutes relating to Coast Guard organization, composition, and personnel administration.

It will:

Increase the present limitation of 4 years applicable to extension of enlistments to a new limitation of 6 years.

Increase the present limitation of 3,000 commissioned officer personnel to a new limitation of 3,500.

Improve the organization and composition of both the civilian teaching staff and the permanent commissioned teaching staff at the Coast Guard Academy.

Improve the organization and composition of the top command by eliminating the present statutory position of engineer in chief; eliminating the present statutory term of 4 years for the Assistant Commandant; and providing for the increased grade of admiral for an officer while serving as Commandant, and of vice admiral for an officer while serving as an Assistant Commandant.

Court-martial sentences

H.R. 12200—Public Law 86–633, Approved July 12, 1960

The purpose of this law is to provide statutory authority for the reduction to the lowest enlisted pay grade of an enlisted member convicted by court-martial, whose approved sentence includes a punitive discharge, confinement, or hard labor without confinement.

Before February 20, 1959, an enlisted member of the Armed Forces convicted by court-martial under an approved sentence that included a punitive discharge or hard labor with or without confinement was, as a result of sentence, automatically reduced to the lowest enlisted pay grade. On February 20, 1959, the Court of Military Appeals, in the case of *United States* v. *Simpson* (27 C.M.R. 303), declared the automatic reduction provisions of the "Manual" to be invalid and held that to be effective, a reduction in grade must be specifically provided in the court-martial sentence. As a result of this decision, approved courts-martial sentences that included punitive discharges, confinement, or hard labor without confinement (or combinations of these punishments), no longer resulted in automatic reduction and many enlisted members under sentence retained and continued to serve in a grade higher than the lowest enlisted grade.

On August 19, 1959, the Comptroller General issued an opinion holding that service members coming within the scope of the Simpson decision could be paid only the pay of the lowest enlisted pay grade, thus giving effect to the provisions of the "Manual for Courts-Martial" that were declared invalid by the Court of Military Appeals in the Simpson decision. The conflicting decisions have placed the Air Force and the Army in a dilemma. The Court of Military Appeals in the Simpson case held that the services had no authority automatically to reduce these persons to the lowest enlisted grade as a result of their sentence, while the Comptroller General held that such persons may be paid the pay of only the lowest enlisted grade. This bill amends the Uniform Code of Military Justice to provide, by law, what paragraph 126(e), as amended, of the "Manual for Courts-Martial" now provides by Executive order. Moreover, the bill restores to enlisted ranks the dignity and prestige historically accorded those ranks by preventing sentenced service members in confinement or awaiting punitive discharges from serving in grades above the lowest enlisted grade.

Defense of suits against Federal employees

H.R. 7577—Vetoed June 13, 1960

This bill provides a method of assuming responsibility by the Federal Government for claims and damages against its employees arising from their operation of vehicles within the scope of their Government employment.

The amendments provided that a civil action or proceeding commenced in a State court against an employee of the Government may not be removed to the district court of the United States without the consent of the plaintiff.

Differentials and allowances

H.R. 7758—Public Law 86–707, Approved September 6, 1960

The purpose of this law is to improve and strengthen Government oversea activities by establishing a uniform compensation system for all Government employees in oversea posts regardless of the agency of employment.

Federal Employees' Compensation Act Amendments of 1960

H.R. 12383—Public Law 86–767, Approved September 13, 1960

The primary purpose of this act is to correct inequities that exist in benefits paid to employees of the Federal Government, other than military personnel, who are injured in the performance of their duties and the dependents of those who died as a result of these injuries. The Federal Employees' Compensation Act has not been amended since 1949, and, as a result, the compensation paid to employees who were injured prior to 1946 is much less than the compensation for disability or death computed on the basis of present-day Federal pay scales. At the same time the rise in the cost of living has created a further inequity.

This act increases by 30 percent the wage base used to compute the amount of compensation for disability or death if the injury for which the compensation is payable occurred before January 1, 1946; increases the wage base by 20 percent if the injury occurred after December 31, 1945, but prior to January 1, 1951; and increases the wage base by 10 percent if the injury occurred after December 31, 1950, but before January 1, 1958.

It also increases the minimum amount of compensation for total disability from $112.50 to $180 per month except in cases where the monthly pay of the injured employee is less than $180, in which event—as under the act at the present time—the compensation for total disability would be equal to the full monthly pay of the injured employee.

The act also increases (1) the minimum wage base to be used in determining the amount of compensation to be paid in death cases from $150 to $240, (2) the amount available for burial expenses to the beneficiaries of an employee whose death resulted from an injury sustained in the performance of his duties from $400 to $800, (3) the maximum amount allowable for the services of an attendant in those cases where the employee is so helpless as to require such constant service from $75 to $125, and (4) the maximum allowance payable for the maintenance of an employee who is undergoing rehabilitation as directed by the Bureau of Employees' Compensation from $50 to $100.

In addition, the bill increases the benefits being paid in approximately 1,100 fatal and 200 total disability cases which arose out of various Federal emergency relief programs in operation between 1934 and 1942. The benefits presently being paid in these cases, which are governed by the provisions of the act of February 15, 1934, are pitifully small. The beneficiaries in the fatal cases, who are almost exclusively widows, most of whom are well advanced in years, now receive on an average of $30 per month, and the compensation rate in many of the total disability cases is less than $100 per month. The bill authorizes a minimum compensation rate of $100 per month for the total disability cases and compensation at the rate of $52.50 per month for widows.

Foreign Service Act amendments

S. 2633—Public Law 86–723, Approved September 8, 1960

This measure makes numerous changes in the administration of the Foreign Service of the United States and the Department of State.

Provides a new class structure for Foreign Service Staff officers and employees.

Liberalizes retirement and disability systems.

Improves recruitment and training of Foreign Service officers.

Encourages functional and geographic area specialization by such officers.

Increases by $10 million the authorization for the Foreign Service buildings fund, largely for office space for U.S. missions overseas.

Foreign Service retirement and disability system

S. 1502—Public Law 86–612, Approved July 12, 1960

This measure provides for adjustments in annuities under the Foreign Service retirement and disability system by:

Granting a 10-percent increase in annuities now being received or which will begin on or before June 30, 1962.

Providing that widow survivor annuitants who on or before June 30, 1962, are receiving a survivor annuity, receive a 10-percent increase, or so much in excess as will enable her to receive a minimum of $2,400.

These increases will begin on the first day of the first month which begins more than 30 days after enactment.

Provides for adjustments in annuities that begin after September 1, 1959 on a graduated scale.

Incentive pay

H.R. 10500—Public Law 86–635, Approved July 12, 1960

This law has two purposes: (1) to amend existing provisions regarding entitlement to incentive pay based on duty on board a submarine, to include, with respect to duty on board nuclear-powered submarines only, those periods of training and rehabilitation after assignment to the submarine (this revision is necessary for the two-crew concept now in operation for the Polaris-type vessel); and (2) to add new statutory language which entitles to incentive submarine pay, members who serve as operators or crew members of bathyscaph-type underwater research craft.

The Department of the Navy has determined that two complete crews will be necessary for the operation of each of the Polaris-type nuclear submarines. These vessels are expected to remain at sea at submerged station over long periods of time, possibly as much as 60 days. It has been determined that one crew is insufficient in terms of physical endurance to carry out the mission of these vessels. The Navy is, therefore, assigning two crews to each of these vessels as they become operational. The crew not at sea will be ashore undergoing rehabilitation and further training during the periods when the other crew is aboard the submarine at its undersea location.

The Comptroller General has ruled that an individual is not "on board" a submarine for the purpose of entitlement to incentive pay if he is absent from the submarine to which he is assigned for more than 15 days. The Navy under existing law is, therefore, confronted with the situation of where the crew not actually on board the Polaris vessel would not be entitled to submarine pay for possibly as much as 4 months out of a year. The principal purpose of this legislation is to authorize both crews of a nuclear-powered submarine to concurrently receive entitlement to incentive pay.

In order to receive entitlement to submarine pay under the terms of the bill, an individual must be assigned to the nuclear-powered vessel. Therefore, there would be no entitlement during periods of necessary schooling and training prior to assignment to the submarine.

The Navy has been experiencing difficulty in obtaining volunteers in the desired numbers for the expanding Polaris program. By removing the inequity of losing submarine pay for a substantial part of the year, it is believed that this bill should go far toward meeting its recruitment problems for submarine duty aboard the Polaris-type vessels.

Indebtedness—Enlisted men

H.R. 471—Public Law 86–511, Approved June 11, 1960

This law grants to the Secretary of the Navy similar authority to that now being exercised by the Secretary of the Air Force and the Secretary of the Army as to the remission or cancellation of enlisted member's indebtedness to the United States remaining unpaid before, or at the time of, that member's honorable discharge, if he considers it in the best interest of the United States.

Naval officers

H.R. 12415—Public Law 86–558, Approved June 30, 1960

The purpose of this legislation is to correct a technical defect in the Navy "hump" legislation enacted as Public Law 86–155.

In that public law a new definition of total commissioned service was adopted for the purpose of a temporary promotion provision applicable only to the Marine Corps. The Comptroller General ruled that this definition as a statutory matter also applies to the elimination provisions of the "hump" legislation. Because of the Comptroller's interpretation, 185 officers who have already been selected to be retired June 30, 1960, under the "hump" authority not only cannot be retired at this time, but in some cases remain on until age 62.

This bill in effect repeals section 6 of Public Law 86–155, with the result that the definition of "total commissioned service" is restored as it existed prior to the passage of this public law.

Naval Reserve Officers' Training Corps Graduates

S. 3733—Passed Senate June 28, 1960, Referred to House Armed Services June 29, 1960

The purpose of this bill is to place the Naval Reserve Officers' Training Corps (Regular) graduates in a status comparable to that of U.S. Naval Academy graduates, relative to the form of the Regular commission received by members of this corps.

These Regular graduates are those appointed as midshipmen in the Naval Reserve upon entering the NROTC as a freshman in college, and who obligate themselves to accept upon graduation an appointment in the Regular Navy or Marine Corps.

Under present law, the Regular graduates obligate themselves upon entry as a freshman to serve on duty a minimum of 3 years as a Regular officer following graduation. This period was increased administratively to 4 years several years ago for the new entering classes.

Under existing law, these graduates, before they have completed 30 months of active service, must make application for retention in active service as a Regular officer in the event that they decide to make a career in the Navy or Marine Corps. If they fail to make application, their Regular commission is terminated at the end of their 36 months of service and they serve their remaining obligation as a member of the Reserve. In effect, therefore, under existing law they must request to stay in as a Regular officer in the Navy and Marine Corps.

This measure also repeals existing provisions of law relating to application requirements to remain on active duty as a Regular officer. As a result of this bill, these officers will have to make application in order to get out of the service at the expiration of their obligated tour.

Oversea duty—Reemployment rights

H.R. 10695—Public Law 86–585, Approved July 5, 1960

This legislation takes into account the fact that the Nation's worldwide defense responsibilities are likely to continue without lessening in the foreseeable future. Because of this likelihood—and because of the vital necessity for obtaining personnel of the highest possible ability and character—this measure has been advanced to remedy a serious personnel problem which has arisen out of current provisions for civilian defense employees overseas. Under present law, they have no reemployment rights to positions in the United States upon completion of their foreign duty.

This measure is designed to remedy this by authorizing the Secretary of Defense and the Secretaries of the military departments to grant return rights to career and career-conditional civilian employees assigned to posts outside the United States. The return right would consist of a minimum guarantee to the employee that he will be placed, upon his return from overseas, in the same position he vacated to accept the foreign assignment. If his former post is no longer in existence, the employee will be placed in another position without reduction in seniority, status, or tenure.

The measure expresses the will of Congress that the military departments establish a continuing personnel program designed to rotate Defense Establishment employees between positions overseas and positions in the United States. Return rights would serve as statutory foundation for this program.

Pay raise

H.R. 9883—Public Law 86–568, Approved July 1, 1960

This measure provides a 7½-percent salary increase for employees in the judicial, legislative, and executive branches, including postal employees, scientific, professional, technical, administrative, and clerical personnel required to perform over 15,000 different occupational skills essential to the performance of the varied and farflung functions of the Government.

Gives the chief legal officers of the executive departments the same standing as assistant secretaries, with additional salary from $19,000 to $20,000.

Establishes the position of Administrative Assistant Secretary in the Department of Health, Education, and Welfare on the same basis as it exists in the other departments.

Authorizes 5 additional supergrade positions in the Interstate Commerce Commission, making a total of 25 such positions.

Per diem allowance

H.R. 5196—Passed Senate, Amended, June 30, 1960

This bill increases to $15 (from $12) the maximum per diem allowance for employees of the Government while traveling on official business and permits them to be reimbursed for parking fees if they are using a privately owned car.

It includes employees of the U.S. courts, Senators, and employees of the Senate within the provisions of this act, thus equalizing the treatment now accorded the House of Representatives and the executive branch.

Authority for establishing the per diem allowance for foreign travel is transferred from the Bureau of the Budget to the President or his delegate.

Physical examinations

H.R. 8212—Public Law 86–603, Approved July 7, 1960

This law eliminates a requirement that members of the Standby Reserve must have a physical examination every 4 years, and provides a more economical method for the administration of personnel actions affecting the Federal status of the Army National Guard and the Air National Guard of the United States.

Public Health Service Commissioned Corps Act of 1960

S. 2220—Public Law 86–415, Approved April 8, 1960

This measure more closely identifies the Public Health Service Commissioned Corps retirement system with the system applicable to military personnel by authorizing 20-year retirement and by putting career reservists under regular corps retirement system instead of civil service retirement.

Makes inapplicable to reservists, with service of from 1 to 3½ years, the present 10-percent vacancy limitation on original appointments of officers in the regular corps in the full grade or above.

Reserve Act—amendments

H.R. 8186—Public Law 86–559, Approved June 30, 1960

This law provides the necessary technical and substantive amendments to the Reserve Officer Personnel Act for promotion and elimination for members of the Reserve components of the Armed Forces.

Retired Federal Employees—Health Benefits Act

S. 2575—Public Law 86–724, Approved September 8, 1960

This bill provides former Federal employees retired prior to the effective date of the Health Benefits Act of 1959 (the first day of the first pay period which begins on or after July 1, 1960) with a health benefits program patterned after and comparable to the program which becomes available on that date to present employees and future retirees.

The conditions of eligibility for those currently retired are the same as for employees who will retire in the future; i.e., the individual must have retired on an immediate annuity with 12 or more years of service or due to disability. Also, eligible are survivor annuitants of retirees who would have been eligible in their own right as annuitants.

The contribution of the Government will be approximately 50 percent of the cost in each instance under the same conditions as enacted into law last year for current employees and future retirees. The Civil Service Commission estimates that the first-year cost to the Government will run between $15 and $20 million and will decrease each year as the number of former employees now on the retirement rolls diminishes. The effective date of the program is January 1, 1961.

Retirement Act—Members of Congress

H.R. 8241—Public Law 86–604, Approved July 7, 1960

This law removes a number of inconsistencies and corrects certain inequities in the operation of the Civil Service Retirement Act.

Present law requires 5 years of Member service for a Member of Congress to obtain initial coverage under the Retirement Act or to regain coverage previously acquired by virtue of earlier service as an employee in a position subject to the act. This quirk in the law means that a covered employee, upon his selection to Congress, loses his coverage until he completes 5 years of service as a Member. On the other hand, coverage in the case of an employee is based on any combination of 5 years of civilian service. Thus, in the case of an employee, coverage once obtained is not lost by reason of a transfer between agencies or to and from the executive and legislative branches.

The bill corrects this situation by basing coverage in all circumstances on any combination of 5 years' civilian service. Thus, if an employee with 5 years or more of service is elected to Congress, his coverage will continue without break; or for example, an employee with 4 years' service will acquire

coverage after completion of 1 year of Member service.

Present law grants retirement credit for civilian employee service performed before, but with one exception not after, Member service. The exception occurs when a former Member is reemployed in a civilian position subject to the act for a period of time sufficient to acquire title to a separate and additional employee annuity (5 years). However, without such separate employee annuity title, civilian employee service performed after leaving Congress now produces no additional retirement benefits. The bill corrects this obvious inequity by making provisions for computation or recomputation of the former Member's annuity, to include credit for any civilian service, performed subsequent to his service as a Member of Congress.

Under existing law, a retired Member who accepts appointment to a civilian position on an intermittent service or when-actually-employed basis, or on a full time or substantially full-time basis without compensation is required to forfeit his entire annuity for the full period of his appointment even though he receives only an occasional day's pay, or even none at all under a "without compensation" appointment.

The law makes provision for continuing the former Member's annuity on a proper pro rata basis in the circumstances described above but with no resulting increase in retirement benefits. During any such period or periods of reemployment on an intermittent service or when-actually-employed basis, the employing agency would be required to reduce the former Member's salary by the amount of his annuity appropriately allocable to his period or periods of reemployment. The money withheld will be returned to the retirement fund.

Retirement contributions

S. 2857—Public Law 86-622, Approved July 12, 1960

This law amends the Civil Service Retirement Act to authorize a refund of contributions in excess of an amount necessary to purchase maximum benefits payable under the act.

The Civil Service Retirement Act limits annuity payments to 80 percent of the high 5 consecutive year average salary in the case of employees and 80 percent of the final salary in the case of Members. Under present computation formulas employees attain the maximum benefit payable under the act after approximately 42 years' service and Members after approximately 32 years' service. A combination of the different types of service would result in attaining the maximum at any point between 32 and 42 years' service.

Contributions beyond such point purchase no additional annuity benefits. Accordingly, the bill provides for a refund of all retirement contributions made after the month in which an employee or Member obtained sufficient service to entitle him to the maximum benefits payable under the act. Benefits are prospective only and would be payable upon separation either on retirement or death.

Travel expense

S. 3485—Public Law 86-587, Approved July 5, 1960

The purpose of this law is to further increase the ability of the Federal Government as an employer to attract persons to Federal service in shortage occupations such as scientists and engineers. It seeks to accomplish this objective by broadening the coverage of existing law relative to payment of travel and transportation costs of certain new employees, and by making permanent the present 2-year program established by Public Law 85-749.

Public Law 85-749 provided temporary authority to the Federal Government to authorize payment of travel and moving expenses of prospective employees reporting to their first duty station in positions in the natural and mathematical sciences, engineering, architecture, and related technical positions in the continental United States and Alaska for which there is determined by the Civil Service Commission to be a manpower shortage in those skills which are critical to the national security effort.

This law (1) eliminates the restrictive categories contained in existing law by authorizing payment of travel and transportation costs of persons appointed to positions for which there is determined by the Civil Service Commission to be a manpower shortage; (2) authorizes payments to persons appointed to positions in the United States, rather than in the continental United States and Alaska, thereby including all 50 States and the District of Columbia; (3) authorizes payments to student trainees when promoted upon completion of college work, necessitated by the fact that, since they are already on Federal agency rolls as part-time employees, they cannot receive such payments under existing law which restricts payments to new appointees; (4) makes certain technical amendments to existing law necessitated by the addition of the student trainee category; and (5) makes the program permanent by eliminating the 2-year restriction contained in existing law, under the terms of which it would expire on August 24, 1960.

Unemployment compensation

H.R. 3472—Public Law 86-442, Approved April 22, 1960

This law repeals section 1505 of the Social Security Act so that, in determining eligibility of Federal civilian employees for unemployment compensation, their accrued annual leave will be treated in accordance with State laws.

The Federal employees' unemployment insurance program is administered by the States under agreements with the Federal Government. Under section 1505 of the Social Security Act, however, no compensation may be paid to a Federal employee during a period subsequent to separation from Federal service when he is being paid for accrued annual leave. By repealing this section, the award of unemployment compensation to a separated Federal civilian employee while he has accrued annual leave will depend upon State law.

This law also makes a technical correction in order to prevent undue hardship and injustice. Present law provides that a quarter of coverage under OASI is based on the quarter in which wages are paid. Originally Congress provided that coverage should be based on the period when the work was performed, and the retirement test is still based on this concept. Thus this bill qualifies for social security benefits certain workers who have worked in covered employment for the required number of quarters, but who are unable to establish such eligibility due to this method now being used by the Social Security Administration in determining the insured status on the basis of the period in which the wages were paid, instead of the periods during which the wages were earned. Limits this provision in scope to individuals who were not deceased prior to January 1, 1955, and who attained retirement age or died before January 1, 1957.

Uniformed services—Pay accounts

H.R. 9702—Public Law 86-641, Approved July 12, 1960

This law relieves the General Accounting Office of the necessity for settling pay accounts of deceased members of the uniformed services before payments can be made to surviving spouses, children, parents, or legal representatives.

Section 2771 of title 10, United States Code, authorizes a member of the Armed Forces to designate a person to receive the pay and allowances due him if he dies. This section also provides that if the member has made such a designation, the appropriate military department may make immediate and final payment to the person designated by the member. If the member has not designated a beneficiary, the payment will be made in the order listed to: (1) The surviving spouse, (2) the children, (3) the parents, (4) the legal representative of the estate, or (5) the person entitled under the law of the domicile of the deceased member. Payments to persons in these categories may be made only after settlement by the General Accounting Office. Processing settlements when the deceased member has not designated a beneficiary requires an average of approximately 55 days. The average amount due deceased persons is about $125.

Under this law, the military departments would be authorized to make final payments of pay and allowances except to a person entitled under the law of the domicile of the deceased member. This type case would be settled by the General Accounting Office, or the military departments, as authorized by the Comptroller General. In the ordinary case, payments will be made within an average of 5 or 6 days.

Wage rates, Portsmouth, N.H., Naval Shipyard

S. 3800—Passed Senate August 25, 1960; Referred to House Armed Services August 25, 1960

This bill requires the Secretary of the Navy to establish the hourly rates of pay for all per diem employees of the Portsmouth, N.H., Naval Shipyard at the same hourly rates paid to employees of similar classification at the Boston, Mass., Naval Shipyard.

FINANCE, COMMERCE, INDUSTRY

Alumina and bauxite—Duty suspension

H.R. 9307—Public Law 86-441, Approved April 22, 1960

This law continues for 2 years the suspension of duty on certain alumina and bauxite, and extends until July 16, 1960, the suspension of duty on imports of crude chicory and the reduction in duty on ground chicory.

Amorphous graphite—Duty suspension

H.R. 1217—Public Law 86-453, Approved May 13, 1960

This law suspends for 2 years the import duty on amorphous graphite or plumbago, crude or refined, which is valued at $50 a ton or less.

Amorphous graphite is used for foundry facings and in the manufacture of carbon brushes, dry-cell batteries, pencils, and paints, lubricants, and brush stock for electric motors. We have long been dependent on imports for nearly all of our requirements of natural amorphous graphite.

In recent years over 95 percent of the amorphous graphite imported originated in Canada, Ceylon, Mexico, and Norway. The major part of the Mexican deposits is owned and operated by U.S. concerns. The imports of the natural products originating in Ceylon consist of high-grade or high-quality materials which is suitable for certain strategic items required by the Air Force.

Bamboo pipestems

H.R. 10841—Public Law 86-800, Approved September 11, 1960

The purpose of this act to make duty free bamboo pipestems in whatever condition of manufacture and whether bored or unbored, when imported from other than Communist-dominated countries.

Bank mergers

S. 1062—Public Law 86-463, Approved May 13, 1960

This law prohibits mergers of federally insured banks without the approval of the appropriate Federal bank supervisory agency.

If the merger is to result in a national bank or a District of Columbia bank, approval must be obtained from the Comptroller of the Currency; if it is to result in a State bank that is a member of the Federal Reserve System, approval must be obtained from the Federal Reserve Board; if it is to result in an insured nonmember State bank, approval must be obtained from the Federal Deposit Insurance Corporation.

In acting on a merger application, the agency having jurisdiction over the transaction is required to consider the following:

The final history and condition of each of the banks involved, the adequacy of its capital structure, its future earnings prospects, the general character of its management, the convenience and needs of the community to be served, whether the bank's corporate powers are consistent with the purposes of the Federal Deposit Insurance Act, and the effect of the transaction on competition including any tendency toward monopoly.

Approval will not be given unless, after considering all factors, the agency finds the transaction to be in the public interest.

Provides that each of the three bank supervisory agencies shall include in its annual report to Congress a description of the mergers it has approved during the period covered by the report.

Bankruptcy Act Amendment

H.R. 6816—Public Law 86-519, Approved June 12, 1960

The law eliminates the requirement that bankruptcy claims be filed under oath. This amendment, recommended by the Administrative Office of the U.S. Courts, will preserve the present standing of a verified proof of claim as prima facie evidence of the validity and amount of the claim.

Bankruptcy—False financial statements

H.R. 4346—Public Law 86-621, Approved July 12, 1960

The purpose of this law is to limit the use of false financial statements as a bar to discharge in bankruptcy.

Section 14 of the Bankruptcy Act, entitled "Discharges, When Granted," now provides in c(3) that the court shall grant the discharge unless satisfied that the bankrupt has "obtained money or property on credit, or obtained an extension or renewal of credit, by making or publishing, or causing to be made or published in any manner whatsoever, a materially false statement in writing respecting his financial condition."

This law substitutes the following language: "while engaged in business as a sole proprietor, partnership, or as an executive of a corporation, obtained for such business money or property on credit or as an extension or renewal of credit by making or publishing or causing to be made or published in any manner whatsoever a materially false statement in writing respecting his financial condition or the financial condition of the partnership or corporation."

It is believed that complete denial of a discharge is too severe a penalty in the case of the individual noncommercial bankrupt. It is also a penalty which experience has shown to be subject to abuse. An unscrupulous lender armed with a false financial statement has a powerful weapon with which to intimidate a debtor into entering into an agreement in which the creditor agrees not to oppose the discharge in return for the debtor's agreement to pay the debt in full after discharge. The creditor may also accomplish his purpose of preserving his debt by not opposing the discharge and then suing in a State court on the ground that the debt is not dischargeable.

Even where the creditor has had no part in the issuance of a false financial statement, the exercise of his right to bar the discharge completely results in a windfall for other creditors who were not even aware of such a statement. Debts which are dischargeable are not discharged solely because one of many debts was induced by a false financial statement. This result is not required to protect a creditor who has relied on a false financial statement since under section 17a(2) that particular debt is not dischargeable.

Bankruptcy—Liens

H.R. 7242—Vetoed September 8, 1960

The purpose of this act is to establish priority of liens in bankruptcy as recommended by the Judicial Conference of the United States, the National Bankruptcy Conference, and the American Bankers Association.

It is the result of a careful reexamination of several provisions of the Bankruptcy Act. During the past few years the need for legislative action has been demonstrated by the development of decisional doctrine which has created serious questions relating to the position of secured creditors and the rights of the trustee.

This bill deals with two problems in the administration and distribution of a bankrupt estate. The first of these is the problem of preserving the recognized interests of security holders. The second concerns the powers of the trustee.

Bankruptcy—Notice

H.R. 7726—Public Law 86-631, Approved July 12, 1960

This law amends the Bankruptcy Act to require only that a copy of the notice of the first meeting of creditors be sent to the District Director of Internal Revenue for the district in which the court is located, and that whenever the schedules of the debtor, or the list of creditors of the debtor, or any other papers filed in the case disclose a debt to the United States acting through any department, agency, or instrumentality thereof (except for any Internal Revenue obligation payable to the Secretary of the Treasury or his delegate), a notice of the first meeting must be mailed as well to the head of such department, agency, or instrumentality.

Bankruptcy referees

H.R. 6556—Public Law 86-662, Approved July 14, 1960

This law clarifies the filing time for review of orders of referees in bankruptcy by making it clear that a petition for review must be filed within the prescribed 10-day period or within such extended time as the court may allow upon petition for extension itself filed within the 10-day period.

Casein—Suspension of import duty

H.R. 7456—Public Law 86-405, April 4, 1960

This stopgap measure extends to July 1, 1960, the suspension of import duties on casein or lactarene pending hearings on legislation providing for a longer extension. A general decline in the domestic production of casein has been shown where the general trend of imports of casein has been up for a number of years.

Casein, a product of skimmed milk, is used by the coated paper industry as an adhesive to hold coating to the paper base stock.

Casein and shoe lathes

H.R. 9862—Public Law 86-562, Approved June 30, 1960

This measure continues for 2 years until August 7, 1962, the existing suspension of duties on copying lathes used for making rough or finished shoe lasts.

It also extends to June 30, 1963, the existing suspension of import duties on casein with the requirement that the suspension not apply to sodium caseinate, sodium phospho-caseinate, of other caseinates if casein or lactarene is the component material of chief value.

Chicory—Duty suspension

H.R. 9308—Public Law 86-479, Approved June 1, 1960

Continues for 3 years, until June 30, 1963, the existing suspension of duty on crude chicory, except endive, and continues for the same period the statutory rate of duty of 2 cents a pound for chicory, ground or otherwise prepared.

Coarse wool—Suspension of import duties

H.R. 9322—Public Law 86-557, Approved June 30, 1960

This law provides for a permanent suspension of import duties on certain coarse wools imported under bond for use in the manufacture of rugs and carpets. It also adds papermakers' felts to the list of products included in the suspension.

Defense Production Act extension

H.R. 12052—Public Law 86-560, Approved June 30, 1960

Extends for 2 additional years, through June 30, 1962, the remaining powers of the President under the Defense Production Act of 1950. These include power to establish priorities for defense contracts, limited power to allocate materials for defense purposes; authority to guarantee loans made in connection with defense contracts; authority to make loans and purchases to build up our defense capacity and assure adequate supplies of defense materials; authority for businessmen to cooperate voluntarily in meeting defense needs without violating antitrust laws; and provision for establishment of a reserve of trained executives to fill Government positions in time of mobilization.

These powers are now scheduled to expire June 30, 1960. They must be extended to maintain production schedules on missiles and other defense contracts; others are needed for longer range preparedness programs; and other powers must be maintained in readiness for possible future emergencies.

The law amends the reporting requirements to permit semiannual reports on activities under the borrowing authority, instead of quarterly reports as now required.

Domestic tin

S. 1957—Passed Senate June 10, 1960. Referred to House Interior June 13, 1960

This bill is designed to encourage discovery, development, and production of domestic tin by providing for a program under the Secretary of Interior to purchase up to 10,000 long tons of domestically produced tin concentrates over a 10-year period.

Since the greatest known potential source of tin in the United States is in Alaska, it is believed that a stable going tin-producing industry in that State will largely wipe out existing unemployment and the accompanying economic distress conditions.

This measure establishes a base price of $1.40 a pound for tin produced from lode mines and $1.25 a pound for tin from placer mines, c.i.f. delivery point.

Federal Deposit Insurance assessments

H.R. 12465—Public Law 86-671, Approved July 14, 1960

To simplify the process of determining assessments paid by banks insured by FDIC, this law bases assessments on deposits shown in the call reports already required by bank supervisory officials. This, in effect, eliminates the need for banks to maintain special assessment records which will be both a time and money saver.

It provides for uniform deductions—16⅔ percent for demand deposits and 1 percent for time deposits.

It increases the amount of net assessment income after payment of all FDIC expenses and losses returned to the insured banks from 60 percent to 66⅔ percent.

Federal Reserve direct purchases

H.R. 12346—Public Law 86-567, Approved July 1, 1960

This act extends until June 30, 1962, the present authority of the Federal Reserve banks to purchase securities directly from the Treasury in amounts not to exceed $5 billion outstanding at any one time.

Up to 1935 Federal Reserve banks could purchase Government obligations either in the market or directly from the Treasury. The Banking Act of 1935, however, required that all purchases of Government securities by Federal Reserve banks be made in the open market. In 1942 the authority of the Federal Reserve banks to purchase securities directly from the Treasury was restored, but a limit of $5 billion was placed on the amount outstanding at any one time. The $5 billion authority was granted initially only through 1944, but Congress has extended it from time to time to provide continuous limited direct borrowing authority. The present authority was granted for 2 years and expired June 30, 1960.

Heptanoic acid—Duty suspension

H.R. 12659—Public Law 86-776, Approved September 13, 1960

This act suspends for 3 years the import duty on heptanoic acid. This type of acid is used in making special lubricants and brake fluids for use in military aircraft.

Holding company regulations

S. 3619—Public Law 86-746, Approved September 13, 1960

This measure provides for permanent regulation of savings and loan holding companies in order to promote and preserve local management by protecting them against encroachment by holding companies.

Public Law 374 of the 1st session of the 86th Congress established a moratorium on further acquisitions pending a survey and report by the Federal Home Loan Bank Board on the feasibility of such a move. The Board recommended permanent legislation.

Household effects—Suspension of import duties

H.R. 9881—Public Law 86-563, Approved June 30, 1960

This law extends for 2 years, until July 1, 1962, the suspension of import duties on personal and household effects brought into the United States under Government orders. During this 2-year period the departments and agencies charged with the responsibility of administering the act will be expected to prevent any possible abuses under the law. All such departments are to submit information to the appropriate congressional committees, not later than January 15, 1962, relative to the operation and administration of the act, including a statement of actions taken to improve its administration.

Local advertising charges

H.R. 12536—Public Law 86-781, Approved September 14, 1960

This bill provides that where a manufacturer, producer, or importer of articles, subject to manufacturers' excise tax, makes a separate charge for local advertising of the article, or reimburses the retailer or other distributor for part or all of his expenses for local advertising, this charge is to be excluded from the manufacturers' sales price or the price is to be readjusted for this charge. Excluding this amount from the sales price, or readjusting this price for this amount, reduces the manufacturers' excise taxes, since this price is the base for these taxes. The price exclusion, or readjustment, is limited to radio, television, and newspaper advertising, and to not more than 5 percent of the sales price, excluding local advertising charges. This amendment applies to articles sold on or after the first day of the first calendar quarter beginning more than 20 days after the date of enactment.

The act also permits taxpayers mining minerals used in making cement to make an election as to base for determining percentage depletion deduction for the years prior to 1961. It further provides that certain specified trusts to be deemed to constitute a qualified trust for tax exemptions only if it is down to the satisfaction of the Treasurer or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

Another change in tax law brought about by this legislation and effective for years after 1960, thus putting the States and taxpayers on notice, would provide for only one accrual for State taxes in any one taxable year where the State legislature has changed the accrual date, and would thus eliminate the additional deduction available under existing law.

Metal scrap

H.R. 11748—Public Law 86-606, Approved July 7, 1960

This law continues to June 30, 1961, the existing suspension of duties on metal scrap. It excludes from the suspension lead scrap, lead alloy scrap, antimonial lead scrap, scrap battery lead or plates, zinc scrap, or zinc alloy scrap, or any form of tungsten scrap, tungsten carbide scrap, or other articles of lead or tungsten imported for remanufacture by smelting.

It provides for a separate tariff classification for certain fresh or frozen coconut, and provides that tight barrelheads of softwood be imported duty free.

Old Series Currency Adjustment Act

S. 3714—Passed Senate June 28, 1960—Referred to House Banking June 30, 1960

Authorizes the Treasury to adjust its accounts on large-size currency issued by the Government before 1929 and about $12½ million in gold certificates issued between 1929 and 1934.

The Treasury and the Federal Reserve System are holding approximately $100 million in gold, silver, and other assets as security for this old currency. This includes about $61 million in gold and silver reserves held by the Treasury and about $37 million in reserves held by the Federal Reserve banks to secure Federal Reserve notes.

Thus the Treasury is authorized to transfer the amounts of this old currency from its currency accounts to the outstanding public debt, to be reported as part of the outstanding public debt in the same way Federal Reserve bank notes, national bank notes, and U.S. notes are now reported. The Federal Reserve banks would pay to the Treasury an amount sufficient to discharge their liabilities for outstanding Federal Reserve notes. These actions would make available to the Treasury for current use approximately $100 million. The availability of $100 million will reduce the Government's need to borrow this amount, which will save about $3 or $4 million in interest a year.

Any of the old notes presented for redemption would be redeemed in regular course from the general fund of the Treasury.

It also permits the Secretary of the Treasury to determine the amount of the old currency which has been destroyed or lost and to reduce amounts of this old currency outstanding on the records of the Treasury. This action would not impair the redeemability of any currency subsequently presented to the Treasury.

The Treasury is authorized to withhold from destruction one piece of each denomination of each kind of currency issued, in order to provide an historical collection of the paper currency of the United States.

Payments to Local Governments Act of 1960

S. 910—Passed Senate May 12, 1960; Referred to House Interior May 16, 1960

This measure, sponsored by 35 Senators, authorizes for a 5-year period from January 1, 1960, through December 31, 1964:

A limited program of payments in lieu of taxes on industrial or commercial real property acquired by the Federal Government after June 30, 1950.

Payments in lieu of special assessment and taxes levied after the effective date of the act in urban or suburban areas, if the assessments and taxes were also levied on real property owned by other taxable persons.

Payments in lieu of taxes on the interest of the Federal Government in real property in the custody or control of taxable persons under a lease, contract, or permit to the extent that taxes on that property are not already paid by taxable persons.

The program is to be administered by a five-member, bipartisan Federal Board for Payments to Local Governments, appointed by the President, subject to Senate confirmation.

Requires a taxing authority to file an application, specifying the Federal property involved, the basis of its claim and the period for which the claim is made—not to exceed 12 months in any single application.

Requires the Board, after determining the existence of a probable basis for the claim and holding a hearing if a basis is found to exist, to certify to the controlling Federal agency the amount of payment to be made to the local taxing authority.

Authorizes the Board to conduct a comprehensive study and make a case-by-case analysis of all phases of fiscal and related problems of local taxing authorities arising out of Federal immunity from local real and personal property taxes, including the operation of the existing program. Requires the Board to report, within 2 years following enactment, its findings and recommendations for any future legislative program.

The term "local governments" includes the District of Columbia.

Public debt—Temporary increase

S. 3714—Passed Senate June 28, 1960

Extends to June 30, 1961, a temporary increase of $8 billion in the public debt limit, making the ceiling $293 billion.

Religious items—Duty free

H.R. 4384—Passed Senate, Amended, September 1, 1960

The purpose of this act is to add certain items to the list of articles for religious purposes now permitted free entry, and to clarify and enlarge the list of organizations which may import these articles without payment of duty.

It also authorizes the Federal Government to withhold city wage taxes in cities with a population of 75,000 or more from salaries of Federal employees who live in the same State as the city withholding the tax.

Revolving fund—SBA

H.R. 11207—In Conference

This bill increases by $75 million (to $650 million) the Small Business Administration's revolving fund for its regular loan program. It provides for a wider participation by small business concerns in the subcontracting phase of Government procurement, and authorizes SBA to establish a small business subcontracting program.

It authorizes the Secretary of Commerce to publish in the Department's daily Synopsis of U.S. Government Proposed Procurements, Sales and Contract Awards, all defense procurements of $10,000 or over and all civilian procurements of $5,000 or over except those which are classified, perishable, public utilities, or emergency procurements.

It requires the Attorney General to make surveys and submit yearly reports on a Government activity which might injure small business.

RFC—Payment in lieu of taxes

H.R. 9983—Public Law 86-498, Approved June 8, 1960

This law extends for 2 years, to December 31, 1960, the period in which payments in lieu of taxes may be made to State and local taxing authorities by the Federal Government on certain real property.

The earlier law, which is extended by this one, was designed to furnish temporary relief for local taxing authorities which were under an undue and unexpected burden as the result of a transfer of taxable real property from Reconstruction Finance Corporation or its subsidiaries to another Federal Agency or Department which removed the property from taxation. It authorized payments in lieu of taxes only on property transferred by the RFC or one of its subsidiaries to another Federal Agency or Department on or after January 1, 1946, and only if title to the property had been held continuously by the United States since the transfer.

Registration and protection of trademarks

S. 2429—Passed Senate June 28, 1960; Referred to House Judiciary June 29, 1960

The purpose of this legislation is to make a number of miscellaneous clarifying and correcting amendments to the so-called Trademark Act. These amendments affect details of registration, administrative and court procedure, internal organization of the Patent Office regarding trademark matters, and refinements in language.

Securities Act—Amendments

S. 3769—Passed Senate July 2, 1960; Referred to House Interstate August 15, 1960

This measure amends the Security Act of 1933 in order to bring it up to date and to strengthen the Commission's injunctive powers and the criminal sanctions to prevent or to punish violations of the act.

S. 3770—Passed Senate July 2, 1960; Referred to House Interstate August 15, 1960

Amends the Security Exchange Act of 1934 to extend regulations over registered brokers' and dealers' margin, extension of credit, and proxy practices directly instead of indirectly. It expands the power to make rules over financial responsibility of brokers and dealers and over lending customers' securities by brokers and dealers. It expands the power to suspend trading in any registered security on an exchange and creates the power to suspend trading in the over-the-counter market.

S. 3771—Public Law 86-760, Approved September 13, 1960

Amends the Trust Indenture Act to grant the Commission additional power to exempt companies which have been unable to amend trust indentures issued for their bonds.

S. 3772—Passed Senate July 2, 1960; Passed House, Amended, August 30, 1960

Amends the Investment Company Act of 1940 to require a separate recital of policy for each fund of an open-end investment company which issues more than one series of stock; to limit investment by diversified investment companies; to require that bank custody of security of an investment company include all cash assets of the company; and to limit the equity investments of face-amount companies to prevent their obligations from becoming speculative.

S. 3773—Public Law 86-750, Approved September 13, 1960

Amends the Investment Advisers Act of 1940 to provide new grounds for disqualification of an applicant for registration; to grant new power to postpone effectiveness within certain limits; to authorize the Commission by rule to require books to be kept and reports filed; to permit periodic examinations of a registrant's books and records; to authorize the Commission to define and prescribe means to prevent fraud; and to extend criminal liability to include a willful violation of a rule or order of the Commission.

Small Business Investment Act amendments of 1960

S. 2611—Public Law 86-502, Approved June 11, 1960

The primary purpose of the Small Business Investment Act of 1958 is to make equity-type capital and long-term credit more readily available for small business concerns, through encouraging the establishment of privately owned small business investment companies. Under the 1958 act, each Small Business Investment Company must have a minimum initial paid-in capital and surplus of $300,000, of which $150,000 may be supplied by the Small Business Administration through purchase of subordinated debentures of the SBIC. SBA may also make loans to any SBIC, up to 50 percent of its capital and surplus. An SBIC can supply funds to a small business in two ways: by buying the small business concern's unsecured debentures, convertible into stock in the concern, at sound book value as determined at the time the debentures are issued; or by making term loans from 5 to 20 years.

This measure amends the 1958 act in order to remove certain obstacles which have impeded its actual intent. This amendment will open up new methods by which SBIC's may furnish equity capital to small businesses. It will allow SBIC's to furnish capital in other forms to be authorized by regulation of the Small Business Administration, such as by directly buying stock in small business concerns or by buying debentures with severable or detachable stock rights.

This law also repeals the requirement that a small business concern must purchase stock in any SBIC from which it gets equity capital. It grants the small business concern an option to buy stock in the SBIC equal to 5 percent of the capital supplied. It authorizes a bank that is a subsidiary of a holding company to invest up to 1 percent of its capital and surplus in any SBIC, which is now prohibited where the SBIC is a subsidiary of the same holding company. Another major change is that it exempts SBIC's in the District of Columbia from the District of Columbia small loan law, and extends the act to possessions of the United States such as Guam.

Sugar quotas

H.R. 12311—Public Law 86-592, Approved July 6, 1960

Extends the quota provisions of the 1948 Sugar Act through March 31, 1961.

Grants the President discretionary authority to cut the Cuban sugar quota and prohibits him from increasing Cuba's quota.

To make up for any Cuban reduction and other deficits, the President is authorized to obtain sugar from both foreign and domestic sources.

Permits redistribution of sugar assigned to Cuba, which will affect the 156,000 tons of Hawaiian and Puerto Rican sugar Cuba was to receive but, under this act, can now be redistributed to domestic beetgrowers.

Other deficits may be made up by purchase, rather than allocation, from countries having quotas of 3,000 to 10,000 tons, to the extent that their exports to the United States would be raised to 10,000 tons.

Deficits remaining after this initial distribution can, up to 15 percent, be purchased from the Philippines and the remainder from other quota countries.

Should there still be a deficiency, additional amounts can be purchased from any foreign country, regardless of quota provisions, and refined sugar could be imported if raw was not available.

At the time the President signed the bill into law, he signed a proclamation cutting Cuba's share of the 1960 U.S. market by 700,000 short tons. The United States had already certified 2,379,903 tons of Cuban sugar for entry this year, which left only 39,752 tons more to be imported in 1960—out of the original quota of 3,119,655 tons. Cuba's share will be apportioned to free-world nations and American producers.

Sugar—Dominican Republic

H.R. 13062—Passed Senate, Amended, September 1, 1960

The bill which became law on July 6, 1960, extended the Sugar Act until March 31, 1961, and delegated authority to the President to limit purchases of sugar from Cuba. This bill is an extension of the principles of that act with certain new authorizations and limitations until the close of December 31, 1961.

It would have cut the sugar quota of the Dominican Republic by 322,000 tons regardless of whether or not the Organization of American States voted economic sanctions.

Tampico fiber—Duty suspension

H.R. 9861—Public Law 86-456, Approved May 13, 1960

This measure continues until September 5, 1963, the existing suspension of duty on dressed or manufactured istle or Tampico fiber.

Istle or Tampico fiber is derived from several species of the agave plant which is indigenous to Mexico. It is one of the best known and most widely used of all vegetable brush fibers. Its principal use in the United States is in the manufacture of brushes.

At the time of the first suspension of this fiber in 1957, there was no domestic production of the raw fiber and an insignificant production of the dressed fiber from imported raw fiber, and good grades of raw fiber were in short supply. The brush industry and other importers indicated that the prices of dressed fiber had risen, with resulting increases in the cost of production and in the price of the finished product. The purpose of the suspension was to reduce the burden of the higher prices on domestic users of the fibers.

The U.S. Tariff Commission advised there was no substantial change since the original suspension.

Tanning extracts—Suspension of duty

H.R. 9820—Public Law 86-427, Approved April 22, 1960

This law extends for an additional 3 years or until September 30, 1963, the period during which certain tanning extracts may be imported free of duty and the period during which extracts of hemlock or eucalyptus suitable for use for tanning may be imported duty free.

FOREIGN RELATIONS

Alien property

S. 2634—Passed Senate May 26, 1960. Referred to House Foreign Affairs May 27, 1960

This bill permits the return of interests in certain enemy corporations vested under the International Claims Settlement Act or under the Trading With the Enemy Act to persecutees normally barred of a return because of being nationals of Bulgaria, Hungary, or Rumania, enemy countries of the United States during World War II.

Amistad Dam and Reservoir

H.R. 12263—Public Law 86-605, Approved July 7, 1960

Authorizes the conclusion of an agreement with Mexico for joint construction of the

Amistad Dam, a major international storage and conservation dam on the Rio Grande, under the terms of the Mexican Water Treaty of 1944.

The first of the three dams specified in the treaty, Falcon Dam, between Laredo and Roma, Tex., has been in operation since 1953. Experience has shown, however, that it, alone, is unable to control disastrous floods of the Rio Grande.

The Amistad site was selected after years of extensive study and exploration. Thus, this measure authorizes the conclusion of the agreement and, upon conclusion, authority is granted to conclude an agreement to construct, operate, and maintain on a self-liquidating basis a hydroelectric plant by the United States.

Operation of the dam is to be integrated with that of the Falcon Dam to provide the maximum amount of water for beneficial use in the United States. Releases of waters for domestic, municipal, industrial, and irrigation uses in the United States will be granted at the request of the State of Texas and water distribution is to be the sole responsibility of the State of Texas.

Authorizes appropriations necessary to carry out the provisions of the act.

Century 21 Exposition

S. 3532—Public Law 86-697, Approved September 2, 1960

This law authorizes the Secretary of the Treasury to strike and furnish, to the Century 21 Commission, national medals to commemorate the exposition to be held in Seattle, Wash., beginning April 21, 1962, and ending October 21, 1962.

The bill provides that not more than 500,000 medals are to be struck, and that the size of the medals authorized are to be determined by the Secretary of the Treasury and members of the Commission.

Export Control Act—Extension

H.R. 10550—Public Law 86-464, Approved May 13, 1960

This measure extends the Export Control Act of 1949 to June 30, 1962. This act, which is administered by the Secretary of Commerce by delegation from the President, authorizes the regulation of exports under standards based on national security, foreign policy, and domestic shortages.

International food for peace resolution

Senate Concurrent Resolution 116—Passed Senate August 27, 1960; Referred to House Foreign Affairs August 29, 1960

Senate Concurrent Resolution 116 expresses the support of the Congress for the continued exploration by the President with other nations for the establishment of an international food program for the purpose of furnishing food to less favorably situated peoples.

The resolution specifies that such an international food for peace program would be for—

(1) combating extreme price fluctuations in the international market in food products;

(2) alleviating famine and starvation;

(3) helping absorb temporary market surpluses of farm products; and

(4) economic and social development programs which are formulated in cooperation with appropriate international agencies.

Participation by the United States in an international food program would be contingent on appropriate statutory or other authorization.

Foreign trade

S. 1857—Public Law 86-687, Approved September 2, 1960

To promote the possibility of reestablishing the markets of Western Europe, particularly, the United Kingdom, which were lost during World War II, this measure provides for the inspection of products entering commerce and makes it unlawful for any person to ship or offer for shipment to any foreign country European-type grapes or European and Japanese-type plums unless certified that it meets minimum quality requirements established by the Secretary of Agriculture.

International Development Association Act

H.R. 11001—Public Law 86-565, Approved June 30, 1960

This law authorizes the President to accept membership for the United States in the International Development Association. The articles of agreement were approved by the Executive Directors of the International Bank for Reconstruction and Development on January 26, 1960, to be submitted to member governments of the Bank. The law authorizes appropriations by Congress totaling $320,290,000 without fiscal year limitation for the subscription of the United States to the association.

The purposes of the association are to promote economic development, increase production and thus raise standards of living in the less-developed areas of the world including within the association's membership, in particular by providing finance to meet their important development requirements on terms which are more flexible and bear less heavily on the balance of payments than those of conventional loans.

The resources of the association will be initial subscriptions of $1 billion. Voting power is roughly based upon the size of a country's initial subscription and thus upon the pattern of voting rights in the International Bank. The United States, which contributes about 32 percent of the association's total resources, will have 27.6 percent of the vote.

Requires specific congressional authorization for subscription of additional funds or gifts to the association.

Italy—Centennial anniversary

House Concurrent Resolution 225—Adopted by House and Senate

This resolution expresses as the sense of Congress that the President extend greetings from the United States to the people of Italy on the occasion of the unity of Italy centennial anniversary in March of 1961. It also provides for an official exhibit as our part in the celebration to recognize the progress and achievements of the people of Italy during the past century.

The theme of our exhibit is "Technological Developments in Industry," designed to show how technology in the United States has been made the servant of man and not his master, and that it has brought to Americans the highest standard of living the world has ever known.

Approximately 20 other nations, including Great Britain, India, the Soviet Union, and Czechoslovakia are planning large-scale exhibits. The exhibition, to be held in the city of Turin, will last 6 months and is expected to attract visitors from all over Italy and neighboring European countries.

Latin American aid

H.R. 13021—Public Law 86-735, Approved September 8, 1960

This act authorizes a loan program of $100 million to the President for Chilean reconstruction and $500 million to the Secretary of State to carry out a program for development in Latin America.

The administration indicated the $500 million authorization would be used to assist in such fields as land settlement and land utilization, housing, vocational, technical, and scientific training, and basic public facilities such as potable water systems and sewage systems.

The $100 million for Chilean reconstruction is to assist Chile in rebuilding and maintaining an economic stabilization program.

Mexico-United States interparliamentary groups

House Joint Resolution 283—Public Law 86-420, Approved April 9, 1960

To strengthen the bonds of friendship between the United States and Mexico, this resolution authorizes participation by the United States in annual parliamentary conferences with Mexico. The U.S. group is to be composed of 12 Senators appointed by the President of the Senate (4 from Senate Foreign Relations Committee), and 12 Members from the House appointed by the Speaker (4 from House Foreign Affairs Committee).

The Mexican Congress has passed similar legislation and appointed delegates to the meetings.

Mutual Security Authorization Act of 1960

H.R. 11510—Public Law 86-472, Approved May 14, 1960

This law authorizes appropriations of $1,366,200,000 for the fiscal 1961 mutual security program, which is $88,700,000 less than the President requested in his message to Congress. The bill, however, left intact previous year's authorizations for military assistance and other expenditures.

Major provisions are:

Limits military assistance to $55 million, other than training, for Latin America.

Prohibits assistance to Cuba following date of enactment (May 14, 1960) unless the President determines that the assistance is in the national and hemispheric interest of the United States.

Expresses as the sense of Congress, that assistance under the Mutual Security Act and the Agricultural Trade Development and Assistance Act of 1954 should be administered to give effect to the principles that the United States favors freedom of navigation in international waterways and economic cooperation between recipient nations.

Authorizes the State Department to submit to Congress plans for a Western Hemisphere cultural center in Puerto Rico, by January 3, 1961.

Establishes a Center for Cultural and Technical Interchange in Hawaii and authorizes necessary appropriations. (Public Law 86-678 appropriated $10 million for this project.)

Directs the President to arrange for a study of the advisability of establishing a Point Four Youth Corps, and authorizes $10,000 from technical cooperation funds to defray expenses.

Abolishes the International Development Advisory Board.

Authorizes the use of funds for the Indust Basin development under the supervision of the International Bank for Reconstruction and Development, and waives the requirement that at least 50 percent of the foreign aid goods be shipped in American vessels.

Defense support information to Congress: Requires, upon request, that information be furnished GAO and committees of Congress and, if the President forbids submission of this material, he must furnish reasons.

Development Loan Fund: Expands the purposes of the Fund to include the development of free economic institutions as well as economic resources and makes it clear that agricultural as well as industrial production is covered. Expresses as the sense of Congress that special consideration should be given to housing loans and guarantees. Continues the availability of the Fund to support sound program of economic development as well as specific development projects. Prohibits the allocation or earmarking of Development Loan Fund funds in excess of $50,000 for use in any country unless an application is received containing sufficient information and assurance to indicate that the funds will be used in an economically and technically sound manner.

Expresses as the sense of Congress that consideration should be given by the United

States to participate in an internationally financed program which would utilize foreign currencies available to the United States to preserve the cultural monuments of the upper Nile, and requests the President to submit his recommendations to Congress on or before March 1, 1961.

Palestine refugees: Authorizes an appropriation of $16.5 million for fiscal 1961 and the use of $6.5 million previously appropriated, making a total of $23 million for resettlement purposes. Directs the President to send to Congress for fiscal 1962 specific recommendations for progressive repatriation and settlement of refugees and for reducing U.S. contributions to UNRWA.

Requires an itemized public accounting by members of congressional committees and their staffs of all funds expended in connection with foreign travel.

Authorizes payment of overland freight charges on relief shipments to landlocked countries.

Permits direct barter of military materials and equipment, thus eliminating the sale of U.S. goods by the United States and purchase of similar goods from another country.

Establishes as the policy of extending loans for associations of small farm operators to strengthen the economies of underdeveloped nations, with a maximum of $25,000 for any association, and an aggregate of $10 million for all loan balances.

Directs the President to have a study made of the functions and coordination of agencies engaged in foreign economic activities with a view to simplifying and rationalizing the formulation and implementation of U.S. foreign economic policies.

	Administration request	House bill	Senate bill	Conference agreement
Defense support	$724,000,000	$675,000,000	$700,000,000	$675,000,000
Bilateral technical cooperation	172,000,000	172,000,000	172,000,000	172,000,000
U.N. technical cooperation	33,000,000	33,000,000	33,000,000	33,000,000
OAS technical cooperation	1,500,000	1,500,000	1,500,000	1,500,000
Special assistance	268,500,000	256,000,000	260,000,000	256,000,000
U.N. High Commissioner for Refugees	1,500,000	1,500,000	1,100,000	1,300,000
Escapees	3,500,000	3,500,000	3,500,000	3,500,000
U.N. Children's Fund	12,000,000	12,000,000	12,000,000	12,000,000
Palestine refugees	18,500,000	18,500,000	22,000,000	16,500,000
Ocean Freight	2,000,000	2,000,000	2,000,000	2,000,000
ICA administration	40,000,000	40,000,000	40,000,000	40,000,000
Atoms for peace	3,400,000	3,400,000	3,400,000	3,400,000
Contingency fund	175,000,000	100,000,000	155,000,000	150,000,000
Total	1,454,900,000	1,318,400,000	1,405,500,000	1,366,200,000

Mutual security contingency fund

S. 3855—Passed Senate August 19, 1960; Referred to House Foreign Affairs August 22, 1960

This act increases the authorization for the President's mutual security contingency fund by $100 million in order to meet the costs of such emergency operations as airlifting United Nations troops to the Congo.

Under the regular mutual security authorization for fiscal 1961, the administration requested $175 million for the contingency fund and the committee of conference reached the figure of $150 million.

NATO Citizens Convention

Senate Joint Resolution 170—Public Law 86–719, Approved September 7, 1960

This resolution authorizes a 20-member U.S. Citizens Commission on NATO to participate, unofficially, with similar groups from other NATO countries at a convention, and subsequent meetings, to explore the possibilities of promoting greater cooperation among the North Atlantic Treaty nations.

There is a strong feeling among NATO nations that more should be done within the alliance to counter, through political and economic measures, the increasing Soviet bloc emphasis on competition with the West. This could be accomplished under article 2 of the North Atlantic Treaty which provides for cooperation by NATO members in nonmilitary fields. By this means, the North Atlantic alliance could expand to strengthen Western unity without lessening the importance of its military aspect. This 20-member Commission will be appointed by the President of the Senate and the Speaker of the House after consultation with the Senate and House Foreign Affairs Committees.

Authorizes $300,000 appropriation to carry out the purposes of the resolution.

Pan American Union

Senate Resolution 304—Senate Adopted April 14, 1960

The Senate unanimously adopted this resolution extending greetings to the legislative bodies of each of the republics of the Western Hemisphere on the 70th anniversary of the founding of the Pan American Union on April 14, 1890.

Republic of China—Sale of ships

H.R. 8042—Public Law 86–473, Approved May 14, 1960

This law authorizes the Secretary of Commerce, within 1 year following enactment, to resell to the Government of the Republic of China any two of the four CI–SAY–1 type vessels originally contracted for sale in 1948 under the terms of the Merchant Ship Sales Act of 1946. These vessels were returned to the United States in 1950 because the Chinese Government was unable to meet the installment payments.

Under the terms of the original contract, the purchase price of the four vessels was $1,100,000 each. Before default the Chinese Government made a downpayment of $1,100,000 and an installment payment of $188,000.

This measure provides that the same statutory floor price be applied to the repurchase of any two of the four, and gives credit for the $1,288,000 plus depreciation at 3½ percent a year since default.

It is believed this sale will contribute to the economic development of the Republic of China and will serve the interests of the United States. The two vessels are for use in Chinese trade in Far East and Near East waters exclusively.

Ryukyu Islands

H.R. 1157—Public Law 86–629, Approved July 12, 1960

The purpose of this legislation is to establish a basis in law for U.S. programs to promote economic and social development in the Ryukyu Islands.

U.S. interest in the Ryukyu Islands is indicated by strategic military considerations of the highest importance. Consequently, the task of administering the islands has been assigned by the President to the Department of Defense, an assignment made necessary by the inextricable linking of civil and military functions there. In the tightly constricted area of the Ryukyus, virtually all activities and policies of the local government directly affect military planning and operations. The bill formalizes existing arrangements and provides a means for maintaining and increasing effective performance.

Ship loans—Republic of China and Canada

H.R. 9465—Public Law 86–482, Approved June 1, 1960

Authorizes the loan of one submarine to Canada for a 5-year period, and extends the loan of one destroyer to the Republic of China for an additional 5 years.

Shrimp Conservation Act

S. 2867—Passed Senate May 26, 1960; Referred to House Merchant Marine May 27, 1960

This bill implements a convention ratified by the Senate on June 4, 1959, to conserve shrimp between the United States and Cuba. A Commission for the Conservation of Shrimp in the Eastern Gulf of Mexico is to be established to carry out the objectives of the convention.

This bill authorizes the President to appoint three Commissioners to the U.S. section of the Commission, to serve at his pleasure and without compensation. One of the Commissioners is to be an official of the U.S. Government, and the other two from States which maintain a substantial shrimp fishery in the convention area.

These Commissioners are authorized to appoint an advisory committee of from 5 to 15 members, from groups participating in the fishery and from interested State agencies which operate in the convention area.

Under the terms of the convention, the Commission is to obtain scientific information regarding the abundance, life history, and ecology of stocks of shrimp in the convention area in order to determine the measures necessary for conservation.

TREATIES

Antarctic Treaty

Executive B—Ratified August 10, 1960

The Antarctic Treaty, signed December 31, 1959, by the United States and 11 other nations, including the Soviet Union, to insure a permanent use of Antarctica for peaceful purposes was ratified by a vote of 66 to 21.

The treaty dedicates the use of Antarctica to peaceful purposes only and prohibits all military operations, including the establishment of bases, maneuvers, and weapons testing, but not the use of military personnel and equipment for scientific purposes.

Provides for the complete freedom of scientific investigations in Antarctica and for the exchange of plans, personnel, and results of any scientific expeditions.

Bans nuclear explosions or the disposal of radioactive waste material in Antarctica. Authorizes any signatory nation to designate observers to carry out inspections, including aerial observations, in any part of Antarctica.

Requires periodic meetings of signatory nations to make recommendations for technical implementation of the treaty, solution of disputes, amendment of the treaty, and provides that it will enter into force when ratified by all 12 signatory states.

Educational-scientific-cultural agreement (commonly known as the Florence agreement)

Executive I—Ratified February 23, 1960, by vote of 76 to 14

This agreement and protocol of reservation on importing educational, scientific, and cultural materials, was opened for signature at Lake Success, N.Y., November 22, 1950, entered into force on May 21, 1952, and signed in behalf of the United States June 24, 1959.

It is designed to encourage the exchange of materials of a cultural, scientific, and educational nature by admitting duty free the following materials:

1. Books, publications, and documents.
2. Works of art and collectors' items.
3. Visual and auditory materials.

4. Scientific instruments or apparatus.
5. Books and other materials for the blind.
6. Certain public exhibition materials.

The protocol of reservation permits the United States, and other participants, on a reciprocal basis, to suspend any of its obligations under the agreement if any materials covered by the agreement are being imported in increased quantities and under conditions to cause or threaten serious injury to domestic producers of similar or directly competitive products.

France—Convention of Establishment

Executive G—Ratified August 17, 1960

The Senate ratified Executive G, 86th Congress, 2d session, the Convention of Establishment Between the United States and France, together with a protocol and a joint declaration, signed at Paris on November 25, 1959.

The treaty is designed to insure nondiscriminatory treatment of our businessmen in France and a guarantee that the businessmen of France will be treated equally with the United States.

The term of the convention with France is 10 years after which it can be terminated on 1 year's written notice by either party to the other.

Japan—Mutual Cooperation and Security Treaty

Executive E—Ratified June 22, 1960

This treaty of mutual cooperation and security between the United States and Japan was signed at Washington, January 19, 1960, and replaces the security pact of 1951.

This new treaty represents an affirmation by the two parties of their solemn obligations to settle their international differences in a manner consistent with the Charter of the United Nations; to broaden and strengthen economic ties; and to strengthen their capacities to resist armed attack through self-help and mutual aid. The United States and Japan are to consult together from time to time regarding the implementation of the treaty, and, at the request of either party, whenever the security of Japan or international peace and security in the Far East is threatened.

Each party recognizes that an armed attack against either party in the territories under the administration of Japan would be dangerous to its own peace and safety and declares that it would act to meet the common danger in accordance with its constitutional provisions and processes.

The United States is guaranteed the privileges of continued use of military bases and other facilities on Japanese soil. The use of these facilities and areas as well as the status of U.S. Armed Forces in Japan is to be governed by a separate agreement.

This treaty is to remain in force until the two Governments agree that the United Nations can satisfactorily maintain the peace in Japan's area; however, after 10 years, either party can give notice of termination, which would take place 1 year after notice.

The treaty went into effect late June 22, 1960, U.S. time, when the Japanese Foreign Minister and the U.S. Ambassador to Japan exchanged the instruments of ratification in Tokyo.

Mexican broadcasting agreement

Executive G—Ratified February 23, 1960, by Vote of 76 to 8

This agreement, signed at Mexico City on January 29, 1957, governs the relationship between the United States and Mexico in the use of standard broadcasting band. It will remain in force for a period of 5 years unless terminated by either Government or replaced by a new agreement. If, however, consultations over violations are unsuccessful, the agreement can be terminated 90 days after denunciation.

It provides a basic pattern by prescribing engineering standards, procedures, classes of stations, radiofrequency priorities and similar regulations.

North American regional broadcasting agreement

Executive A—Ratified February 23, 1960, by Vote of 76 to 8

This agreement, signed at Washington on November 15, 1950, is a regional agreement concerning use of radiofrequencies in the standard broadcast band between 535 and 1605 kilocycles by the participating countries.

It prescribes engineering standards, procedures, classes of stations, radiofrequency priorities and similar regulations.

Participating countries are Canada, Cuba, the Dominican Republic, the United Kingdom (for Jamaica and the Bahamas), and the United States. Provision is made for the adherence of Haiti.

This agreement remains in effect for 5 years after entry into force unless a new agreement is negotiated.

Pakistan Treaty

Executive F—Ratified August 17, 1960

The Senate ratified a Treaty of Friendship and Commerce between the United States and Pakistan, together with a protocol, signed at Washington on November 12, 1959.

The purpose of the treaty is to protect the interests of those nationals and corporate entities of the treaty parties engaged in conducting business and commercial transactions within the territory of the other party.

The United States has been trying for 11 years to negotiate such an agreement with Pakistan, but not until the present Government assumed direction of that country was it possible to do so.

The term of the treaty is 10 years after which it can be terminated on 1 year's written notice by either party to the other.

Paris Convention

Executive D—Ratified August 17, 1960

The Senate, by a unanimous vote, ratified Executive D, 86th Congress, 2d session, the Convention of Paris for the Protection of Industrial Property, signed at Lisbon on October 31, 1958, to take effect June 1, 1963.

The convention assures protection of industrial property rights of U.S. nationals abroad; namely, patents, trademarks, designs, commercial names, and related rights. Fifty countries are parties to the convention—the United States became a signatory of the original convention in 1887.

Sea law conventions

Executives J-M—Ratified May 26, 1960

These conventions are: Convention on the Territorial Sea and the Contiguous Zone; Convention on the High Seas; Convention on Fishing and Conservation of the Living Resources of the High Seas; and a Convention on the Continental Shelf.

These four conventions codify existing international law and establish additional law. They are concerned primarily with the rights and duties of states and vessels in the territorial sea, contiguous zone, and on the high seas, rights and responsibilities with regard to fishing and conservation on the high seas and formulating international law relative to the exploitation of natural resources on the Continental Shelf.

Visual education

Executive V—Ratified May 26, 1960

This treaty is designed to facilitate the international circulation of visual and auditory materials of an educational, scientific, and cultural character to promote the free flow of ideas and mutual understanding of peoples.

GENERAL GOVERNMENT

Alaska lands

S. 3545—Public Law 86-620, Approved July 12, 1960

This measure provides for the disposal of lands in Alaska by sealed competitive bids as well as by public auction. A 1929 statute granting 100,000 acres of public lands in Alaska for the support of the agricultural college and school of mines restricted sale or lease of these lands by public auction to the highest bidder. The State of Alaska believes that the sealed competitive bidding for sale or leasing of these lands will result in a higher price and thus increase the revenues in the State for educational purposes.

Antarctica Medal

H.R. 3923—Public Law 86-600, Approved July 7, 1960

This law authorizes the Secretary of Defense to issue a commemorative medal to persons who serve or who have served as members of a U.S. expedition to Antarctica between January 1, 1946, and a date to be subsequently established by the Secretary of Defense. It provides a treasured honor for those men, military and civilian, who have actively participated in expeditions in the Antarctic and experienced the hardships and hazards incident thereto.

Under the regulations which the Secretary of Defense would be authorized to prescribe, the awards should assist both the Navy and the National Science Foundation in recruitment of personnel for winter service in the Antarctic. Without the contribution of those persons who have spent time in the Antarctic under its most rigorous conditions, the results of scientific and geographic value and the grounds for U.S. territorial claims alike would be very meager. The law is intended to honor those who have made such contributions and to provide an incentive for others.

Antikickback statute

S. 3487—Public Law 86-695, Approved September 2, 1960

This bill amends the so-called Anti-Kickback Act of 1946 by extending its scope and coverage to all prime contracts with the United States which are negotiated. Under existing law, the act applies only to prime contracts which are on a cost-plus-a-fixed-fee or other cost-reimbursable basis.

The Anti-Kickback Act prohibits the payment or grant of anything of value by or on behalf of a subcontractor to an employee of a prime contractor holding a Government contract, or to an employee of a higher tier subcontractor, either as an inducement for the award of a contract or purchase order, or as an acknowledgment of a subcontract or purchase order previously awarded.

Under the act it is conclusively presumed that kickbacks are ultimately borne by the Government, and prime contractors are required to withhold from subcontractors, upon the direction of the contracting agency or the General Accounting Office, the amount of the kickback.

The act provides for both civil recovery and criminal prosecution and authorizes the General Accounting Office to inspect the plants and audit the books and records of any prime contractor or subcontractor engaged in the performance of a cost-plus-a-fixed-fee or cost-reimbursable contract to determine whether kickback payments have been made.

Changing designation of certain medals

H.R. 3291—Public Law 86-593, Approved July 6, 1960

The purpose of this law is to provide for changes in designation of the "Distinguished Service Cross" and the "Soldier's Medal" to the "Air Force Cross" and the "Airman's Medal," respectively.

The current designations of "Distinguished Service Cross" and "Soldier's Medal" identify these medals as decorations of the U.S. Army, and are essentially carryovers from the period before the Air Force was made a separate Department under the National Security Act of 1947.

Since that time, the Air Force has made several distinctive changes primarily to foster esprit de corps and increase the morale of its members. For example, in April 1952, the enlisted rank designations of private; private, first class; corporal; and sergeant were changed in the Air Force to basic airman; airman, third class; airman, second class; and airman, first class, respectively, and are equivalent to the Department of the Navy designations of apprentice seaman, seaman, and petty officer, third class.

In January 1949, the Air Force adopted the present blue uniform to identify its wearers as members of the U.S. Air Force. In November 1957, the Air Force established a distinctive Longevity Service Ribbon for wear on the Air Force uniform as a visible means of recognizing certain periods of active Federal service performed by its military members.

Clean election bill

S. 2436—Passed Senate January 25, 1960; Referred to House Administration January 26, 1960

This measure completely rewrites the Corrupt Practices Act of 1925 and would—

Increase the spending limit for candidates for Senator and Representative at Large from $25,000 to $50,000, or an amount equal to 20 cents a vote for all votes cast for the office in the preceding general election, plus 10 cents a vote for all votes over 1 million or a similar amount based on the total number of persons registered to vote;

Increase the spending limit for candidates for Representative from $5,000 to $12,500, or an amount based on the above formula;

Increase the spending limit for political committees operating in two or more States from $3 million a year to an amount equal to 20 cents a vote for the highest number of votes cast for President in any one of the preceding three elections, thus raising the annual ceiling to approximately $12 million;

Reduce the number of financial reports required of political committees from four to two in nonelection years, and substitute for one of the two extra reports required immediately prior to elections one to be filed not later than 30 days following elections;

Provide that all spending reports be filed with the Clerk of the House, Secretary of the Senate, and clerk of the U.S. district court, and require that the reports be preserved for 6 years instead of 2; make them available for public inspection within 24 hours of receipt and permit them to be photographed or copied;

Include primaries, conventions, and caucuses within the scope of the reporting requirements (rollcall vote 50 to 39);

Require intrastate as well as interstate committees to report on campaign expenditures and contributions if the committee spends over $2,500 a year to influence the election of a candidate for Federal office or President or Vice President electors (rollcall vote 53 to 37);

Require every person who makes contributions of over $100 (instead of $50) in any year directly to candidates in two or more States to file reports of his contributions (voice vote);

Limit an individual's total political contributions in any year to $10,000 and prescribes criminal penalties for violations (voice vote);

Restrict spending by candidates for President to $12 million and Vice President to $6 million (voice vote);

Eliminate the requirement for a second report following first primary if candidate must participate in a runoff, thus permitting a cumulative report following second primary (voice vote);

Make the bill effective January 1, 1961 (voice vote).

Coast and Geodetic Survey

S. 2482—Public Law 86-409, Approved April 5, 1960

Remove geographical limitations on the activities of the Coast and Geodetic Survey in connection with projects designated as essential to the national interest.

The act of Congress approved August 6, 1947, limited the Survey's activities to the United States, its territories and possessions. Recent experience in many fields of scientific endeavor in connection with military activities, particularly with regard to the exploration of outer space, and the pressing need for expanded knowledge of the ocean's depths for submarine operation and defense makes it necessary for the removal of this restriction.

Commission on noxious and obscene matters

S. 3736—Passed Senate June 30, 1960; Referred to House Education and Labor July 1, 1960

Creates a commission to explore methods of combating traffic in obscene and noxious materials.

The Commission is to be made up of persons who have knowledge of the seriousness of the problem. The Commission will study the need for any new Federal regulations as well as the general need for State laws or local ordinances on the subject.

Desert land laws

H.R. 11706—Public Law 86-552, Approved June 29, 1960

Authorizes the Secretary of the Interior to extend by not more than 3 years the time within which holders of desert land entries on public lands in the lower Palo Verde Mesa, Riverside County, Calif., may complete the reclamation and cultivation of their entries as required by the Desert Land Act. A further extension of up to 3 years is also authorized if the entryman can show before the end of the first extension that he has adequate financing to complete his project during the additional period and if other requirements are met.

In addition, the law permits the acceptance of expenditures for engineering or legal expenses, including sums paid for these purposes to an organization of entrymen, as proof of the past annual expenditures for benefit of the entries required under the Desert Land Act. The minimum amount required for proof work is $1 an acre a year.

Federal Property Act

H.R. 9541—Public Law 86-591, Approved July 5, 1960

This law authorizes the Administrator of General Services to accept funds for testing articles and commodities to aid in the development of specifications and standards. It also extends the authority of the Administrator to include testing of articles or commodities offered for lease to the Federal Government.

GSA—Special police

S. 2851—Passed Senate June 23, 1960; Referred to House Government Operations June 24, 1960

This bill amends the act of June 1, 1948, by adding a new section which would authorize the Administrator of General Services, or certain officials designated by him, to appoint employees of the GSA engaged in investigative functions, to act as nonuniformed special police. The Administrator of General Services contends that nonuniformed special police are required for protecting property under the control of the General Services Administration. These employees would be empowered to enforce Federal laws to protect persons and property, and to enforce rules and regulations issued by the General Services Administrator for protection of such property. The policemen to be designated under this bill would also be authorized to make arrests without warrant for any offense constituting a felony when committed on Government property, if such police had reasonable grounds to believe that the person to be arrested is guilty of the offense.

At present, the Administrator of GSA has authority to appoint uniformed guards as special police for the protection of Federal property. He is also authorized to appoint nonuniformed policemen to make investigations within the District of Columbia, but there is no authority for the appointment of nonuniformed police for duty outside of the District of Columbia.

Greetings to Helen Keller

Senate Resolution 336—Passed Senate June 23, 1960

The Senate unanimously adopted this resolution extending greetings to Miss Helen Keller on the occasion of her 80th birthday:

The 27th day of June 1960 marks the 80th anniversary of the birth of this most remarkable and gentle lady who is loved and respected by people throughout the world.

Miss Keller was born in Tuscumbia, Ala., and was made blind and deaf by disease while still an infant. She was imprisoned, as she later called it, in a "no world." The whole world knows of the challenging inspiring story of how she emerged into womanhood and how, through her own determination and faith, and through the patient understanding and devotion of a dedicated teacher, Miss Anne Sullivan, she won her magnificent victory over darkness and defeat.

Miss Keller's personal victory turned her life and ambitions to the service of others. As she has written:

The more we try to help each other and make life brighter, the happier we shall be.

With this philosophy as her guide, Helen Keller has for more than half a century employed the symbol of her own hope and faith to the benefit of millions of her fellow handicapped in America and throughout the world.

Idaho—100th anniversary

S. 3160—Public Law 86-696, Approved September 2, 1960

This bill authorizes the Secretary of the Treasury to strike and furnish to the Idaho Territorial Centennial Commission national medals to commemorate the 100th anniversary of the founding of the State of Idaho as a territory.

It provides that not more than 10,000 medals of either silver or bronze or both be struck. The medals are to be delivered as required by the commission in quantities of not less than 2,000 and no medals shall be made after December 31, 1963. The bill authorizes the manufacture and sale by the mint to the public of silver or bronze duplicates of this medal upon authorization from the Idaho Territorial Centennial Commission.

Indian lands

H.R. 4386—Public Law 86-634, Approved July 12, 1960

This act extends the protection of the Federal law, which now makes it unlawful to destroy or deface Government survey marks, to signs of warnings erected by Indian tribes either to mark the boundaries or their reservations or to indicate no trespassing on the reservations. In addition, the bill makes it unlawful to go upon Indian land for the purpose of hunting, trapping, or fishing without the consent, in the form of a license or permit for which a fee can be charged, by the Indian or tribe concerned.

James Madison Memorial

Senate Joint Resolution 128—Public Law 86-417, April 8, 1960

Establishes a James Madison Memorial Commission to formulate plans for a permanent

memorial to James Madison in Washington, D.C.

Jane Addams Centennial

House Joint Resolution 658—Public Law 86-698, Approved September 2, 1960

This resolution authorizes and requests the President to proclaim September 6, 1960, as a day upon which all Americans should pay honor and respect to Jane Addams, founder and leader of Chicago's Hull House.

John J. Pershing Centennial

House Joint Resolution 640—Public Law 86-483, Approved June 1, 1960

This joint resolution authorizes the President to proclaim September 13, 1960, the 100th anniversary of the birth of General of the Armies John J. Pershing, as a day upon which all Americans should pay honor to the general and the men who served under him.

John J. Pershing Memorial

S. 3901—Passed Senate August 31, 1960. Referred to House Administration August 31, 1960

Authorizes the American Battle Monuments Commission to provide for the erection of a memorial to the late John J. Pershing, General of the Armies of the United States, to be erected in accordance with the plans and design submitted by the Commission on federally owned land in the northwest section of the District of Columbia bounded on the north by Pennsylvania Avenue, on the south by E Street, on the west by 15th Street, and on the east by 14th Street.

The authority in this bill would cease to exist after 5 years unless the erection of the memorial has been begun and the Commission has determined that sufficient funds are available for its completion. Upon completion of the memorial, its maintenance and care would be the responsibility of the Secretary of the Interior.

The Commission would be authorized to accept from any source, public or private, money or other property for use in carrying out its functions, and to cooperate therein with interested public and private organizations.

Junior Achievers

Senate Concurrent Resolution 81—Adopted by the Senate January 26, 1960; Passed House January 28, 1960

To lend encouragement and give proper recognition to a worthwhile group and function, the Congress adopted, unanimously, a resolution authorizing the President to issue a proclamation designating the week of January 31 through February 6, 1960, as National Junior Achievement Week. All citizens were urged to salute the activities of these young people and their volunteer adult advisers.

Junior Achievement, Inc., is a nationwide, nonprofit organization organized in 1942 to provide high school students with an opportunity to learn American business methods by actually organizing and operating their own business under the sponsorship of local business corporations. Junior Achievers are recruited in public and parochial high schools throughout the country with the cooperation of school authorities.

The organization is made up of more than 30,500 teenagers and operates more than 2,000 miniature corporations in some 95 communities throughout the United States.

Juvenile Delinquency Act of 1960

S. 694—Passed Senate January 27, 1960; Referred to House Education and Labor January 28, 1960

The Senate unanimously agreed to this measure which is designed to bring to bear upon the national problem of juvenile delinquency the resources of the national Government in an effective manner.

It provides for a 5-year program of Federal assistance by authorizing an annual appropriation of up to $5 million for fiscal 1960 and each of the 4 succeeding fiscal years to demonstrate and develop improved methods for the prevention, control, and treatment of juvenile delinquency: $2.5 million is allotted for development-demonstration programs and $2.5 million for personnel training.

The Secretary of HEW is authorized to make the grants and render technical assistance to States and municipalities and to other public and private nonprofit agencies, including institutions of higher learning or research.

Establishes a 13-member National Advisory Council on Juvenile Delinquency within HEW to advise the Secretary on the administration of the act and to review and make recommendations on projects proposed for Federal assistance under the act.

Land exchange

H.R. 7681—Public Law 86-509, Approved June 11, 1960

This law transfers authority to the Secretary of Agriculture to exchange national forest lands for State-owned or private lands, to accept title on behalf of the United States to the State-owned or private lands exchanged and authority to dispose, under the Minerals Act, of common mineral materials on acquired lands, thus eliminating the dual responsibility of the Secretary of the Interior for these actions.

It reaffirms the Secretary of Interior's authority to apply the national mineral policies established by the Minerals Leasing Act, the general mining statutes and other statutes governing evaluation, reservation, and disposition of minerals on all public lands, including the national forests.

Law Day

Senate Joint Resolution 203—Passed Senate June 28, 1960; Referred to House Judiciary June 29, 1960

The purpose of this resolution is to designate the first day of May of each year as Law Day in the United States of America.

The designation of a day set aside each year as Law Day was first proposed by the American Bar Association and designated by the President of the United States on May 1, 1958. Since the 1958 designation, by Presidential proclamation, similar recognition has occurred in 1959 and 1960 by Presidential proclamation.

It is estimated that more than 75,000 separate observances were held throughout the Nation this past year. These observances have been celebrated in churches, schools, courtrooms, public auditoriums, and before civic and service clubs.

Legislative jurisdiction exercised by United States

S. 1617—Passed Senate May 25, 1960; Referred to House Government Operations May 31, 1960

This bill permits Federal agencies to restore to the States certain jurisdictional authority now vested in the United States, which may better be administered by State authorities, and to acquire only jurisdiction necessary in connection with future land procurement. Once legislative jurisdiction has been vested in the United States, it cannot be revested in the States other than by operation of a limitation imposed by the State at the time the State granted jurisdiction, or by an act of Congress.

This bill declares it to be the policy of Congress that—

"The Federal Government will receive or retain on that measure of legislative jurisdiction over federally owned or operated land areas within the States as may be necessary for the proper performance of Federal functions.

"To the extent consistent with the purposes for which the land is held by the United States, the Federal Government is to avoid receiving or retaining concurrent jurisdiction or any measure of exclusive legislative jurisdiction."

The overall objective is to provide that, in any case, the Federal Government may not receive or retain any of the States' legislative jurisdiction relative to qualifications for voting, education, public health and safety, taxation, marriage, divorce, descent and distribution of property and a variety of other matters which are ordinarily the subject of State control.

Library of Congress—Additional building

House Joint Resolution 352—Public Law 86-469, Approved May 14, 1960

Authorizes the Architect of the Capitol to prepare preliminary plans and estimates of cost for an additional building for the Library of Congress under the direction and supervision of the Joint Committee on the Library.

The Library of Congress, one of the leading research libraries in the world, must add substantial numbers of publications to its collections each year in order to maintain its effectiveness. This new building will house the Copyright Office and the Processing Department which will acquire and process materials for the Library's collections; the branch Government Printing Office which works closely with the Processing Department in printing catalog cards, binding books, and laminating maps and manuscripts; the Legislative Reference Service; the Division for the Blind; the collections, staffs, and reading rooms of the Manuscript Division; the Map Division; the bound newspaper collection and the microfilm collection with their related reading rooms and staffs; and the motion picture collection.

Medal awards

H.R. 5569—Public Law 86-582, Approved July 5, 1960

This law permits the award of certain medals in cases where the appropriate Secretary determines that the recommendation for the award was made within the prescribed time period, but that no award was made because of loss of the recommendation or inadvertence.

Under existing law applicable to the Army and the Air Force, recommendations for military service awards must be made within 2 years after the act justifying the award, and the award itself must be made within 3 years of the act. For the Navy, the recommendation must be made within 3 years of the act and the award made within 5 years of the act.

There are some cases in which recommendations were made within the prescribed period, but no awards were made on the basis of these recommendations because of loss or inadvertence. In these cases, this bill permits award of the medal if the appropriate Secretary determined that (1) a statement of the act or service and recommending the award was made and supported by sufficient evidence within the statutory period, and (2) no award was made because the recommendation was lost or through inadvertence was not acted upon. The award must be made within 2 years of the Secretary's determination.

Medals—Posthumously

S. 2969—Public Law 86-656, Approved July 14, 1960

This measure authorizes the posthumous award of appropriate medals and certificates to Chaplain George L. Fox, of Cambridge, Vt.; Chaplain Alexander D. Goode, of Washington, D.C.; Chaplain Clark V. Poling, of Schenectady, N.Y.; and Chaplain John P. Washington, of Arlington, N.J., for their

heroism aboard the U.S. troopship *Dorchester* when it was sunk by an enemy torpedo on February 3, 1943.

National Armed Forces Museum Advisory Board

S. 3846—Passed Senate August 31, 1960

Establishes in the Smithsonian Institution a National Armed Forces Museum Advisory Board, which would provide advice and assistance to the Regents of the Smithsonian Institution on portrayal of exhibits depicting the contributions which the Armed Forces of the United States have made to American society and culture.

The Board would be composed of 11 members, including the Secretary of Defense (ex officio), the Secretary of the Smithsonian Institution (ex officio), and 9 members appointed by the President of the United States. The members would serve without compensation but would be reimbursed for necessary expenses.

National Public Works Week

Senate Joint Resolution 202—Passed Senate June 28, 1960; Referred to House Judiciary June 29, 1960

The purpose of this resolution is to authorize and request the President to issue a proclamation designating the 7-day period commencing October 2, 1960, as National Public Works Week, and calling upon the people of the United States to celebrate the week with appropriate activities and ceremonies.

The establishment of National Public Works Week is an effective means of explaining the role public works engineering and administration play in the lives of every American family, and particularly those living in urban communities. Due to the vital nature of public works and its importance to most Americans, mass media can be expected to help carry its message to its audiences. The designation of a Public Works Week will focus attention on the public works program whose services are dedicated to the health and well-being of the citizens of the Nation. It is felt that this program will help to arouse an interest in the young people of this Nation to pursue careers in the public service inasmuch as that service needs topflight men of imagination, vision, and foresight in the field of public works.

National Voters' Day

Senate Joint Resolution 186—Passed Senate June 28, 1960; Referred to House Judiciary June 29, 1960

This resolution authorizes and directs the President of the United States to issue a proclamation designating the first Tuesday after the first Monday in November of each year as National Voters' Day, calling upon Federal, State, and local governments, civic, industrial, and business groups, and upon the people of the United States to observe the day with appropriate activities and ceremonies.

The aim of this resolution by designating the first Tuesday after the first Monday in November of each year as National Voters' Day would be to encourage not only national efforts, by Governors, mayors, industry, business, labor, fraternal, service, women's, and other civically oriented groups to support voter education campaigns. It is hoped that these programs will educate people on the issues in a campaign, on the candidates and their qualifications, on the mechanism of voting, such as marking ballots and using voting machines, informing eligible voters of, and encouraging them to meet, registration requirements; educating potential voters on the processes of government and the value of citizen support; participation in, and, if advisable, constructive opposition, and launching a counterattack on the trend toward apathy now among the major causes keeping almost 50 percent of the eligible voters away from the polls.

Navajo Indians

S. 2878—Passed Senate March 29, 1960; Referred to House Interior March 30, 1960

The primary purpose of this measure is to convey in fee simple certain federally owned lands excluding mineral rights, located within the State of New Mexico to the Navajo Tribe of Indians. It also adjusts and simplifies the administration of certain other federally owned lands located near Gallup, N. Mex.

Enactment of this measure will permit the tribe and the Bureau of Land Management of the Department of the Interior to initiate a comprehensive management program which will result in better conservation practices.

Payment for lands conveyed to United States

H.R. 9142—Public Law 86-596, Approved July 6, 1960

The principal purposes of this law are (1) to provide compensation for land conveyed or relinquished to the United States during the years 1897–1905 under the act of June 4, 1897, in cases in which the lands or other rights which the owners were entitled to receive under this 1897 act and supplementary legislation have not already been given them; (2) to make inapplicable to the owners, their heirs and assigns a later provision of law directing the Secretary of the Interior, upon request, to return the original lands; and (3) thus to correct defects in the law under which such parties are now laying claim to valuable lands within the national forests and parks and taking them out of Federal ownership.

Presidential office space

S. 3524—Passed Senate September 1, 1960

This bill authorizes the establishment of a Commission on Presidential Office Space. The Commission would be composed of seven members, two Senators to be appointed by the President of the Senate, two Representatives appointed by the Speaker of the House of Representatives, and three persons appointed by the President of the United States from the executive branch or from private life. Commission members appointed from the Congress and the executive branch would serve without additional compensation.

It would be the duties of the Commission, after consultation with the President occupying the White House at that time, to approve all design and construction plans, determine the methods for selecting and approve the selection of the architect, and to utilize the services of the Office, Chief of Engineers, Department of the Army, to the maximum practicable extent in awarding contracts for the construction work and in supervising the progress of the design and construction work. The work performed by the Chief of Engineers would be on a reimbursable basis. Measures would be taken to assure that all lumber, fixtures, and other materials removed from the Executive Mansion or other buildings are carefully examined to determine their historical value and their proper preservation and distribution. Reports on progress of the work would be submitted to the Congress and the President from time to time, but at least once annually. Upon conclusion of its work, the Commission would promptly submit a final report, and would cease to exist 30 days after such submission.

Public lands for recreational use

S. 2757—Public Law 86-755, Approved September 13, 1960

Under existing law, the Recreation and Public Purposes Act of 1926, conveyances of certain public lands to States for recreational purposes may be made each year in the amount of 6,400 acres, embraced in not more than three sites. This maximum is doubled for the calendar years 1960, 1961, and 1962.

Certain States applied for land under the act in 1959, but for various reasons those applications could not be granted during that period of time, and the States were unable to obtain the acreage allowed for 1959. This bill permits these States to obtain the 6,400 acres for three sites authorized for 1959 and also to take care of similar contingencies which might arise in the future.

The effect of this bill is to provide that if any State fails in any one calendar year to secure the maximum acreage permitted for that year because pending applications could not be processed by the Department of the Interior during the calendar year additional conveyances may be made to that State pursuant to applications on file with the Secretary on the last day of that year, and the additional conveyances will be charged against the limitations for that year rather than for the year in which the conveyances are actually made.

Publication payments

S. 3579—Passed Senate June 18, 1960—Referred to House Government Operations June 20, 1960

This bill amends existing law to provide governmentwide uniform authority for Federal departments and agencies to make advance payment for subscription or other charges for publications which they require, but which do not fall within the category of newspapers, magazines, or periodicals.

Section 3648 of the Revised Statutes (31 U.S.C. 529) prohibits advance payment for articles purchased by the Federal Government in the absence of specific statutory authority. The act of June 12, 1930, provides general authority for advance payments of subscription charges for "newspapers, magazines, and other periodicals." However, the Comptroller General has ruled that the language of that act does not cover charges for "publications" which do not fall into the category of "periodicals." Under existing law, however, special authority has been provided for the Department of Agriculture, the Department of the Army, and the Veterans' Administration.

This bill amends the act of June 12, 1930, to provide Government-wide authority for the advance payment of subscription "or other charges" for newspapers, magazines, periodicals, and "other publications." It also repeals those statutes providing special authority for the advance payment for subscriptions to publications to provide uniform authority for all departments and agencies.

Reimburse owners and tenants of lands for moving expenses

S. 2583—Passed Senate June 3, 1960; Referred to House Government Operations June 6, 1960

Establishes a uniform and acceptable reimbursement policy to pay expenses and losses incurred by individuals who are forced to vacant their homes or land which was acquired for use by the Federal Government.

Right of States to select certain public lands

S. 2959—Public Law 86-786, Approved September 14, 1960

This bill clarifies the right of States, including the State of Alaska, to select certain public lands as indemnity selections even though the lands are subject to outstanding mineral leases or permits.

Under existing law the States are permitted to select lands which are under a mineral lease or permit but subject to the requirement that selections must include all the lands subject to that lease or permit. None of the lands subject to that lease or permit may be selected, however, if they are in a producing or a producible status.

It is often the case that many oil and gas leaseholds include within their geographical boundaries certain lands to which the United States does not have title. This fact prevents the States from selecting any of the lands under existing law. This bill amends the present laws governing State selections to permit the States to select some of the lands subject to a lease or permit without having to select all of the lands subject to that lease or permit. It further provides that if a State should select such lands it would receive them subject to a reservation to the United States of the minerals for which the lease or permit was issued until the termination of the lease or permit. The revenues from the development of reserved minerals are to continue to be received by the United States and distributed as provided by existing law.

Robert Frost Medal

S. 3439—Public Law 86-747, Approved September 13, 1960

This measure authorizes the President of the United States to present in the name of Congress an appropriate gold medal to Robert Frost in recognition of his poetry which has enriched our culture and the philosophy of the world.

It authorizes the Secretary of the Treasury to strike a gold medal and also authorizes an appropriation of $2,500.

Secret Service—Presidential successors

S. 3366—Passed Senate May 26, 1960; Referred to House Judiciary May 27, 1960

This measure is designed to close gaps that exist in connection with threats against the successors to the Presidency and to authorize their protection by the Secret Service.

Present law provides penalties for threats against the President-elect and the Vice President of the United States and authorizes their protection by the U.S. Secret Service, but does not take care of the situation that would occur in the event of the death or disability of either the President or Vice President, or both. Nor does existing law provide protection for the Vice President-elect while he is waiting to assume office after his election. This legislation remedies this lack of coverage by making the threat and protection provisions coextensive with the possibilities of succession to the Presidency.

Existing law authorizes the full-time protection of the President but provides protection of the Vice President only upon his request. It would seem that part-time protection is ineffectual since anyone with a premeditated design to harm the Vice President would be expected to execute his plan at a time when no Secret Service protection was afforded. This legislation removes the discretion of the Vice President.

Small towns and rural counties

S. 3140—Passed Senate May 26, 1960; Referred to House Government Operations May 27, 1960

This measure establishes a 20-member bipartisan Commission on problems of small towns and rural counties.

The Commission is authorized to make a full and complete investigation and study of Federal policies and programs relating to the needs and problems of the Nation's smalltown and rural county areas. It is to study the needs, present and future, related to highways, public services, water resources, schools, recreation, financing, law enforcement, and business and industrial development.

The Commission is to determine the capabilities of State, county, and local governments to meet the needs and seek means of improving coordination of Federal, State, county, and local policies. It is to investigate the possibilities of the Federal Government encouraging wider dispersal of Government procurement operations, the location of Federal facilities as well as other matters which may be of assistance in solving the various problems of, and promoting the social and economic well-being of the Nation's smalltown and rural county areas.

The Commission is to report its findings and recommendations to the President and to Congress on or before February 1, 1962.

Theodore Roosevelt memorial

H.R. 8665—Public Law 86-764, Approved September 13, 1960

The present section 3 of the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital," approved May 21, 1932, authorizes the Director of the National Park Service to permit the Roosevelt Memorial Association to erect on Theodore Roosevelt Island a monument or memorial to the memory of Theodore Roosevelt to be approved by the association, by the Commission of Fine Arts, and the National Capital Planning Commission, and to be erected at private expense.

The purpose of this measure is to amend section 3 to provide that the monument or memorial be erected under the direction of the Secretary of the Interior and that the cost of the project be defrayed by public funds. The Department of the Interior estimates that it would cost $886,400 to complete the monument and related structures on Theodore Roosevelt Island.

One hundred and seventy-fifth anniversary, U.S. Constitution

House Joint Resolution 605—Public Law 86-650, Approved July 14, 1960

Creates a 12-member commission to prepare plans for the celebration of the 175th anniversary of the Federal Constitution and to coordinate the plans of various State and civic groups.

Members of the Commission will be the President of the United States, the President of the Senate, and the Speaker of the House. In addition, each of the above will appoint three other members.

Variety Artists Week

Senate Joint Resolution 168—Passed Senate June 7, 1960; Referred to House Judiciary June 8, 1960

In recognition of the untiring efforts of artists who supply us with entertainment, this resolution designates the week of October 2-8, 1960, as National American Guild of Variety Artists Week.

Wilsons Creek battlefield, Missouri

H.R. 725—Public Law 86-434, Approved April 22, 1960

This measure establishes the Wilsons Creek Battlefield National Park to commemorate the Battle of Wilsons Creek, sometimes called Oak Hill by the Confederates. The battle, fought on August 10, 1861, was a struggle between the Confederate and Union forces in Missouri for control of the State in the first year of the Civil War.

The site of this Civil War battlefield is some 10 miles southwest of Springfield, Mo.

Woodrow Wilson Memorial Commission

Senate Joint Resolution 152—Passed Senate June 28, 1960; Referred to House Administration June 29, 1960

Establishes a Woodrow Wilson Memorial Commission for the purpose of considering and formulating plans for the design, construction, and location of a permanent memorial to Woodrow Wilson in the District of Columbia.

The Commission is to be composed of the following members:

1. Former Presidents of the United States, at their pleasure;

2. Two persons to be appointed by the President of the United States;

3. Two Members of the Senate to be appointed by the President of the Senate;

4. Two Members of the House of Representatives to be appointed by the Speaker of the House of Representatives;

5. Three members to be appointed by the President of the United States, one from each of the following: (a) The Woodrow Wilson Foundation; (b) the Woodrow Wilson Centennial Commission; and (c) the Director of the National Park Service or his representative.

The Commission selects a Chairman and a Vice Chairman from among its members. Vacancies in membership would be filled in the same manner as the original appointment. The members serve without compensation, but to be reimbursed for necessary expenses.

At the earliest practicable date the Commission is to report its plans and recommendations to the President and to Congress, in the interim submitting annual reports on its progress.

There is authorized to be appropriated not more than $10,000 to carry out the provisions of the joint resolution.

Youth Appreciation Week

Senate Joint Resolution 181—Passed Senate June 2, 1960; Referred to House Judiciary June 3, 1960

This resolution designates the 7-day period beginning on the second Monday of November of each year as Youth Appreciation Week, and requests the President to issue annually a proclamation calling upon the people of the United States to observe this week with appropriate ceremonies and activities.

This is intended to strike at the recurring problem of juvenile delinquency by stimulating participation in religious and civic activities.

HEALTH

Air pollution problems

S. 3108—Passed Senate June 28, 1960; Referred to House Interstate June 29, 1960

The purpose of this bill is to authorize the Surgeon General to make investigations and to hold public hearings on air pollution problems which are interstate in nature and of broad significance.

Air pollution study

H.R. 8238—Public Law 86-493, Approved June 8, 1960

This measure authorizes the Surgeon General of the Public Health Service to conduct a study of the effect on human health of substances discharged into the atmosphere by the exhausts of motor vehicles.

Requires the Surgeon General to submit a report to Congress within 2 years with findings and recommendations.

Gorgas Memorial Laboratory

S. 3179—Public Law 86-617, Approved July 12, 1960

This law increases the construction authorization by $250,000 for facilities at Gorgas Memorial Laboratory in the Republic of Panama.

Gorgas is well known for its research work in malaria, yellow fever, and virus diseases. It is considered an important center for field and laboratory studies, not only by its own staff but by visiting scientists, and is one of the very few such centers under American auspices in the American tropics.

Narcotics Manufacturing Act of 1960

H.R. 529—Public Law 86-429, Approved April 22, 1960

This law gives full effect to treaty obligations of the United States to limit exclusively to medical and scientific purposes the manufacture of narcotic drugs and to require that their manufacture be restricted to properly licensed persons and premises.

It also amends the Narcotic Drugs Import and Export Act to bring the regulation of exports in conformity with current treaty ob-

ligations, and to permit importing and exporting of certain narcotic drugs for scientific research.

Practical-nurse training

S. 3025—Passed Senate May 26, 1960; H.R. 11893—House Calendar

This bill extends to June 30, 1965, the Federal-State program of training practical nurses under the authority of the Vocational Education Act of 1946. Provides authority for the appropriation of up to $5 million of grants a year to be matched by States with State plans for practical-nurse training.

It includes Guam as a participant under the act and provides that Hawaii and Alaska be treated as States.

Public health—graduate training

H.R. 6871—Public Law 86–720, Approved September 8, 1960

This legislation expands and strengthens graduate public health training by—

Authorizing a new 5-year program of project grants, up to $2 million a year, to schools of public health and schools of nursing and engineering which provide graduate or specialized training in public health; and

Extending, without time limit, the present authority of the Surgeon General to make grants-in-aid up to $1 million a year to schools of public health.

U.S. nationals—Care and treatment

S. 2331—Public Law 86–571, Approved July 5, 1960

This law makes systematic provision for hospitalizing nationals of the United States who are returned to this country because of mental illness. It authorizes the Secretary of HEW, upon application of the Secretary of State (1) to receive, and temporarily care for and hospitalize, pending arrangements for suitable continuing care and treatment, mentally ill nationals certified by the State Department; and (2) assume responsibility for continuing care and hospitalization until such time as the State of residence or legal domicile can be ascertained and arrangements made for transfer and release of the person to the appropriate State, or to a relative who has agreed in writing to assume the responsibility.

HOUSING

NASA housing

S. 3226—Public Law 86–578, Approved July 5, 1960

This measure extends the provisions of section 809 of the National Housing Act to essential civilian employees at installations transferred from the Department of Defense to the National Aeronautics and Space Administration.

This section was added to the National Housing Act in 1956 to help solve the housing problems of essential civilian employees of the armed services at research and development installations. This special program was necessary because in some instances homes built for the employees in towns near or adjacent to installations would be above and beyond those needed for the normal economic growth of the community.

In the opinion of FHA, homes built in excess of those needed for normal growth of a community cannot meet the test of economic soundness required by statute as a prerequisite for FHA mortgage insurance. Section 809 permits the economic soundness test to be waived in these cases.

Omnibus Act of 1960

S. 3670—Passed Senate June 16, 1960; H.R. 12603—House Calendar

This omnibus bill provides for a $1.2 billion housing measure which:

Authorizes the Housing and Home Finance Administrator to undertake a research and study program identifying the solutions to problems involved in construction improvements, methods, and costs.

Permits the FHA Commissioner to insure mortgages secured by housing which is being used for testing advanced technology in housing design, materials, or construction. Limits the insurance to $300,000 a year.

Extends the home repair and improvement program to October 1, 1961, and removes the ceiling on the loan authorization.

Gives the FHA Commissioner discretion to reduce mortgage insurance premiums on programs to one-fourth of 1 percent a year.

Creates the position of Assistant Commissioner for Cooperative Housing.

Permits the Commissioner to exercise discretion as to the extent and period of disqualification of an investor-sponsor identified with an FHA cooperative housing project which failed to meet the requirement that it be sold to a cooperative.

Increases FHA general insurance by $4 billion—existing authorization is $37.8 billion.

Permits FHA to insure multifamily projects secured by buildings in which individual units are owned separately from the whole.

Increases by $25 million the authority to appropriate funds for direct loans to provide housing for the elderly.

Increases by $350 million the capital grant authorization for urban renewal.

Increases the amount that any one State may obtain of the capital grant authorization to 12½ percent of the total authorization, plus a portion of the $150 million reserve fund.

Includes any State-licensed hospital within the provisions of the act.

Increases by $150 million FNMA special assistance fund which is subject to Presidential allocation; and increases by $25 million the special assistance fund for the purchase of cooperative loans insured by FHA.

Increases by $500 million the college housing loan authorization; by $50 million "other educational facilities"; by $50 million the ceiling for student-nurse and intern housing.

Increases by $100 million the public facility loan authorization.

Continues VA direct home loan program for 1 year, and continues the provision in existing law which increases the loan fund by $150 million annually.

Continues the farm housing program for 2 years, and authorizes increases in the loan fund up to $74 million.

Stopgap housing

House Joint Resolution 784—Public Law 86–788, Approved September 14, 1960

This three-point stopgap housing measure, cleared for the President on August 31, 1960, extends the Federal Housing Administration's home improvement loan program for 1 year—through October 1, 1961. It also authorizes an additional $500 million for college housing and $50 million for the public facility loan program of the Community Facilities Administration.

IMMIGRATION

Refugee immigration

House Joint Resolution 397—Public Law 86–648, Approved July 14, 1960

Authorizes resettlement of refugees in the United States under the mandate of the United Nations High Commissioner for Refugees. Under the bill the Attorney General can admit, of the estimated 28,000 or less refugee-escapees in Western Europe, one-fourth of the total number resettled by other countries.

Detailed provisions:

Authorizes parole admission into the United States refugee escapees who, when application is made, are not within a Communist-dominated country, are not a national of the country from which they apply, and who fall under the mandate of the United Nations High Commissioner for Refugees.

Directs the Secretary of State to inform the Attorney General the number of refugee-escapees resettled between July 1, 1959, and June 30, 1960, by other nations and, on each succeeding January 1 and July 1, the number of refugee-escapees resettled within the preceding 6 months.

Requires the refugees to qualify for admission under the terms of existing immigration law, and requires the Attorney General to submit to Congress by January 15 and June 15 of each year a detailed statement concerning each refugee admitted under the program.

Authorizes the Attorney General to include 500 handicapped, difficult-to-resettle refugees, limited to those of good moral character who are not institutional cases.

Authorizes the exclusion or deportation of an alien convicted of illicit possession of marihuana.

Permits an alien admitted to the United States with nonimmigrant status to qualify for permanent residence without leaving the country to obtain an immigrant visa.

Increases by 500 the number of special nonquota visas available for Portuguese nationals from the Azores and adds a year's annual quota (3,136) to the number of special visas available for Netherlands nationals expelled from Indonesia; extends the expiration date for issuance of the visas to June 30, 1962.

Extended to June 30, 1961, the special program for admission of alien orphans.

Terminates the program on July 1, 1962, or earlier, if either the House or Senate within 90 days of the Attorney General's report adopts a resolution stating the program be discontinued.

JUDICIAL

Sentence reduction

S. 2932—Public Law 86–691, Approved September 2, 1960

This law provides for reducing sentences of imprisonment imposed upon persons held in custody while awaiting trial by the time spent in custody.

The primary purpose is to eliminate disparity in sentences under certain statutes requiring mandatory terms of imprisonment. Under existing law, a person charged with violating a statute requiring a minimum mandatory sentence may not be credited with the time spent in custody for want of bail while awaiting trial. The result is that a sentencing court lacks authority to differentiate between the offender who has been free on bail before trial and one who has been in custody, because it is required to impose the same minimum mandatory sentence as to each.

Application of the proviso contained in the bill, where credit is due, preserves the existing statutory provision that service of sentence commences after sentence is imposed and commitment occurs. Computation of sentence involves determination of the date of eligibility for release by crediting the sentence imposed with good-time allowance at the rate applicable, plus the period of presentence custody for want of bail. (In short, for purposes of the records the sentence imposed stands intact and it becomes effective as under existing law, with duration subject to the credits just referred to.)

Supreme Court—Recess appointments

Senate Resolution 334—Adopted by Senate August 29, 1960

This resolution expresses as the sense of the Senate that recess appointments to the U.S. Supreme Court may not be wholly consistent with the best interests of the Court, the nominee, the litigants before the Court, nor the people of the United States and, therefore, such appointments should not be made except under unusual circumstances and to prevent or end a demonstrable breakdown in the administration of the Court's business.

LABOR

Coal mine safety amendment

S. 743—Passed Senate April 27, 1960; House Calendar

This measure amends the Federal Coal Mine Safety Act to make it applicable to all coal mines regardless of size.

The Federal Coal Mine Safety Act is designed to prevent disasters from mine explosions, mine fires, mine inundation, and man-trip and man-hoist accidents, by making mandatory compliance with the mine safety provisions of the act. To accomplish compliance, the Bureau of Mines' inspectors are authorized to issue orders of withdrawal in the event of imminent danger of a fire, explosion, inundation, man-trip or man-hoist accident, or for failure to correct a violation within a reasonable time. The act prohibits the workmen from reentering violations corrected, and the order annulled.

Under the act (prior to this amendment) these provisions were not applicable to those mines employing 14 or fewer individuals underground. Thus, the Director of the Bureau of Mines had authority only to make annual or necessary inspections and investigations for the purpose of obtaining certain information relating to health and safety conditions. This amendment extends the mandatory provisions to all underground mines.

Depressed areas

S. 722—Vetoed May 13, 1960

This measure, the depressed areas bill, authorizes Federal grants and loans totaling $251 million for the relief of chronically depressed industrial and rural areas. This bill, as passed by the Senate in 1959, authorized $389.5 million.

As sent to the President, the measure—

Created an Area Redevelopment Administration within the executive branch, and an Area Redevelopment Advisory Board to advise the Administrator.

Authorized the Administrator to designate two types of redevelopment areas—industrial and rural—in the United States. Requires the Administrator to designate as a rural redevelopment area any county which is among the 500 counties in the United States ranked lowest in level of living of farm-operator families, or which is among the 500 counties having the highest percentage of commercial farms producing less than $2,500 worth of products for sale annually.

Directed the Administrator to designate as industrial redevelopment areas those which have suffered 12 percent unemployment during the entire year preceding the application, or 9 percent unemployment during 15 out of the preceding 18 months, or 6 percent unemployment during 18 out of the preceding 24 months. In addition to these mandatory requirements, the Administrator may designate any area which in his judgment suffers from serious unemployment of other than a temporary nature.

Authorized an appropriation of $150 million for loans—$75 million as a revolving fund for industrial projects in industrial redevelopment areas and $75 million as a revolving fund for industrial projects in rural redevelopment areas.

Limited the Federal loan to 65 percent of the project cost. Requires that 10 percent of the total cost be supplied by the State or local government or by community or area organization, and not less than 5 percent of the total cost must be supplied by a nongovernmental source. Limited loans to 30 years and required an interest rate of one-half of 1 percent above the Treasury rate.

Authorized an additional $50 million appropriation for loans to State or local governments or Indian tribes for construction and improvement of public facilities in industrial and rural redevelopment areas. Authorizes an appropriation of $35 million for public facility grants.

Authorized an annual appropriation of $4.5 million for technical assistance to redevelopment areas including studies evaluating the needs of and development potentiality for economic growth of these areas.

Amended the Housing Act of 1949 to make available urban renewal benefits under that act to a community when the Area Redevelopment Administrator designates the area as an industrial redevelopment area.

Authorized annual appropriations of $1.5 million for vocational training programs in redevelopment areas, and an additional $10 million for unemployment compensation to these trainees for a period not to exceed 13 weeks.

Minimum wage

H.R. 12677—In Conference

This measure amends the Fair Labor Standards Act and its principal provisions would—

Increase the hourly minimum wage for 23.7 million workers presently covered from $1 to $1.15 in 1961, $1.20 in 1962, and $1.25 in 1963.

Extend minimum wage and overtime protection as follows: 1961, $1 an hour and no overtime; 1962, $1.05 an hour and a 44-hour workweek; 1963, $1.15 an hour and a 42-hour workweek; thereafter, $1.25 an hour and a 40-hour workweek.

Extend coverage to 4 million additional employees of—

(a) Laundry and drycleaning and retail and service enterprises with annual gross sales of $1 million or more and engaged in activities affecting interstate commerce;

(b) Local transit companies for minimum wages only;

(c) Establishments which have annual sales of $250,000 or more (some of these employees are already covered by existing law); or $350,000 or more if engaged in construction work (some of these employees are already covered);

(d) Gasoline service stations which have $250,000 or more in annual gross sales;

(e) Laundries having $250,000 or more in gross annual sales if they were in substantial competition with laundries doing more than half their business across State lines.

Exempt from coverage by this measure:

All employees of hotels, motels, restaurants;

Automobile and farm implement dealers;

Parent, spouse, or child of owner if they are the only employees;

Employees of individual retail stores doing less than $250,000 in annual business;

Motion picture theater employees;

Switchboard operators of independently owned exchanges of 750 telephone stations or less;

Seasonal recreation and amusement establishments.

Exempt from coverage by existing law:

Outside salesmen;

Employees engaged in catching, initial processing, and unloading of seafood;

All agricultural workers;

Employees of local weekly, semiweekly, or daily newspapers with circulation of 4,000 or less;

Employees engaged in canning or processing agricultural commodities or dairy products;

Cab drivers;

Employees of small telegraph exchanges;

Lumbering operations employing 12 or less.

Exempt from overtime coverage by this measure:

Seamen on American-flag vessels;

Local transit employees;

Automobile salesmen;

Gasoline service-station employees;

Small area broadcasters.

Exempt from overtime coverage by existing law:

Certain motor carrier, railroad, pipeline, and air carrier employees;

Employees processing and canning fish;

Outside buyers of poultry, eggs, cream, or milk.

Increase minimum wage rates in Puerto Rico and the Virgin Islands by 15 percent in 1961 with special provision for appeals in hardship cases, and an additional 5 percent in each of next 2 years.

Amendments effective January 1, 1961.

NATURAL RESOURCES

Arizona-Nevada compact

S. 3433—Passed Senate August 25, 1960; Referred to House Judiciary August 26, 1960

This bill gives congressional consent to a compact recently made between the States of Arizona and Nevada. The purpose of the compact is to establish a boundary between the States along the Colorado River between the point where the Nevada-California boundary intersects the 35th degree of latitude north and Davis Dam. It also provides, in section 2, that "The right to alter, amend, or repeal this Act is expressly reserved."

Bardwell Reservoir, Tex.

S. 601—Public Law 86-399, Approved March 31, 1960

This law provides for the construction and operation of Bardwell Reservoir on Waxahachie Creek in Texas. The reservoir will provide flood control for Waxahachie Creek and for the downstream reaches of the Trinity River that have been affected by floods on the creek. It will also provide water conservation and storage for the cities of Waxahachie, Ennis, and Corsicana.

Total cost of the project is $6,992,000 for construction and $40,000 for annual operating and maintenance costs. Of this total, about 28 percent, or $1,899,000, will be met by local interests.

Flood control benefits from Bardwell Reservoir are estimated at $172,620 along Waxahachie and related creeks and $64,130 along the Trinity River downstream.

Central Valley project—San Luis unit

S. 44—Public Law 86-488, Approved June 3, 1960

This measure authorizes the Department of the Interior to construct and maintain the San Luis Dam and Reservoir under a cost-sharing agreement with the State of California and under Federal reclamation laws. This project will irrigate approximately 500,000 acres of land in Merced, Fresno, and King Counties.

January 1, 1962, was set as the final date for negotiating an agreement with California, following which a Federal project could be built, provided 90 days' notice was given to Congress.

Authorizes $290,430,000 for construction of the unit. Of this amount $192,650,000 will cover distribution systems and drains that local interests do not build, and funds for operation and maintenance.

Prohibits production of surplus price-supported crops on newly irrigated lands serviced by the Federal project.

Cheney division—Wichita project, Kansas

S. 1092—Public Law 86-787, Approved September 14, 1960

This measure authorizes the Federal construction of the Cheney division of the Wichita reclamation project, a multiple-purpose water resource development, in the Ninnescah River Basin, southwest Kansas, at a total estimated cost of $26,024,000, with Federal expenditures estimated at approximately $18 million. Of this amount $7,022,000 is reimbursable.

The principal features of the Cheney division include the Cheney Dam and Reser-

voir, the pumping plant and pipeline to the city of Wichita. Only the dam and reservoir will be financed and constructed by the Federal Government.

Coal research

H.R. 3375—Public Law 86–599, Approved July 7, 1960

This law establishes the basis for a new and expanded program of coal research and development by the Department of the Interior, to be carried out through various means, including particularly contracts with State and local research agencies and private organizations. Technical advisory committees may be established to assist in the program as administered by a Director of Coal Research.

Reports will be submitted to the President and the Congress annually, and all information as to uses, products, processes, and patents which flow from the research will be available to the general public (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense).

It is intended that an Office of Coal Research be established within the Department of the Interior. This Office will be directly responsible to the Secretary and will have the following functions:

(a) Planning a comprehensive coal research program;

(b) Promoting the coordination of all private and governmental research projects;

(c) Developing, in conjunction with the advisory committees, specific projects which would be recommended directly to the Secretary of the Interior; and

(d) Negotiating and being responsible for the successful conclusion of contracts made by the Secretary with the trade associations, educational institutions, and appropriate responsible State agencies.

Provides for the appointment of a Director of Coal Research and prescribes his annual basic compensation.

Columbia Basin project

Senate Joint Resolution 162—Passed Senate April 11, 1960; Referred to House Interior April 12, 1960

Authorizes the Secretary of the Interior during calendar years 1960 and 1961 to deliver irrigation water on the Columbia Basin project, continue necessary drainage construction, and pave the way for the completion of amendatory repayment contracts.

The 2-year moratorium was caused by the repayment problem which has resulted from agricultural and related economic conditions beyond the control of the individual new settlers.

Conejas Water Conservancy District of Colorado

H.R. 6516—Public Law 86–404, Approved April 4, 1960

This law grants congressional approval to a supplemental repayment contract, under the reclamation law, between the United States and the Conejas Water Conservancy District of Colorado.

The principal objectives of the amendatory contract are to extend the development period before repayment begins for an additional 5 years and to provide a variable repayment plan based upon the availability of irrigation water. It does not change the basic repayment obligation of $2,500,000, which covers the irrigation costs of Platoro Dam and Reservoir, the principal features of the project.

Construction of the dam and reservoir was completed in 1951, but the project facilities have not been used to irrigate district lands because of unprecedented drought conditions and Colorado's position under the Rio Grande compact. Under these circumstances, the Conejas Water Conservancy District could not meet the repayment requirements of its existing contract which called for payment of construction charges to start in December of 1958.

Dalles Federal reclamation project, Oregon

S. 2195—Public Law 86–745, Approved September 13, 1960

Authorizes Federal construction of the western division of the Dalles reclamation project in Oregon designed to irrigate some 3,000 acres of nonirrigated land and another 2,300 acres of partially irrigated land in a semiarid area.

The total cost estimate is approximately $5.6 million, which is reimbursable with the possible exception of about $18,000.

Fish and wildlife—Research and education

S. 1781—Public Law 86–686, Approved September 2, 1960

This act is designed to stablize a nationwide program that has been in existence since 1935 and presently is being administered in the Bureau of Sport Fisheries and Wildlife of the U.S. Fish and Wildlife Service.

The cooperative wildlife research unit program grew out of the acute need for facts on which to base sound wildlife management, for trained professional manpower to implement research findings and carry out effective management programs, for education and demonstration activities to bring about improved public understanding and appreciation of wildlife problems and practices, and for technical assistance to conservation agencies.

There are presently 16 cooperative wildlife research units located at land-grant colleges and universities. Nearly 3,000 advanced degrees have been awarded young men and women who have undertaken collegiate study and training in the colleges and universities which have participated in the programs.

This measure continues the authority of the Department of Interior to carry on this worthwhile program.

Fort Belknap Indian irrigation project

S. 1889—Passed Senate May 25, 1960; House Calendar

This measure authorizes the transfer of project works in three units of the Fort Belknap Indian irrigation project to an organization of landowners whose lands are served by the units. Following the conveyance, the landowners will be completely responsible for the operation and maintenance of the works.

The project is comprised of seven units totaling approximately 24,000 irrigable acres; however, actual irrigated land varies from 12,000 to 18,000 acres annually depending upon the availability of water. The three units affected are Big Warm Springs, the upper Peoples Creek, and the lower Peoples Creek. In hese three units there is a total of 7,637 acres of irrigated land. The bill also cancels delinquent operation and maintenance charges amounting to $24,511.41.

Helium Act amendments

H.R. 10548—Public Law 86–777, Approved September 13, 1960

The primary objective of this legislation is to furnish authority to the Department of the Interior to carry out an effective, long-range program for the production, distribution, and storage of helium in order to assure a sustained supply, taking into account supplies from other sources, to meet essential Government needs. Provision is made for cooperation by the Department of Defense and the Atomic Energy Commission. The measure also clarifies and perfects certain of the existing provisions of the Helium Act.

This measure provides essentially for a conservation program and envisions the possible construction of up to 12 new plants located on helium-bearing gas pipelines to extract the helium that would otherwise be wasted from the gas before this combustible gas goes to fuel markets. The helium extracted would then be stored underground in the Government-owned Cliffside gasfield near Amarillo, Tex., until needed in the future. Other underground storage areas could be utilized as needed.

The legislation provides for industry being invited to participate in the program by financing, building, and operating plants to separate helium from natural gas, with the helium then being purchased and conserved by the Government through the Department of the Interior.

Historical and archeological data—Preservation

S. 1185—Public Law 86–523, Approved June 27, 1960

The Historic Sites Act of 1935 provides for a program to preserve historical and archeological data threatened by the construction of dams. This measure is more explicit than the Historic Sites Act relative to historical and archeological salvage, and provides essentially for coordination of archeological investigations and salvage operations with advance planning and construction of dams either by Federal agencies or under permits granted by Federal agencies.

Kansas-Nebraska water compact

S. 1605—Public Law 86–489, Approved June 3, 1960

This law grants the consent of Congress to the States of Kansas and Nebraska to negotiate and enter into a compact relating to their interests in the waters of the Big Blue River and its tributaries, and provides for an equitable apportionment between these States of the waters of the Big Blue River and its tributaries.

The act further provides that one qualified person appointed by the President shall participate in the negotiations as Chairman, representing the United States, to report to the President and to Congress on the proceedings and on the compact.

Lead-zinc subsidy

H.R. 8860—Vetoed September 2, 1960

This measure was designed to stabilize mining of lead and zinc by small producers to aid in conserving domestic reserves and to provide jobs for unemployed miners in depressed lead-zinc communities by—

Authorizing the Secretary of Interior to establish and maintain a program of stabilization payments to small domestic producers of lead and zinc ores and concentrates.

Providing that payments be made when the price of common lead is below 17 cents a pound—the payment to provide an equivalent of 17 cents.

Providing for payments to producers of zinc when the market price for prime western zinc is below 14½ cents a pound—an equivalent return of 14½ cents.

Prohibiting stabilization payments if production is in excess of 2,000 tons.

Prohibiting stabilization payments on materials sold to the U.S. Government under a contract made pursuant to the provisions of Defense Production Act of 1950.

Act effective on first day of first quarter next following enactment and terminates June 30, 1965.

Leasing of oil and gas interests in Texas

H.R. 8740—Public Law 86–576, Approved July 5, 1960

This act provides for the exploration, development, and leasing of the oil and gas deposits reserved to the State of Texas in lands in that State which are owned by the United States, subject to articles 5367 and 5368 of the Revised Civil Statutes of that State, and which are not excluded from the scope of the Mineral Leasing Act for acquired lands. Leases issued by the Secretary of the Interior for these deposits must conform to those issued under the Acquired Lands Act except for section 5. However,

revenues from these leases are to be apportioned between the United States and the State as provided in articles 5367 and 5368 of the Texas statutes.

Marine Sciences and Research Act

S. 2692—Passed Senate June 23, 1960. Referred to House Merchant Marine June 24, 1960

Establishes a 10-year program of oceanographic research and surveys at an approximate cost of $121 million to promote and advance our military, economic, international and domestic welfare.

Military benefits will include a strengthened security from surprise attack by missile-launching enemy submarines. This will be achieved when we know more about underwater acoustics and have perfected our surveillance and detection systems. It requires extensive scientific data on undersea water densities.

Economic benefits will be derived from the resources of the sea. These include food, liquid fuels, metallic minerals. This bill authorizes a scientific research program and economic studies designed to revive a vastly diminished seafood industry and to increase our food supplies from the oceans, their estuaries, and the Great Lakes. Other economic benefits include those to be reaped by commerce generally. Greater knowledge of currents, winds, and weather already enable modern transocean carriers to save a full day or more from previous schedules.

Welfare benefits will accrue from climatological studies, from extensive investigation of the effects on the marine environment of atomic fallout and radioactive wastes, and from research into methods of counteracting pollution of estuarine and inshore coastal waters.

Mineral Leasing Act

H.R. 10455—Public Law 86-705, Approved September 2, 1960

The purpose of this act is twofold: First, to make substantive changes in the Mineral Leasing Act of 1920 that experience and changing conditions have shown desirable, and, second, to restate sections 17 and 27 of the act in their entirety to clarify their language and simplify the arrangement of their provisions. Sections 17 and 27 have been added to and amended over the years to such an extent that they have become something of a hodgepodge.

Substantive changes: The principal changes of substance in existing law that would be made by the bill are:

1. An increase in the minimum yearly rentals for oil and gas leases on federally owned lands from the present minimum of 25 cents an acre to 50 cents an acre, and elimination of the waiver of second- and third-year rentals provided in existing law.

2. Consolidation of lease and option maximum acreage provisions. Under existing law, no individual, association, or corporation may hold in any one State except Alaska oil and gas leases totaling more than 46,080 acres nor options for such leases totaling more than 200,000 acres on the publicly owned lands of the United States. This total of 246,080 acres that can be controlled by any one person is not increased by this bill, but the maximum limitations on the two forms of holding are consolidated to a great extent.

3. Substitution of a fixed 10-year lease term for the present 5-year term with automatic right of renewal for a second 5-year term.

4. Division of vast area of the State of Alaska into two leasing districts with the present maximum for Alaska of 300,000 acres applicable in each.

5. Inclusion of a major new source of petroleum within our own country, the so-called tar sands, under the Mineral Leasing Act. At present such tar or petroleum sands are locatable under the Mining Law of 1872, with the locator getting outright ownership of all of the minerals without royalty or rent to the Federal Government, and consequent increase in State revenues.

Mineral rights for Alaska homesteaders

S. 1670—Public Law 86-789, Approved September 14, 1960

This act grants to homesteaders who have completed the task of developing their homesteads on the Kenai Peninsula in Alaska full and complete patents, provided that the work had been finished prior to July 23, 1957.

Homesteading is essential to the development of a balanced economy in Alaska. For this reason many citizens have been encouraged to come to the 49th State.

On the Kenai Peninsula a number of these made homestead applications, entered upon the land and proceeded to construct permanent homes and to clear land for agricultural use. They entered upon the land with the understanding that it was primarily valuable for agricultural development and was not prospectively valuable for any minerals. Available information from the Bureau of Land Management and the Geological Survey was to this effect.

Subsequent to their entry and the investment of large sums of cash, tremendous physical effort, and hardship, the land was reclassified, without notice to the entrymen, as prospectively valuable for oil and gas.

The result was that oil and gas prospectors, holding Government leases, either in their own names or upon assignment, then came upon the entrymen's lands and, as a result of inadequate supervision from the grantor of the lease (the Department of the Interior), caused, in many cases, considerable damage to the homestead investment made by the entryman.

The entrymen were later advised by the Bureau of Land Management that a condition would attach to the issuance of a patent, not contemplated by the entrymen or the BLM at the time the entry was allowed. The oil and gas rights, whether active or inactive, would be reserved to the Government.

Congress feels that the conditions surrounding the handling of the classification of the agricultural land as also possibly valuable for oil and gas warrant the action proposed in this legislation.

National Forest Products Week

Senate Joint Resolution 209—Public Law 86-753, Approved September 13, 1960

The purpose of this resolution is to designate the 7-day period beginning on the third Sunday of October in each year as National Forest Products Week, and to authorize and request the President to issue annually a proclamation calling upon the people of the United States to observe the week with appropriate ceremonies and activities.

The forest products industry, as one of the oldest industries in the United States, operates in every State of the Union, and plays a highly significant part in the well-being of our Nation's citizens and our Nation.

American forests cover 786 million acres and are the Nation's only renewable natural resource.

Ownership of private commercial timberlands is diversified. Of the 4½ million owners, farmers own 34 percent—166 million acres; wood-processing industries own 13 percent—64 million. Schoolteachers, professional people, housewives, factory workers, and other private persons own 127 million acres, or 26 percent of the commercial forests.

The Federal Government owns 21 percent of America's commercial forest lands. The Forest Service of the Department of Agriculture is responsible for the management of the national forests, including selling the timber rights to private companies. Other lands are handled by the Department of the Interior. Sales of Government timber for fiscal year 1960 are estimated to total nearly $175 million.

Forest land management has as its primary objective the growing of repeated crops of trees. The forest practices and forest protection necessary to accomplish this objective usually result in many additional benefits, among them watershed protection, preservation of the soil, recreation and maintenance of forage for game and livestock.

The forest products industry, including lumber and wood products, furniture and fixtures, pulp and paper products, provides direct employment in 57,000 operating establishments to 1½ million persons, or 9 percent of all manufacturing employees. Payrolls total more than $6 billion annually and value added by manufacture exceeds $11 billion. Expenditures for new plant and equipment by the forest industry totals $850 million annually.

This country produces 30 percent of the world's lumber, 40 percent of its woodpulp, 43 percent of its paper and paperboard, and 51 percent of its plywood.

Through the transportation of forest products during 1959, the Nation's railroads earned more than $1.3 billion in gross freight revenue, representing 15 percent of total railroad freight revenue.

Congress believes that it will be to the best interests of the people of this Nation, including Government, labor, and management to have the forest industry called to their attention annually through the proclamation of a National Forest Products Week.

Navajo irrigation project

H.R. 8295—Public Law 86-636, Approved July 12, 1960

This act authorizes the Secretary of the Interior to transfer to the Navajo Tribe, with tribal approval, title to any or all of the irrigation project works on the Navajo Reservation that were constructed by the United States, together with the equipment usable for the operation and maintenance of the works. The act further provides for Federal personnel to train and assist tribal personnel in operating any irrigation works transferred to the tribe so that the tribal personnel may be qualified to assume full responsibility for project works. The Navajo Tribe will pay the cost of Interior Department personnel employed for this purpose.

There are 67 irrigation units scattered throughout the Navajo Reservation ranging in size from less than 100 acres to 6,000 acres. The total for all units is approximately 33,800 acres. Original reimbursable construction costs for the units was approximately $6,570,000, of which about $670,000 has been canceled, leaving a balance of approximately $5,900,000. The Leavitt Act deferred the assessment of construction costs on Indian irrigation projects until the lands go out of Indian ownership, and this bill does not alter that situation. By its terms, after the project works are transferred, the land and the irrigation works will not be subject to any restrictions because of Indian ownership, but the land, the project works, and any income therefrom will continue to be tax exempt as long as they remain in Indian ownership.

Norman Federal reclamation project, Oklahoma

S. 1892—Public Law 86-529, Approved June 27, 1960

Authorizes the Norman project, on Little River (a tributary of the Canadian River), in Oklahoma, and provides for recognition of certain interest costs on the Upper Colorado River project.

The Norman project consists of a dam and reservoir, pipelines, and pumping facilities

to deliver municipal and industrial water to the project cities of Norman, Midwest City, Del City, and to Tinker Air Force Base. This bill permits Federal expenditures of $19,042,000 if the Interior Department builds the entire project, or $12,920,000, if the Central Oklahoma Master Conservancy District builds the aqueducts.

Other major uses of the project works are flood control, fish and wildlife conservation and development, and recreation.

The act also provides for allocation of costs, and sets out that the reimbursable costs will be repaid in 50 years with interest to the Federal Government. The Federal costs allocated to the Tinker Air Force Base for its proportionate share of the costs allocated to municipal water supply, and to fish and wildlife benefits, to basic recreational facilities, and to flood control, will be nonreimbursable.

It also provides that the water users' organization of the Norman project may sell any surplus water but are required to use these revenues to apply on retirement of project debt payment, payment of interest, and payment of operation and maintenance costs.

It also provides that, upon full repayment, the water users will have permanent right to use of the facilities for municipal water supply purposes.

In addition, the measure changes the method of computing Federal interest charges on money spent for certain parts of the Colorado River storage project. The change will affect those projects started after June 1, 1960, and will limit the interest rate to 2.69 percent.

Omnibus rivers and harbors

H.R. 7634—Public Law 86-645, Approved July 14, 1960

This measure authorizes a $1,441,194,300 for construction of 130 rivers and harbors and flood control projects.

It is a comprehensive act designed to carry forward the important programs for development and improvement of the rivers and harbors of our Nation, for the protection of lives and property of our citizens against the ravages of floodwaters, and for the general development of the Nation's water resources, which will contribute so much to the enhancement of the national economy.

It is a combined omnibus river and harbor and flood-control measure which—

Includes authorizations for river and harbor and beach erosion control projects.

Includes authorizations for flood control projects, increased monetary authorization for previously approved comprehensive basin plans.

Authorizes the evaluation of recreational benefits at water-resource development projects in the United States.

Breakdown of funds:

Navigation projects	$203,169,300
Beach erosion	22,190,800
Barkley Dam, Ky	146,000,000
Decatur Bend, Iowa, project	155,000
Subtotal	371,515,100
Flood control:	
New projects or modifications	251,439,200
Increased basin authorizations	736,240,000
Merced River, Calif., project	12,000,000
Mokelumne River, Calif., project	10,000,000
Missouri River Basin	60,000,000
Subtotal	1,069,679,200
Total	1,441,194,300

Reforestation of publicly owned lands

Senate Joint Resolution 95—Passed Senate June 24, 1960; Referred to House Agriculture June 25, 1960

The resolution expresses the sense of the Congress that it is important that all existing authority for reforestation of publicly owned lands be fully and completely utilized.

The resolution sets forth a series of facts drawn from reports made by the Chief of the Forest Service. There are 488 million acres of commercial timberland in the United States of which 48 million, approximately 10 percent, are in need of planting. This planting should be done in the next 10 years if we are to have an adequate wood supply in the year 2000.

To meet this goal during each of the next 10 years 560,000 acres of Federal land should be planted; 240,000 acres of State and municipal land; and 4 million acres of privately owned land.

Planting of the Federal land is completely a responsibility of the Federal Government and it is of highest priority.

The policy of the Congress is declared to provide a continuing program to accomplish the needed reforestation in the 10-year period commencing July 1, 1960.

Reserved mineral interests

S. 1268—Passed Senate April 11, 1960; Referred to House Interior April 12, 1960

In those cases where a State holds the title to the surface or land in which the Federal Government has reserved the minerals, this measure requires the Secretary of Interior to give written notice to that State of any offer to lease the minerals. The State will then be given 30 days within which to present its views on the proposal. There is no requirement, however, that the State must give its consent before a lease can be issued.

Saline water program expansion

S. 3557—Passed Senate June 24, 1960; Referred to House Interior June 25, 1960

This bill extends the saline water conversion program, enacted in 1952 and increases the appropriation authorization to carry out the objectives of the original act.

It also authorizes the construction of a central test site and laboratory at an estimated cost of $2,500,000.

The categories of activities under the saline water program and more specifically emphasized by this bill are:

Studies and research, theory and laboratory research.

Pilot plant testing.

Demonstration plants: This bill authorizes the Office of Saline Water to negotiate contracts with any States, territories, possessions, political subdivisions or publicly owned utilities organizations for the use of the organization's saline water conversion plant facilities to further the sea and brackish water conversion research and demonstration programs.

Investigation, coordination, and correlation of scientific data.

Economic studies.

To back up the expansion, this bill authorizes a total appropriation of $20 million, which is a modest program in view of its tremendous importance to the future well-being of the Nation.

Wabash Basin study commission

S. 3625—Passed Senate August 25, 1960. Referred to House Public Works August 26, 1960

This bill authorizes the establishment of a Wabash Basin Interagency Water Resources Commission to be responsible for—

(1) Coordinating Federal, State, and local plans for developing water and related resources in the Wabash Basin;

(2) Preparing and keeping up to date a comprehensive, integrated, joint plan for water and related water resources development;

(3) Recommending a long-range schedule of priorities for the collecting and analyzing basic data, for investigation and project planning, and for construction of projects in the basin; and

(4) Fostering and undertaking studies of water resources problems in the basin.

The Commission to be composed of members appointed by the President from the various Federal departments or agencies having a substantial interest in the work to be undertaken and one or more members, as the President determines appropriate, from each of the States of Indiana and Illinois, as well as one member from each interstate compact commission which has jurisdiction over any of the waters of the Wabash Basin. The President would also appoint the Chairman of the Commission. The Governors of the two States would nominate the members from the States of Indiana and Illinois.

Water Pollution Control Act

H.R. 3610—Vetoed February 23, 1960

This measure affects one of the most vital resources of our Nation—water. Congress, despite opposition from the administration, is endeavoring to help by making this vital resource clean. The administration wants to turn this vast problem over to the States, while Congress wants the people of this Nation to have clean water. The problem is that simple.

To accomplish this objective, we authorized the Public Health Service, under the supervision and direction of the Secretary of HEW, to stimulate construction of needed municipal waste-treatment facilities to prevent untreated or inadequately treated sewage or other waste from being discharged into "any" waters.

We have increased the construction grants from $250,000 to $450,000 for individual projects with the proviso that no grant can exceed 30 percent of the estimated cost or $250,000 whichever is smaller. Thus the States pay 20 percent and the communities 50 percent.

We increased from $50 to $90 million the annual authorization for construction, with an aggregate appropriation limited to $900 million.

This increased Federal aid would have enabled the States and the communities to clean up the rivers—with the ultimate result of pure water for all. The act, however, was vetoed.

In his veto message, President Eisenhower stated:

"The bill would authorize an increase in Federal grants to municipalities for assistance in the construction of sewage treatment works from $50 million to $90 million annually, and from $500 million to $900 million in the aggregate. * * * The Federal Government can help, but it should stimulate State and local action rather than provide excuses for inaction—which an expanded program under H.R. 3610 would do * * *."

Watershed Act—Amendment

H.R. 4781—Public Law 86-468, Approved May 13, 1960

This act authorizes the Secretary of Agriculture to prosecute non-flood-prevention water management measures in connection with the 11 watershed improvement programs authorized by the Flood Control Act of 1944. The additional measures which could be prosecuted would be similar to those provided for by the Watershed Protection and Flood Prevention Act, and the same local organization participation would be required.

It also permits the Secretary to make loans to cover the local share of these 11 programs in the same manner that he is authorized to make loans to cover the local share of

programs under the Watershed Protection and Flood Prevention Act. This is intended to apply both to the flood prevention and non-flood-prevention features of these programs.

Watershed project starts

H.R. 11615—Public Law 86-545, Approved June 29, 1960

The law authorizes Federal assistance for installation of watershed projects under the Watershed Protection and Flood Prevention Act to proceed upon satisfactory assurance that the local organization will acquire the necessary lands, without waiting for final acquisition of title. It is intended to apply only to those cases in which land is being acquired by condemnation and where a formal order of taking or possession has been issued by a court of competent jurisdiction; and it is to be restricted to lands to be acquired by condemnation.

Wildlife, game, and fish conservation

H.R. 2565—Public Law 86-797, Approved September 15, 1960

This measure provides a program for the cooperative use, conservation, and propagation of wildlife, fish, and game on military reservations. The Secretary of Defense is authorized to carry out program plans agreed to by the Secretary of Interior and the appropriate State agency in the State where the reservation is located.

These cooperative plans may stipulate rules and regulations for hunting and fishing, hunting permits, and fee collections. The fees may be used to protect, conserve, and manage the refuges.

This law also offers an opportunity for opening more acres of military lands to hunters and fishermen, both civilian and military.

Wyoming—Riverton Federal reclamation project

Senate Joint Resolution 150—Public Law 86-448, Approved May 5, 1960

This joint resolution gives congressional authorization to the Secretary of the Interior to continue during calendar years 1960 and 1961 to deliver irrigation water to the third division, Riverton project, Wyoming, pending the completion of a repayment contract under reclamation law.

SOCIAL WELFARE

National Little League Baseball Week

House Concurrent Resolution 17 — House Adopted May 17, 1960; Senate Adopted May 28, 1960

This resolution authorizes and requests the President to proclaim the week beginning the second Monday in June of each year as National Little League Baseball Week.

This year marks the 20th anniversary of little league baseball, and during that period the movement has grown to more than 25,000 teams in 23 countries.

Social security amendments—Medical care for aged

H.R. 12580—Public Law 86-778, Approved September 13, 1960

The Congress by almost unanimous vote authorized a new program of Federal grants to the States for medical care for the low-income aged and increased social security coverage under existing programs.

The twofold approach for medical care for the aged provides a new medical-care program for those persons not on old-age assistance but yet financially unable to pay for part or all of any medical care, and strengthens and extends the medical programs now operating or possible under old-age assistance.

The measure increases Federal funds to the States for medical services for the 2.4 million aged persons on old-age assistance; it authorizes Federal grants to the States to help pay part or all of the medical services of a group of persons totaling about 10 million who may, at one time or another, be in need of assistance in paying their medical expenses; and it instructs the Secretary of HEW to develop guides or recommended standards for the use of the States in evaluating and improving their programs of medical services for the aged. The States can take advantage of its provisions in whole or part beginning October 1, 1960.

Extended coverage under OASI: Self-employed: Extended the filing time for ministers to elect coverage.

Employees: Liberalizes coverage for those with more than 1 employer; allows Nebraska to exclude certain justices of the peace and constables compensated on a fee basis; adds Texas to the list of States who can take advantage of the split system provision which allows a State to divide a retirement system into two divisions—those who desire coverage and those who do not; allows the State of Maine until July 1, 1961, to treat the positions of teachers and related positions and the positions of other members of the same retirement system as separate systems for coverage; authorizes coverage of certain hospital employees in California; extended coverage to parents in the employ of their children in the course of the child's trade or business; extended coverage to Guam and American Samoa; extended coverage to employees of international organizations on self-employed basis.

Eligibility: Liberalizes requirement so that an individual will need one quarter of coverage (acquired at any time after 1936) for every three calendar quarters elapsing after 1950, or after the calendar year in which he attained the age of 21 and up to the beginning of the calendar year in which he attained retirement age, or died, whichever occurred first, but he must have at least six quarters of coverage.

Reduces the duration-of-relationship requirements for entitlement to wife's, child's and husband's benefits in cases where the worker is alive from 3 years to 1 year.

Retirement test: No reduction for an individual who earns $1,200 a year or less; if he earns between $1,200 and $1,500, $1 in benefits will be withheld for each $2 of earnings above $1,200; if he earns more than $1,500, $1 in benefits will be withheld for each $2 of earnings between $1,200 and $1,500 and $1 in benefits for each $1 of earnings above $1,500.

Aid to blind: States in determining need may disregard the first $85 per month of earnings plus one-half of earned income over $85 on a month-by-month basis. Provision is optional with the States until July 1, 1962, when it becomes mandatory.

Child welfare service: Authorization increased from $17 million to $25 million.

Unemployment compensation: Raises the Federal unemployment tax rate from 3 percent to 3.1 percent and extends coverage of the unemployment compensation program to several groups of workers.

Disability insurance program: Eliminated the 50-year age requirement which will permit about 250,000 additional workers totally and permanently disabled to qualify for benefits. Strengthened the rehabilitation aspects of the disability program by providing a 12-month period of trial work, during which benefits are continued for all disabled workers who attempt to return to work. Removed the 6-month waiting period requirement for those who become disabled within 5 years after terminating one period of disability before they are again eligible for benefits.

SPACE

Authorization—NASA

H.R. 10809—Public Law 481, Approved June 1, 1960

This measure authorizes appropriations to the National Aeronautics and Space Administration for fiscal 1961, totaling $970 million as follows:

Regular authorizations:	
Salaries and expenses	$170,760,000
Research and development	621,453,000
Construction and equipment	122,787,000
Subtotal	915,000,000
Emergency authorizations:	
Research and development	50,000,000
Construction and equipment	5,000,000
Subtotal	55,000,000

As enacted, the bill provides 30 additional "excepted" positions with 13 of these positions authorized to be paid salaries up to $21,000. The remaining positions will be within the salary ranges of $14,000 to $19,000. The 30 additional jobs increased the total in this category to 290.

NASA—Supplemental

House Joint Resolution 621—Public Law 86-425, Approved April 14, 1960

This measure, a supplemental for 1960, appropriated $23 million additional for the national aeronautics and space agency: $12,200,000 of the $23 million is for additional research and development on Project Mercury and $10,800,000 for Mercury tracking and modifications at Atlantic Missile Range.

NASA—Von Braun team

Congress unanimously endorsed the transfer of the Development Operations Division of the Army Ballistic Missile Agency to the National Aeronautics and Space Administration.

The transfer plan includes:

Functions of Army Ballistic Missile Agency relating to the development of space vehicle systems, excluding ballistic missiles, and research;

Land area consisting of 1,200 acres, with 98 buildings estimated value of $100 million, located within the Redstone Arsenal, will be leased to NASA;

Personnel at the arsenal presently employed by the Development Operations Division, numbering nearly 3,900 persons (Dr. von Braun team); and

Designated Cape Canaveral facilities, belonging to the Army Ordnance Missile Command, having a value of approximately $14 million.

Plan effective March 14, 1960.

TAXATION

Bicycle tires and tubes—excise tax

H.R. 8318—Public Law 86-418, Approved April 8, 1960

This law relates to excise tax on bicycle tires and tubes. Under present law, a tax of 5 cents a pound applies to bicycle tires and 9 cents a pound to inner tubes. These taxes apply to sales of tires and tubes by the manufacturers, producers, or importers. Bicycle tires and tubes, whether manufactured here or imported, are subject to tax when sold in the United States to bicycle manufacturers or others for mounting on new bicycles. Similarly, they are subject to tax if the tire and tube manufacturer himself mounts a tire and tube on a bicycle, since this use is considered a sale. In the case of bicycle tires and tubes mounted on bicycles outside the United States, where the bicycles are sold in the United States no U.S. excise tax is paid on the bicycle tires and tubes.

This act eliminates this discrimination by providing an exemption for bicycle tires and tubes sold for use in the manufacture, or production of new bicycles, or used by the tire and tube manufacturer for this purpose. The taxes will continue to apply, however, to tires and tubes sold, or used, as replacements.

Cabarets—Tax cut

H.R. 2164—Public Law 86-422, Approved April 8, 1960

This measure reduces from 20 percent to 10 percent the tax imposed on roof gardens, cabarets, and similar establishments.

The necessity for this reduction was due to the fact that the 20-percent rate was discriminatory in that the rates of almost all of the other ad valorem excise taxes do not exceed 10 percent. In addition, it is believed that this high rate has been a deterrent to the employment of musicians and other entertainers.

Charitable contributions

H.R. 6779—Vetoed June 3, 1960

This measure provides that, for the purpose of unlimited deductions for charitable contributions by certain individuals for income tax purposes, the 90-percent test may be met by combining the contribution over 2 consecutive taxable years within the 10 preceding years.

Cigars—Excise taxes

H.R. 10960—Public Law 86-779, Approved September 14, 1960

The Federal excise tax on large cigars is paid by the manufacturer but based on the intended retail price of the cigars. Seven different tax brackets provide tax rates increasing with the intended retail price of the cigar. This intended retail price of the cigar is determined in the principal market of the cigar, or the locality where most of a particular brand is sold. Under present law this price is determined by excluding State and local retail sales taxes from the price. Under this bill the price is determined by excluding "any State or local taxes imposed on cigars as a commodity." This excludes not only retail sales taxes but taxes such as manufacturers and wholesalers sales taxes in determining the intended retail price of large cigars. This amendment is to apply to cigars removed on or after the ninth day of the first month beginning after the date of enactment of this bill.

The measure also taxes real estate trusts as regulated investment companies, modifies filing requirements for estimated taxes, provides a deduction for certain students maintained in a taxpayer's home, and revises the tax on mechanical lighters.

Coconut and palm oil—Tax suspension

H.R. 8649—Public Law 86-432, Approved April 22, 1960

This act continues through June 30, 1963, the suspension of the 3-cents-a-pound processing tax on the first domestic processing of coconut oil, palm oil, palm-kernel oil, fatty acids, salts, combinations or mixtures thereof.

Copyright royalties

H.R. 7588—Public Law 86-435, Approved April 22, 1960

This measure amends the Internal Revenue Code to provide that personal holding company income is not to include income from copyright royalties if—

1. More than 50 percent of their gross income is from copyright royalties;

2. Business expense deductions are equal to at least 50 percent of gross income; and

3. They do not have more than 10 percent of other personal holding company income.

Effective for taxable years beginning on or after January 1, 1960.

Dealers' reserve—Tax treatment

H.R. 8684—Public Law 86-459, Approved May 13, 1960

To prevent a consumer abuse this measure pertains to the tax treatment of certain dealer reserves. A recent Supreme Court decision held that dealer reserve income is to be reported at the time it is properly accruable or, in general, at the time of the sale of the installment paper where this immediately follows the sale of the property. Some dealers, however, following numerous circuit court decisions to the contrary have not reported this income until the reserves were withdrawn by the dealers from the finance companies.

To alleviate any hardship, this bill provides two alternative methods for paying the tax due on income which has not been previously reported. First, it provides that such amounts can be treated as required changes in methods of accounting. This means that the reserves built up prior to 1954, if such years are closed, need not be reported for tax purposes, and that only the excess of the current balance over the 1954 balance in the reserve is to be reported. A second alternative permits the computation of the deficiencies, or overassessments, which would arise if the income had been reported in the proper years, and then the sum of these amounts, plus interest up to the time of selecting this alternative, may be paid in 10 annual installments, generally beginning in 1961.

The usual dealers' reserves arise from the sale of customers' installment paper to finance companies. In transactions of this type the question is whether this reserve is income to the dealer in the year of the sale of the article and the sale of the installment paper to the finance company, or is income to the dealer only when he actually receives the reserved amount in cash from the finance company.

Excise tax—Public debt extension, 1960

H.R. 12381—Public Law 86-564, Approved June 30, 1960

Extends to June 30, 1961, a temporary increase of $8 billion in the public debt limit, making the ceiling $293 billion.

Extends to June 30, 1961, the present corporate income and certain excise tax rates scheduled for reduction on July 1, 1960. Present corporate rate is 52 percent. Excise rates continued are those on distilled spirits, beer, wine, cigarettes, and passenger automobiles, parts, and accessories.

Extends to June 30, 1961, the 10 percent tax on transportation and local telephone service.

Directs the Joint Committee on Internal Revenue Taxation to make a full and complete investigation of the operation and effects of present law, regulations, and practices relating to the deduction of expenses as ordinary and necessary business expenses for entertainment, gifts, dues, or initiation fees in social, athletic, or sporting club organizations. Requires the joint committee to report to the House and Senate the results of the investigation as soon as practicable during the 87th Congress, together with recommendations for changes in the law and administrative practices.

Provides for a report by the Secretary of the Treasury on the results of the recently adopted enforcement program of the Internal Revenue Service relating to similar deductions together with recommendations considered necessary to avoid misuse of the business expense deduction. Report to be made to the House and Senate during the 87th Congress.

Prevented excessive depletion allowances in minerals and ores by applying the allowance to raw ores rather than finished products, effective December 31, 1960.

Exploration expenses—Deduction

H.R. 4251—Public Law 86-594, Approved July 6, 1960

Under present law an annual exploration expenditure deduction of up to $100,000 is allowed for no more than 4 years. This bill removes the 4-year limitation and substitutes an overall limitation of $400,000. However, the limitation of $100,000 per year remains.

Exploration expenditure deductions may be taken (currently or deferred and taken when the product is sold) for expenditures made in exploring for ore or mineral deposits (but not for oil or gas) prior to the development stage of the mineral deposit.

This change is to be effective for taxable years beginning after the date of enactment of this act.

Firearms

H.R. 4029—Public Law 86-478, Approved June 1, 1960

This law amends the special excise taxes in the Internal Revenue Code to—

1. Exempt from the special occupational and transfer taxes, rifles with barrels between 16 and 18 inches in length.

2. Subject to occupational and transfer taxes, any weapon made from a rifle or shotgun if the modified weapon has an overall length of less than 26 inches.

3. Lower the manufacturer and dealer occupational taxes and the transfer tax on any other weapon, except a pistol or revolver, from which a shot is discharged by an explosive if the weapon is capable of being concealed on the person. At present the manufacturers' and dealers' occupational taxes applicable to these weapons, generally, are $500 and $200, and, under the bill, will be reduced to $25 and $10. The transfer tax under present law is $200 and, under the bill, will be $5.

4. Raise from $1 to $10 a year dealers' taxes on certain combination shotgun and rifles and certain guns designed to be held in one hand. The applicable transfer taxes are raised from $1 to $5 a transaction.

5. Repeal the proration feature of existing law which provides that occupational taxes are the same whether the individual involved is in the specified business for part, or all, of a year.

6. Make jointly and severally liable the transferor and transferee for the transfer tax.

FNMA—Nonrefundable capital contributions

H.R. 7947—Vetoed May 16, 1960

Financial institutions selling mortgage paper to FNMA must subscribe to its common stock in an amount equal to 2 percent of the mortgages sold. This stock, which is issued at a par value of $100, has been selling on the market at less than the issued price.

This bill provides that where FNMA stock is purchased under these conditions, any excess of the issued price over the fair market value on the date of issuance is to be treated as an ordinary and necessary business expense in the year of purchase rather than as a part of the cost of acquiring the stock. Thus, in the future, the year of purchase is to be the taxable year in which occurs the date of issuance rather than the date of payment.

Effective for tax years beginning on or after December 31, 1959.

Foreign tax credit

H.R. 10087—Public Law 86-780, Approved September 14, 1960

This measure amends the Internal Revenue Code to permit U.S. business firms with holdings in more than one foreign country an opportunity to choose between an overall limitation on foreign tax credits or the present per-country limitation.

This has the effect of permitting taxpayers to treat the taxes of the various foreign countries collectively, rather than separately for each country. For example, if a firm has holdings in one foreign country with a tax rate of 48 percent and another holding in a second country with a 52-percent tax rate, the U.S. firm can now add these together before applying the limitation. The act provides, however, that once the taxpayer has elected the overall limitation in lieu of the per-country limitation, the overall limitation is binding until the Secretary of the Treasury, or his delegate, consents to a change.

Prohibits credits from a per-country year to be carried back and forward to overall years; however, unused credits from a per-country year may be carried back or forward to other per-country years. Permits unused credits from an overall year to be carried back and forward only to other overall years.

Excludes from gross income reimbursements for moving expenses received by employees of corporations formed exclusively to operate laboratories for AEC but applies only to amounts received before October 1, 1955, and only to cases where the individual was expressly told at time of his employment by an authorized official of the corporation that the amount of the reimbursement should not be includible in gross income. Permits these employees whose claims are now barred by the running of the statute of limitations to secure a refund of their reimbursed expenses, without interest, if claim is filed within 6 months after enactment of this act.

Bars credits when certain information requested by the Treasury Department is not furnished concerning the foreign corporation.

Requires the returns to contain information as to its creation, organization, or reorganization of the foreign corporation.

Investment company taxation

H.R. 6132—Public Law 86-416, Approved April 8, 1960

Under present law the documentary stamp tax on original issues of stock is levied at the rate of 10 cents per $100 of actual value. The documentary stamp on stock transfers, however, is levied at the rate of 4 cents per $100 of actual value.

Regulated investment companies operating as open-end mutual investment companies, however, do not usually provide for trading of their securities. Instead they issue new securities to those desiring to buy their stock, and redeem the stock of the sellers. As a result, they pay a 10 cents per $100 issuance tax on transactions which to others would result in a transfer tax of 4 cents per $100 of actual value.

This measure provides that the issuance tax in the case of qualifying regulated investment companies is to be imposed at the rate of 4 cents per $100 of actual value, rather than the 10-cent rate otherwise applicable.

This is to be effective for stock sold following enactment.

Laminated tires—Tax reduction

H.R. 6785—Public Law 86-440, Approved April 22, 1960

This law reduces from 5 cents to 1 cent a pound the tax on laminated tires used for offhighway purposes where the terrain is rough or where there is the hazard of puncture in the case of pneumatic tires. They are used primarily on lifts, cranes, payloaders, weed cutters, and similar types of industrial and farm equipment.

Under existing law the laminated tire is subject to the 5-cent tax. Because of the very heavy weight of the laminated tires, this represents a burdensome tax which, in some instances, represents a burden equal to nearly 20 percent of the retail price of the tire. To be subject to the reduction, the tire must be made wholly of scrap rubber from used tire casings and held together by a metal band on which the pads are threaded in a manner to form a complete circle.

Medical expenses

H.R. 9660—Public Law 470, Approved May 14, 1960

This law amends the Internal Revenue Code to provide a general rule that the additions to tax for the late filing of income, estate, and gift tax returns and the underpayment of estimated income tax are to be assessed and collected without the issuance of a (presently) required 90-day letter to the taxpayer with two exceptions:

1. An addition to tax for late filing which is attributable to a deficiency in tax will be subject to the 90-day letter procedure.

2. Where no return is filed for a taxable year, an addition to tax for underpayment of estimated tax will be subject to the 90-day letter procedure.

The above amendment will be effective following enactment.

The act also removes the 3-percent limit on medical and dental expenses incurred by the taxpayer for the care of his dependent mother or father, or the dependent mother or father of his spouse, if the dependent has attained the age of 65 before the close of the taxable year.

The above provision applies to the 10 years beginning after December 31, 1959.

Nonprofit corporations or associations—Exempt from taxes

H.R. 6155—Public Law 86-428, Approved April 22, 1960

This act moves forward from September 1, 1951, to September 1, 1957, the date before which certain mutual deposit guarantee funds must be organized in order to qualify for income tax exemption. The other requirements for the exemption, which are left unchanged, provide that the organizations must be mutual, nonprofit organizations without capital stock and operated to provide reserves and insurance for building and loan associations, cooperative banks, or mutual savings banks.

Three of the four presently existing mutual deposit guarantee funds were organized before September 1, 1951, and therefore presently qualify for exemption. A fourth such organization organized after that date but before September 1, 1957, will qualify for the exemption under this bill. These organizations perform essentially the same type of services at the FDIC and FSLIC, Federal Corporations which are exempt from income tax.

Effective after December 31, 1959.

Nonresident aliens—Exclusion from gross income

H.R. 135—Public Law 86-437, Approved April 22, 1960

Effective for taxable years beginning on or after January 1, 1960, this measure provides that amounts paid to a nonresident alien individual by the United States for services performed by an employee of the United States are not to be taxable to him to the extent they are attributable to basic U.S. salary derived from sources without the United States. This means that for the typical nonresident alien who has worked for the United States only abroad, no U.S. tax will be payable with reference to his pension.

State taxation study

S. 5349—Passed Senate June 18, 1960; Referred to House Rules June 20, 1960

This bill provides for a study by the Committee on the Judiciary of the House of Representatives and the Committee on Finance of the Senate of all matters pertaining to the imposition of sales and use taxes by the States on sales and other business activities which are exclusively in furtherance of interstate commerce.

The purpose of the prescribed study is to establish a sound factual basis for recommending to Congress proposed legislation providing uniform standards to be observed by the States in imposing sales and use taxes on interstate sales and business activities. Under the bill, the results of the study together with proposals for legislation are required to be reported to the House of Representatives and the Senate on or before July 1, 1962.

In 1959, following extensive hearings by various committees, Congress passed and the President signed into law a bill (Public Law 86-272) limiting the power of States to impose taxes measured by net income upon income derived from interstate commerce if the only business activities within the State consisted of (*a*) the solicitation of orders for sales of tangible personal property, if the orders were accepted and filled by shipment from a point outside the State, or (*b*) the solicitation of orders in the name of or for the benefit of a prospective customer (generally a retail dealer within the State), if the orders were accepted and filled by shipment from a point outside the State.

In addition to making it plain that maintenance of a sales office by an independent contractor did not constitute "doing business" within the State so as to make the manufacturer liable for a net income tax within that State, the 1959 law provided for a congressional study to be completed on or before July 1, 1962, of State net income taxes on incomes derived from business conducted in interstate commerce for the purpose of recommending proposed legislation providing uniform standards to be observed by the States in imposing such taxes on incomes derived from business conducted in interstate commerce. The limitations enacted in 1959 constituted, in effect, stopgap legislation.

Unemployment benefit trusts—Tax exempt

H.R. 8229—Public Law 86-667, Approved July 14, 1960

This act provides a new exempt category for income tax purposes in the case of trusts providing for the payment of supplemental unemployment compensation benefits. These may be the only benefit payments made by the trusts, or may be payments made together with subordinate sick or accident benefits (but not retirement or death benefits). This exempt category differs from the category, already under existing law, under which some of these trusts obtain exemption, in that the new provision does not require the SUB trusts to obtain at least 85 percent of their income from employers or employees (and not from investment income).

The so-called nondiscriminatory provisions of present law applying to qualified pension, profit sharing, and stock-bonus plans are in general made applicable to the trusts qualifying under the new exemption category. In addition the "prohibited transaction" provisions, and "unrelated business income" provisions (including the business lease provisions) of present law are made applicable to the new exemption category.

In general this exemption is to apply to taxable years beginning after December 31, 1959.

Unemployment tax credits

H.R. 6482—Vetoed June 3, 1960

Permits a successor employer of both incorporated and unincorporated businesses to consider as credit toward Federal income taxes funds paid by predecessors in connection with State unemployment funds.

TRANSPORTATION AND COMMUNICATIONS

Aircraft

H.R. 7593—Public Law 86-661, Approved July 14, 1960

The present measure, requested by the Civil Aeronautics Board, amends the Federal Aviation Act to permit the Board to issue limited certificates of public convenience and necessity for supplemental air transportation for a period of 20 months.

In general, this law authorizes the issuance of a certificate upon a determination of fitness and ability based on conditions peculiar to supplemental air transportation; permits the Board to issue "grandfather" certificates to those carriers now holding unrevoked certificates and have furnished service to April 7, 1960, limited to the same period as contained in the original certificate; permits the Board to grant blanket operat-

ing authorization without having to designate specific points and places limitations on these certificates to insure that service is limited to supplemental air transportation; provides for continuance of operations of presently certificated or exempted supplemental carriers on a qualified basis; preserves all existing enforcement and compliance proceedings; and provides for final disposition of certain pending applications of carriers affected by this bill.

Airline pass privileges

H.R. 4049—Public Law 86–627, Approved July 12, 1960

This legislation authorizes air carriers to grant free or reduced-rate transportation to certain classes of persons in addition to those already designated in the Federal Aviation Act of 1958. These are the following:

(1) Retired directors, officers, and employees and their immediate families receiving retirement benefits;

(2) Parents of active or retired officers and employees (whether or not living in the immediate household);

(3) Immediate family of any person injured or killed in an accident in the performance of his duty for the air carrier where the object is to transport these persons in connection with the accident;

(4) Widows, widowers, and minor children of employees who die of injuries received in line of duty.

This law, which implements a legislative recommendation of the Civil Aeronautics Board, was introduced at the request of the Board and was supported by all segments of the aviation industry, including management and labor. It is permissive and not mandatory and the Board will retain control over all conduct of the air carriers.

Alaska Railroad—Economic regulation

S. 1508—Pocket Veto July 6, 1960

To reflect Alaska's status as the 49th State, this measure amends the legislation which created the Alaska Railroad to provide that 180 days following enactment the Alaska Railroad will be subject to the Interstate Commerce Act and related acts, including Safety Appliance Acts, Boiler Inspection Act, and the Employer Liability Act the same as all other States of the Union.

In addition, the bill provides that applicable statutes regulating intrastate transportation enacted by the State of Alaska will apply to the Alaska Railroad as though privately owned.

This measure excepts from jurisdiction of the Interstate Commerce Commission the necessity for approval of any extension of the railroad or issuance of securities by the railroad.

Alaska—Vessel inspection

S. 2669—Public Law 86–688, Approved September 2, 1960

Extends to December 31, 1962, the period of exemption from inspection granted certain small vessels operated by cooperatives or associations transporting merchandise of members on a nonprofit basis to or from places within the inland waters of southeastern Alaska and Prince Rupert, British Columbia, or to or from places within the inland waters of the State of Washington.

Aviation hearings

S. 1545—Public Law 86–758, Approved September 13, 1960

To improve and assist the Civil Aeronautics Board in its administration of economic regulation of the aviation transportation industry, this measure authorizes the CAB to eliminate the requirement for a hearing in cases involving relative simple transactions which do not affect the control of a direct air carrier, or create a monopoly, or restrain competition.

In such cases the Board must first determine that the public interest does not require a hearing and that no one with a substantial interest requested a hearing. In addition, the CAB must give notice of its intention to act without a hearing through publication in the Federal Register with a copy of the notice going to the Attorney General.

Bridge commissions—Annual audit

S. 1511—Passed Senate April 11, 1960; Referred to House Public Works April 12, 1960

This measure requires that each bridge commission and authority created by an act of Congress must provide for an annual audit of its financial transactions by an independent, recognized public accountant of recognized standing. The Governors of the States concerned will prescribe the standards. After the completion of the audit, a report of the findings and a copy of the annual report will be sent to the Governors and the Secretary of Commerce.

The measure also provides that members of the commissions shall continue in office until the expiration of his present term, except where a member is serving without limitation as to length of term the Secretary of Commerce shall reappoint such member for a specific term.

Membership vacancies in the commissions will be filled by the Secretary of Commerce. Incumbent members are to serve until successors qualify. The provisions of this bill do not apply to ex officio members.

Canadian vessels—Alaska

H.R. 9599—Public Law 86–410, Approved April 5, 1960

Extends for another year, until June 30, 1961, a waiver of the statutory requirement that vessels of the U.S. registry be used in passenger or freight transportation between the United States and Alaska.

Permits Canadian-flag vessels to carry passengers and freight between Hyder, Alaska, and other ports in southeastern Alaska and foreign ports.

The waiver is necessary because the Alaska Steamship Co., an American concern, has suspended those operations described in the waiver, leaving the southeastern Alaska ports without available American transportation.

Carrier routes and rates

S. 2452—Passed Senate May 4, 1960; Referred to House Interstate May 5, 1960

This measure permits the establishment of through service and joint rates for carriers serving Alaska or Hawaii and the other States and establishes a Joint Rate Review Board.

The measure becomes effective 120 days after enactment and applies to all carriers including railroads, motor carriers, water carriers, and airlines rendering freight transportation service.

This arrangement will permit a number of carriers to render service from origin to destination on one bill of lading quoting a single transportation charge. Each carrier is required to file tariffs with the regulatory agency having jurisdiction over the carrier. These rates must be reasonable and free from unjust discrimination.

The Joint Board, established by this measure, will pass upon the lawfulness of the rates after applying the standards for permissive joint rates and through routes currently provided for motor carriers of property under the Interstate Commerce Act.

Rates applicable to and from the docks in Hawaii are to be excluded from these joint arrangements since most of this service is in the nature of local drayage within a commercial zone which the ICC exempts from economic regulation.

Certified mail—Government agencies

H.R. 10996—Public Law 86–507, Approved June 11, 1960

This law authorizes the various Government agencies to use the certified-mail procedure of the Post Office Department in lieu of registered mail. The certified-mail procedure in many instances will serve the Government's needs equally as well as the more costly registered mail.

Coastwise trade

H.R. 3900—Public Law 86–666, Approved July 14, 1960

To improve transportation facilities to and from Puerto Rico, this law authorizes enrollment and licensing as U.S. vessels two foreign-built hydrofoil vessels to transport passengers and property between and among ports within the Commonwealth of Puerto Rico.

Communications Act Amendments of 1960

S. 1898—Public Law 86–752, Approved September 13, 1960

Amends the Communications Act of 1934 to eliminate the requirement that, prior to formal designation of an application for hearing, the Commission must advise the applicant and other known parties in interest of the grounds and reasons for the Commission's inability to make the finding that a grant would serve the public interest.

This measure substitutes for the present postgrant protest procedures, a new pregrant objection procedure by means of a petition to deny.

In addition this act—

Imposes limitations on payoffs between applicants.

Grants authority to suspend station licenses.

Requires disclosure of payments made for the broadcasting of certain matter.

Grants authority to impose forfeitures in the broadcast service.

Prohibits deceptive practices in contests of intellectual knowledge, skill or chance.

Authorizes Commission to issue broadcast licenses for less than 3-year periods.

Authorizes local notice and local hearings of broadcast applications.

Requires Commission approval in cases where two or more broadcast applications are compromised or withdrawn as a result of payoffs.

Repeals the provision permitting FCC Commissioners to accept honorariums.

Contracts for transportation of mail

S. 2399—Passed Senate June 24, 1960; Referred to House Post Office and Civil Service June 25, 1960

This bill is designed to make the following needed changes in existing law relating to contracts for the transportation of mail:

First, it revises existing law to require the Post Office Department to act promptly on an application of a star route carrier to be released from his contract on the grounds of hardship.

Second, it gives the Postmaster General authority to withhold payment to a carrier on any given route when service is unsatisfactory instead of on all routes operated by the carrier as now required under existing law; and

Third, it would permit the extension of contracts from 50 miles up to as much as 100 miles when necessary in the interest of the service.

Fishing industry subsidy

H.R. 5421—Public Law 86–516, Approved June 12, 1960

This law provides a 3-year, $7.5 million subsidy program for construction of fishing vessels.

Authorizes a payment of up to one-third of the construction cost for these vessels.

Limits to citizens of the United States the right to apply for a construction subsidy; the citizen, however, must have been recommended for relief by the Tariff Commission under the escape clause of the Trade Agreements Act and relief denied by the President.

Provides that applicants must employ American crews or legally domiciled aliens.

Requires that all plans and specifications must be submitted to the Defense Department for approval that the vessel would be suitable as an auxiliary in time of emergency, and excludes from payments cost of any defense item.

Requires that these vessels be constructed in domestic shipyards by competitive bidding, with disapproved rights reserved to both Maritime Administration and the applicant.

Requires repayment to the United States if a vessel is not operated in the fishery for which it was constructed.

Great Lakes vessels

S. 3019—Public Law 86–555, Approved June 30, 1960

This law establishes pilotage requirements for foreign oceangoing vessels as well as for vessels of U.S. registry while they are navigating the five Great Lakes, their connecting and tributary waters, the St. Lawrence River as far east as St. Regis, and adjacent port areas. It also provides for a regulated pilotage system and for coordinating this system with a similar pilotage system in Canada for ocean vessels navigating the Great Lakes water of that country.

It also sets up qualifications for registered pilots authorized to direct the navigation of the vessels in certain to-be-designated restricted waters, as well as in the open waters of the lakes, and for the other officers who will be authorized to direct navigation solely in the nondesignated, or open, waters.

Provides that the President shall designate certain areas in which registered vessels of the United States and foreign vessels coming into the lakes must have in their service a registered pilot to direct their navigation, and lays down certain bases for the designation.

In waters not designated by the President, the bill permits vessels to have either a registered pilot or the master or another officer among the vessel's licensed complement who is qualified to direct navigation in open waters.

The act becomes effective upon enactment, except that the pilotage provisions would not become effective until the first day of the fourth month following the issuance of regulations by the Secretary.

Hazardous substances for household use

S. 1283—Public Law 86–613, Approved July 12, 1960

The primary purpose of this law is to establish standards for labeling hazardous substances which are used in and about the household which are not now regulated by existing law.

The Federal Caustic Poison Act of 1927 lists 12 chemical substances required to be labeled when in a container suitable for household use. Economic poisons and foods, drugs, and cosmetics are regulated but there are many substances which fit into none of these categories.

It is felt that labeling of these substances must be regulated when shipped in interstate commerce and that the standards and requirements of the labels be uniform in order to warn the use of any hazard in the customary use of the product and, in case of an accident, to identify the hazardous ingredient for the attending physician.

Highway aid

H.R. 10495—Public Law 86–657, Approved July 14, 1960

Authorizes total appropirations of $2,089,500,000 for Federal aid for highways in fiscal 1962 and 1963.

Breakdown of funds:

	Fiscal 1962	Fiscal 1963
From highway trust fund:		
Primary, secondary, urban	$925,000,000	$925,000,000
From general revenues:		
Forest highways	33,000,000	33,000,000
Forest roads and trails	35,000,000	40,000,000
Parks roads and trails	18,000,000	18,000,000
Parkways	16,000,000	16,000,000
Indian reservation roads and bridges	12,000,000	12,000,000
Public land highways	3,500,000	3,000,000
Total	1,042,500,000	1,047,000,000

The ABC road funds (primary, secondary, and urban) to be available to the States according to formulas related to area, population, and postal roads, on the basis of 45 percent for primary roads, 30 percent for secondary, and 25 percent for urban, and with the normal requirement that the States match all funds received on a 50–50 basis, with a downward sliding scale adjustment in the required share for States having certain public lands within their boundaries.

Independent freight forwarders

H.R. 5068—In Conference

This act defines and provides for licensing independent ocean freight forwarders and permits common carriers by water to compensate these ocean freight forwarders when they are licensed and perform any two of six enumerated services.

This bill provides that common carriers by water may compensate independent ocean freight forwarders for performance of certain services, and specifies the terms of the compensation. The purpose of this provision is to end the extended litigation and proceedings on this issue by recognizing the right of the independent ocean freight forwarder to receive brokerage.

International travel agency

S. 3102—Passed Senate June 7, 1960; Referred to House Interstate June 8, 1960

This measure authorizes $5 million for expanding a Commerce Department program to encourage foreign tourists to visit the United States to help offset the current balance-of-trade deficit of the United States.

Establishes in the Department of Commerce an Office of International Travel with a director and staff, to be advised by a Travel Advisory Board of 12 part-time, non-Government personnel.

The office is designed to encourage more host arrangements and tourist facilities in the United States, coordinate Federal travel services, participate in the International Cooperation Administration's technical assistance and economic development programs. It will also collect and publish travel information.

Intrastate motor carriers operating in interstate commerce

S. 3228—Passed Senate September 1, 1960

This bill amends the Interstate Commerce Act to permit State commissions under a specific procedure to grant the right to motor common carriers operating within a single State to engage in interstate or foreign operations within the boundaries of the State in which intrastate authority is simultaneously authorized, and to authorize the Interstate Commerce Commission to issue certificates of registration to existing carriers engaged in interstate operations under the terms of the present second proviso.

The existing second proviso of section 206(a)(1) of the Interstate Commerce Act enables motor common carriers whose operations are confined to a single State and who have been granted a certificate to allow operation within the State from their State regulatory bodies to also engage in operations in interstate and foreign commerce. These operations in interstate and foreign commerce must, of course, be carried on entirely within the State in which the motor carrier is certificated to operate.

Mass Transportation Act of 1960

S. 3278—Passed Senate June 27, 1960; Referred to House Banking June 28, 1960

To assist State and local governments in improving mass transportation services in metropolitan areas, Congress passed this measure and declared as its policy to assist these crowded areas in studies and planning in order to determine their transportation needs, to formulate a program for the most efficient use of existing facilities, and to study and develop plans for various new transportation systems.

This bill—

Authorizes Federal grants for transportation system planning.

Makes the public facility loan program applicable to financing, acquisition, construction, and improvement of facilities and equipment for use in mass transit systems in urban areas.

Provides that mass transportation loans may be made only after a showing that these funds are not otherwise available on equally favorable terms. Interest rates to these borrowers cannot exceed the total of one-fourth of 1 percent a year, added to the rate paid by the Administrator, to obtain funds from the Secretary of the Treasury.

Directs the Administrator, in processing applications for mass transportation loans, to give priority to applicants who have a workable plan to develop a coordinated mass transportation system and to those with the most pressing need for assistance.

Increases the public facility loan revolving fund from $100 to $300 million—$100 million of the total fund is reserved for mass transportation loans. The remaining $100 million of the $200 million increase in the total fund will be available for regular public facility loans.

Provides that funds for such loans be obtained from the Treasury at a rate not more than the average annual interest rate of all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the borrowing.

National Transportation Week

House Joint Resolution 602—Public Law 86–475, Approved May 20, 1960

As a public recognition of the vitality and resourcefulness of those individuals who have capably met and continue to meet the ever-changing and growing transportation needs of our country, the Congress requests the President to proclaim the third week in May of 1960 as National Transportation Week.

Obscene mail

H.R. 7379—Public Law 86–573, Approved July 14, 1960

This law authorizes the Post Office Department to seek court orders to curb use of the mails for distributing obscene or fraudulent matter.

Political broadcasting—Equal time

Senate Joint Resolution 207—Public Law 86–677, August 24, 1960

This legislation is designed to suspend for the period of the 1960 presidential and vice-presidential campaign with respect to the nominees for the office of President and Vice President of the United States a part of section 315(a) of the Communications Act of 1934, as amended. That is the part which requires a licensee of a broadcast station who permits any legally qualified candidate for a public office to use a broadcasting station to afford equal opportunities to all other candidates for that office in the use of the broadcasting station.

This joint resolution also provides that the Federal Communications Commission make a report to Congress not later than March 1, 1961, relative to the provisions of this joint resolution and any recommendations the Commissioner may have for amendments to the Communications Act of 1934 as the result of experience under the provisions of the legislation.

Postal service codification

H.R. 2339—Public Law 86-682, Approved September 2, 1960

The intent of this measure is to consolidate and simplify the many laws governing the postal service by—

Substituting simple language for awkward, obsolete terms;

Resolving conflict in laws;

Revising ambiguous provisions to reflect the Comptroller General's interpretations; and

Eliminating superseded, obsolete or executed laws.

Railroad indebtedness

H.R. 11405—Public Law 86-496, Approved June 8, 1960

Revises method for treating railroad corporation income resulting from discharge of indebtedness in receivership or under bankruptcy proceedings.

Present law provides that the discharge of indebtedness of a railroad corporation in a taxable year beginning before January 1, 1958, is not to result in taxable income for the railroad if the discharge occurred as the result of a court order in a receivership proceeding or in a proceeding under section 77 of the Bankruptcy Act. This law continues the application of this provision to discharge after December 31, 1959, but only if the court proceeding involved commenced before January 1, 1960.

The Technical Amendments Act of 1958 provided that a deduction for accrued vacation pay is not to be denied for any taxable year ending before January 1, 1961, solely because the liability for it to a specific person has not been fixed or because the liability for it to each individual cannot be computed with reasonable accuracy. However, for the corporation to obtain the deduction the employee must have performed the qualifying service necessary under a plan or policy which provides for vacations with pay to qualified employees. Under this bill the same treatment is extended to deductions for taxable years ending before January 1, 1963.

Ship construction subsidy

H.R. 10644—Public Law 86-607, Approved July 7, 1960

This law raises the construction subsidy ceiling from the present 50 percent to 55 percent on contracts for the construction of merchant ships signed within 2 years from the date of enactment and retroactive to keels laid after June 30, 1959.

Thus, for this limited period, American shipyards and American shipowners will be placed on a parity with their foreign competitors so long as foreign and domestic vessel prices remain at the present projected levels.

Bars free or reduced-rate ship transportation to Government employees or officials on U.S. merchant marine vessels.

Ship mortgage insurance

S. 3018—Passed Senate June 6, 1960; House Calendar

Grants temporary Federal aid to the depressed shipping industry, particularly the tanker industry, by authorizing the Department of Commerce to advance funds to mortgagors, insured under the Merchant Marine Act, in order to prevent them from having to default in their installment and interest payments.

Congress enacted this Government insurance program in 1959 to enable the shipping companies to replace their wornout fleets with modern efficient ships and tankers; also to encourage private financing rather than Government financing. The recession in the shipping and tanker industry, which has developed in the past few months, has created a problem whereby the Government has to either take over and mothball these mortgaged ships or grant temporary relief to the shipowners.

Thus, this permissive legislation will allow the Maritime Commission to borrow from the Treasury and make loans to prevent the defaults and also continue the mortgage payments to the Government but stretched out over a longer term.

Towing vehicles removed from ICC regulation

S. 2375—Passed Senate May 26, 1960; Referred to House Interstate May 27, 1960

This measure removes from ICC regulation motor vehicles used to tow disabled or wrecked vehicles.

Transit regulation compact

House Joint Resolution 402—Public Law 86-794; Approved September 15, 1960

The purposes of the resolution are: (1) to grant congressional consent, pursuant to the Federal Constitution, to an interstate compact between the States of Virginia and Maryland and the District of Columbia, (2) to authorize and direct the Commissioners of the District of Columbia to enter into and execute the compact, (3) to suspend Federal jurisdiction relating to or affecting transportation under the compact and to the persons engaged therein, and (4) to confer jurisdiction upon the Federal judiciary to review orders of the compact commission and to enforce the regulatory provisions of the compact.

U.S. shipyards—Domestic vessels

S. 3189—Public Law 86-583, Approved July 5, 1960

Amends the Merchant Marine Act to require that any vessel of more than 500 gross tons which has acquired the right to engage in coastwise trade must, if rebuilt, be rebuilt entirely within the United States, its territories, or its possessions; otherwise it will lose the right to engage in coastwise trade.

Vessel exchange

S. 2618—Public Law 86-575, Approved July 5, 1960

This act authorizes the Secretary of Commerce to acquire vessels which were constructed as contracted for by the Government between January 1, 1941, and September 2, 1945, or which were constructed between September 3, 1939, and September 2, 1945, and acquired by the Government during the latter period, toward exchange for vessels from the reserve fleet which were built, contracted for, or acquired within the periods noted.

Requires payment in cash at the time of the exchange for the excess in value of the vessels traded out.

Vessels offered for trade-in must have been owned by U.S. citizens, and must have been documented under the American flag and operated without operating-differential subsidy for 3 years immediately preceding the exchange date.

Vessel life—Extension

H.R. 10646—Public Law 86-518, Approved June 12, 1960

This law amends the Merchant Marine Act of 1936 so as to relate the life expectancy of certain vessels to 25 years instead of 20 years.

Under present law the merchant marine is required to establish a depreciation reserve for all ships based upon a 20-year life; however, the actual fact is that these ships have a life of 25 or more years.

Thus, the amendment merely requires that when a ship has a life of 25 years, it may be depreciated or set up on the basis of 25 years, and not on the fictitious basis of 20 years, which requires a higher annual depreciation.

VETERANS

Basic pay

H.R. 7502—Public Law 86-492, Approved June 8, 1960

This act liberalizes the method of computing basic pay for dependency and indemnity compensation by using a higher rank held in service than that held at the time of a veteran's death in service or his discharge, if the use of the higher rank results in a greater benefit to the widow. It applies to cases where the veterans had satisfactorily served on active duty for 6 months or more in the higher rank and was so serving within 120 days of his death or discharge.

The formula for determining the amount of compensation which the widow receives is $112 plus 12 percent of the base pay of the person, who served. Thus, this bill relates the dependency and indemnity compensation payable to a widow to the income level of her husband to which they have been accustomed over an extended period of time near the date of his death or separation from service.

Children benefits

H.R. 10898—Public Law 86-499, Approved June 8, 1960

Under existing law, veterans with service-connected disabilities rated 50 percent or more disabling are entitled to additional compensation for their wives, children (three only), and dependent parents. Thus a veteran with a wartime disability, totally disabled, receives $23 for a wife, $39 for a wife and one child, $50 for a wife and two children, and $62 for a wife and three children. No payment is made for children in excess of three, and the rate for children in excess of one is generally a $12 monthly additional allowance.

This measure permits the $12 monthly payment for all children, regardless of the number a veteran might have.

Dependents—Additional compensation

H.R. 276—Public Law 86-490, Approved June 8, 1960

This measure authorizes additional compensation to veterans for dependents based on the establishment of a disability rating of not less than 50 percent from the effective date of the increased percentage evaluation, provided the basic proof of dependents is received in the Veterans' Administration within 60 days from the date of notification of the rating action.

Under existing law, the effective date of additional compensation for dependents cannot be earlier than the date of the receipt of evidence showing dependent entitlement.

Disabled veterans

H.R. 7211—Public Law 86-663, Approved July 14, 1960

This act provides a new rate of $265 a month for any service-connected disabled veteran who is rated as totally disabled and has additional service-connected disabilities ratable at 60 percent or more, or is permanently housebound.

Duplicate benefit payments—Barred

H.R. 9788—Public Law 86-495, Approved June 8, 1960

This measure prohibits duplicate benefits, such as compensation, dependency, and indemnity compensation, or pension, to a child on account of death of more than one parent in the same parental line. It does not affect insurance benefits which are matters of contract.

Thus, this act will preclude a case such as the following: A World War II widow with three children was receiving compensation for the death of her World War II husband and so were the children of this marriage. The widow remarried and the second husband was a veteran, who later died. Upon his death the three children of the first marriage were receiving benefits from both.

Facilities for veterans

S. 2201—Passed Senate June 28, 1960; Referred to House Veterans' Affairs June 29, 1960

This bill amends the definition of the term "Veterans' Administration facilities" to include private contract facilities for veterans in any war in a State if (1) no Veterans' Administration hospital is located in the State on the effective date of the act, and (2) no Veterans' Administration hospital is located within 500 miles of the border of the State.

The amended definition of "VA facilities" permits the use of private contract hospitals for the care of veterans with non-service-connected disabilities in the States of Alaska and Hawaii. In practical effect, this merely restores privileges to Alaskan and Hawaiian veterans which they enjoyed prior to admission of these States to statehood.

Inasmuch as the VA now has authority to use private contract facilities for the care of service-connected cases, the authority conferred upon the Administrator by this bill is limited to non-service-connected disabled veterans. To qualify for care in a private contract facility, the non-service-connected veteran would have to meet the same standards as would apply to a veteran in any one of the other 48 States.

Guaranteed and direct loan programs

H.R. 7903—Public Law 86-665, Approved July 14, 1950

This law extends the VA guaranteed and direct home loan programs for 2 years, through July 25, 1962.

Insurance waivers

H.R. 10703—Public Law 86-497, Approved June 8, 1960

This act authorizes a waiver of national service life insurance premiums to those veterans who become totally disabled in line of duty between the date of application and the effective date of their insurance. It applies to veterans of World War II and the early Korean conflict only.

The act requires application for its benefits within 2 years after enactment and an extension of time for applying will be provided for insane persons and minors. It revives certain lapsed contracts of insurance but precludes payment in any case where the servicemen's indemnity or gratuitous disability insurance had been paid.

Medal of Honor pensions

H.R. 270—Passed Senate, Amended, August 19, 1960; House Agrees With an Amendment

The purpose of this act is to liberalize the monthly pension payable to holders of the Congressional Medal of Honor. The bill, as passed by the House of Representatives, would eliminate the existing law eligibility requirements that the individual must be 65 years of age and honorably discharged from the armed services, and increase the amount of the monthly pension from $10 to $100. The bill, as passed by the Senate, would reduce the age requirement from 65 to 62 and allow the Medal of Honor holder who has been honorably discharged from the Armed Forces to elect, by filing proper application, either the $10 rate or choose a monthly pension of $100 which would be subject to reduction by the amount of any non-service-connected disability pension which he may receive.

National service life insurance

H.R. 11045—Passed Senate, Amended, June 2, 1960

This measure restores for 1 year (after January 1, 1961) veterans' eligibility for World War II national service life insurance, if the veteran had active service between October 8, 1940, and September 2, 1945, inclusive.

Authorizes for this 1-year period the same type NSLI for those veterans who had active service between September 3, 1945, and April 24, 1951, inclusive.

Restores for this same period the eligibility of persons separated from active service on and after April 25, 1951, and prior to date of enactment of the bill, who have a service-connected disability but are otherwise in good health, for nonparticipating service disabled veterans insurance.

Provides a 1-year period during which veterans separated from active service on and after April 25, 1951, and prior to January 1, 1957, may be granted nonparticipating national service life insurance on a limited convertible term or permanent plan.

This bill requires that the administrative cost of the insurance granted to persons in the above groups, except the service-disabled veterans, be borne by the insured by a reduction in dividends in the participating insurance group, and a loading of premiums in the nonparticipating insurance group.

Provides that a medical examination, when required of an applicant for insurance, other than service-disabled veterans insurance, shall be at the applicant's expense and by a licensed physician.

Exclude from eligibility those persons whose service before July 1, 1946, in the organized military forces of the Government of the Commonwealth of the Philippines while these forces were in the service of the United States, or in the Philippine Scouts.

NSLI—Aviation accident

H.R. 9785—Public Law 86-494, Approved June 8, 1960

This law grants a gratuitous national service life insurance up to $10,000 to any seaman who died as a result of an aviation accident incurred in the line of duty in active service of the Navy after October 7, 1940, and before August 4, 1942, while undergoing flight training leading to appointment as an aviation cadet under the act of April 15, 1935.

The insurance is payable effective from the date of enactment in monthly installments to a limited class of beneficiaries, if living, and no payment will be made to the estate of such person.

Similar laws, which have since been repealed because no longer necessary, authorized a $10,000 insurance policy with premiums paid by the Government to members of the Armed Forces serving as aviation cadets, aviation students, or otherwise undergoing some type of flight training. However, to reduce paperwork the Navy enlisted such students as seamen, second class, V-5, for the elimination and primary stages of flight training. In 1942, Congress passed an act permitting aviation cadets to enlist in the Navy instead of the appointment of such cadets from the enlisted seamen. This act will take care of those few cases in which the seaman was killed prior to qualifying as an aviation cadet, or during his elimination flight.

Outpatient care

H.R. 7966—Public Law 86-598, Approved July 7, 1960

This act expands the use of optometrists' services in the Veterans' Administration outpatient program for veterans having service-connected eye conditions.

Under existing law the Veterans' Administration is authorized to furnish outpatient medical care for veterans with service-connected disabilities. This care is furnished primarily in Veterans' Administration clinics, but it is supplemented by the services of fee-basis, private physicians in cases where it is not feasible to provide the care at the clinics.

The general authority to provide such care states that the Administrator of Veterans' Affairs may furnish "medical services" for a service-connected disability. The term "medical services" is defined as follows:

"The term 'medical services' includes, in addition to medical examination and treatment, dental and surgical services, and dental appliances, wheelchairs, artificial limbs, trusses, and similar appliances, special clothing made necessary by the wearing of prosthetic appliances, and such other supplies as the Administrator determines to be reasonable and necessary."

To insure expanded use of optometrists' services, this act amends the definition "medical services" by adding the words "optometrists' services" immediately after the word "treatment."

Service connected—Death benefits

H.R. 641—Public Law 86-491, Approved June 8, 1960

This act is designed to authorize payment of service-connected death compensation to an otherwise eligible widow of a veteran if she was married to him before the expiration of 15 years after the termination of the period of service in which the injury or disease causing death was incurred or aggravated.

Under existing law, dependency, indemnity, and death compensation may be paid to a widow, otherwise entitled, who was married to the veteran (1) Before the expiration of 15 years after termination of the period of service in which the injury or disease causing death of the veteran was incurred or aggravated; or (2) For 5 or more years; or (3) For any period of time if a child was born of the marriage. However, if neither the second nor third condition is met, death compensation is payable only if the widow was married to the veteran before the expiration of 10 years after termination of the period of service in which the injury or disease causing the death of the veteran was incurred or aggravated.

This bill extends the 10-year period to 15 years to make it consistent with the other service-connected death benefit provision.

Service connected—Severance

H.R. 113—Public Law 86-501, Approved June 10, 1960

This act prohibits the severance of any service connection granted under title 38, United States Code, and which has been in effect for 10 or more years, unless it is shown that there was fraud or that the veteran did not have the necessary service or character of discharge.

It should be noted, however, that this act merely freezes the determination of service connection and does not freeze the percentage rating which represents the degree of the disability and governs the amount of compensation. Thus a veteran with a disability rating of 10 percent may later be medically determined to be 80 percent disabled and have his rating and compensation increased. Likewise, a rating and compensation can be reduced as the degree of disability declines.

State veterans' homes

H.R. 10596—Public Law 86-625, Approved July 12, 1960

This measure changes the method of Federal aid to State homes from a payment of $700 a year to a daily maximum basis of

$2.50. The $2.50 a day maximum increases from $700 to $912.50 a year, the amount payable to States for the care of disabled soldiers, sailors, airmen, and marines.

The first Federal contribution to States in aid of State veterans' homes was authorized in 1888. At that time the aid was fixed at $100 a year for each veteran. Since 1920 the Federal contribution has gradually increased and reached its present level of $700 in 1954.

VA Hospitals—Patient turnover

H.R. 7965—Public Law 86–639, Approved July 12, 1960

This law authorizes the Administrator of the Veterans' Administration to furnish medical service for a non-service-connected disability under the following circumstances:

(1) Where such care is reasonably necessary in preparation for admission of a veteran who has been determined to need hospital care and who has been scheduled for admission; and

(2) Where a veteran has been granted hospital care, and out-patient care is reasonably necessary to complete treatment incident to such care.

This new authority conferred upon the Administrator is limited to non-service-connected cases, inasmuch as authority for providing such care to veterans with service-connected disabilities already exists.

The purpose of the bill is to accelerate the rate of patient turnover in Veterans' Administration hospitals.

VA—Reimbursements

H.R. 10108—Public Law 86–590, Approved July 5, 1960

This act authorizes reimbursement for ferry fares, and bridge, road, and tunnel tolls in addition to the mileage allowance.

Section 111 of title 38 authorizes the Administrator of Veterans' Affairs to pay the actual necessary expense of travel or an allowance based upon mileage traveled, of any person who travels in connection with vocational rehabilitation, certain educational and vocational counseling, or for the purpose of medical examination, treatment, or care. Travel payments are also allowed for required attendants, other than employees of the Veterans' Administration.

The mileage allowance is currently set at 5 cents per mile. Recent studies by the Veterans' Administration have shown, however, that in some areas the 5-cent rate is inadequate to cover ferry fares, and bridge, road, and tunnel tolls, which, of course, constitute essential elements in general travel costs. Presently, such fares and tolls may be recovered by filing claims for "actual necessary expense" instead of the "mileage allowance"; however, the recovery of fares and tolls by this method involves considerable inconvenience and impracticality.

In view of these facts, it is believed it will be much simpler and more convenient, both for the individual and for the Government, to permit amounts for fares and tolls to be added to the mileage allowance.

ROLLCALL OR VOICE VOTES ON LEGISLATIVE RECOMMENDATIONS SUBMITTED BY PRESIDENT EISENHOWER, 86TH CONGRESS, 2D SESSION

During the 2d session of the 86th Congress, the President submitted 152 recommendations. These proposals were carefully examined by the Congress and changes made wherever and whenever they appeared necessary for the best interests of the people.

Below is a recapitulation of legislative action on these recommendations. Following the recapitulation is a list of all the recommendations with a detailed analysis of all activity on each.

Gains for Alaska in the 86th Congress

EXTENSION OF REMARKS
OF
HON. ERNEST GRUENING
OF ALASKA
IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. GRUENING. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a statement which I have prepared on the record of legislation, of interest to my State of Alaska, which has been written by the 86th Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GRUENING

One of the foremost practical advantages foreseen for Alaska throughout the long period in which the people of that former Territory sought statehood was the gaining of a voice and a vote in the Congress.

Now that the end is at hand for the 86th Congress, the first in which Alaska has enjoyed participation on a basis of equality with her sister States, it is appropriate to cast up accounts and see whether and how this first great practical advantage of statehood has been realized.

I believe it must be the verdict of history that the 86th Congress has done well by the infant State. Alaska has made greater progress, governmentally, in the past 20 months than in any like period in her history. The groundwork has been laid for a sound, a prosperous, and—in the long view of history—a populous State. Many enactments which will have great significance in the years to come have been achieved in the two sessions of Congress which have followed Alaska's admission on January 3, 1959.

The record of accomplishment for Alaska in the two sessions now ending is all the more remarkable in that it has been written against a background of divided Government. The Congress has been overwhelmingly Democratic in both House and Senate. Much worthwhile legislation has been lost through the veto or a threat of veto by the Republican President. Some legislation vitally needed by Alaska, such as that providing the first money for Rampart Dam, has been enacted only by the overriding of the veto. With the Senate certain to remain under Democratic control next year and with the House of Representatives virtually certain to do the same, it can be hoped by those interested in responsible and effective Government that the era of discord and division will end with the election in November of a Democratic President sympathetic to Alaska's, and indeed the Nation's, needs and aspirations.

Within the Congress, as far as Alaska programs are concerned, there has been no discord or division. The Alaska delegation has worked unitedly and with singleminded purpose to achieve for our State those things which are essential for our growth and well-being in these first years of statehood. What Alaska has gained in this 86th Congress could not have been accomplished without the devoted efforts of a team, which the Alaska delegation has comprised. No words could possibly express my admiration for the manner in which the senior Senator from Alaska Mr. BARTLETT, and our State's sole Member in the other body, Representative RALPH RIVERS, have worked with me untiringly throughout the session. I would be lacking in gratitude also if I did not at this point express my thanks for the assistance and the understanding of the majority leader, the assistant majority leader, the chairmen of the committees, and many Members on both sides of the aisle who have been helpful in seeing that Alaska is off to a good start as a State.

Here is the story, necessarily abbreviated, of what has been achieved for Alaska in this first session of the Congress in which our State has had full voting representation.

The development of Alaska's unmatched resources for the production of hydroelectric power represents one of the most important areas in which Federal legislation is required to realize the full potentials of this great source of energy.

RAMPART CANYON DAM

At Rampart Canyon, on the Yukon River, Alaska possesses the finest site on the American Continent for the construction of a hydroelectric dam which could produce more electric power than any other installation under the flag. Preliminary studies of the Army Corps of Engineers indicate that a dam at Rampart could produce about 5 million kilowatts of installed power capacity at a cost of approximately 2 mills per kilowatt-hour at the bus bar. It would produce more than twice as much power as Grand Coulee and the size of the power installation and the reservoir created by its construction would dwarf that mighty dam. The capacity of the proposed Rampart Dam would be half again as great as that of the entire Tennessee Valley Authority. The enormous lake that would be its reservoir would cover more than 10,000 square miles and could change the climate of Alaska in its vicinity. The cost of Rampart Dam has been estimated at between $900 million and $1.5 billion, and it may take at least 10 years to construct it.

As a first step toward the realization of this much needed source of power, but in the face of vigorous opposition from the administration, the Alaska delegation, in the first session of the 86th Congress, succeeded in obtaining an initial appropriation of $48,750 to enable the Corps of Engineers to begin its study of this project. For the fiscal year 1961 the administration recommended the appropriation of only $100,000 for the continuation of the study. Through the vigorous support and urging of the Alaska congressional delegation, this sum was raised to $350,000 as passed by the Senate and to $225,000 as finally agreed upon in conference and enacted.

SNETTISHAM POWER PROJECT

In the Juneau area the Bureau of Reclamation has made studies and has reported favorably on the construction of the Crater-Long Lakes division of the Snettisham project. This projected source of electric power would have an installed capacity of 48,000 kilowatts, and could be constructed at an estimated cost of $40 million. Firm energy would be produced at a cost of 6 mills per kilowatt-hour.

For the purpose of obtaining necessary congressional authorization for construction of this project by the Bureau of Reclamation, I introduced a bill, S. 3095. Action by Congress on the measure was not completed by this Congress due to the failure of executive departments concerned to submit required comments on the report of the Bureau of Reclamation in time to allow necessary hearings in Washington. In accordance with authorization for this purpose by the chairman of the Interior and Insular Affairs Committee, I expect to hold hearings at Juneau on the need for this project and power requirements of the city of Juneau during the period between adjournment of the 86th Congress and the convening of the 87th Congress.

ANCHORAGE POWER REQUIREMENTS

The growing needs of the city of Anchorage for electric power were highlighted in the past year by the request of the city manager that legislation be introduced which would authorize modification of Eklutna Dam in a manner which would raise the present height of the dam and convert approximately 20 million kilowatt-hours of nonfirm energy now produced into firm energy for use of the city of Anchorage. A hearing held on the bill, which I cosponsored, S. 3222, was held in Washington on May 11, 1960, and developed much factual information concerning increasing power needs of the Anchorage area and provided a useful discussion of this proposal as well as other possible means of developing sources of this power.

I expect to hold additional hearings on this bill in the Anchorage area during the period after adjournment of the 86th Congress for the purpose of further exploring needs for Federal legislation to achieve power required for anticipated growth of population and industry in the Anchorage area.

RECLAMATION INVESTIGATIONS

During the first session of this Congress the Senate passed a bill, S. 1514, introduced by Senator BARTLETT and myself, which would remove the present ceiling of $250,000 on annual authorizations for the Bureau of Reclamation for carrying on investigations of water resource development projects, including hydroelectric projects, in the State of Alaska. The artificial ceiling on reclamation requirements for this purpose must be lifted in order that this important agency may make its full contribution to the development of Alaska. Unfortunately, the House Interior and Insular Affairs Committee took no action on this bill.

ALASKA OIL RESOURCE DEVELOPMENT

During the first session of the Congress I cosponsored a bill, S. 1855, to increase limitations on the amount of public land a single oil and gas lessee may hold in Alaska to a total of 1 million acres, rather than the 300,000 acres under lease and option provided for by then existing law. As reported to the Senate, the bill provided for an increase to 600,000 acres. This bill, which passed both Houses of Congress, was the subject of the most completely unjustified veto of the many vetoes exercised by President Eisenhower during his tenure in office. Relying on advice of the Department of Interior that Alaska should be divided into two regions, separated by the Brooks Range, and that a maximum limitation of 300,000 acres should be applied in each region, the President vetoed this important legislation, thus temporarily delaying passage of a measure designed to expedite development of the oil and gas resources in Alaska.

During the second session of the Congress both Houses enacted comprehensive legislation revising the Mineral Leasing Act of 1920. This is now Public Law 86–705. A provision of the law adopted by both Houses is an increase in oil and gas acreage limitations in Alaska to a maximum holding of 600,000 acres for each lessee. While the law will require a division of the State into two regions, the line of division will follow the line of the Yukon and Tanana Rivers, thus resulting in a more reasonable separation of leasing areas in the State than that originally proposed by the Department of the Interior in its report on the bill vetoed by the President during the first session. In addition to increasing acreage limitations for Alaska oil and gas lessees, the new mineral leasing amendments include many other significant changes in law governing leasing of public lands for oil and gas development.

COAL LEASING

During the first session Congress passed and the President signed the law (Public Law 86–252), cosponsored by Senator BARTLETT and myself, which increased acreage limitations on the amount of land which may be held by a single lessee for coal mining. The previous acreage limitation for Alaska was extremely discriminatory, in that it allowed

Alaska lessees a maximum holding of only 2,560 acres. The new law allows Alaska lessees the same limitation as those of other States—a total of 10,240 acres, with an additional allowance of 5,120 acres at the discretion of the Secretary of the Interior.

COPPER, FLUORSPAR, GOLD, LEAD AND ZINC, TIN

For the benefit of industrial development of deposits of these minerals, I cosponsored the following bills:

Senate Resolution 101, opposing the release of Government stockpiles of copper as a means of maintaining present price levels of copper. Not reported.

S. 1285, to provide for the development and preservation of the domestic fluorspar industry. Not reported.

Senate Resolution 163, a measure adopted by the Senate requiring the Tariff Commission to make a study of the need for imposition of quotas and tariffs on fluorspar imports with a view to taking action needed to insure markets for domestic supplies of this product. Not reported.

S. 590, a bill to provide for the free marketing of gold for the purpose of stimulating the recovery of this industry. Not reported.

Senate Resolution 162, S. 1538, and S. 2169 were all measures designed to improve conditions of domestic producers of lead and zinc. The Senate resolution would have called upon the Tariff Commission to study the need for quotas and tariffs on lead and zinc with a view to increasing markets and stabilizing of domestic production. S. 2169 would have increased duties on imports of lead and zinc, and S. 1538, as another approach to the problems of domestic producers, would enact measures to stabilize production of domestic lead and zinc.

Senator BARTLETT and I cosponsored a bill, S. 1957, passed by the Senate, providing for stabilization payments by the Secretary of the Interior to domestic tin producers, a measure designed to stimulate production of this basic metal. It was not acted on by the House committee.

WATER

I enthusiastically supported legislation designed to reduce pollution of waters of America, and was cosponsor of the bill S. 2992, which would expand Federal programs of research into methods of water pollution control, improve enforcement measures, and otherwise improve provisions of existing legislation for Federal water pollution control programs. This bill was not acted on by the Senate committee.

I objected strongly to the act of the President in vetoing the bill H.R. 3610, which was a measure passed by Congress to increase authorizations for amounts to be expended by the Federal Government on water pollution control.

For the State of Alaska, I joined with Senator BARTLETT in sponsoring S. 2628, a bill passed by the Senate which provided for a study of water resources of the State of Alaska. No action was taken by the House committee on this measure.

FISHING INDUSTRY

Rehabilitation of the Alaska fishing industry is essential for this important segment of the Alaska economy. S. 3658, a bill introduced by me during the second session, cosponsored by Senators MAGNUSON and JACKSON, of Washington, Senators MORSE and LUSK, of Oregon, and Senator ENGLE, of California, would double the amount of funds now authorized to be appropriated to the Secretary of the Interior from customs receipts on fish and fish products for research and development of the fishing industry. Additional funds made available would be used for the same purposes for which they are now authorized, including scientific research on fishery development and conservation and development of domestic markets for fish and fish products. This bill was introduced late in the session in the expectation that during the period before the 87th Congress convenes support can be engendered in the Pacific Northwest for its enactment.

Conservation measures, designed to protect fishery resources, which I cosponsored and supported include S. 502 and Senate Joint Resolution 184, in favor of which I testified before the Senate Committee on Interstate and Foreign Commerce. S. 502 would prohibit imports of salmon from countries failing to apply conservation measures necessary for protection of salmon stocks. No action was taken beyond the hearings. Senate Joint Resolution 184 would extend a similar prohibition to other kinds of fish and shellfish. Hearings were held but no further action was taken.

The growing importance of the shrimp industry in Alaska caused me to join with Senators from other States to which the sale of shrimp and shrimp products is of particular economic significance in cosponsoring legislation to establish quotas and tariffs on imported shrimp and shrimp products. The purpose of such legislation is to reduce imports of shrimp from other countries, thus enabling domestic producers to find a larger market for their shrimp. The bills which I cosponsored for this purpose are S. 3204, a long range measure designed to enact quotas and tariffs into permanent law, and S. 3639, an emergency measure introduced by Senators from shrimp producing areas to be effective for a limited period of time. No action was taken on either of these bills, but the Finance Committee has directed the Tariff Commission to undertake an investigation of the shrimp industry.

LAND MANAGEMENT

I cosponsored with Senator BARTLETT S. 3469, a bill authorizing the Bureau of Land Management to sell land in Alaska containing coal, oil, or gas with a reservation of minerals to the Government. At the present time, this land cannot be sold. The bill would help simplify the enormously complicated procedures now applicable to land transactions in Alaska. It passed the Senate, but received no action in the House.

I cosponsored a bill with Senator BARTLETT, S. 1411, which has now become law (Public Law 86–512), authorizing owners of land at Big Delta and Tok Junction to acquire property lying between their estates and the highways. This provision enables some of the land that was withdrawn earlier by the Government in the form of excessive rights-of-way to be restored to private entry.

I also cosponsored S. 3267, which passed the Congress, amending the current law relating to disposal of certain lands in Alaska. The new law would enable Matanuska Valley farmers to buy land at less than market value set by the Bureau of Land Management. In addition to correcting previous practices that have caused complaints of unfairness in land sales, the bill will be to the Government's advantage in that the cost of prolonged appeals can be avoided.

S. 3434, which I also cosponsored, would authorize the State of Alaska to make partial selections of public land under mineral lease. This bill is of great importance to Alaskans, as it will facilitate selection of lands allotted to Alaska under the Statehood Act and as such, of course, would greatly assist the State in proceeding with the selection of lands to which it is entitled. Although the Interior Committee did not report S. 3434, its provisions were incorporated in Public Law 86–786 (S. 2959) which was signed by the President on September 14, 1960.

S. 3545, which I cosponsored, and which is now Public Law 86–620, amends a 1929 statute granting 100,000 acres of public land in Alaska for the support of the University of Alaska. Previously this land could be sold or leased only at public auction. The newly passed bill will allow the sealed-bid method to be used. This is, of course, the more general practice in land sales and the leasing of public property by such a procedure usually brings higher prices. Consequently, the University of Alaska stands to benefit from this bill.

Another bill which I cosponsored (now Public Law 86–173) amends the Alaska Statehood Act by permitting the State to acquire lands that may have come under Federal oil and gas lease provisions subsequent to statehood. The enactment of this bill was, of course, greatly desired by the State, as it helps to carry out the primary intent and purpose of Congress in making land grants; namely, that of enabling the State to support statehood in its own right.

S. 2587, cosponsored by me, which passed the Senate, but did not come out of the House Interior and Insular Affairs Committee, is a bill of general application which requires any department or agency of the Government to come to Congress for legislative approval for all land withdrawals in excess of 5,000 acres. This bill is of particular consequence, as the decision to withdraw large areas of land should be accomplished only with legislative approval. This provision amends a law enacted in 1958 requiring the Defense Department to seek similar congressional approval for its proposed withdrawals. If it had passed the House and had been signed by the President, it would have restored some of the legislative authority that has been forfeited to the executive branch during recent years.

HOMESTEADERS

Another major legislative objective was the enactment of a law which would insure fair treatment for Alaska homesteaders who have been faced with demands of the Department of the Interior for waiver of subsurface rights as a result of reclassification of sedimentary lands in Alaska as prospectively valuable for oil and gas.

Early in the session I introduced a bill, S. 1670, to quitclaim to homesteaders the rights of the United States to mineral deposits in homesteads where valid entries had been made prior to the actual discovery of oil on the Kenai Peninsula in July 1957.

The bill, as introduced, ran into strong opposition from the administration. Just prior to the July recess of the second session the Senate Committee on Interior and Insular Affairs authorized an investigation of the Anchorage Land Office to determine the extent to which errors of administration of the public land laws by that office had contributed to the problems faced by the homesteaders in connection with the loss of their subsurface rights. The committee requested that the Secretary of the Interior extend the moratorium on submission of waivers of mineral rights demanded of the homesteaders pending completion of the survey and determination of the committee as to action to be taken by it as a result thereof. The Secretary of the Interior refused to agree to the committee's request. Instead, he insisted that the bill I introduced be sharply restricted and limited to those homesteaders on the Kenai Peninsula who had completed all requirements, except the submission of final proof, by July 23, 1957. Realizing that any bill going beyond the demands of the Department of the Interior faced a certain veto, both Houses of the Congress passed, in the closing hours of the session, a bill limited in the manner specified by the Secretary of the Interior.

CONSERVATION LEGISLATION

I was a cosponsor of Senate Concurrent Resolution 73 to create a joint committee on a national fuels policy. A thorough study needs to be made by the Congress in this vital area in order to foster the long-range development of all fuels that continue to be needed to maintain our national secu-

rity and insure continued economic growth. The bill did not come out of committee.

S. 2460, which I cosponsored, would insure that certain portions of the shoreline of the United States would be preserved for public use. The object of the bill is to prevent commercial development of certain areas, so that the public could continue to have use of unspoiled shoreline. No action was taken on this bill.

Another bill, S. 2699, cosponsored by me, would authorize the establishment of the Indiana Dunes National Monument. It is of great importance to all the citizens in the United States that areas having unique recreational scenic and esthetic values be saved from invasion by industrialization. Establishment of the Indiana Dunes National Monument would be particularly expressive of this thinking, as this beautiful and unique area is in very great danger of being ruined by a commercial enterprise. Unfortunately, no action was taken on the bill.

I opposed the Arctic wildlife range bill (S. 1899). This bill would authorize withdrawal of some 9 million acres in northeastern Alaska as a wildlife range. I believe that this particular proposal would be damaging rather than beneficial for the State of Alaska. No action was taken on this bill.

HIGHWAYS FOR ALASKA

One of my primary concerns has been obtaining adequate Federal assistance for Alaska to enable it to catch up with the other States in the needed construction of highways. I have repeatedly brought to the attention of the administration the long neglect of Alaska highway construction by the Federal Government, the unfair exclusion of Alaska from the Interstate Highway program, and the inadequacy of appropriations for highway construction in Alaska as compared with Federal expenditures for similar purposes abroad under the foreign aid programs of the present administration. As a means of obtaining some assistance from the Federal Government commensurate with the needs of Alaska, I introduced or cosponsored the following legislation:

S. 2976, a bill to equalize treatment of Alaska under the Federal-aid highway program with that of other States. The bill provides for the appropriation of $20 million annually for a period of 15 years for the purpose of road construction in Alaska. It is estimated that this is equivalent to the amount of money Alaska would have received from the Federal Government under the Federal-aid highway program had it been included in the program on the same basis as the other States since the legislation went into effect in 1916.

Despite the overwhelming justification for this program, the Department of Commerce refused to acknowledge the need for it, and gave as its view that the bill should not be enacted. The strong opposition of the executive branch, as stated by the Department of Commerce, made enactment of S. 2976 impossible. In the course of discussion of the bill in the Senate Public Works Committee, however, the committee was made aware of the great need of Alaska for highway construction and for Federal assistance for this purpose. Accordingly, the committee recommended and the Senate passed an amendment to the Federal Highway Act of 1960 (H.R. 10495) which would have added 300 miles to the Federal Interstate Highway System, 50 miles of which was intended for the State of Hawaii, and the remaining 250 for Alaska. Unfortunately, the conference committee on the bill was not inclined to support this amendment and it was lost in conference.

FERRY LEGISLATION

As a part of the program of the Alaska delegation to obtain adequate Federal assistance for highway construction in Alaska, two bills were introduced to encourage development of a ferry system in southeastern Alaska in lieu of road construction, which would be prohibitive in cost.

S. 2661, a bill to authorize contribution of Federal funds to the construction by a State of approach roads to ferries was adopted as an amendment to the omnibus Federal highway authorization bill for 1960 (H.R. 10495).

Another measure was S. 1956, which would authorize construction subsidies under the Merchant Marine Act of 1956 for ferries constructed for use in the proposed southeast Alaska ferry system. As a result of determined opposition by the Department of Commerce it was impossible to obtain action upon it by Congress.

MATCHING FUNDS REDUCTION

The provisions of S. 3290, a bill to reduce amounts of funds which States are required to contribute to obtain Federal aid allocations under the Federal-aid highway system, were incorporated as an amendment to the 1960 Omnibus Highway Act. The amendment changes the formula for State matching which previously allowed a reduction of amounts required by States having within their borders public domain lands representing more than 5 percent of the area of the States. The amendment authorized inclusion in the formula of certain public lands which have been withdrawn or reserved by the Federal Government for various purposes other than for national forests, parks, and monuments and which could not, prior to this amendment, be considered for computation of amounts by which matching funds are to be reduced. While there are 13 States with large areas of public land which would have matching requirements reduced by the new law, Alaska benefits by a greater reduction than any other. Matching requirements for Alaska for 1961 apportionments under the Federal Aid Highway Act are reduced from $5,940,877 to $1,963,725—thus saving the State $3,977,152 every year.

WATER AND RAIL TRANSPORTATION

S. 1507, which was introduced by the chairman of the Interstate and Foreign Commerce Committee by request, would provide for regulation, by the Interstate Commerce Commission, of water carriers operating within the State of Alaska and coastal water carriers operating between Alaska and other U.S. ports. No action was taken on it in either session, although hearings were held by the Senate committee to which it was referred.

S. 1508, providing regulation of the Alaska Railroad by the Interstate Commerce Commission, passed the Congress but unfortunately was vetoed by the President.

S. 1509, which is now Public Law 86–615, authorizes certain grandfather rights for motor and inland water carriers in Alaska which came under the jurisdiction of the Interstate Commerce Commission with passage of the Statehood Act.

Hearings were held on S. 2451 which would require common carriers serving Alaska to establish through routes and joint rates. No action was taken, but S. 2452, which would permit—as contrasted to require—common carriers serving Alaska to establish such routes, passed the Senate, but met with no action in the House.

S. 2669 would exempt from Coast Guard inspection certain small vessels essential for water transportation in southeastern Alaska. These vessels, serving the population along the protected coast, now enjoy such exemption, but to continue to do so, the authority had to be extended. This bill was enacted and is now Public Law 86–688.

Public Law 86–410 reenacts previous legislation authorizing for another year the transportation of passengers and cargo by Canadian vessels to ports in southeastern Alaska.

During this session, I joined with Senator BARTLETT in sponsoring a bill, S. 3005, to extend to 7 months, as against the previous 4, the period of the Federal Maritime Board's authority to suspend proposed tariff increases. The bill would add desirable uniformity in the powers of two regulatory agencies affecting transportation, as the 7-month increase corresponds to the period of suspensions used by the Interstate Commerce Commission. It passed the Senate, but no action was taken by the House Merchant Marine and Fisheries Committee.

AIRPORTS

Air transportation being of primary concern to Alaskans, major efforts were concentrated during the first session of this Congress on obtaining Federal appropriations adequate to finance the needs of Alaska as well as the other States under the Federal Airport Act.

S. 1, a bill to increase appropriations for airport assistance, was introduced by Senator MONRONEY during the first week of the session. I was one of the cosponsors of this bill. Unfortunately, the threat of a Presidential veto made it impossible to enact authorization on a scale commensurate with needs. The legislation finally passed and signed by the President merely called for extension of the program, on the same basis as during previous years, for the 1960–61 fiscal years.

S. 2208, a bill which I cosponsored with Senator BARTLETT, was enacted and signed by the President (Public Law 86–295). This bill, for the special benefit of Alaska, enables the 49th State to receive certain discretionary funds to be allotted by the Federal Aviation Administrator for exceptional airport projects for which financing is not available from regular appropriations. The discretionary fund of the Administrator amounts to 25 percent of all funds authorized.

Other assistance for the aviation industry in Alaska was provided in the Alaska Omnibus Act (Public Law 86–70) which, among other provisions, authorized the transfer without reimbursement of the Anchorage and Fairbanks airports from the Federal Government to the State and authorized appropriations of funds equivalent to amounts that would have been spent by the Federal Government on the airports during the 5 succeeding fiscal years if Alaska had not become a State.

CIVIL RIGHTS

During the 1st session of the 86th Congress, I strongly supported an amendment introduced by Senator HAYDEN of Arizona, designed to continue the existence of the Civil Rights Commission (established by the Civil Rights Act of 1957) and to appropriate funds for its operation. This amendment was adopted and became law.

During the second session of the Congress, I fought vigorously for a meaningful civil rights bill which would insure the right to vote for all citizens regardless of race, creed, or color and for effective enforcement measures for the civil rights of all citizens. While the bill which was enacted (H.R. 8601, Public Law 86–449, the Civil Rights Act of 1960) fell short of what I would have wanted enacted, I nevertheless voted for the measure as a means of progress toward the solution of one of the gravest problems confronting our Nation.

I was an enthusiastic cosponsor of the bill S. 50 (Public Law 86–3) which admitted Hawaii to the Union as the 50th State.

I cosponsored legislation to establish an educational center in Hawaii dedicated to the exchange of cultural and technical information, ideas, and views on a wide range of subjects. The center was authorized in the Mutual Security Act of 1960 (Public Law 86–472).

HEALTH INSURANCE

As a strong supporter of legislation to provide health insurance for elderly persons by incorporation of such an insurance plan in the social security legislation now in force, I cosponsored a bill (S. 3503) introduced by Senator McNamara, which would not only provide for this but authorize certain medical insurance benefits for elderly persons not eligible for old age and survivors insurance. Due to effective administration opposition, this bill, or amendments similar to it, could not be passed. In the end, a limited health plan granting aid to the States was acted on and sent to the President.

INDIAN AFFAIRS

I cosponsored S. 56, a bill designed to improve Indian health standards by authorizing the Surgeon General to improve essential sanitation facilities by various means in Indian homes, communities, and lands, including those in Alaska. This was passed and became Public Law 86–121.

UNEMPLOYMENT INSURANCE

I cosponsored a number of bills relating to unemployment insurance, including S. 1631, to provide for the establishment of a Commission on Unemployment Problems; Senate Joint Resolution 119, to provide for a conference on measures to reduce unemployment; Senate Resolution 196, to create a Special Committee on Unemployment Problems. All of these bills would help to provide solutions to creating full employment. Hearings were held on these bills, but no action was taken.

I also cosponsored the bill S. 1323, which became Public Law 86–7 during the first session of Congress, providing for a temporary extension during which unemployed persons could file a claim for unemployment insurance. During this second session, I cosponsored a much broader bill (S. 3505) which is designed to revise, extend, and improve the entire unemployment insurance program. In this bill, the Federal Government would assume responsibility for 13 weeks of assistance beyond the State standard, and would thus acknowledge that this grave problem is nationwide in scope. The bill would also raise the base rate for employer contribution, bringing the rate into line with the figure used for the old-age and survivors insurance program. No action was taken on it.

Another bill, S. 722, which I cosponsored, would provide Federal assistance for areas of the United States in which there is a substantial degree of unemployment. This bill was vetoed by the President.

HEALTH INSURANCE BENEFITS FOR RETIRED FEDERAL EMPLOYEES

I cosponsored legislation which extends to retired Federal employees the benefits of health insurance legislation previously enacted for present employed civil service employees. The bill (S. 2575) passed both Houses and is now Public Law 86–724.

ANNUAL LEAVE

Together with Senator Bartlett I cosponsored legislation (S. 973), which would restore special privileges available to Federal employees in Alaska prior to statehood which authorized these employees to accumulate a maximum of 45 days annual leave, as compared with the 30-day maximum allowed employees elsewhere. No action was taken on this bill.

COST OF LIVING ALLOWANCES

I also cosponsored a bill, S. 176, to authorize payment of cost of living allowances to Federal employees in Alaska in excess of the maximum now specified, which is 25 percent of basic compensation. This bill was not reported by the committee.

DEAF CHILDREN

I cosponsored Senate Joint Resolution 127, a resolution introduced by Senator Hill, which would provide increased educational opportunities for deaf children. The bill would encourage the training of additional teachers equipped to instruct deaf children, and enable professional training for larger numbers of speech pathologists and audiologists needed to assist children handicapped by deafness to overcome this physical disability. This bill passed the Senate, but it was not reported out of the House Education and Labor Committee. I will continue to do everything I can to see that the next Congress enacts this legislation.

YOUTH CONSERVATION

S. 812 would establish a Youth Conservation Corps to provide an opportunity for healthful training and employment for young men in connection with carrying out planned conservation programs. This bill, of which I am a cosponsor, passed the Senate, but no action was taken in the House.

JUDICIARY LEGISLATION

Anticipating the new State's growth and future need for disposing of litigation quickly, I introduced a bill, S. 2705, to provide for a second Federal judge for Alaska. Although no action was taken on the bill itself, it provided an opportunity for the matter to be studied by the various groups and people concerned and consequently should facilitate action to establish a second judicial seat.

LIBRARIES

I cosponsored S. 2830, which extends for 5 more years the current authorization for appropriations for the development of public library services in rural areas by stimulating the States through a grant-in-aid program to develop methods of providing library services to small towns and farming communities which now totally lack or have inadequate facilities. This bill was enacted and is now Public Law 86–679.

POSTAL SERVICE

The Senate passed S. 2869, which I cosponsored, which would restore the size and weight limitations on fourth-class mail to or from Alaska and Hawaii which existed prior to their admission as States. The House Post Office and Civil Service Committee held hearings, but took no further action.

I also cosponsored S. 2963, a bill to provide that first-class mail be transported to Alaska and Hawaii by air. This bill would bring these two noncontiguous States as physically close to the Union as modern transportation advances can achieve and would break the bottleneck of the slow travel of current mail from San Francisco and Seattle. The Senate Post Office and Civil Service Committee did not act on the bill.

S. 1849, which I introduced for myself and Senator Bartlett, would improve mail service for the Aleutian Islands by providing that mail boats serving the area would be required to be based in Alaska. The bill passed the Senate and was reported favorably from the House Post Office and Civil Service Committee but was objected to when called up for consideration on the House floor.

RAILROAD RETIREMENT

I was a cosponsor of a composite bill, S. 226, that passed the Congress during the first session that amended and consequently liberalized the Railroad Unemployment Act of 1937, the Railroad Tax Act and the Railroad Unemployment Insurance Act. This bill, similar to others which prior Congresses had been unable to pass, strengthened and placed on a sound, self-supporting basis the railroad retirement and unemployment systems and thus brought about long needed reforms that have been greatly desired by the railroad workers.

SCHOOL ASSISTANCE

I was a cosponsor of S. 2, introduced at the beginning of the first session of Congress, designed to assist in the support of public schools by making grants to the States for the construction of facilities and for teachers' salaries. S. 8, which I also cosponsored, was designed to offer an emergency 2-year grant to the States for school construction when it became apparent that S. 2 could not be passed. S. 8 included an amendment, which I cosponsored, to provide aid for teachers' salaries which met with a tie vote and was then defeated by Vice President Nixon's negative vote. Finally, the bill was passed providing only for school aid at the rate of $917 million a year for the next 2 years. However, the House wrecked even this bill, as it would not arrange a conference for it to settle differences between House and Senate versions.

VETERANS

I cosponsored several bills in behalf of veterans. One bill, S. 2675, which sought to provide an additional 1-year period during which certain veterans could apply for national life insurance, was reported favorably as an amendment to H.R. 11045 and passed the Senate but the House failed to complete action.

S. 1138, cosponsored by me, is a comprehensive new GI bill designed to provide benefits for those veterans who served in the Armed Forces between 1955 and 1963. This bill is similar to the older GI bills that have had such a profound and beneficial effect on American life. The Senate passed this major bill during the first session but the House Veterans' Affairs Committee, which held hearings on the bill, took no further action.

Another bill, S. 2201, cosponsored by me, would authorize the Veterans' Administration to furnish care which is needed by veterans in Hawaii and Alaska who suffer from non-service-connected disabilities. This bill passed the Senate but the House Veterans Affairs Committee took no action on it.

S. 3015, cosponsored by Senator Bartlett and me, would provide relief for certain veterans who entered into an on-the-farm training program and who were advised by their instructors that their eligibility for subsistence would not be adversely affected by reason of off-the-farm employment. Subsequently, the VA ruled that these veterans were not eligible for subsistence allowances and the veterans were assessed. This bill would correct this injustice, since the veterans had acted in good faith. Veterans who have paid would receive refunds and those who had not paid would be relieved of liability. No action was taken on this bill.

HOUSING

Early in the first session, the Senate passed a comprehensive housing bill which would provide, among other major features, assistance for urban renewal, low-rent public housing and housing for the elderly. I supported this bill. Unfortunately, the House would not permit this comprehensive measure to go to conference to work out differences between it and a House-passed bill. At the very end of the second session, an extremely limited housing bill was passed that only extends three crucial programs (Federal Housing Administration home repair and improvement, college loan, and community facility loan programs).

MUTUAL SECURITY

During the second session of the Congress, I repeatedly called the attention of the Congress to the administration's strange double standard under which much needed projects at home were turned down by veto or threat of veto while the administration demanded constantly increasing funds for similar projects abroad.

At the time of the consideration of the Mutual Security Authorization Act for 1960, I proposed an amendment which would have reasserted congressional control over mutual security program expenditures. One of these amendments relating to military assistance was adopted. This amendment would require submission during annual requests for funds of detailed explanations on a country-by-country basis of the force objectives toward which the military assistance is furnished. In other words, the amendment is designed to let Congress know where we are going, militarily speaking, in foreign countries and precisely how much it would cost to get there.

The substance of another one of my amendments was adopted as part of the appropriation bill for the mutual security program for the fiscal year 1961. This amendment would prohibit the expenditure of funds for projects not justified to the Congress.

I cosponsored an amendment to the Mutual Security Authorization Act of 1960 which reaffirms American support for freedom of navigation in international waterways (including the Suez Canal) and opposition to economic warfare, such as boycotts or various other restrictions in international trade. The administration opposed this statement but fortunately this expression of the sense of the Congress remained in the bill as passed.

ANTARCTICA TREATY

I strongly opposed ratification by the Senate of the Antarctica Treaty, which would establish the Antarctic Continent as an area of free access for the 11 signatories for scientific exploration. My principal criticisms of the treaty are that (1) its ratification by the United States would foreclose this country from establishing claims to Antarctica which are well justified on the basis of American exploration and (2) while it binds the Soviet Union, as one of its signatories, it is not binding on the Soviet satellites or Communist China, so that the Soviet Union, acting through them, could establish bases in the Antarctic not devoted to peaceful purposes. However, the treaty did finally pass the Senate by a vote of 66 to 21.

UNITED NATIONS CHARTER REVISION

I was one of the cosponsors of resolutions of the Senate urging review of the United Nations charter for the purpose of determining what revisions should be made to promote a just and lasting peace through the development of enforcible world law. No action was taken on these proposals.

TV LEGISLATION

S. 1886, which has now become Public Law 86–609, was enacted after extended hearings to determine what steps could best be taken to promote the development of a nationwide, competitive television system. This bill grants the FCC discretion to waive, if the public interest and necessity warrants, certain requirements for booster or rebroadcasting stations. The new provisions should provide real assistance in extending television service to small communities. S. 2653, which would authorize the FCC to license community antenna TV systems, was sent back to committee by one vote.

ALASKA OMNIBUS ACT

Basic to Alaska's successful operation as a State was the Alaska Omnibus Act, passed by the first session of the 86th Congress. This legislation, which has become Public Law 86–70, was passed to insure effective transition of Alaska from a Territory to a State. Its provisions include:

1. Transitional grants of Federal funds to the State, authorized to be appropriated over the next 5 years in a total amount of $28,500,000;

2. Provisions for transfers of Federal functions and property no longer needed for those functions to the State government;

3. Amendment of numerous Federal grant-in-aid statutes to authorize Alaska participation as a State, on an equal basis with the other States;

4. Amendment of many other acts to conform with Alaska's status as a State.

PUBLIC WORKS APPROPRIATIONS FOR ALASKA

Among the most important legislative accomplishments for Alaska of the congressional delegation is the appropriation of sufficient funds for needed public works in the State. Harbors for small boats, flood control projects, improvement of navigable waterways, and planning for the Rampart Canyon Dam are among the items included in the budget for the Corps of Engineers for which the Alaska congressional delegation has fought for adequate funds.

In the 1st session of the 86th Congress it was necessary to overcome two vetoes of the President in order to obtain a public works appropriation for the 1960 fiscal year. In this connection it might be pointed out that the administration asked for no money at all for the Rampart Canyon Dam investigation, despite the exceptional importance of this project. Despite the opposition of the administration a meager sum of $48,750 was finally appropriated as a result of pressure at all steps of the way by the Alaska congressional delegation.

As noted above, for the 1961 fiscal year the administration requested $100,000 for the Rampart Canyon investigation—an amount which we were able to raise to $350,000 in the Senate, but which, in conference, was fixed at $225,000.

Other appropriations for which money was obtained for Alaska public works are set forth in the following tables:

Public works appropriations for Alaska

Public Law 86–254, 1960:	
Rampart Canyon (investigation)	$48,750
Dillingham Harbor	395,850
Naknek River (to be allocated from lump sum appropriation for small authorized projects)	20,475
Seldovia Harbor (to be allocated from lump sum appropriation for small authorized projects)	238,875
Public Law 86–700, 1961:	
Rampart Canyon (investigation)	225,000
Fairbanks flood control	100,000
Homer Small Boat Harbor	542,000
Seldovia Small Boat Harbor	548,000
Ninilchik Harbor (to be allocated from lump sum appropriation for small authorized projects)	229,000
Douglas Harbor (to be authorized from lump sum appropriation for small authorized projects)	364,000

It is my hope, and belief, that even with legislative proposals which for one reason or another were not enacted during the 86th Congress, the groundwork was laid in the 1959 and 1960 sessions for future success.

The Kind of America We Want

EXTENSION OF REMARKS

OF

HON. KATHRYN E. GRANAHAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. GRANAHAN. Mr. Speaker, not far from this historic Capitol of the United States, in the city of Washington, surrounded by great shrines which commemorate the principles and ideals on which our Nation has been founded, a young man with a consuming mission in life has been preaching a gospel of hate.

I am speaking of the self-appointed feuhrer of an infinitesimal group which calls itself the American Nazi Party. Under our guarantees of free speech, this frenzied young man has been calling for an end to freedom in America, and the establishment here of a dictatorship patterned along the lines of Hitler's reich.

Many people are deeply disturbed that such a performance can be given in a public park in our Nation's Capital. People who cannot forget Belsen and Auschwitz and the other extermination camps of Nazi horrors, who cannot forget the suffering of many millions of people in many countries because of the Hitlerian insanity, can hardly be expected to look tolerantly on this kind of agitation only 15 years after the end of the most terrible war in history.

On the other hand, an appeal to establish nazism here is hardly in a position to make much of a dent in American political thought. When we think of Hitler's Nazi policies, most Americans automatically react with a sick feeling in the stomach that such a philosophy could ever have seized control of any country and could have caused such havoc, mass murder, and destruction as accompanied Hitlerism's attempt at world conquest.

PREJUDICE AND HATRED NOT DEAD

We are not in very much danger of going Nazi in this country—of choosing or of having imposed upon us a Nazi dictatorship. We are all painfully aware of the sick bestiality of nazism. Similarly, we have no use for the dictatorship of communism.

Nevertheless, the prejudices and hatreds which should have been stamped out and eradicated in free America generations ago still seem to persist, and we have many willing volunteers who zealously spend their efforts and their money in seeking to spread the virus of divisive hatreds here in the United States. They are doing a great disservice to all of us.

As we approach the end of the 86th Congress, and review our efforts in behalf of the people of our congressional districts and of the country as a whole, and think ahead about some of the unsolved problems which confront us, I am moved to place this problem at or near the top of those I consider deeply threatening to America's well-being—the problem of eradicating unthinking hatreds based on superstition, ignorance, envy, fear or whatever motivates some Americans to hate some other Americans they do not even know, merely because of race, religion or other differences.

Without regard to politics—and I know that religious intolerance is being insinuated into politics this year by all sorts of groups which preach prejudice and divisiveness—I am impelled to make this statement because of the tremendous amount of hate material I have seen flooding the mails of our country in my capacity as chairman of the Postal

Operations Subcommittee of the House Committee on Post Office and Civil Service, and I am shocked and dismayed by it.

To me it is a problem as serious to our national health as the flood of pornography which my subcommittee has worked so diligently to curb. Both types of material represent a slimy flow of printed filth emanating from sick minds. It is incumbent on every American who believes in our ideals as a nation to help oppose and help expose those who spread lies and slander and mass indictments of whole groups of other Americans.

ACHIEVING THE KIND OF AMERICA WE WANT

Now, Mr. Speaker, in this opportunity which has been made available to me to report on some of my thoughts as we prepare for the final adjournment of this Congress, I want to turn to some different problems we face which involve not un-American hatreds and prejudices, but the normal clash of political controversy and philosophy in the healthy give-and-take of our democratic system of government.

Representing nearly half a million Philadelphians in the Congress of the United States is a responsibility which I take most seriously, because what we do here is vitally important to all of the people of my district. The people of my district have very strong opinions about the kind of America we want. And they believe, with me, that it is possible to achieve the kind of America we want if we will but make use of the marvelous resources we possess as a people and as a nation to reach our objectives of a better America in a decent world in which freedom cannot only survive but can expand into every corner of the globe.

We are still very far from our goals. In recent years, furthermore, we have lost much valuable ground and much of the initiative. And this is truly alarming.

We must restore America's political vitality both in domestic issues involving our economic well-being and social adjustments, as well as in our leadership role in world affairs.

The people of the Second Congressional District of Pennsylvania in the city of Philadelphia—the good people I have the honor and pleasure of representing here in the Congress—do not consider government in America as a sort of necessary evil to be tolerated unhappily; instead, they consider government in our democracy to be a necessary good, to be used effectively to advance the prosperity and well-being and security of all of the people of a great country. They share my deep concern over the manner in which the machinery of National Government has been allowed to rust and deteriorate in underuse, if not disuse, in these past nearly 8 years of complacent leadership and national slippage.

IS THIS THE BEST AMERICA CAN DO?

In 20 years of the New Deal and the Fair Deal, from 1933 to 1953, we learned to put Government to use in strong, affirmative terms to help meet every serious national problem which came along. In those exciting years, the Government of the United States was a dynamic force for progress here at home and it became a symbol to the whole world of a sincere quest for peace based on international decency—a symbol of freedom throughout the civilized world.

The people of Philadelphia—where our form of government was born nearly 2 centuries ago—are dismayed at the consequences to our position in the world as a result of drift, apathy, timidity, and lack of imagination in national policies in these recent years.

We are experiencing a dangerously static condition in our normally expanding economy at home; we have suffered a dangerous undermining of our moral leadership in the free world.

Is this the best America can do? Of course, it is not. Of course, we can do much better. Of course, we can reestablish the surging strength of our economy and the powerful influence of our democratic ideals in the world—and we must. But leadership is required.

We cannot continue as we have been doing in recent years—that is, without awful consequences to the cause of world peace and the survival of freedom.

RESTORING AMERICA'S "GET UP AND GO"

Under Franklin D. Roosevelt and Harry Truman, the activities of Government in the United States, while often—usually—controversial, were always exciting. No one was apathetic about what was being done in Washington. You were either vigorously in favor of or violently against the ideas and proposals and suggestions and reforms and advances which were being put forward by the White House for meeting serious national problems. The whole country was politically conscious—awake to the importance of the decisions being made in Congress and in the executive agencies of Government. The American political system—democracy—was never healthier in the whole long history of our country than it was in those years, for Government was a matter of personal interest and concern to every citizen.

As a result, no problem was too big to solve. No important issue was neglected. Progress in our country—after horrible years of depression, hardship and privation—was spectacular. The good things of life became available to almost every family. Our strength as a people, meanwhile, was so vastly increased that this country was able to achieve the impossible in assuring victory in the greatest war in history—a war fought all over the globe and won with American weapons turned out in sufficient quantity not only to outfit our own fighting men but those of all of our allies.

Look at us now: our economy is tired and not expanding, and unemployment levels are altogether out of proportion to our seeming prosperity; in world affairs, we have frequently been insulted, humiliated, even threatened with bare-faced ultimatums, as the Soviets dazzle the world with scientific and technological achievements in fields where we have to admit we are behind—fields in which we are behind because of pinch-penny research policies dictated by budgetary rather than defense considerations.

America cannot rest complacently on a claim that "everything is fine and dandy" when our situation is so vulnerable. We need an administration in power which will restore the Nation's "get-up-and-go" and put us once again in the forefront of world leadership—for the peace and security of freedom everywhere.

The people of this country must once again have the kind of leadership in the White House which will enlist us all enthusiastically in the hard work of self-government and make democracy once again an exciting part of everyone's daily life.

NEGLECTING THE NEEDS OF OUR ECONOMY

Although we have many outward signs of good living for most of our people, we who live in major cities, as well as those who live in rural areas of farm recession, know that our prosperity is spotty and not as broadly shared as it could be under strong national leadership committed to using the resources of the Full Employment Act sponsored by President Truman in 1946.

The big pockets of unemployment in the distressed areas have continued to exist despite tremendous efforts toward self-help in the communities affected. Our State government in Pennsylvania has worked untiringly to help our own distressed areas. But this is a national problem, and one which can only be solved with effective and intelligent national programs.

As we all know, President Eisenhower vetoed depressed areas legislation Congress several times drafted and presented to him for signature. Philadelphia's economy has certainly suffered as a result of the continued existence of very high unemployment in the hard coal regions of eastern Pennsylvania, and in other parts of Pennsylvania and the Nation. The economy of the United States is so interrelated that we all suffer from depressed conditions, even in distant areas. The Eisenhower-Nixon administration has completely ignored this serious problem.

SMALL BUSINESS DISTRESS—BIG BUSINESS PAYOLA

Small business, the backbone of the American economy for many generations, is being pushed to the wall by monopoly practices among giant corporations dividing up the markets between themselves. Enforcement of the antitrust laws has been far from effective.

It took a series of congressional investigations, meanwhile, to expose the extent of payola practices throughout the business community—not just in the highly publicized entertainment fields. Favoritism in the award of Government contracts, intercession with the regulatory agencies in behalf of big campaign contributors to the Republican Party, and similar practices have shocked the moral standards of the country.

UNSOLVED PROBLEMS, UNMET NEEDS

The fight to clear away blight in our cities and continue the highly successful Democratic urban renewal program launched in 1949, has been a particularly

bitter one because of administration opposition and vetoes. Yet we in the Congress have persevered despite many setbacks, and the program has at least been kept alive and saved from sabotage. But it is now falling behind schedule, and must be restored to full vigor.

There are so many other national needs which have been neglected in these recent years, too—housing for GI's and others who have had such great difficulty in obtaining mortgage financing despite the generous FHA and GI programs enacted and extended by Democratic Congresses; housing at fair rentals specially designed for the elderly—thanks to Congress, such a program is now finally to get under way despite Mr. Eisenhower's previous opposition; expansion of schools and colleges which are now so crowded; expansion of clinics and hospitals; encouragement for construction of private nursing homes—for which Congress made specialized provisions in the FHA law; solution of some of the serious problems created for homeowners, tenants, and small businesses in areas which are to be redeveloped; aid to cities in solving their choking traffic congestion and in broadening mass transit such as we are trying to do in Philadelphia; better educational opportunities for youth and more job opportunities for those over 40; stronger health safeguards in hazardous employment; more attention to highway safety—these are just a few areas in which Congress, under the Democrats, has tried hard to provide solutions, but in which the President and his administration have failed to support or put into full operation the programs Congress has suggested.

HEALTH CARE FOR THE ELDERLY

And what about the health-care problems of the aged? No issue has arisen in recent years which has brought more mail to us in the Congress, showing the extent of national concern this problem enjoys.

This problem has been so cluttered up with scare charges of socialized medicine that we have tended to lose sight of the fact that insurance against high hospital and surgical costs is now pretty much the normal thing for most workers and their families. We must provide a means by which the retired worker and his family can also obtain an effective form of health cost insurance at rates within the average retiree's resources. A pauper's oath program intended only for the medically indigent—whom we already take care of in our existing programs—is hardly the full and complete answer. A solution to this problem must be high on our list of priorities next year.

THE FIGHT AGAINST PORNOGRAPHY IN THE MAILS

Mr. Speaker, I want to speak only very briefly at this point on a matter which has had my very close attention as chairman of the Postal Operations Subcommittee. As the Members know, we have done a great deal of effective work in the investigation of the evil of pornography and in the enactment of legislation to curb traffic in filth. I am proud of the support the subcommittee's membership has given me on this matter and I appreciate the wonderful way in which the House acted so promptly to pass the bills reported out of our subcommittee. Two of these measures should substantially increase the Post Office Department's ability to cope with the flow of filthy materials through the mail: one, a bill to establish a special judicial officer in the Department to handle and expedite cases involving fraud and obscenity; second, a bill to empower the Postmaster General, under certain safeguards, to obtain from the Federal courts temporary orders for the detention of incoming mail addressed to known purveyors of filth, as a means of cutting off their revenues until prosecution can be effective.

There is still much to be done to put the merchants of filth out of business—and I pledge to continue the fight.

DEPLORABLE DETERIORATION OF MAIL SERVICE

While discussing the work of the Postal Operations Subcommittee, I want to make clear that we are not only aware of—but we have been strongly critical of—the policies in the Post Office Department which have led to such a deplorable deterioration in mail service.

So many experiments in mechanization have been undertaken in these last few years that the human element has been shoved aside—and machines, alas, cannot think. That is why Philadelphians are receiving mail from other cities by way of remote, far distant communities—the machinery suffered some sort of aberration. Deliveries are delayed beyond all reason. I do not blame the career people in the Post Office, they are just as upset about this as I am. I blame the top leadership of the Department and the patronage-appointed bureaucrats, who have treated the career employees as if they were unintelligent loafers, and have almost completely destroyed morale and the spirit of conscientious devotion which we have always associated with the career postal employee.

I am sure that under intelligent direction, the postal service will be restored next year to the efficiency we used to experience and applaud, and once again there will be meaningfulness in the slogan of the postal people expressing the determination that the mail go through despite all obstacles.

LEGISLATION BENEFITING FEDERAL EMPLOYEES

Philadelphia has a very large number of Federal employees performing—on the career level—tremendously important work in the national interest. I am proud to have played a leading role in this Congress in the enactment of a justified pay raise bill despite a Presidential veto, in the enactment of the health insurance program for active employees, and in the enactment of a new program to begin next July to provide for a contributory health insurance program for retired Federal employees. There is no good reason that I can see why we cannot provide a similar type of program for those retired on social security—the retired Federal employee will pay most of the cost and the Government, as last employer, supplements the premium payment and makes possible the best kind of terms as to coverage. If we had such a program under social security, all workers could contribute to it during their working careers so that the cost would be shared by employee and employer just as are the other costs of social security benefits.

I am proud that the Government employee groups as a mark of confidence have so often come to me to request that I act as main sponsor of some of their major legislative proposals in the Congress. I appreciate the support the rank and file of Government employees have also always given me.

A FORWARD-LOOKING AMERICA

Mr. Speaker, in the coming national elections in November—when every seat in the House of Representatives, one-third of those in the Senate, and the Presidency and Vice Presidency are at stake—the people of this country will have an opportunity to select the kind of Government they want for the kind of America they want. I know that in Philadelphia, where progressive local government has achieved community miracles in less than a decade after generations of municipal corruption and shame, the voters want and insist upon a Federal Government which is forward-looking and progressive and vigorous in pursuit of solutions for the people's needs.

As we prepare for the political campaigns, therefore, let us rededicate ourselves—those of us who subscribe to the Democratic Party's platform for a better America—to carry forward into reality the outline drawn by the leaders of our party at Los Angeles—the most liberal platform ever written by any political party in American history.

Twentieth Anniversary of Ukrainian Congress Committee of America

EXTENSION OF REMARKS

OF

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. COLLIER. Mr. Speaker, this fall will mark the 20th anniversary of the founding of the Ukrainian Congress Committee of America, an organization reflecting the thoughts and sentiments of 2½ million Americans of Ukrainian ancestry. Among the many objectives of this committee are coordinating and intensifying Ukrainian-American participation in the peace efforts of America, strengthening and propagating the American way of life; assisting and supporting the U.S. Government in the event of war, and cooperating in all respects with our Government in its national policies for the common good.

The Ukrainian Congress Committee is a member of the All-American Conference to Combat Communism and has actively assisted and cooperated with the United States, officially and privately, in its struggle to bring world peace and freedom. The committee has also maintained worldwide contacts with friends of the Ukraine, provided aid to the Ukrainian underground, and held as one

of its policies the rejection of the common guilt of the Russian masses, made up of people of captive nations within the Soviet borders outnumbering all the Russians combined.

The committee is a completely American institution, made up of American citizens with a Ukrainian heritage or ancestry and it vigorously opposes the Communist regimes of China, Poland, Yugoslavia, and the other Communist-dominated countries, since these regimes reflect the will of Moscow rather than representing the will of the people.

The ultimate goal of the Ukrainian Congress Committee of America is peaceful liberation and the necessary dismemberment of the Soviet Empire, stressing national self-determination and independence.

It is my privilege to congratulate the congress committee on the occasion of its 20th anniversary for its steadfast pursuit of these ideals and policies, its cooperation in all respects with the U.S. Government, and the encouragement it provides to the brave people of the captive nations who have not ceased fighting their oppressors.

Voters Hold Solution to Farm Problem

EXTENSION OF REMARKS
OF
HON. GRACIE PFOST
OF IDAHO
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mrs. PFOST. Mr. Speaker, since coming to the Congress in 1953, I have become increasingly alarmed over the cost-price squeeze in which our Nation's farmers find themselves. Agriculture plays an important role in the economy of the First Congressional District in Idaho which I have the privilege to represent.

I grew up on a farm in the Boise Valley, and the great depression which swept the land in the early 1930's brought harder times to my parents than they had ever known.

Through sheer grit and hard work, we managed to hang on to our farm while many of our neighbors went under. Twelve years of Republican rule had added up to poverty, despair, and foreclosures, so that the coming of President Roosevelt and the New Deal was like a breath of fresh air on a tired land. And the Democratic Party with such constructive programs as the REA, proved equal to the challenge of those depression years and farmers were again able to hold their heads up in dignity and provide a better life for their families.

But now, after another era of Republican power, the farmer again finds himself slipping into an abyss of despair.

The Benson regime was established in the Nation's Capital in 1953. It came in on a wave of promises that saw headlines in the newspapers which read: "Ike Favors More Farm Props and 100 Percent of Parity," and "Ike Offers Plan for Farm Price Boost." Little did the Nation's farmers who read those headlines so hopefully know what was in store for them. The record, some 8 years later, speaks for itself.

Thousands of once proud, independent farmers have gone bankrupt and have been forced to leave the land which belonged to their forefathers.

The net income of farmers last year dropped to the lowest level—in relation to volume of their sales—than in any year since the Department of Agriculture began keeping records. And worse yet, his income so far in 1960 is 8 percent below the depressed level of 1959.

The per capita annual income of farm families last year—and that includes Government payments along with earnings for off-farm work—plummeted to less than one-half that of nonfarm families.

And what is the overall picture for the last 8 years, comparing 1960 with 1952? It is a sad commentary, indeed. Farm prices are down 17 percent and the farm parity ratio is down 21 percent; net farm income is down 24 percent and the purchasing power of that farm income is down 29 percent, the lowest since 1940; farmers' debts stand at a record $24 billion and the farm population has declined 3.1 million since 1952.

All of this is cold arithmetic. The cost in human terms—in poverty-ridden rural families, in hungry and ragged children, in loss of pride and dignity and a sense of purpose and accomplishment—cannot be measured.

It is the same story everywhere—a cost-price squeeze which has been sapping the very vitality of our farmers. Secretary Benson has taken control of the farm program out of the hands of the farmer and given it to people "who farm the farmers," as someone described them. These middlemen who reap the profits at the expense of the farmers have been richly rewarded by Mr. Benson. But it has confounded him also by piling surplus upon surplus, and the drain on the taxpayers has been heavier with each passing year.

With more than $5 billion being spent annually by Secretary Benson in his patchwork farm program, it is no wonder that he has managed to spend more money than all the Secretaries of Agriculture combined since the Department of Agriculture was founded back in the 1860's.

Today it takes 41.7 bushels of corn to buy the same suit of clothes that 26 bushels would buy in 1952. It takes 216.7 bushels to buy an electric stove compared to 153 bushels in 1952, and 38.6 bushels to buy a chair for the house compared to only 17.1 bushels 8 years ago.

As prices have steadily fallen, farmers have been impelled to produce more to make up for the loss. The result has been mountainous surpluses, which have further depressed prices. This, in a nutshell, is the fallacy of the Benson program. The tragedy it has wrought could not be spelled out in simpler terms.

When Democratic Farm Belt Members of the Senate and House rebelled and tried to pass legislation designed to help the farmer, we were met with veto after veto by the President.

Legislation to restore parity to 90 percent in 1955 fell by an Eisenhower-Nixon veto. In 1958, "hold the line" legislation—Senate Joint Resolution 162—to prevent Secretary Benson from lowering the farm price structure was vetoed. A major wheat bill which sought to cut acreage and raise parity was enacted in 1959, but it was vetoed. A new tobacco bill was voted, but then it also was vetoed. Last year, Congress passed a bill to restore the authority over REA to the REA Administrator, thus to forestall the Agriculture Secretary from crippling that very important agency to farmers, but this, too, was vetoed.

Agriculture is our basic industry. We are the best fed nation on earth. Our farmers have made it so. The productivity of our farms is today the greatest stabilizing force in the economy of the free world. The Communists have put satellites above the earth, but they cannot begin to match the productivity of the people tilling the soil of America.

Mr. Speaker, the fate of 21 million farmers is at stake in the November election. I have deep faith in the wisdom of the American voters. The decision is up to them to place in power in Washington an administration and a Secretary of Agriculture who will be sensitive to the needs of rural America and who will actively work to bring a new measure of prosperity to the farmer.

Congressman Peter W. Rodino, Jr., Reports to the People

EXTENSION OF REMARKS
OF
HON. PETER W. RODINO, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. RODINO. Mr. Speaker, it is my pleasure once more to report to my neighbors and constituents of the 10th Congressional District on my activities as their representative in the 86th Congress, just concluded.

As a Congressman, it is my aim to represent all of the people, regardless of their needs or political affiliations. I consider this my primary responsibility. During the last Congress, as during each of my prior terms of service, I have faced every bill, every program, and every legislative proposal with one test: Is this in the best interest of the 10th Congressional District and of the Nation?

The past 2 years have been busy, sometimes frantic ones. It is possible to include only some of the highlights in this report. Unhappily, as my report below will show, some of the programs for which I fought, such as the minimum wage bill, did not materialize. Important advances were made in the social security laws, but much still remains to be done.

On the credit side of the ledger, a landmark civil rights bill, based on a report which I prepared, was enacted into law. I was in the forefront of the successful fight to give further protection to the small businessman. And I have been greatly encouraged by the response to my proposal to create a

Senior Citizens' Bureau, as well as to other planks in my legislative program.

No less vital was the time spent in helping my constituents with their personal problems. I shall continue to help in every way possible, for I believe it is the right of every person to petition his Congressman. Whether the problem is big or small, I know that, for the individual concerned, it is very important.

Aware that an alert, well-informed electorate is the surest safeguard of democracy, I submit the following report to you. Your comments in the past have been helpful and most welcome. I solicit your continued reactions, your views, and your suggestions as to my stewardship.

THE UNITED STATES AND WORLD LEADERSHIP

Ten years ago we were fighting the Communists in Korea; today they have ventured into our own backyard. This startling turn of events makes it imperative that we reevaluate our foreign policies and objectives. The crises of the past year—Korea, Japan, Cuba, the collapse of the summit—call for a new American offensive, based on imagination, boldness, and decisive action.

I have long urged that we reexamine our attitude toward our neighbors to the south. Although we waited for the Cuban crisis to do so, we have at last undertaken just such a reexamination. I am pleased to report that one of the major accomplishments of the summer session was the approval of a program for the development of Latin America and the reconstruction of Chile.

As important as economic aid, in my opinion, is getting our true image across to the peoples of Latin America. I have long been concerned with launching sister city programs to strengthen inter-American relationships, in my capacity as chairman of the National Citizens Committee for Columbus Day. I have also been meeting with officials of the U.S. Information Agency to explore what else we can do to reach the Latin American man in the street.

Because the struggle between democracy and communism in the next decade will focus largely upon the uncommitted and underdeveloped nations, I have strongly supported maximum appropriations for foreign aid. I believe we could be far more effective in this field as well, however, if we reexamined our programs, put them on a definite, long-term basis, used our funds to build mutual respect, instead of "buying friends," and supported projects which were truly responsive to the needs of the local citizens.

Communism will fail only if this country remains the strongest nation in the world. Disturbed by the testimony of countless military experts who warned that we will not retain our military superiority unless we intensify our efforts, Congress appropriated almost $40 billion for defense. Congressional prodding also spurred a reexamination of our missile program. We must provide for the defenses we need, not those we think we can afford. A missile lag is something we can afford least of all.

Diplomacy, as well as defense, can decide the cold war. So that we may be prepared on the diplomatic front, I have strongly urged the establishment of a Foreign Service Academy. This academy, I believe, can provide us with a pool of highly skilled, highly trained talent from which we can draw the very best men and women to represent us abroad.

Finally, I have continued to press for the establishment of a permanent U.N. police force, a plan I have been promoting since 1950. The Congo crisis points up once again how valuable such a peace force might be.

CIVIL RIGHTS

Our Nation's strength lies not only in the defense program, but in the guarantee of fundamental rights and liberties.

As in the 85th Congress, I again authored the report which resulted in the Civil Rights Act of 1960—the first breakthroughs in civil rights legislation in 80 years.

The Act of 1960 will secure some of our most sacred rights for all of our citizens.

IMMIGRATION

As a member of the Judiciary Committee, I am pleased to report that the committee engineered legislation to reunite families, help many alien orphans, and admit homeless refugees, a most appropriate step forward in this world refugee year.

SOCIAL SECURITY AND OUR SENIOR CITIZENS

Several good amendments to the social security laws were passed this year, including a moderate increase in the income limitations. As one who has pressed for removal of the income restrictions entirely, I must point out that the job has just begun. We must change the law so that those retired people who are willing and able to work will not be penalized for doing so.

Important changes were made in our disability laws. I am particularly pleased with this because I pointed out many of the serious deficiencies in the social security disability program in testimony before the Ways and Means Committee last fall.

During 1959 Congress launched a new program to provide housing for the elderly. Though a modest beginning, this marks a significant first in a sadly neglected field.

I have been deeply encouraged by the fine response to my suggestion to establish a Bureau for Senior Citizens. I intend to intensify my efforts on this program, for I feel a Bureau is essential if senior citizens are to have the spokesman they need.

LABOR

Congress adjourned without taking action on the minimum wage bill.

As one of those who strongly supported adequate minimum wage legislation, I was deeply disappointed.

We must remember that we cannot regard ourselves as a prosperous nation until each and every one of our citizens has the right and opportunity to earn a living wage.

SMALL BUSINESS

My work on the Antimonopoly Subcommittee of the Judiciary Committee is concerned with protecting the small businessman and the consumer.

Most recently, the subcommittee was instrumental in getting legislation to restrict bank mergers, which will help small banks—often the small businessman's chief source of credit—to stay in business.

I authored the report which resulted in the Clayton Act Finality Bill—hailed by the Chairman of the Federal Trade Commission as the most significant piece of antitrust legislation to come out of this Congress. This law is important to consumers and small businessmen alike, because it gives us a new weapon against deceptive business practices, price discrimination and unfair competition.

Just last year, the subcommittee was responsible for a decrease in long-distance telephone rates—saving users $50 million a year. We are now working on still another decrease.

PAYOLA

Perhaps one of the most important achievements of this session, and one which had my strong support, was legislation to restore integrity to the radio-TV industry. Those who become involved in payola and other dishonest practices will now be subject to severe criminal penalties.

OBSCENE LITERATURE

My personal fight for stronger laws against smut peddlers has stimulated wonderful support, both from my constituents and from my colleagues in Congress.

As a result of my urging, the chairman of the Judiciary Committee has promised to schedule hearings on my program early next session. At that time, I have been assured, a complete investigation of the entire problem will be undertaken. I am most hopeful that stringent, effective legislation will be a prompt result.

EDUCATION

It has been officially estimated that 10 million of our children receive an impaired education because they go to school in inadequate, overcrowded classrooms. We cannot continue to tolerate this neglect of our greatest national resource. Nor can we continue to ignore the challenge of the Soviet Union, which places far more emphasis on education than we do.

An equitable program to expand our educational facilities has been a firm part of my legislative platform. Unfortunately, those of us who were so committed were unsuccessful in the last Congress. I do not think I need add that I intend to continue my fight in the future.

MEDICAL RESEARCH

Although I am not on the Appropriations Committee, I have taken an active interest in the yearly budget for medical research. This year considerable progress was made, as we increased the appropriation over last year's by about 40 percent.

Who knows what diseases might already be conquered had we invested perhaps 40 percent more in our health and our lives over the last decade.

VETERANS

Of particular interest to the veteran is the extension of the GI home loan program, which had my vigorous support.

I introduced legislation to provide pensions on a more equitable basis for widows and children of veterans of World War II and Korea; such a provision was included in the pension bill enacted in 1959.

Reported out of committee, although not finally approved, was a measure to set up a court of appeals for veterans who are denied claims by the Veterans' Administration. I cosponsored this legislation and testified on its behalf before the House Committee on Veterans' Affairs.

FOR THE GARDEN STATE

Of special interest to the commuter is the new New Jersey-New York Transportation Agency, set up to handle our commuter problems. At the request of New Jersey State officials, I introduced the bill granting congressional consent to this agency, and steered the bill into law.

I have received the personal thanks of the chairman of the State Tercentenary Commission for my efforts to secure House approval for the New Jersey tercentenary bill. Under this legislation a Federal Tercentenary Commission will help New Jersey celebrate her 300th birthday.

As in prior years, I continued my efforts to focus attention, on the Federal level, on the nonresident tax on New Jersey commuters. It looks now as though at least some relief may be forthcoming early next year.

Immediately after learning of the decision on the Essex East-West Freeway, I contacted the Bureau of Public Roads to press for reconsideration. In the myriad of correspondence, telephone conversations and conferences which have followed, with officials of both the Bureau and the Office of Civil and Defense Mobilization, I have urged the Bureau to consider the civil defense advantages of a depressed highway, because this factor, when added to all the others, should certainly be enough to justify the expenditure of additional Federal funds.

During our last meeting, the Chief of the Bureau agreed to reconsider the depressed design in the light of all these considerations. As soon as there is any definite word, you may be sure that I shall inform the district.

OTHER ISSUES

I have repeatedly stressed the overwhelming need for an adequate urban renewal program. A great deal more must be done to restore our cities and provide for balanced suburban development. I shall continue to work for programs to eliminate blight, solve urban transit difficulties, meet other problems such as air and water pollution, and rehabilitate our cities.

So that you may know where I stand on issues other than those mentioned above, I might mention that I introduced legislation to establish a U.S. Peace Agency; to combat waste and inefficiency in Government spending; to prevent our servicemen stationed abroad from being tried by foreign courts; to revise and standardize our unemployment compensation system; to provide an additional tax exemption for the physically handicapped; and to improve the immigration laws. I cosponsored the Captive Nations Resolution which was approved last spring, and also introduced a bill to set up a separate Captive Nations Committee of the House. After several years, my efforts to award Medals of Honor to the four chaplains—one of whom was Father Washington of Arlington—were finally successful. The Department of Defense is now preparing an appropriate design.

Your letters are most welcome and deeply appreciated. Whether they discuss legislative issues or personal problems, I feel they help me become truly responsive to the needs and opinions of the people I am proud to represent. I hope you will continue to give me the benefit of your views and suggestions.

Looking Ahead in the Field of Public Power

EXTENSION OF REMARKS

OF

HON. JOHN SHERMAN COOPER

OF KENTUCKY

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. COOPER. Mr. President, the distinguished senior Senator from Vermont [Mr. AIKEN] has been one of the most foresighted men in Congress in sensing the need to meet the challenge of providing greater and cheaper electric energy in this country. He has consistently recognized the contribution of public power to our Nation's progress, and earlier this year addressed the seventeenth annual convention of the American Public Power Association in Washington.

I ask unanimous consent that his speech be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LOOKING AHEAD IN THE FIELD OF PUBLIC POWER

(By Senator GEORGE D. AIKEN)

Ten years ago I had the privilege of addressing the seventh annual convention of the American Public Power Association here in Washington.

I interpreted the enthusiasm shown at that convention as symbolizing the progress which had been made in public power development.

I said that the problem which led you to pioneer in this field was still with us—"the urgent need for more and cheaper electric energy."

I also called attention to the fact that the utilities were trying to lull us into complacency about the future growth of our Nation by telling us that the facilities they planned would produce enough power to meet the demand.

I noted that in this way they hoped to stall off the public development of our major water resources.

Today, I want you to join me in a glance backward over the 10 years which have passed since your seventh annual convention, followed by a forward look at the challenge to American public power in the decade which lies ahead.

As I look at the situation, I am convinced that the problem has been broadened to include not only the development of water power but also the entire pattern of regional power supply on which all electric systems must depend.

PUBLIC POWER HAS MORE THAN HELD ITS OWN IN LAST DECADE

When I spoke to you in 1949, the country's production of electricity was just passing the 300 billion kilowatt-hour mark.

Last year we passed the 700 billion kilowatt-hour mark.

The 10-year increase of 400 billion kilowatt-hours in the country's power requirements exceeded the total production of electricity by all utility systems, public, private, and cooperative in the earlier year.

For the purpose of review, it is important to note that Federal, State, municipal, and cooperative electric systems (the consumer-owned sector of the power industry) contributed more than a quarter of the 400 billion kilowatt-hour expansion in the country's power production.

The electricity generated in these consumer-owned generating stations increased from 59 billion kilowatt-hours in 1949 to 166 billion kilowatt-hours in 1959.

Thus, consumer-owned production of electric energy rose from 20 to 23 percent of the country's total.

Publicly owned generating stations are today producing more electricity than all electric utility systems in the country produced in 1940, just 20 years ago.

For you gathered here in this great convention there is another significant footnote to this tremendous expansion in the country's supply of electricity.

The increase in the public share of this generation was by no means altogether Federal.

In the 10-year period non-Federal public and cooperative systems increased their total production of electricity from 20 billion to 57 billion kilowatt-hours, or about 185 percent.

This just about paralleled the rate of increase in federally generated power supply and exceeded by a considerable margin that of the investor-owned electric utilities.

Before turning to the prospects of the next decade, I would point out that these figures are of much importance.

We must maintain approximately this same proportion of the capacity required for the next 10 years' expansion, if the strength of the public and cooperative sector of America's power industry is to be preserved.

Assurance that there will be some Federal power supply available as a competitive influence in every region is essential to the survival of the many small municipal and rural cooperative electric systems.

A little later I will tell you why.

Here let me just add, that of the 93.5 million new kilowatts of electric generating capacity added to the 63 million which we had in 1949, about 15.7 million was Federal and 9.5 million non-Federal public and cooperative.

This brought the total consumer-owned capacity to about 37.8 million kilowatts or just over 24 percent of the country's total central station capacity.

So I congratulate you at this 17th annual convention of the American Public Power Association on being fundamentally stronger than you were 10 years ago.

I can congratulate you because, in the face of the all-out drive of the private power companies to reduce the public and cooperative power sector, you have more than held your own.

This has been due in large measure to the growing strength and able leadership of your great organization working shoulder to shoulder with another great organization, the National Rural Electric Cooperative Association, and the other important labor-consumer organizations banded together in the Electric Consumers Information Committee.

The inscription across the face of the National Archives Building continually reminds us: "The Past Is Prologue."

Therefore, we must look ahead to the great future we can build for the country in an all-electric age if we can only free ourselves from the influence of sterile slogans and give our fast developing technology the green light—subject only to the moral mandate that the Nation's gigantic powerhouse of the future be founded on the rock of public welfare.

As I warned 10 years ago, we cannot let the private utility people—stanch defenders of the "status quo"—lull us into a state of complacency.

In other words, we can't sit back and leave the Nation's future power supply to Uncle "Power Monopoly," any more than we can leave it altogether to Uncle Sam.

I don't worry about our becoming complacent so long as you people remain organized and alert.

We must develop a new pattern in power supply, adapted to the new technology, in which all forms of electric utility enterprise can cooperate to meet the expanding needs of all at the lowest possible cost.

A part of this pattern will include development of some 20 million kilowatts of additional hydroelectric power as part of the next step forward in our river-basin programs.

An increasingly important part will include an answer to the question of how we are going to organize the great modern regional combinations of large steamplants and hydroelectric plants delivering to high-voltage transmission pools which modern technology makes possible.

CHALLENGE OF THE POWER INDUSTRY'S NEXT DECADE

From this point of view, let us look at what is ahead, at what is going to happen in the power industry, before I address your 27th annual convention in 1970.

To make our perspective crystal clear, we will frankly make use of Electrical World's "Survey of the 1960's" and "Research and Development" issues as field glasses through which to see this future.

Our frame of reference will include an increase of 34 million in population, an increase from $4,900 to $6,250 per family in disposable income, an increase from about 52 million to 60 million in the number of home units, and an increase from $480 billion to $700 billion in gross national product.

The average home use of electricity will be close to double in the next decade.

The number of all-electric homes, including electric space heating, will rise to 4 million using around 100 billion kilowatt-hours of electricity, or as much as all residential consumers used as recently as 1954.

Residential use as a whole will rise to about 400 billion kilowatt-hours, a total exceeding utility sales to all classes of consumers 6 years ago.

Altogether, Electrical World foresees an increase of nearly 1 trillion kilowatt-hours (1 million million) in the Nation's total utility output, with a corresponding increase from 180 million to 337 million kilowatts in the installed generating capacity required to meet the total requirements of 1⅔ trillion kilowatt-hours.

What are the implications of these tremendous figures to the consumer-owned public and cooperative electric systems of the country which, together, serve more than 21 percent of all the country's electric consumers?

Simply this: If the country is to maintain approximately the same proportion of the total production of electricity in public and cooperative hands as prevailed at the end of the last decade, the answer is clear.

During the next 10 years, the Federal, State, municipal, and cooperative electric systems must plan for the construction of about 40 million kilowatts of new generating capacity, with an output of at least 200 billion kilowatt-hours of electricity.

Let me note, in passing, that I am not projecting this necessary public share of the next decade's expansion beyond that assumed by Electrical World.

In its forecast for the 1960's, that able journal assumes that $14 billion of the $67 billion to be expended in the next 10 years on new construction of plant and equipment will be the responsibility of public and cooperative electric systems (Electrical World, Dec. 28, 1959, p. 80).

When I address your annual convention in 1970, I will be citing a total consumer-owned generating capacity of about 80 million kilowatts, with annual output of at least 360 billion kilowatt-hours.

It will take mighty sound long-range planning to make sure that all public and cooperative systems have access to low-cost power.

Just as important as assuring the public and cooperative share of available power will be the reorganization of power supply which will be required if the country is to take full advantage of the low-cost electric energy which modern technology offers.

WHAT MODERN POWER SUPPLY TECHNOLOGY OFFERS

Some years ago representatives of the investor-owned electric utilities came before Congress supporting legislation to free them from certain Federal regulatory requirements if they set up jointly owned power supply companies.

They testified that great savings in power supply costs required the installation of very large generating units in giant steam stations.

The power company spokesmen also testified that considerably less than half of the power systems in the country were big enough to plan such large modern stations or finance them as parts of their expansion programs.

They stressed the importance of joint ownership as the answer and included atomic as well as conventional steam stations in offering this new pattern.

Electrical World's projection for the 1960's presents a picture along this line which we cannot overlook if we are to correctly appraise the future of public and cooperative electric systems.

This journal of the industry projects future steam units averaging more than 230,000 kilowatts, with single units exceeding 1 million kilowatts on order.

These modern steam stations, along with hydro plants, will increasingly be subject to complete, automated, remote control. The Electrical World article states:

"The new decade will bring multimillion-kilowatt systems which will be the integrated and optimized product of a revolution in planning rather than the random assemblies of individually optimized power plants, substations, and transmission networks."

It further foresees demands that the future power supply be ready, reliable, and reasonable in cost, stimulating an unparalleled growth in transmission.

It states that existing system interconnections which tie together 85 percent of the generating capacity of the United States will be immensely extended and strengthened.

It says that the threat of governmental interference will hasten this trend.

It provides us with this picture of the evolution of power supply in the coming decade:

"Power pooling, today well developed, will in the sixties reach fuller flower. There will be the start of pooling of pools, the first and most logical approach to regional and even nationwide power grids."

HOW WILL PUBLIC AND COOPERATIVE SYSTEMS PARTICIPATE

The biggest problem facing public and cooperative systems today, as we move into the new decade, is to determine just how they are to participate in the results of this technological revolution in the electric power industry.

The answer to that problem will determine in large measure whether the country as a whole is going to be protected against a gigantic private power monopoly embodied in a power-company-dominated nationwide power grid.

Thirty-five years ago, in his message to the Pennsylvania Legislature on giant power, Gov. Gifford Pinchot saw the development of the network of interconnected electric lines as so rapid "that a delay of even 5 years in establishing effective public control will bring Pennsylvania and the Nation face to face with an overwhelming and almost uncontrollable electric monopoly." He continued:

"Nothing like this gigantic monopoly has ever appeared in the history of the world. It is immeasurably the greatest industrial fact of our time. If uncontrolled, it will be a plague without previous example. If effectively controlled in the public interest it can be made uncomparably the greatest material blessing in human history."

Fortunately, at that very time, my friend and your friend, Senator George Norris, of Nebraska, was battling to make the Federal Muscle Shoals power project the basis for a TVA which would afford more than 100 municipal and cooperative systems access to modern power supply.

Fortunately, also, at that time E. F. Scattergood, former general manager of the great Los Angeles Bureau of Power and Light and founder of the American Public Power Association, was battling for Boulder Canyon, first of the series of lower Colorado River projects, which are now pouring low-cost power into the local public power systems of southern California, Arizona, and Nevada.

Fortunately, with the coming of the next decade, multiple-purpose river basin programs were initiated, which have become sources of low-cost power for the public and cooperative systems of the Pacific Northwest, the Central Valley of California, the Southwestern States embracing the White, Arkansas, Red, Brazos, and Lower Colorado River Basins, and much of the Southeast outside of the region served by TVA.

Fortunately, to these anti-power-monopoly programs centering around our river basins the REA program was added.

This enabled over 4 million farms and other rural consumers to establish cooperative electric service including, where necessary to prevent monopoly-pricing of wholesale power supply, their own generation and transmission systems.

All these combined have done much to arrest the trend toward the all-embracing private power monopoly that Governor Pinchot feared.

The battle to hold these gains, in terms of the country's tremendous advance into the electric age which lies ahead, will face us in the 1960's.

THE NORTHEAST WITH ITS NIAGARA AND ST. LAWRENCE

When I addressed your convention 10 years ago I talked about the St. Lawrence and Niagara projects and my hopes that these two great public power developments would provide the necessary competitive influence to bring down the high power costs in the Northeastern States.

Now the St. Lawrence project has been on the line for more than a year, with my State of Vermont allotted 100,000 kilowatts of the output, and the great Niagara project will be delivering power within a year or two.

But the grip of the private companies has been so tight that the broad benefits I hoped for have not yet materialized.

The recent report of Gov. Nelson A. Rockefeller's Committee on Power Resources for the State of New York may give us an explanation in two brief sentences.

The committee states (1) that "in the area east of the Mississippi and north of the Ohio, Federal power is practically nonexistent," and (2) that "municipal and cooperative ownership of electric utilities is an extremely small factor in the power economics of the Northeastern States."

The latter statement is borne out by the fact that in 1958 the New England and Middle Atlantic States, with about one-quarter of the country's total population, had the advantage of only about one-fiftieth of the 130 billion kilowatt-hours sold to ultimate consumers by public and cooperative systems.

This may explain the fact shown in the Federal Power Commission typical electrical bills report for 1959, that, of the 10 States with the highest monthly bills for homes using 250 kilowatt-hours, 8 are in the Northeast.

These eight States include all of New England, plus New York and Delaware.

The Rockefeller committee, in which three large New York power systems were represented, fully confirmed the fact that we are entering a new power era.

It reported that very large steam generating units would mean a material reduction in power supply costs but that only one system in the State could support such units.

It added, however, that statewide integrated operation may well function in the future with 800,000 to 1 million kilowatt units.

Remarking that installation of even a 500,000 kilowatt unit in New York would cost something like $100 million, a figure approaching or far exceeding the present production investment of each of five of the seven New York companies, the committee added:

"Some form of joint ownership of such large facilities may become necessary."

The report then continues with the following significant statement:

"To the power engineer it is obvious that, in theory the maximum economy and efficiency in developing the power resources of New York State could be attained by planning and operating the generation and transmission facilities as a single statewide system with strong interconnections to adjoining States.

"Such planning, with coordinate construction and operation, would permit taking advantage of the latest and most advanced technology."

THE BROADER PUBLIC INTEREST

We in New England, as well as consumers of electricity in all the Northeastern States, may well ask, should not this coordinated planning, construction, and operation of power systems, taking advantage of advanced technology, be extended on a regionwide basis?

This would enable us to get all the advantages of possible location of giant power producing stations near the coal mines, construction of economical atomic power stations nearer the loads, development of river basin power for peak load and reserve purposes, and the diversity of loads offered where an entire region is included in power supply planning.

This, however, raises the broader problem of whether, in order to simplify regulation, regional bulk power supply should not be separately incorporated as a jointly owned undertaking.

Such regional wholesale power supply organizations could be set up with the cooperation of Federal, State, local public, and cooperative, as well as private power systems.

They should be made responsible for meeting the expanding power requirements of all systems selling electricity to ultimate consumers.

I am convinced that, after careful study of the whole situation, Congress must take the necessary action to facilitate development somewhat along these lines.

But, speaking directly to you, representatives of the country's important publicly owned local electric systems, I say that the biggest problem facing you and your fellow rural electric cooperatives, as we move into the new decade, is to determine how you are going to participate in the advantages of the technological revolution which is taking place in the power industry.

There is no question but that the full weight of private power influence will be thrown into the battle to deny to you the benefits which you should derive from your regional bulk power supply organizations.

The old battle of the holding company era, exposed a quarter of a century ago by the Federal Trade Commission, is still going on.

It will require the most carefully organized, hardheaded, power supply planning, leading to both joint construction and legislative action, to meet the challenge.

You can count on the supoprt of many able Members of both Houses of Congress in going forward with constructive long-range plans which require Federal participation and rulemaking.

You can count on the support of many able well-worked-out comprehensive river-basin programs, including hydroelectric power and needed transmission, as contributions to the realization of such plans.

But, in cooperation with the rural electric cooperatives, you yourselves have got to take the initiative in developing the plans and point the way.

In a very real sense your success will provide the answer to a larger problem, the problem of how the millions of small consumers of electricity throughout this land—farms, rural and urban homes, small businesses—are going to be assured the full advantages of this power revolution, as against the continued threat of giant power monopoly.

This is so because, throughout the entire history of central station electric power, actual or potential public competition, even by little village systems has been the most potent force for better service at lower rates.

So I say, God speed you in building a constructive program during the years ahead.

Congressman John D. Dingell Reports to the People of the 15th District of Michigan

EXTENSION OF REMARKS

OF

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. DINGELL. Mr. Speaker, at the conclusion of each Congress, I report on my stewardship to the people of my district.

During this session I served on the Committees on Interstate and Foreign Commerce and Merchant Marine and Fisheries.

I maintain two offices to serve my constituents, one in Washington, D.C., and one in Detroit at 7310 Grand River Avenue, where I will again be available during the fall to meet with people of my district on their problems.

I. LEGISLATION INTRODUCED BY THE HONORABLE JOHN D. DINGELL WHICH HAS BECOME LAW DURING THE 86TH CONGRESS

H.R. 500: Outlawing bombing of churches, synagogues, homes, schools, and businesses.

H.R. 3852: Eliminating the 50-year age requirement for permanent disability under the social security program.

H.R. 11591: Increasing salaries of Federal classified and postal employees by 7½ percent to 8.4 percent, and making permanent certain other Government pay raises.

H.R. 4261: Extending the life of the Civil Rights Commission.

H.R. 12449: Increasing penalties for violation of the Migratory Bird Act.

H.R. 5191: Improving distribution of surplus food to needy families.

II. OTHER LEGISLATION INTRODUCED BY HON. JOHN D. DINGELL

SOCIAL SECURITY

H.R. 3851: To reduce retirement age for men to 60 and for women to 55.

H.R. 3854: To raise the amount which may be earned by social security recipients without penalty to $1,800 per year.

H.R. 3897 and H.R. 5923: To provide for up to 60 days hospitalization per year and other medical care for social security beneficiaries.

H.R. 3853: To liberalize the definition of permanent disability which now excludes many disabled persons from benefits under the permanent disability section.

CIVIL RIGHTS

H.R. 351: An omnibus bill to outlaw discrimination in employment, voting, housing, and transportation, and to create a Federal Fair Employment Practices Commission with strong enforcement powers.

H.R. 352: To authorize the Attorney General of the United States to file civil actions for injunction on behalf of citizens whose civil rights are threatened or interfered with.

H.R. 353: To outlaw lynching or violence because of race, creed, or color of the victim.

H.R. 354: To establish a strong Federal Fair Employment Practices Commission to abolish job discrimination.

PROBLEMS OF THE AGED

H.R. 11167: To make it an unfair labor practice to discriminate against a worker because of age.

MINIMUM WAGE AND UNEMPLOYMENT COMPENSATION

H.R. 3558: To provide Federal standards for unemployment compensation and to guarantee unemployed workers two-thirds their weekly wage or half the average wage within their State, whichever is less, for not less than 39 weeks.

H.R. 6239: To increase the minimum wage to $1.25 per hour, and so to protect workers and industries in Michigan from low wage competitors in other areas.

NATIONAL CONTRIBUTORY HEALTH INSURANCE

H.R. 4498: As in previous sessions I sponsored a national program of contributory health insurance to make ade-

quate medical care available to all on a prepaid basis with freedom of choice expressly reserved to both physician and patient.

RECORD OF THE 86TH CONGRESS

Liberals found this Congress most frustrating after the clear mandate of the people in the fall of 1958. The conservative coalition of Dixiecrats and Republicans, which has blocked much worthwhile social legislation since 1938, prevented enactment of minimum wage, school construction and housing legislation, as well as legislation to stimulate the sluggish growth of the economy, to help business and industry, and to provide jobs for our people. In this the Dixiecrat-Republican coalition had the leadership and open assistance of the Republican administration which rattled a constant veto threat over the heads of Congress.

Particularly unfortunate was the betrayal of the aged by the administration and its coalition cohorts on medical care. The legislation passed ostensibly to furnish medical care to the aged, the highest of all groups in all phases of medical need, will do little for them. Matching Federal grants for the care of the needy aged on a strictly welfare basis are provided in the bill passed. The usual means test is required. In all probability, residents of States like Michigan will receive little direct benefit, except that the Federal Government will pay a portion of what is now paid by the State under existing welfare programs to furnish medical care to aged welfare recipients. It is questionable whether this will make improvement in actual quality of the care now afforded our needy aged.

The Congress passed the Civil Rights Act of 1960, principally directed at protecting the right to vote and it should be helpful in this. I am happy to say that not only was I a framer of the discharge petition which brought this legislation to the floor, after it had been bottled up by the Dixiecrat-Republican coalition, but was active in every effort to strengthen the bill. The conservative coalition with the support of the White House and most of the Republican membership beat down most efforts to make this legislation really meaningful. Provisions of my antibombing bill are included in this law.

Although exact figures are not available at this time, the Congress cut the administration's spending requests substantially. The politically balanced budget of the 1960 fiscal year was achieved by juggling of expenditures of the year preceding and the year following. Among others, foreign aid expenditures not needed until 1960 were spent in 1959. Vital defense expenditures, and, indeed, many other necessary expenditures, were put off by the Executive until 1961. Many bookkeeping changes were made to permit this balanced budget, including more than doubling the Federal Reserve's payment to the Federal Government from $491 to $1,093 million.

While this juggling was going on the President and members of his party in Congress were successfully opposing housing and urban renewal programs, aid to depressed areas, and school construction legislation.

The Congress appropriated sufficient money to meet foreign aid requirements, although it appears that the administration is seeking to make up for diplomatic failures by big expenditures. The collapse of American foreign policy in many areas, such as the Congo, Latin America, and the Far East was again a signal for increased foreign aid requests by the administration. The events of the past year have finally proved that the "grand tour personal diplomacy" does not work. I am hopeful that these failures may result in intelligent reappraisal of foreign policy and that emergency appropriations will not substitute for intelligent planning.

SOME IMPORTANT LEGISLATION ACTED UPON BY THE 86TH CONGRESS

Civil Rights Act of 1960: Authorizes Federal courts through appointed referees to safeguard voting rights; fixes penalties for obstruction of court orders and for destruction of homes, churches, schools, and businesses by use of explosives; and requires preservation of Federal election records for 2 years.

S. 722: To provide loans and grants for industrial redevelopment in depressed areas, as well as retaining unemployed workers. This was vetoed by the President and an attempted override failed.

H.R. 12667: To increase the minimum wage from $1 to $1.25 per hour over a 3-year period, and extend coverage to 4 million more workers. This was passed by the House and Senate, but killed in conference by Republican-Dixiecrat coalition.

Public Law 85–564: Extending the limit of $293 billion on the national debt for 1 year.

H.R. 10128: To authorize a 3-year $975 million program of aid to school districts for construction of schools. This was passed by both Houses but the conference request was killed in Rules Committee by Republican-Dixiecrat coalition.

COMMITTEE ACTIVITIES OF HON. JOHN D. DINGELL

Disclosures by me several years ago of irregularities in granting television licenses by the Federal Communications Commission, and my discussion of improprieties of conduct by members of that body, have helped bring about stringent reform legislation. Cancellation of television licenses granted under questionable circumstances, and resignation and indictment of members of that agency, have also followed.

This year I helped bring about a thorough investigation of the Federal Power Commission, by disclosure of ex parte contracts on members of that body. Lobbyists secured an excessive rate of return on gas delivered to the Detroit area by improper visits to commissioners. A thorough congressional investigation resulted, the Federal Power Commission reversed itself, and the people of this area were saved some $16 million over the next 20 years.

I vigorously and successfully opposed other lobby attempts to damage consumer interests. I helped defeat an effort to weaken the food and drug law to permit cancer-producing additives in foods. I joined with a few colleagues in successfully defeating a nationwide so-called fair-trade bill which would have cost consumers over a billion dollars a year in additional costs on food, appliances, drugs, cosmetics, and household items. This bill would have repealed the antitrust laws, and opened businessmen to intimidation, coercion, and improper pressure. It would have vested in special interests license to fix prices and gouge merchants and consumers alike.

I have taken a particular interest in conservation of wildlife and natural resources, and have drafted strong legislation to clean up our rivers and waters and make them again safe for home, industrial, and recreational use. I took part in enactment of every piece of conservation legislation which was passed this session.

It has been an honor to represent my people in the House of Representatives for the past three Congresses, and I hope my efforts will merit their continued approval.

Congressman O'Hara Reports to the Michigan Farmer

EXTENSION OF REMARKS

OF

HON. JAMES G. O'HARA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. O'HARA of Michigan. Mr. Speaker, one of the gravest problems facing our Nation arises from the economic squeeze in which the American farmer now finds himself.

It is a problem which has caused me as much concern during my service in Congress as any other single subject.

THE SEVENTH DISTRICT OF MICHIGAN

The congressional district which I have the privilege to represent is composed of Huron, Tuscola, Sanilac, Lapeer, St. Clair, and Macomb Counties in the Thumb of Michigan.

In the majority of these six counties agriculture is the principal industry.

The farmers of my district are both industrious and resourceful, and they farm productive land. Yet today they find themselves in an economic wringer as do farmers throughout the Nation.

When net farm income drops in Michigan by 30 percent between 1952 and 1959, and farm mortgage debt increases by 73 percent in the same period, we are all in trouble. In those same 7 years, 23,000 farms were closed down in our State, and the people that lived and worked on them have gone elsewhere in search of jobs.

This is not a pretty picture, and the national farm scene is much the same. For example, in the Seventh District, where many of our factories produce machines and products used on the farm, we have also felt the impact of the drop in purchasing power of the farmer to its lowest point since 1940.

Now, I should like to review some of the farm programs and policies considered by this 86th Congress, in which I have had the privilege to represent the Seventh District of Michigan.

WHEAT

The wheat generally grown in the Seventh District is a soft white wheat which is not in surplus, as are the hard red wheats, and which has on several occasions in recent years actually been in short supply.

Most of our wheat producers are small growers, many of them operating under the 15-acre exemption.

The wheat bill before the House this year imposed upon all growers of soft white wheat an enforcible acreage allotment equal to the greatest number of acres planted in the last 3 years less 25 percent. The 15-acre exemption would also have been eliminated.

This amounted to penalizing Michigan growers for a surplus situation which they did not create and to which they do not contribute.

I, therefore, proposed an amendment which would have corrected this inequitable treatment. When my amendment failed of adoption, I voted against the bill which was defeated in the House.

While I favor legislation to reduce surplus stocks of wheat and to assist hard-pressed growers, I insist that such legislation deal fairly with all growers of all types of wheat.

MILK

On Wednesday, August 31, the House, with my support, passed and sent to the President S. 2917, a bill to set price support levels for manufacturing milk at $3.22 per hundredweight instead of the present $3.06 and for butterfat at 59.6 cents per pound instead of the present 56.6 cents.

The new price support level of 81 percent represents average market prices of the past marketing year and provides insurance against a price drop during the balance of this marketing year.

This bill was supported by the Michigan Milk Producers Association and other dairy organizations. Michigan Milk's president, Glenn Lake, estimates that the support boost will mean $180 million to the Nation's dairy farmers, $8 million of it to Michigan dairymen.

BEANS

Bean price supports have been lowered from $7.87 per hundredweight in 1952 to $5.35 per hundredweight in 1959, a reduction of 32 percent, with serious impact upon growers.

Additionally, the problem of marketing Michigan beans in an orderly fashion to obtain the highest possible price has been complicated by maintenance of an unnecessarily early takeover date on beans under Commodity Credit Corporation loans.

I have repeatedly urged the Department of Agriculture to change the takeover date from the end of February to the end of April, without success. I shall continue doing so until action is taken.

SUGAR BEETS

The question of allocation of sugar quotas under the Sugar Act has been dominated this year by foreign policy considerations involving relations between our Government and the governments of Cuba and the Dominican Republic.

It is my intention, when the Sugar Act is again up for amendment, to press for a 5-year extension, providing adequate quotas for our Michigan domestic beet producers.

MIGRANT LABOR

In the last hours of this session, the Senate passed, and the House accepted, a bill extending the operation of Public Law 78 under which Mexican nationals are permitted to enter the United States as farm laborers through next year, without change.

Earlier, the House had voted a 2-year extension which the Senate would not accept.

I supported the extension of Public Law 78, but would have preferred a longer extension along with amendments to correct abuses of the program which have arisen, mostly in the five States of the South and Southwest in which about 90 percent of the bracero labor is used.

INDUSTRIAL DEVELOPMENT

I was pleased to be able to assist the successful efforts of the Snover and Deckerville industrial development groups to bring small industries to their communities.

I would like to see much more of this and stand ready to assist other communities in such efforts in any way I can.

Earlier this year, I voted for the area redevelopment legislation setting up a program to assist in bringing new industries and new jobs to areas of substantial and chronic unemployment and to rural areas in which a proven need for supplemental income and employment opportunities exists. This would have helped especially in the Port Huron and Detroit employment areas.

Unfortunately, that bill was vetoed by the President, in part because he felt that "loans for construction in rural areas are incongruous and unnecessary." Michigan State has done some very successful work with their rural development program, and this bill would substantially assist their pioneering work in our rural Michigan counties.

Nevertheless, Congress should, I believe, persist in its efforts in this direction next year.

FOOD FOR NEEDY

Last year I joined with Michigan's Senator PHIL HART, who serves on the Senate Agriculture Committee, in sponsoring a bill to establish a food stamp demonstration program. The Secretary of Agriculture, under this proposal, would operate six pilot demonstration food stamp programs in areas of high unemployment, both in rural and urban counties, to utilize the surplus production of our farms to help the needy.

We believed that this demonstration food stamp program, once under way, would once and for all time show the feasibility and usefulness of food stamps for the needy in all parts of our Nation. This proposal was passed in the Senate, but was changed before it finally passed the House to the extent that it did not direct the Secretary of Agriculture to get on with this food-stamp program, but simply gave him authority to undertake such a program if he wanted to. Secretary Benson said he did not believe there was any need for a food stamp program, and to date has refused to use this authority which Congress gave him.

I intend to keep pressing for a sound program to get our surplus food into the stomachs of needy people in our country, as well as the hungry overseas.

FOOD FOR PEACE

The United States has no greater weapon in the cold war than the productive ability of our land and our farms. I have supported the programs under Public Law 480 to use our food surpluses and our abundant production as an instrument of peace and friendship. But I believe that there can be great improvements in this program. Unfortunately the administration has fought every effort of those of us in Congress who want to improve this program. We could, for example, be using the foreign currencies received for the sale of our surplus commodities to build storage facilities for national food reserves in nations that have had serious deficits.

We would be helping to prevent starvation from famine or other disaster by having the food close at hand to the country needing it.

I have believed this type of program to be sound, and in the best interests not only of our farmers, but of our Nation and the peoples of the world. Efforts to enact such new programs for use of food surpluses overseas have been blocked by this administration. I will continue to work for expanded food-for-peace programs, and my support for them will be a continuing one.

FARMS AND THE ECONOMY

Mr. Speaker, all of us have a stake in achieving economic justice for the farmer. We cannot prosper as a Nation unless the farmer shares in our prosperity.

Yet net farm income in 1959 was 16 percent below that in the recession year of 1958. If farm income continues to decline, the demand for products of the mines, mills and factories of America will also decline. The inevitable result will be widespread unemployment and depression.

TOP PRIORITY

Mr. Speaker, the depression on the farm should be assigned top legislative priority in the next Congress. Simple justice demands prompt action to win for the farmer a fair price for the fruits of his labor.

Congressman John Brademas Reports on the 86th Congress

EXTENSION OF REMARKS

OF

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. BRADEMAS. Mr. Speaker, under unanimous consent, I submit for the CONGRESSIONAL RECORD my annual report on the work of Congress.

In a few weeks the American people will choose the party and the President to lead them in the 1960's. This fall Members of Congress will discuss their records with the people they represent. Here is a report from your Representative on his work and activities in the 86th Congress.

TOP PRIORITY: THE FIGHT ON UNEMPLOYMENT

Since coming to Congress I have given top priority to working for measures to combat the evil of unemployment, still a serious problem in Indiana and the Nation. Unemployment represents human tragedy for the jobless workers and their families and lost production to the Nation at a time when Khrushchev threatens to "bury" our capitalist system by outproducing us.

My first bill, the area redevelopment bill, was twice passed by Congress but twice vetoed by President Eisenhower. Its purpose: to encourage more industry and new jobs in areas of chronic unemployment. I am confident the bill will become law next year.

I also introduced bills to repeal the excise tax on autos and musical instruments to stimulate purchases; and a bill to help the U.S. rubber industry defend itself against a wave of imports of Japanese rubber footwear.

MINIMUM WAGE INCREASE SUPPORTED

Senator VANCE HARTKE and I worked hard to stop the shutdown of Kingsbury Ordnance Plant in La Porte County and so were glad to arrange for the Senate Special Committee on Unemployment Problems to hold hearings in La Porte.

I also sponsored legislation to modernize unemployment compensation by raising benefits and extending weeks of payment, and I worked to raise the minimum wage to $1.25 and extend its coverage to more workers.

HIGHLIGHTS OF AUGUST SESSION OF CONGRESS

In the August session Congress passed five major appropriations bills, the Antarctic Treaty, suspended the equal-time broadcasting requirements to permit the Kennedy-Nixon debates, a stop-gap housing bill, an antipayola bill, $600 million in Latin American aid; the minimum wage bill died in Senate-House conference after the House conferees insisted on their version or none, but Senator JOHN KENNEDY said Congress would come back and pass a good bill in January, 1961.

REPUBLICANS OPPOSE HEALTH INSURANCE FOR ELDERLY

Congress passed a social security bill setting up a program of Federal grants to States for medical care for elderly persons on relief or in need. Only 1 Republican joined 43 Democratic Senators in support of Senator KENNEDY's bill to provide health insurance through the contributory, pay-as-you-go, social security system, also endorsed by GOP Gov. Nelson Rockefeller. A solid block of Republicans and Dixiecrats killed the bill; the administration-endorsed "pauper'" bill was then passed.

DEMOCRATIC 86TH CONGRESS CUTS $2 BILLION OFF EISENHOWER BUDGETS

The 86th Congress cut $2,093,048,591 off President Eisenhower's budget requests for fiscal year 1960–61. The President asked for $148,704,982,935; the Democratic Congress cut the big-spending GOP administration's appropriations to $146,611,934,344.

Administration opposition killed a plan to let self-employed persons, such as doctors and lawyers, deduct from taxable income a limited amount placed yearly in retirement funds.

EDUCATION: A SOUND INVESTMENT IN AMERICA'S FUTURE

America's children need more schools and more teachers. The world's richest nation can afford to invest more in education. Latest figures show we need 134,000 more classrooms and 132,400 more teachers. As a member of the House Education Committee, I worked hard in the 86th Congress for Federal support of State and local efforts to build more schools and improve teachers' salaries—whichever the States chose to do. I am strongly opposed to Federal control of education. I am just as strongly aware that we cannot raise local property taxes much higher.

GOP-DIXIECRAT COALITION BLOCKS SCHOOL BILL

Both House and Senate passed school bills but the Republican-Dixiecrat coalition on the House Rules Committee refused to permit a conference to resolve the differences. I am confident that with a Democrat in the White House, a good school bill will become law next year. We can no longer cheat hundreds of thousands of American children, including many young Hoosiers, of a good education because of overcrowded classrooms and a lack of qualified teachers.

BRADEMAS SCHOOL LUNCH BILL CALLED EXCELLENT

Here are some other items on education.

The Council of Chief State School Officers said my bill to improve administration of the national school lunch program, which feeds 13 million children daily, was "excellent" and offered "substantial improvements" in the law.

In June I was named to the advisory committee for the first Washington, D.C., seminar for college and university presidents.

I am also serving on the area committee for the Midwest Program on Airborne Television Instruction which seeks to encourage the use of instructional television in classrooms.

CONGRESSMAN'S LIFE BUSY BUT REWARDING

Service in Congress is to me one of the greatest honors that can come to any American. Here are some of the fine experiences I have had:

Assisting CHESTER BOWLES, chairman of the platform committee at the Democratic National Convention, in Los Angeles in July.

Representing Methodist laymen in a nationwide TV program on the history of Methodism.

Receiving the Citizenship Award of the Democratic National Committee, the Ahepan of the Year Award, and the Outstanding National Achievement Award of Detroit's Hellenic Board of Trade.

GOLD MEDAL FOR DR. DOOLEY PROPOSED

Participating in a film, "Mr. BRADEMAS Goes to Washington," showing the first weeks in the life of a new Congressman, used for schoolchildren in civics classes across the nation.

Meeting Dr. Thomas A. Dooley, the remarkable young doctor who brings medical help to the people of Laos, and introducing a bill authorizing the President to confer on him a special gold medal because of his inspiring service.

HAROLD HANDLEY'S GIVEAWAY

With letters I requested from State Senator Matt Welsh and Hoosier Democrats in Congress, I persuaded the House Appropriations Committee to restore nearly $200,000 in funds for rural library service. Because GOP Gov. Harold Handley refuses to accept this money, Indiana is the only one of the 50 States not in the program. Handley's action is an outrageous giveaway of Hoosier tax dollars. I am glad Matt Welsh has promised to use the funds if elected Governor, and so return Indiana to the Union.

HELPING DISTRICT CITIZENS A GREAT THRILL

Helping citizens of the Third District gave me a great deal of satisfaction in my first term.

The Housing Act of 1959 contained my amendment to enable 320 South Bend families in the Southmore housing project to keep their homes.

My bill giving rent-free classroom space at Kingsbury Ordnance Plant to a La Porte County school destroyed by fire also became law.

I helped secure $7,800 in Federal funds for an Army Engineers study of Michigan City's harbor, the first step in major improvements.

MICKEY JOSEPH'S DAUGHTERS COME FROM LEBANON

Congress passed the Brademas-Hartke bill to let Mr. and Mrs. Mickey Joseph, of Michigan City, bring their two adopted girls from Lebanon.

His father in Michigan City has just advised me that Soviet authorities are going to let 18-year-old Gediminas Kavaliunas leave Russian-controlled Lithuania to join his family here. I arranged for Vice President NIXON to carry an appeal for the boy's release to Russia on his recent visit and I also sent a personal telegram to Nikita Khrushchev when he was here urging him to permit the young man to be reunited with his parents after 15 years of separation.

SOUND FARM POLICY STILL A BIG PROBLEM

The stalemate on farm policy between the Eisenhower-Nixon-Benson administration and Congress continued with no major change in farm law. There are no easy answers to the complex farm problem but I believe we must work toward policies that enable farmers to receive fair prices for what they sell without being forced into bankruptcy.

Cash farm income in Indiana was down about 8 percent in 1959 from 1958. For the Nation net farm income for 1959 was $3.5 billion below 1952, a drop from $15.3 billion to $11.8. Yet the price of food to the housewife hasn't gone down—the cost of living has hit the highest peak in U.S. history.

HOOSIER GOP CHAIRMAN SAYS BENSON PROGRAM "NOT CLICKING"

So the Hoosier GOP State chairman may be right when he said recently that

Benson's farm program "is not clicking." I believe we need an approach that will curb unlimited production and the falling prices that follow. We need to do more to use our surplus foods to wage war against hunger at home and abroad.

HOFFA: "DEFEAT BRADEMAS"

My vote for the Labor-Management Reform Act got me listed as one of the Congressmen Jimmy Hoffa wants purged at the polls.

A secret Hoffa memo, revealed by the press, called me a bad actor on the House Labor Committee and demanded my defeat. Although my Republican predecessor voted against a labor reform bill in 1958, I felt some legislation was needed to protect the millions of honest union members in America against the corruption of a few.

POLL ANSWERED BY 23,485

A substantial majority of the 23,485 persons who returned my questionnaire on issues favored Federal programs for education, depressed areas, health insurance for the aged, raising the minimum wage and extending coverage. The questionnaire was sent in April to most registered voters in the Third District.

KENNEDY and NIXON were top choices for President, with Democratic candidates getting 55 percent of the votes; Republicans, 45 percent. In the May 3 Indiana primary, Democratic candidates received 56 percent of the votes and Republican 44 percent.

CONGRESS PASSES ANTIBIGOTRY RESOLUTION

This year the House unanimously passed my resolution expressing the profound sense of shock and indignation at the wave of anti-Semitic and anti-Catholic demonstrations in Western Germany and other nations.

We all know, as I told the House, that when one man or one house of worship or one religious faith is today made the object of attack, tomorrow another may feel the sharp lash of bigotry.

LETTER FROM LINCOLN

As a Protestant and a Democrat, I am in full agreement with the noble words of a great Republican, Abraham Lincoln, who, a century ago, in a letter to a Kentucky friend in 1855, wrote:

> Our progress in degeneracy appears to me to be pretty rapid. As a Nation we began by declaring that all men are created equal, except Negroes. When the Know-Nothings get control, it will read "All men are created equal except Negroes and foreigners and Catholics." When it comes to this, I shall prefer to emigrating to some country where they make no pretense of loving liberty.

Abraham Lincoln understood the simple truth that all of us belong to some minority group.

"WE HOLD THESE TRUTHS TO BE SELF-EVIDENT"

The Declaration of Independence boldly declares that "all men are created equal" and are "endowed with certain unalienable rights." The task of securing these rights to all Americans, regardless of race or color, is one of the most crucial issues facing our country today.

Here is a summary of my work for civil rights during my first term in Congress:

First Member of Congress to introduce the constitutional amendment guaranteeing the right to vote to all Americans, as suggested by the Reverend Theodore M. Hesburgh, president of Notre Dame and a member of the U.S. Civil Rights Commission.

Introduced both the Democratic and Republican proposals for registrars and referees to insure Negroes the right to vote in the South.

Served on a civil rights task force of Democratic Congressmen who sought to pass an effective civil rights bill against GOP-Dixiecrat efforts.

Helped preside over the Notre Dame Civil Rights Conference attended by Federal officials and other persons concerned with civil rights legislation.

Worked at Democratic National Convention on the platform committee which drafted the strongest civil rights plank in either party's history.

SECURING PEACE AND FREEDOM

The greatest challenge to the American people is the securing of peace and freedom in the face of expanding Communist power. The common danger of mankind is war and the threat of war. But to work effectively for peace, we must restore American political, military and economic leadership in foreign affairs.

I believe that in the life or death area of foreign policy, a conscientious Congressman must vote in the national interest and put his political party second. My Republican predecessor in Congress supported President Eisenhower on foreign policy votes only 46 percent of the time. Although I am a Democrat, I have not once voted against President Eisenhower on a foreign policy issue, a 100 percent record.

EISENHOWER THANKS BRADEMAS FOR FOREIGN POLICY SUPPORT

In fact, President Eisenhower wrote to me in May to voice his appreciation for a letter I had written him on behalf of a group of 28 Democratic Congressmen expressing our support of adequate funds for his mutual security program.

Republicans on the House Appropriations Committee, urging support of the mutual security appropriation bill this year, warned:

> This is no time to kowtow to Khrushchev or be soft on communism.

I agree, and on June 17, 1960, I voted for this bill.

REPUBLICAN OPPONENT VOTES AGAINST EISENHOWER FOREIGN POLICY

But when my Republican opponent was our Representative in Congress, he cast his vote, on July 2, 1958 against President Eisenhower's mutual security appropriation bill and thus drove a knife into the heart of a program the President has described as "indispensable to our own and free world defense against Communist imperialism."

Some other activities of your Congressman:

I was glad to receive so many letters in support of my bill to create a Great White Fleet to carry surplus foods and medical help to disaster areas all over the world.

I strongly supported the point 4 Youth Corps idea, adopted by Congress, to provide for a study of the possibility of sending able young Americans abroad, at soldiers' pay, to serve our country in technical aid missions in the underdeveloped areas. It is in these areas that much of the battle for a free and peaceful world is now being fought.

BRADEMAS DELEGATE TO CONFERENCE IN LATIN AMERICA

The troubles in Cuba remind me of my recent visit to Latin America as a delegate from the U.S. Congress to the First Inter-American Parliamentary Conference in Lima, Peru, where I had the chance to talk with legislators from South and Central America. I served as translator for the chairman of our three-man delegation during a committee meeting on agricultural policy. My conversations with Latin American political leaders at this 16-nation meeting made clear to me that: First, economic development is the No. 1 problem facing these Republics; and, second, we must give much more attention than we have been doing to our relations with Latin America.

The 86th Congress Sets a Forward Course

EXTENSION OF REMARKS

OF

HON. HARLEY O. STAGGERS

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. STAGGERS. Mr. Speaker, I should like to present my analysis of the 86th Congress and invite every American, especially the good people of the Second District of West Virginia, to read it word for word.

America is awakening to the fact that all is not well with our Nation either at home or abroad. Our enemy, communism, is getting bolder and more threatening day by day. Congress has been impressed by events on the international scene and by the testimony of military and economic experts who challenge the administration view that we are in good shape. Much of the time and attention of the 1960 session has been spent in devising means of combating the dangers which threaten us. Matters of particular interest to the people of the Second West Virginia District may be summarized as follows:

Defense, space, security: Concern over the No. 1 worry—defense—has raised the total authorized expenditure in that category to $46.6 billion, more than $600 million above the President's request. Some $15 billion of this will be spent on submarines, missiles, aircraft, and other military equipment; $4.6 billion will go to research and development in atomic energy fields. In addition to these military appropriations, Congress enacted no less than six important measures to strengthen our relative position in the vital matter of defense. If appropriations are used immediately for the purpose intended, they should help to restore our prestige abroad and blunt the edge of insults to which we have been subjected in recent months.

International affairs: It is no less important to assist our friends in the free

world than to look after our own defense interests. To that end, Congress provided $1.3 billion for economic and technical assistance and other special activities for a long list of allies and potential allies, as well as $2.7 billion for strictly military assistance. The mutual security program was extended for 1 year. In the last days of the session, a special fund of $600 million was set up for assistance to our Latin American neighbors to the south. These programs are all designed to help raise economic conditions in the recipient nations to the point where freedom and self-respect can maintain strong governments devoted to resistance to any foreign domination. Other action of significance on the international front included: Extension for 2 years of the President's authority to control exports of strategic materials; funds to effect U.S. participation in International Bureau for Protection of Industrial Property; a bill authorizing the President, the Secretary of the Department of Health, Education, and Welfare, and the Surgeon General of the United States to conduct an international cooperative program in health research, planning, and training; a resolution reaffirming the sense of Congress that upon achievement of disarmament agreements the United States should join with other countries in a program for peace. The last two of these matters embody programs on which I have worked ever since I came to Congress. I have introduced a number of bills providing for international study of methods of cancer control, in particular, and for the establishment of a Department of Peace in the President's Cabinet. Both of these matters deserve positive consideration and action. Congressional agreement on my proposals is now a fact.

Domestic economy: As defense is the No. 1 problem in our foreign relations, lag in economic growth at home creates serious domestic difficulties. The 1960 session of Congress acted on a wide range of subjects in this field. Your Representative spent many hours in promotion of three measures. The first of these was the depressed areas redevelopment bill, which would have provided technical assistance and loans for setting up or relocating small business enterprises in areas of substantial unemployment, a service similar in nature but much less expensive than economic aid for foreign countries. This bill was specifically tailored for conditions in West Virginia and in other depressed areas scattered over the country. The bill was passed twice by the Congress and vetoed each time. Another bill, under my cosponsorship, authorizes comprehensive development of national forests for timber uses, grazing, land and mineral resources, and recreation. Some 50 Congressmen joined in introducing similar bills, showing the widespread popularity of the idea. Forests constitute one of the most valuable assets of West Virginia, and their scientific development and use will add significantly to the local economy. This measure was finally approved by the President. A third bill for which I was cosponsor created an Office of Coal Research to find new uses for our fuel resources. Other matters affecting the domestic economy to which I gave special attention include: The creation of an Agricultural Research and Development Commission to find new industrial uses for farm products; the establishment of an Office of Water Pollution Control and an appropriation to assist local governments in sewer construction—vetoed; amendments to the Small Business Investment Act extending credit to small business enterprises and increasing its working capital; authorization of $1 billion for each of the next 2 years in Federal aid for highway construction, of which West Virginia will get a share. The public works authorization of $1.4 billion for flood control projects and improvements to navigation contains more than $21 million for programs in our State.

Labor: The millions of unemployed in the United States furnish eloquent evidence that our boasted prosperity does not extend to important segments of our population. Jobs ought to grow as fast as available workers, and I have no apology for my intense interest in projects and programs, both public and private, which will furnish job opportunities and increase the earnings of workers. The $21 million for flood control and locks and dams in the rivers of the State of West Virginia provide work opportunities in an otherwise depressed area. Congressional authorization has been given for the expenditure of some $79 million for the Naval Radio Research Station at Sugar Grove, W. Va., in Pendleton County. This includes an appropriation for this year of $17,800,000, with other millions yet to come. Scientists say the Sugar Grove project will be the "Eighth Wonder of the World." The National Radio Astronomy Observatory of the National Science Foundation, located at Green Bank, Pocahontas County, W. Va., is now being constructed at a cost of some $10 to $12 million. This installation is employing highly skilled and well-paid workers. The Internal Revenue Service Computer Center at Martinsburg in Berkeley County will soon be under construction at a cost of approximately $3,500,000. Approximately 289 acres of ground in Jefferson County have been secured to develop an Army Communications Center. The Bureau of Mines Station at Morgantown now employs 224 persons, with a payroll of $58,640 every 2 weeks and with a total authorization of over $2 million annually.

I have worked diligently with all Government agencies to reactivate the Morgantown Ordnance Works and I have been assured by high Government officials that the chances are good for putting the plant back into operation. In the early 1950's, when operations had ceased at this chemical facility in Morgantown, I worked diligently and was successful in having the Army lease the plant to private enterprise and operations were resumed. Airport improvements at Morgantown have been approved and $671,000 in Federal funds allocated to complete the job. A new Federal building is being constructed at Martinsburg at a cost of $1,400,000. At least nine new post offices in the Second District have either been constructed or are currently scheduled for construction. These are located at Petersburg, Kingwood, Shepherdstown, Romney, Moorefield, Westover, Star City, and Paw Paw. New offices for Elkins and Morgantown are on the planning list.

Incidentally, these post offices under a new plan are being constructed by private enterprise under a long-term lease to the Government. They will therefore be subject to local taxation and add to the tax base instead of subtracting from it. With the assistance of Federal appropriations, for which I voted and actively worked, hospitals have been built or planned for Romney, Petersburg, Webster Springs, Philippi, Kingwood, Morgantown, and Martinsburg. The fish hatchery in Randolph County was established by a bill for which I was cosponsor. The Elkins Airport bill saved the city of Elkins approximately $100,000. The armory at Keyser is nearing completion, and the Elkins Armory will soon be constructed. Both of these armories were made possible by Federal matching funds for which I worked ceaselessly until they were made available.

In 1958, the most recent year for which complete figures are available, total Federal payments in West Virginia for old-age and survivors benefits, for veterans' programs, railroad retirement and unemployment plans, and unemployment insurance amounted to the impressive sum of $450 million. All these projects and benefits turn loose money in the Second District which is used for the procurement of an endless variety of goods and supplies, for the employment of workers, and for new and important services. And every one of them involves constant alertness and attention on the part of your Congressman.

Veterans: No fewer than 10 important items of veterans' legislation emerged from the 1960 session. The list will indicate the nature of the benefits and services provided, and will demonstrate the fact that our ex-servicemen have been neither forgotten nor neglected. They are: Extension for 2 years of authority for direct and guaranteed loans to veterans for homes, farms, or business; waiver of premiums on national life insurance policies for certain totally disabled veterans; permission to convert or exchange national life insurance policies to a new, modified plan; additional compensation for disabled veterans with more than three children; additional compensation for certain disabled veterans; provisions for the services of optometrists to veterans with service-connected eye conditions; authorization for involuntary retirement after 20 years' service of Air Force and Army officers who fail to meet selection requirements for promotion three or four times; incentive pay for service on nuclear-powered submarines; amendments to the Reserve Officers Personnel Act to equalize promotion opportunity in various branches of the Armed Forces; and posthumous awards to the four chaplains.

Numerous other bills engaged the attention of Congress, but failed to reach final action during the 1960 session.

Health, education, welfare: In these fields, obstructionists in the administration and among some ultraconservatives in Congress cut off forward-looking action on several important matters. A realistic proposal for health care for the aged was watered down, but pushed through in the best form that could be had at this time. Threats of a Presidential veto precluded any satisfactory school-aid bill. A new minimum wage bill suffered the same fate. Constructive action on a number of matters was taken, the list including such items of District interest as the extension of the special milk program for school children, with an increased appropriation of $10 million; tightening of control over use of coal-tar coloring in food, drugs, and cosmetics; redefinition of certain narcotic drugs, with tightened control over their manufacture and sale; new regulations to curb the use of the mails to distribute obscene and fraudulent matter.

Miscellaneous: A bill which I cosponsored authorizing the purchase of Storer College and other land at a cost of $300,000 for addition to the Harpers Ferry National Monument will add materially to the attractiveness of this historic site, which already entertains more visitors than any other monument in the United States except one. Serving the needs of these tourists adds significantly to the prosperity of the locality.

As a disabled veteran of World War II and the father of six children who are attending the public schools of West Virginia, I assure the people of the Second District, whom I have the honor and the privilege of representing in the Congress—as well as every American—that I will always continue to work and fight for those things which will strengthen our Nation and make it a better place in which to live and to bring up their children and mine.

Every Member of the Congress is responsible for his actions to his own conscience, to his constituents, to this incomparable Republic, to world opinion, and, in the last analysis, to that Supreme Power which guards our destiny and shapes our ends. In this spirit, we submit our record, both individually and collectively, to those who must be our judge.

The 20th Anniversary of the Ukrainian Congress Committee

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. DULSKI. Mr. Speaker, I would like to take this opportunity to congratulate the Ukrainian Congress Committee of America on the occasion of its 20th anniversary.

As the spokesman for the 40 million Ukrainians under the domination of Soviet tyranny the committee has been in the forefront of the struggle against communism. Its purpose has been to educate its fellow Americans and the citizens of the free world and to inform them of the realities of life under Russian communism. In the past 20 years the Ukrainian Congress Committee has always spoken out, clearly and forthrightly, on behalf of all the captive non-Russian nations in the Soviet Union. It has attempted to dispel any illusions we of the free world might have about the Soviet totalitarian system of government. By its own words and actions the committee has advanced the cause of democracy and aided the United States and its allies in the crucial struggle against dictatorship in all forms.

I congratulate the members of the Ukrainian Congress Committee for its wonderful work. All Americans can be justly proud of this organization and take heart from its endeavors. Let us hope that we shall soon see a fulfillment of the committee's aims and a world of both peace and freedom.

Congressman Stratton's Annual Report to the People of the 32d Congressional District of New York

EXTENSION OF REMARKS
OF
HON. SAMUEL S. STRATTON
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. STRATTON. Mr. Speaker, once again, in accordance with my usual practice, I am taking this opportunity to report directly to the people of the 32d District of New York, whom I have the honor to represent in Congress, on some of the accomplishments of this 2d session of the 86th Congress, now drawing to a close.

JOBS AND UNEMPLOYMENT

This year, just as last, the major problem facing our people continues to be unemployment—severe and extended unemployment, created by the loss of jobs to the South, to the west coast, and, through mounting foreign competition, even overseas.

Early last January, at my request, the Special Senate Subcommittee on Unemployment came to Schenectady and held a day-long hearing into unemployment problems throughout our district. As a direct outgrowth of this hearing, the House in May, after some rather extensive parliamentary maneuvering, brought to the floor and successfully passed a bill to help distressed areas suffering from unemployment. I was a cosponsor of that bill and a leader in the fight for its adoption. The bill passed the House, largely on the basis of the impressive facts about unemployment in our district originally developed at that Schenectady hearing. This was a major legislative victory for our district.

Yet the victory was short-lived. The President vetoed the bill, in spite of a last-minute visit of mine to the White House to plead again for his signature. He killed as being too costly a bill that would have given the Nation's unemployment areas, so as to get back onto their feet, only 5 percent of the figure that is spent every single year to aid foreign countries. Personally, I would have been willing to support any bill the President would have signed so as to get some assistance law on the books. But time was just too short to enable us to get around all those complex parliamentary obstacles all over again. This bill certainly must become the number one item of unfinished business on the agenda of the next Congress.

NEW INDUSTRY FOR SCHENECTADY

One bright cloud on the horizon is the expectation that a new industry will move into Schenectady. This was made possible when the General Services Administration agreed in August to my request to sell the Niskayuna Tank Testing Plant to the Schenectady Industrial Corp. for use by this new industry, even though the offered price was well below the fair market value of the building. If Government surplus can be used to create new jobs for distressed areas, then we would be money ahead even if we gave it away.

OTHER JOB DEVELOPMENTS

Other Washington developments that have been designed to ease some of the heavy pressures of unemployment in our area are these:

First. A new Government contract on rocket research was completed for the Malta Test Station of the General Electric Co. This will keep the station in operation for several additional months. But we still need further Government work to make the fullest utilization of these facilities and the people trained to operate them. The House passed this session, with my strong support, the Brooks bill to encourage companies with large private research organizations like General Electric to participate in contracts for the National Space Agency on a par with smaller, Government-created companies. Unfortunately the Senate never took up the measure. It would have helped our area.

Second. The Defense Department, after a succession of requests on my part, finally consented to increase available housing facilities at the Schenectady General Army Depot by allowing the Army to acquire the Mohawk Manor development on Duanesburg Road. This action will fill in the one major gap in the depot's present facilities, and will thus insure its continued status as a permanent defense installation. I feel certain that as a result more military missions and with them more jobs will be transferred to Schenectady in future months when other military installations in other parts of the country are closed down.

Third. When the House passed legislation earlier this year to ban retired service officers from exercising improper influence in the awarding of defense contracts, the bill that was finally adopted had wisely been stripped of those original provisions that would have banned all defense contracts to companies like GE and Alco with retired officers on their payroll. I succeeded in eliminating this harmful feature during

our Armed Services Committee's consideration of the bill, and insisted that we make it clear that the valuable services of men such as Admiral Rickover, for example, would not be lost forever to the Nation's defense program in private industries like the GE Knolls Laboratory simply because they had retired from active service. A poorly worded bill, passed in the heat of debate, could easily have done irreparable harm to Schenectady.

Fourth. Although the Navy persisted in their decision to close down the Scotia Depot, the General Services Administration has taken over the site as a Government facility, and still provides a sizable number of jobs to the area. As a result of my request, a number of former Navy personnel have been retained at Scotia to meet some of the heavy requirements of machinery transferral which had not been fully anticipated in the Navy's original decision. Where there is life there is hope. I am still hopeful we can keep these men on the job, and can convince the Navy and the GSA next year of the advantages of increasing job opportunities at Scotia by switching here other Government operations now being performed less efficiently elsewhere. I still believe that the decision of the Civil Defense Administration not to transfer more defense storage functions to Scotia simply because Schenectady is a "target" area is unwise and shortsighted, both from the point of view of defense as well as unemployment. This is a decision I believe can and must be reversed by the incoming administration.

Fifth. Throughout the year my office has been channeling to area businessmen and manufacturers periodic information about Government contracts coming up for bid. In this way I believe we have helped to increase the opportunity for local businessmen to get a larger share of Government work.

Sixth. I have introduced and fought hard for legislation to require that foreign governments making purchases in this country with American aid funds be required to spend those funds in unemployment areas like our own. Such a policy is vitally necessary to insure that Alco in Schenectady, for instance, gets a fair share of locomotive business being financed by American taxpayers' dollars.

THE GROWING PROBLEM OF FOREIGN COMPETITION

Because much of the serious unemployment problem in our area, especially in Amsterdam and Fulton County, is the result of increasing low-cost foreign imports, the battle against this unfair competition has continued to occupy a very major part of my time and efforts.

Early last spring I testified personally before the U.S. Tariff Commission in support of the glove industry's request for tariff and quota relief. I told the Commission that if existing law could not grant such protection to the glove industry, then it would be hard to see how any industry could ever get relief. In spite of strong appearances by manufacturers and labor representatives and the marshaling of a most impressive group of statistics, the Tariff Commission ruled against the glove industry. To me this is clear proof that the Commission is simply not performing the function it was designed by Congress to perform, and that the whole legal procedure which Congress originally drafted to protect domestic industries must be completely revised next year when the Reciprocal Trade Act comes up for renewal.

In the same way I have fought for a better break for the hard-hit carpet industry, and took the lead in the House in supporting the industry's very proper request that our State Department withdraw some of the present tariff concessions to carpet-manufacturing countries like Japan which have already taken away so many jobs from Amsterdam and elsewhere. Although the legislation on this matter did not get an opportunity to be voted on in the brief period of our special session, I feel confident that as an expression of wide congressional interest it should still have a healthy effect on our negotiators at the tariff discussions now going on in Switzerland.

I have also offered several other pieces of legislation intended to bring to the attention of Congress and the public the serious shape of the problem of foreign competition and to suggest some constructive answers. One such bill was H.R. 11418 which would limit imports from countries with a lower standard of living than ours but allow those countries to collect the tariff levies themselves, provided they used them to help raise their own living standards.

All in all I feel we have made real progress in this matter. Congress is certainly more alert to the problem now than ever before. I feel confident that those of us who have worked together these past 2 years to protect American industries will be in a position to nail down a real victory when the Reciprocal Trade Agreements Act comes up for renewal in the next Congress.

BUILDING AN INVULNERABLE DEFENSE AGAINST COMMUNIST AGGRESSION

As a veteran of two wars, a member of the Naval Reserve, and a member of the House Armed Services Committee, I have long had a deep interest in building the strongest possible defense against Soviet aggression. Even the attacks made on me during my first few months in Washington by the Soviet propaganda radio because of my outspoken position on defense have not deterred me one little bit. This past year, for example, I led a successful fight in the House to put more money into our defense budget for Polaris submarines, a decision which was fully justified by the successful firing of the weapon from a submerged submarine in July.

I also took the lead in insisting that in view of the deterioration of some of our oversea land bases as a result of the U–2 incident, we needed funds in the budget for a new aircraft carrier. In spite of opposition from several key House leaders we won this fight too. But I have been profoundly disturbed to see the contract for this new ship taken away from New York State, where it belongs, and transferred to Virginia.

INFLATION AND A BALANCED BUDGET

The problem of inflation, the rising cost of living, with its impact on everyone but especially those living on fixed incomes, continues to be of great concern to me. One of the best ways that the Federal Government can meet this problem, of course, is to keep its own financial house in order, balance its budget, and pay off something every year on the national debt. I am happy to report to you that for the second straight year, during my tenure as your Congressman, the Federal Government has not only balanced its budget but has produced a surplus to be used to retire a portion of our huge Federal debt. As your Congressman I have repeatedly resisted spending proposals which I believed to be unnecessary or which would have had the effect of unbalancing the budget. I am proud that I have had a part in bringing about this sense of fiscal responsibility, and in insuring once again that the funds appropriated by Congress were less than those requested by the President.

FARM LEGISLATION

Because our 32d District is one of the most important farm areas in New York State and the Nation, I have worked especially hard to promote legislation to help our farmers.

One major accomplishment in this regard was the defeat of the 1960 wheat bill, which would have seriously aggravated our present surpluses and would have put an even greater squeeze on the New York dairy farmer by increasing his grain costs. Not only did I cast my own vote against the wheat bill, but I also succeeded in enlisting the support of many Congressmen from the New York City area who have in the past usually supported the Midwestern farmer. As a result, the wheat bill was defeated in the House of Representatives by a sizable majority.

Another important accomplishment was the establishment by Congress this year of a special agricultural soil and water research facility within New York State at Cornell University. Some time ago Congress authorized creation of a series of these facilities in various parts of the country to help the farmer improve his production by eliminating harmful deposits in the soil and by increasing the ability of his soil to retain necessary water and minerals. One of these laboratories was scheduled for construction this year in the northeastern part of the United States. But we were not sure whether it would go into New York or into one of the adjoining States. All of the major New York State farm organizations, the Farm Bureau, the Grange, and the Dairymen's League, were united in their desire to have this facility located in New York. I was one of three New York State Congressmen selected to represent our full 43-member delegation in presenting the arguments in behalf of our State to the Appropriations Committee. We were successful in our request. The President has signed the bill into law, and the facility, which will be of great help to our New York farmers, is scheduled to be built next year.

MILK

Of course, the overriding problem confronting the farmers of our district during this past year has been the steadily

declining price of milk. The consumer in the city still pays the same high price for milk, of course, but the farmer has been getting less and less. During the year I have taken these actions to help meet this serious farm problem:

First. Supported expansion of the school milk program to promote greater consumption of fluid milk.

Second. Introduced legislation to have the Government test out the effects of a milk advertising and promotion campaign.

Third. Proposed an investigation into the feasibility of tying the New York-New Jersey milkshed in with the New England milkshed, so that more New York State farmers could profit from the higher milk prices paid to farmers in the New England area.

Fourth. Actively supported the bill increasing the price for manufactured milk. This is one of the first real breaks, by the way, for our New York farmers.

Fifth. Testified against a bill designed to permit flooding the New York milkshed with unlimited quantities of midwestern milk and succeeded in forcing this unwise bill to be killed in committee.

Sixth. Took the floor to oppose action by Congress to destroy existing milk market orders in New York State, as is now being attempted in a pending Pennsylvania court case. Congress took no action.

Seventh. Joined in efforts by upstate New York dairy farm organizations to request Secretary Benson to postpone an October 3 hearing on tying New York milk prices into midwestern condensery prices. The hearing was deferred.

With rapidly sagging milk prices, the New York State dairy farmer is today facing a grim future. In my judgment it is time that our farm legislation be geared less to midwestern problems and more to the immediate and urgent needs of our own dairymen.

BLOCKING BIG DAMS IN OTSEGO COUNTY

Since coming to Washington I have, of course, been a consistent opponent of the Army Engineers' plan to combat floods in the Susquehanna Valley by building large reservoir dams on much of the beautiful and valuable farmland of historic Otsego County. This year we made real progress by finally persuading the Army Engineers to put their big dam plan on ice and look for a new approach. At my request the Army agreed to resurvey the whole flood situation in the light of modern conditions, and Congress passed the necessary authorizing legislation. The survey itself will require some 3 or 4 years to complete and all indications are that it will find suitable alternatives to the old big dam idea.

DISASTER AREAS

Incidentally, I was happy to be successful in getting the Army to move quickly into Oneonta this spring when the floodwaters hit, an action that later led to their agreement to undertake the overall survey. In similar fashion we were successful in getting the Army to reexamine the possibility of flood control work along the Mohawk River at Schenectady. I am also glad to have been successful in having Schenectady declared a disaster area after the tornado hit last June, with the result that Federal help was quickly made available to many tornado victims by the U.S. Small Business Administration.

HEALTH INSURANCE LEGISLATION

One piece of legislation passed by Congress which was plainly inadequate to meet the existing need was our health insurance bill for retired citizens. Both political parties have acknowledged its shortcomings, yet neither was able to get an expanded bill adopted in the limited time available during the special session. I am certain, however, that the next Congress will adopt an improved and expanded health insurance program. At any rate, the bill which was written into law recognizes at least the responsibility of the Government to help our older citizens meet these heavy medical costs.

GENERAL ACCOMPLISHMENTS

In addition to the items already touched on, the session of Congress now drawing to a close has several other accomplishments listed to its credit which deserve brief mention: a new civil rights bill, insuring the right to vote without regard to race or color; a constitutional amendment to give the citizens of the District of Columbia the right to vote for President and Vice President; a pay raise for postal and other classified Government employees; a needed addition to the Schenectady National Guard Armory; flood control works construction for the South Chuctanunda Creek in Amsterdam; and a bill awarding a special congressional medal to the four chaplains, including the late Reverend Clark Poling of Schenectady's First Reformed Church.

OVERALL VOTING RECORD

Throughout my legislative service, both in Congress and for the 9 years before that in municipal government, I have been proud of the designation once given to me by a newsman—"independent as a hog on ice." Throughout this session of Congress, as in the previous session, I have endeavored to serve the interests of my district and my Nation without regard to consideration of narrow partisanship. Believing that I was elected to serve all of the people, I have opposed some measures supported by my party, just as I have supported others I believe to be sound. I was one of the few members of my party, for example, who refused to join in the partisan attack on President Eisenhower at the time of the U–2 incident. Having once served in time of war in the military intelligence field, I believed and still believe that in such matters the national interest should have priority over party advantage. Similarly, when the proposal was offered in the House to cite three outstanding officials of the Port of New York Authority for criminal contempt I voted against these citations, believing that any such contest of naked power between the Federal Government and the individual States ought never to be encouraged except as an absolutely last resort.

REPORTING TO THE PEOPLE

Throughout this year, as in the past, I have endeavored to keep all of you posted regularly on developments in Washington—not only by means of our weekly newsletter, which many of you have commented on so very generously, but also through the medium of the press, radio, and television. All of these services have cooperated most generously in passing these reports along to you, and I appreciate their courtesies deeply. In addition I sent out this past spring a detailed questionnaire on legislative matters pending before Congress, and asked you for your advice and recommendations on them. The response to this questionnaire was tremendous, and your views and suggestions did prove most helpful to me in discharging my responsibilities as your elected spokesman in Washington. I am hopeful that this questionnaire can become an annual procedure.

CONCLUSION

In conclusion, may I express my appreciation to all the people of my district for the support they have given me, and for the many encouraging words they have sent to me during these past two years as I have tried to work for their interests. It has been an exacting, a time-consuming, but also a tremendously challenging and satisfying job to be your Congressman. I am hopeful that the progress our district has made in these past 2 years will serve only as the groundwork for even greater achievement in the years ahead.

Report by Congressman Laurence Curtis to the People of the 10th Congressional District of Massachusetts

EXTENSION OF REMARKS

OF

HON. LAURENCE CURTIS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. CURTIS of Massachusetts. Mr. Speaker, with the adjournment of the 86th Congress, I give an accounting of my stewardship as Congressman to the people of the 10th Congressional District of Massachusetts, comprising nearly one-third of Boston, wards 4, 5, 10, 12, 19, 20, 21, Newton, and Brookline. This is my first report of this nature, although I have made newsletter reports published in the local papers.

THE COLD WAR

The House Committee on Foreign Affairs, on which I have served for 3 years, is the committee most closely concerned with the nonmilitary aspects of the cold war. The cold war underlies and affects most of the other problems, domestic and foreign, confronting our country. The defense effort and other cold war activities cost the American people more than half of its hard-earned tax dollars. I, therefore, report first on my work as a member of this committee.

My votes have been cast with these facts in mind: the realization that the present nonmilitary aggression against the United States is war; that threats of

rocket retaliation against us have been voiced by Chairman Khrushchev; that Americans must have strong hearts and steady nerves, and that it may be necessary to risk war in order to avoid certain war; that once a country gives in to threats it remains subject to blackmail, and is on the road to appeasement which can lead only to eventual war, or surrender and enslavement.

I have supported the President's foreign policies and foreign aid, known as mutual security. I have seen this program in action while on a study mission with other members of the committee to the Far East and around the world last year. I believe that technical cooperation and economic assistance must receive greater emphasis, with less emphasis on military pacts and military assistance. I believe that more of our aid should be handled on a multilateral basis in cooperation with other free world countries.

The great objective is to show the people of less developed areas who are striving to raise their standards of living that they can do so in freedom rather than by succumbing to false but to them alluring doctrines of communism. Should they choose the path of slavery, centers of hostile power may develop even in our own hemisphere. The balance of world power could swing against the free world and endanger our own national security.

A STRONG DEFENSE

I have been discussing the nonmilitary aspects of the cold war, with which the Foreign Affairs Committee is particularly concerned.

As to the military threat against the free world, I have supported a strong defense, and have consistently voted for appropriations for that purpose. I have voted for increased appropriations where the amounts requested by the President had been cut by the Committee on Appropriations.

THE MIDDLE EAST AND CUBA

As a member of the Foreign Affairs Committee, I was glad to support the action of that committee aimed at promoting peace in the Middle East. Amendments to the mutual security law sponsored by that committee upheld freedom of the seas and condemned economic warfare—blockades and boycotts. This was, of course, aimed at the illegal blockade of Israeli shipping through the Suez Canal and the economic warfare waged against Israel by her neighbors.

The amendment provides that our principles in opposition to these practices shall be applied in the administration of foreign aid.

The mutual security legislation also condemned discrimination against American citizens based on race or religion. This was aimed particularly at the Middle East, where such discrimination has existed.

The situation in Cuba was also taken up in this legislation. It prohibited the use of foreign aid funds to countries directly or indirectly selling arms to the Castro regime or giving or loaning military or economic aid.

DOMESTIC ISSUES

Civil rights legislation, to protect the constitutional rights of minority groups, has had my strong and active support. Two great acts on civil rights have recently been passed by the Congress. When the 1957 act was before the Congress, I was a member of the Committee on the Judiciary which was handling the legislation and so was in a good position to give the measure strong support. I was glad to take part in the debates on this year's bill, voicing strong support.

Both bills were focused on protecting the right to vote. This is a key right because, if widely exercised, it can unlock the door to the protection of other rights. Other rights were also acted upon, such as protection from bombings. There have also been strong advances in the protection of civil rights through administrative action. All of these advances have had my undivided support.

The immigration laws are still marred by the taint of some discriminatory provisions. I have supported efforts to amend them and have filed bills seeking this objective.

On the other domestic issues I have on the whole followed the President's leadership, avoiding the extremes on either side. I supported the more moderate approach to the minimum wage legislation and medical care for the elderly.

The bill passed by the Congress on the latter subject goes further than many people realize, and will be a big step forward in the long battle against poverty and underprivilege.

The other approach to the problem, favored by many, which keyed the medical care to the old age and survivors insurance program, did not in fact come before the House for vote. The House Ways and Means Committee, which had jurisdiction, and which is of course dominated by the majority party, decided not to bring forward a bill keyed to social security insurance, and floor amendments were not in order.

I was glad to support other changes in the social security law which were enacted this year. One made it possible for beneficiaries to receive disability insurance benefits before attaining 50 years of age. Another increased the $1,200 earnings limitation for persons who have retired on Social Security by about $150. I had filed a bill to raise the limit to $2,400, and regret that the provision adopted did not go further. This subject will probably be taken up again next year.

I have voted for and supported bills giving Federal aid for school construction, housing, and slum clearance. I have opposed overcentralization of power in Washington, and shall refer to this in connection with a bill I filed to protect agencies formed under interstate compacts from unwarranted Federal interference.

I have cast my votes in a direction which I believed would promote a free economy, sound money and wise governmental economy.

MASSACHUSETTS PROBLEMS

Problems affecting Massachusetts have of course received my special attention.

Some of the Federal aid programs have a tendency to drain money unfairly from Massachusetts taxpayers for the benefit of other sections of the country whose industries are in competition with ours.

Massachusetts people are of course ready to do their fair share on problems of truly national interest and national importance, but it is necessary to be constantly on the alert to see that Federal aid is not taken advantage of by other areas whose combined legislative power is great, to the disadvantage of Massachusetts.

I have opposed Federal aid programs which I believed were going too much into local problems to the disadvantage of Massachusetts. I have taken the floor in debate to oppose the "formula for distribution" of Federal aid when I felt it was unfairly weighted with factors which resulted in discriminatory treatment of Massachusetts. This must be a constant battle.

Some of the problems affecting Massachusetts must also be handled on the administrative level rather than through legislation. Many times the entire Massachusetts delegation, Democrats and Republicans, have taken action in support of procedures which will be helpful to Massachusetts. I have joined wholeheartedly in these efforts, and have also personally taken up these problems with the departments concerned.

The problems to which I refer relate to such matters as: Tariff protection of Massachusetts industries; protection of small business, which is of particular importance in Massachusetts; freight rates which are discriminatory against the port of Boston; the allocation of Federal sugar purchases which can be unfavorable to the local candy industry and other Massachusetts consumers by forcing them to purchase less advantageously from the Chicago market largely fed by beet sugar than they could purchase from local refineries handling cane sugar imported by sea; limitations on imports of residual oil, which hurt our area.

VOTING RECORD

Believing that most people would be interested in key votes on important legislation, I am including here my record on certain votes picked by the New York Times as the key rollcall votes of the 86th Congress. The New York Times picked 11 such votes before the House in 1959, at the 1st session of the present 86th Congress, and 9 before the House in 1960 during the 2d session. Here they are:

NEW YORK TIMES KEY ROLLCALL VOTES, 1959

(The first paragraph after each number was copied from the New York Times. The further description of the issues was compiled by Congressman CURTIS.)

1. Hawaii statehood:

March 12, 1959: Passage of bill. Passed: Yea, 323; nay, 89. Democrats: Yea, 203; nay, 65. Republicans: Yea, 120; nay, 24.

CURTIS voted for Hawaiian statehood.

2. Airport construction:

March 19, 1959: Passage of first House bill. Passed: Yea, 272; nay, 134. Democrats: Yea, 242; nay, 25. Republicans: Yea, 30; nay, 109.

This bill provided Federal aid for airport construction in amounts opposed by the President as excessive. CURTIS voted against it.

The amounts were subsequently greatly reduced by a committee on conference between the two branches, and the bill was enacted

and signed by the President. CURTIS at that time voted for it.

3. Rural Electrification Administration:

April 30, 1959: Passage of bill over President's veto (two-thirds vote required). Failed to pass: Yea, 280; nay, 146. Democrats: Yea, 274; nay, 4. Republicans: Yea, 6; nay, 142.

This bill sought to strip the Secretary of Agriculture of important controls over the Rural Electrification Administration. It was vetoed by the President. CURTIS voted to sustain the veto.

4. Tennessee Valley Authority bonds:

May 7, 1959: Passage of bill. Passed: Yea, 245; nay, 170. Democrats: Yea, 238; nay, 31. Republicans: Yea, 7; nay, 139.

This bill provided for further expansion of the public power facilities of the Tennessee Valley Authority by permitting self-financing by TVA. It was opposed on the ground that the bill provided insufficient Federal financial and budgetary control. CURTIS voted against the bill.

Subsequently the bill was improved by Senate amendments, was enacted and signed by the President.

5. Wheat program:

June 18, 1959: Adoption of conference report. Rejected: Yea, 202; nay, 214. Democrats: Yea, 195; nay, 71. Republicans: Yea, 7, nay, 143.

This bill was opposed on the ground that it would intensify rather than improve the problem of surplus wheat. It was later vetoed by the President. He said: "The proposed return to the discredited high rigid price supports would hasten the complete collapse of the entire wheat program." CURTIS voted against adoption of the conference report, which was in effect a vote against the bill.

6. Foreign aid authorization:

June 18, 1959: Passage of bill. Passed: Yea, 271; nay, 142. Democrats: Yea, 182; nay, 83. Republicans: Yea, 89; nay, 59.

This was the mutual security (foreign aid) authorization bill. It made moderate cuts in the amounts requested by the President. It was opposed mainly by those desiring deeper cuts. CURTIS voted for it.

7. Housing:

June 23, 1959: Adoption of conference report. Adopted: Yea, 241; nay, 177. Democrats: Yea, 222; nay, 51. Republicans: Yea, 19; nay, 126.

This was the first of three housing bills. It was opposed by the President as excessive in many respects, and was later vetoed. CURTIS voted against the adoption of the conference report, which was in effect a vote against the bill.

Subsequently, a second bill, also regarded by the President as excessive, was passed and vetoed. Finally, a bill more in line with Presidential policy was passed and became law, and CURTIS then voted for it.

8. Federal-State law conflict:

June 24, 1959: Passage of bill. Passed: Yea, 225; nay, 192. Democrats: Yea, 111; nay, 162. Republicans: Yea, 114; nay, 30.

This was the so-called States rights bill, H.R. 3, relating to preemption. It sought to limit the Supreme Court in its interpretation of Federal statutes in relation to possible conflicts with State statutes. It was opposed mainly on account of its retroactive effect, being applicable to past as well as future statutes, which opponents claimed would unsettle past decisions and require relitigation. CURTIS voted against the bill. It was not acted upon by the Senate.

9. Labor bill:

August 13, 1959: LANDRUM, Democrat, of Georgia, and GRIFFIN, Republican, of Michigan, amendment to substitute for the committee bill the language of their bill, containing curbs on secondary boycotts and organization and recognition picketing, and giving the States power to handle "no man's land" labor disputes. Agreed to: Yea, 229; nay, 201. Democrats: Yea, 95; nay, 184. Republicans: Yea, 134; nay, 17.

This was the crucial House vote on the labor reform bill which subsequently became law. It was to substitute the stiffer Landrum-Griffin bill for the bill which had been reported by the House committee. Substitution prevailed. The bill as so amended was passed by the House. After slight modifications by a committee on conference between the branches, it was enacted and signed by the President. CURTIS voted for substitution.

10. Public works appropriation:

September 2, 1959. Passage of the bill over the President's veto (two-thirds majority required). Failed to pass: Yea, 274; nay, 138. Democrats: Yea, 263, nay, 6. Republicans: Yea, 11; nay, 132.

This was the first "pork barrel" bill, providing money for hundreds of rivers and harbors improvements, flood control, reclamation and power projects all over the country. It was vetoed by the President as excessive, principally on account of 67 unbudgeted new starts, which would have involved large future commitments. CURTIS voted to sustain the veto.

11. Public works appropriation:

(Second bill.) September 10, 1959: Passage of the bill over the President's veto (two-thirds majority required). Passed: Yea, 280; nay, 121. Democrats: Yea, 260; nay, 5. Republicans: Yea, 20; nay, 116.

This was the second "pork barrel" bill, passed with little change after the first one was vetoed. It still contained the 67 unbudgeted new starts. The President again vetoed it, but it was passed over the President's veto. CURTIS voted to sustain the veto.

NEW YORK TIMES' KEY ROLLCALL VOTES, 1960

1. Water pollution veto:

February 25, 1960: Motion to pass, over the President's veto, amendments to the Water Pollution Control Act raising Federal grants to the States for sewage plant construction to $90 million a year. Two-thirds majority, or 271 votes, required for passage. Rejected: Yea, 249; nay, 157. Democrats: Yea, 234; nay, 27. Republicans: Yea, 15; nay, 130. CURTIS voted nay. I favored the President's more moderate approach.

2. Civil rights:

March 24, 1960: Motion to pass the Civil Rights Act of 1960, making obstruction of integration in the schools a crime and providing Federal referees in voter-registration disputes. Passed: Yea, 311; nay, 109. Democrats: Yea, 179, nay, 94. Republicans: Yea, 132; nay, 15. CURTIS voted yea.

3. Aid to schools, Powell amendment:

May 26, 1960: POWELL, Democrat, of New York, amendment to the School Construction Act of 1960 barring Federal funds to segregated school systems. Passed: Yea, 218; nay, 181. Democrats: Yea, 100; nay, 160. Republicans: Yea, 118; nay, 21. CURTIS voted yea. I did not want money of Massachusetts taxpayers to be spent on segregated schools.

4. Aid to schools, passage:

May 26, 1960: Passage of school bill as amended, authorizing $325 million a year for 4 years for school construction. Passed: Yea, 206; nay, 189. Democrats: Yea, 162; nay, 97. Republicans: Yea, 44; nay, 92. CURTIS voted yea.

5. Foreign aid:

June 17, 1960: TABER, Republican, of New York, amendment to mutual security appropriation, 1961, restoring $200 million of a $400 million cut in the President's foreign aid requests. Passed: Yea, 212; nay, 173. Democrats: Yea, 15; nay, 138. Republicans: Yea, 107; nay, 34. CURTIS voted yea.

6. Health care for aged:

June 23, 1960: Omnibus social security bill providing increased benefits under existing programs and authorizing Federal grants for medical care programs that may or may not be established by the States for needy persons 65 years of age and over. Passed: Yea, 381; nay, 23. Democrats: Yea, 244; nay, 16. Republicans: Yea, 137; nay, 7. CURTIS voted yea.

7. Wheat:

June 23, 1960: Farm Surplus Reduction Act of 1960, raising price supports and reducing acreage. Rejected: Yea, 171; nay, 236. Democrats: Yea, 162; nay, 100. Republicans: Yea, 9; nay, 136. CURTIS voted nay.

8. Minimum wage:

June 30, 1960: KITCHIN, Democrat, of North Carolina, substitute for committee amendments to Fair Labor Standards Act, reducing increase in minimum wage from $1.25 to $1.15 an hour and limiting extension of coverage. Passed: Yea, 211; nay, 203. Democrats: Yea, 90; nay, 176. Republicans: Yea, 121; nay, 27. CURTIS voted yea.

9. Pay raise veto:

July 1, 1960. Motion to pass Postal and Federal Employees' Salary Increase Act of 1960 over the President's veto. Two-thirds majority required for passage. Passed: Yea, 345; nay, 69. Democrats: Yea, 256; nay, 13. Republicans: Yea, 89; nay, 56. CURTIS voted nay.

CURTIS' FIGHT TO PROTECT MASSACHUSETTS AGENCIES FROM UNWARRANTED FEDERAL INTERFERENCE

The fight for home rule and against unwarranted Federal interference must be a continuous one. Government should be kept close to the people, and local control of local matters is a cornerstone of American democracy. Federal power has a tendency to feed on itself. The danger of overcentralization of governmental powers in Washington needs continual watching.

In support of these principles, I filed a bill to protect an agency formed under an interstate compact, to which Massachusetts was a party, from unwarranted Federal interference.

This interference was threatened because Congress had insisted on its right to investigate the Port of New York Authority, an agency formed under an interstate compact, and the principle relied upon was broad enough to pose a threat to other agencies.

In the New York case the right of investigation was challenged by Governor Rockefeller, of New York, and by Governor Meyner, of New Jersey, and by the Port of New York Authority itself. Three officials of that authority who refused to produce certain documents were cited for contempt of Congress.

The New England Interstate Water Pollution Control Commission informed me that it felt that the assertion of Federal power in the New York case presented a threat to that commission. I filed a bill to protect that commission from unwarranted Federal interference.

In the New York case, the claim that Congress had the right to investigate was based on the requirement of the Constitution that States shall not enter into interstate compacts without congressional consent. My bill seeks to make it clear that the consent heretofore given to the New England Interstate Water Pollution Control Compact shall not carry with it any right of the Congress to investigate or regulate the acts of the commission formed under that compact.

This bill raises an important question of Federal-State relations. The main purpose of interstate compacts is to find a way of avoiding the constant growth

and concentration of Federal power, and to make provision for the States to assume responsibilities and act effectively in matters of local concern as to which State cooperation was desirable. This purpose is prejudiced, if not defeated, by the claim that the Congress has the right to investigate and regulate the activities of agencies formed under interstate compacts.

While my bill was filed too late for action in the last session, it brought this problem to public attention and has received much favorable comment.

OTHER CURTIS BILLS

It is the practice of some Congressmen to file many bills. These are often repetitions of other bills already before the Congress on subjects of popular interest. I have not followed that practice, but have limited my bills to matters of special interest to the district, or to matters which I felt were otherwise insufficiently covered.

Among Curtis bills of general interest, the objectives of which were favorably acted upon, were the following:

To reduce from 65 to 62 the age at which a single woman can qualify for admission to a low-rent housing project and the age at which a woman can qualify her family for admission to a project designed specifically for elderly families. This provision was included in the Housing Act of 1959.

To control bombings, usually manifestations of racial discrimination. This objective was included in the 1960 Civil Rights Act.

A House resolution honoring and congratulating Arthur Fiedler on his 30th anniversary as conductor of the Boston Pops Orchestra. It was passed by the House, no Senate action necessary.

To increase social security earnings limitations to $2,400 per annum. This was included in greatly reduced form in the Social Security Amendments of 1960.

A resolution to express indignation of Congress with the desecration of places of worship. This objective was partly included in the bombing provisions of the Civil Rights Act of 1960.

PRIVATE BILLS

During the 86th Congress in 1959 and 1960, I filed 15 private bills. These relate to individual problems and seek special legislation regarding immigration matters or private claims against the Government or by the Government against the individual. They usually seek an exception to some law or regulation which would create hardship if literally applied.

These are difficult bills on which to secure favorable action, but the action on the Curtis bills was gratifying:

Five of the Curtis bills were enacted;

One was passed by the House but not by the Senate;

The objective of one was accomplished by administrative action;

Several were filed too late for action by the 86th Congress and will be brought up again next year.

This was an unusually favorable batting average for this type of legislation.

OTHER ACTIVITIES

I believe that one of my major duties is to see to it that constituents are fairly treated in all their dealings with the Federal Government. I have maintained offices open the year around in both Boston and Washington for every possible service to constituents. I have conducted periodic meetings with constituents in every section of the district.

My newsletter published in the local press seeks to keep people in touch with matters of interest in Washington and report on my activities. I write these letters myself, and do the necessary research myself.

CONCLUSION

In closing this report, I express my appreciation to the people of the 10th District for the honor and privilege of representing them in the Congress of the United States.

Congressman Joseph E. Karth Reports to the Citizens of Ramsey County

EXTENSION OF REMARKS

OF

HON. JOSEPH E. KARTH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. KARTH. Mr. Speaker, at this the close of the 86th Congress, I feel it my duty to review the events, the achievements and, yes, the failures which have marked the last 2 years.

Our district, Mr. Speaker, with 422,000 people is one of the largest in Minnesota. I am proud to serve my friends and neighbors as their Congressman and to report to them.

ST. PAUL—SOUTH ST. PAUL FLOODWALL

I was particularly gratified to have had an important part in winning for our district the first appropriation amounting to $500,000 for construction of the long dreamed of and planned floodwall project along the west bank of the Mississippi. Approval of these funds by Congress has already set into motion multi-million-dollar plans for an industrial park and redevelopment which will mean new jobs and business for an important area of our district which has too long been held back from realizing its potential and too long had to put up with human misery and great financial loss.

I will continue to press for additional funds for this important project until it is finished.

ACTIVITIES IN SCIENCE AND ASTRONAUTICS COMMITTEE

When committee assignments were made I received an appointment to the new Committee on Science and Astronautics of the House which has in its legislative jurisdiction outer space, including exploration and control thereof, science scholarship, scientific research and development, and astronautical research and development—including resources, personnel, equipment, and facilities.

The committee also has legislative jurisdiction over these Government agencies: Bureau of Standards, National Aeronautics and Space Administration, the National Aeronautics and Space Council, and the National Science Foundation.

During this Congress the committee conducted 27 investigations covering topics ranging from the exploration of the bottom of the sea to Army plans for construction on the moon. Extensive hearings involving untold hours of testimony were held on 17 different subjects ranging from a broad review of the Nation's space program to that of research on mechanical translation. This committee's importance is well recognized since Congressman McCORMACK, Democratic leader, and Congressman MARTIN, a high-ranking Republican, serve on it as their only committee assignment.

INTERNATIONAL SITUATION

A strong America—strong in defense, strong in industry, strong in moral purpose, and strong in friends through the world—is the only guarantee to peace.

In 1952 we had all of these, but since then a failure in administration leadership has caused our country to suffer diplomatic defeats in Japan, Indochina, Egypt, and the Near East, Hungary, South America, Cuba, and now in the Congo.

The bookkeepers in the Budget Bureau now dictate our global defense strategy and the weapons which are to be built.

While the Constitution severely limits the actions of Congress in international relations, we have given the Chief Executive everything he has asked, and more, in maintaining our defense. But while the Congress appropriates funds to defend America the Executive can and does "freeze" them, and our overall strength is lessened.

The Congress, too, has supported substantially the requests for foreign economic and military assistance, although with many misgivings that too much of the money will be badly spent in poorly planned projects and in supporting discredited and even corrupt foreign governments.

Most Ramsey County citizens would, I am sure, consent to spend such funds as Americans can reasonably afford in preserving the peace with honor.

I hope, too, that the next administration will give serious consideration to such legislative proposals as mine to establish within the Government a permanent National Peace Agency of top experts devoted to researching the conditions of permanent and honorable peace and to the means of achieving them.

RESPONSIBILITY IN GOVERNMENT FINANCES

It has become a regular practice now for the administration to accuse Congress of fiscal irresponsibility in many instances where Congress has disagreed on programs involving expenditures.

The RECORD should show that during this last session of Congress the administration asked for about $73,846 million to run the executive department but the Congress finally reduced this staggering sum by $212 million. For the two sessions of Congress (1959 and 1960) the Congress cut the administration budget requests by well over $2 billion.

Let the RECORD also show who the spenders are: This administration's first budget totaled $57 billion; its last, $84 billion—or $27 billion more. When the administration took over, the public debt amounted to $266.1 billion; when it leaves the debt will be about $286.3 billion, or $20.2 billion higher than when it took office.

Let the RECORD also show that on this debt the present administration will be paying this year $13 billion more in interest than the last year of the previous administration.

I think the RECORD should show that because of this high interest rate policy, the purchasing power of the dollar has fallen by 10 percent during the past 7½ years.

AMERICA'S FAILURE TO GROW

The administration's tight money-high interest policies have stunted the economic growth so that in midyear 1960 the employment and business growth outlook of our country is not good. Steel mills are producing at half their capacity and about a fifth of the Nation's production machinery is idle. Over 5 percent of the labor force continues to be unemployed while millions of other workers have only part-time jobs.

LABOR

Under the pretext of driving crooks and racketeers from the country's labor movement, conservatives in both parties managed to pass the Landrum-Griffin law which more than ever handicaps legitimate and decent trade unions and puts them over all sorts of legal hurdles.

The rank and file of labor continued to suffer from the hostility of the administration in their efforts to soften the effects of the Taft-Hartley law in regard to picketing and the open invitation to unscrupulous employers to move to low-wage, right-to-work States. Every worker and employer in my district should be vitally concerned with this problem of lost jobs and lost industry.

Fair Labor Standards Act amendments which were introduced to raise the Federal minimum wage and to extend coverage to millions of workers not now included, were defeated in the conference committee.

RAILROAD WORKERS

Benefits for railroad workers and their families were improved under the Railroad Retirement Act and the Railroad Unemployment Compensation Act.

GOVERNMENT WORKERS

Congress responded to the desperate need of postal workers and classified Government employees for improvements in wages by passing a law increasing their income by 8.4 percent for postal workers and 7½ percent for others.

OLD-AGE HEALTH CARE

The big issue of the 86th Congress was the controversy over the establishment of a Government program to finance the cost of health care for aged persons—16 million of whom are now 65 years and over.

Several approaches were proposed. One, as part of the social security system which would provide hospital benefits to the aged and involve a slight increase in social security tax; the second would give subsidies to private insurance companies and be paid out of regular Federal taxes; and the third method called for a joint State and Federal program covering only the aged who demonstrate that they cannot afford medical care—this would be financed out of regular State and Federal taxes.

The last of these was finally adopted with many misgivings on the part of those who sincerely want not a political issue but actual, adequate care for sick, old people.

SOCIAL SECURITY

Included in the omnibus bill to amend the social security law was:

An important amendment which eliminates altogether the 50-year age requirement for disability benefits—now a person is covered whenever he becomes totally disabled. Another provision which in effect lifts the income limitation on outside earnings of social security recipients from $1,200 a year to about $1,350.

EDUCATION

Assistance for America's schoolchildren became a political casualty when school construction legislation was bottled up in the rock-ribbed conservative House Rules Committee which ordinarily tells the House what legislation can be considered. A bill giving assistance to our short-changed schools passed the Senate earlier.

SMALL BUSINESS

The 86th Congress closed gaps in legislation to protect small business from illegal price discrimination and make it possible to compete against large companies.

A bill was passed allowing small business wholesalers of gasoline to pay the excise tax on gasoline actually sold by them. Previously these wholesalers had to pay a tax on all the gasoline he bought and as a result was penalized when he lost gasoline through spillage and evaporation.

Congress again showed its willingness to help small business by increasing the lending authority of the Small Business Administration first, from $500 million to $575 million and then again by another $150 million. We also voted changes to make it easier for small businesses to obtain long-term equity capital.

CIVIL RIGHTS

An important milestone was made in the last session in the progress of our Nation to achieving the full rights of citizenship for all our people. The 1960 legislation was drafted to help Negroes win voting rights in areas of the South which have long in the past completely disfranchised otherwise qualified citizens. I hope this act will be enforced with full vigor and dispatch.

THE VETO AND THREATS OF VETO

The Nation—and the people of Ramsey County—suffered from a negative government. The administration and the Republican leaders in Congress thwarted many legislative measures for building our Nation by the threat of the veto or sustaining a veto—making it necessary for the advocates of worthy programs to have over two-thirds of the votes of the Congress to prevail.

Some of the legislative programs which were lost to the country by veto or a threat of veto were:

First. An adequate Federal housing program: U.S. taxpayers receive, with interest, repayment of loans—public housing has never lost a dime.

Second. School construction program: There are few things more important to America than the education of its youth—Ramsey County would have profited from Democratic sponsored education bills.

Third. Realistic farm legislation: Present program costs have risen almost 500 percent at the same time farm units have decreased by 900,000 and farm income has decreased 24 percent.

Fourth. Distressed area program: Loans would be granted on a matching basis to areas which are permanently economically distressed and have high unemployment.

Fifth. An expanded water pollution program: Within a few years, unless we work at the problem, we will be without an adequate supply of safe, fresh water for our growing population.

Sixth. Effective old-age health care without the stigma of a pauper's oath: There are 16 million persons now over the age of 65—many of them in need of medical care which they cannot afford or get—unless they become charity cases.

It is my fervent hope that the next Congress working with a do-something administration will get our country off the dead center of inaction and stagnation so that we again can assume the leadership that the world has so long expected of us as a people.

Congressman Porter's Report to His Constituents

EXTENSION OF REMARKS

OF

HON. CHARLES O. PORTER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PORTER. Mr. Speaker, as I approach the end of four sessions as the U.S. Representative from the Fourth District of Oregon, I am impressed with how swiftly time passes. These have been busy years. I have done my best to keep my constituents informed about my activities and views but I know that many of them appreciate a summary report at the end of a congressional session.

This is my summary report for the 86th Congress. It cannot be complete because there were too many votes, too many activities and too many opinions to include. If any constituent of mine desires further information about any aspect of my work as his Representative, I ask him or her please to write or to call me at Eugene.

Following these remarks is a record of my votes on the major issues that were

presented to the 86th Congress during the last 2 years.

This summary is divided into three parts: First, I shall discuss some of my achievements directly for the people of the Fourth Congressional District. Then I shall list my position with respect to major national legislation. Finally, I shall deal with my efforts to improve our chances of maintaining peace with freedom in this troubled, perilous world.

FOURTH DISTRICT ACHIEVEMENTS

I have continued my practice of being readily available to my constituents by mail, telephone, or in person. During the sessions of the 86th Congress I returned home nine times. I maintain year-round offices in both Eugene and Medford. I often hold office hours, publicized in advance, in towns and cities throughout my district.

I make a special point of being available because I believe this is the first duty of a Member of Congress. My top three staff members have been with me in Washington ever since my election in 1956. We pride ourselves on the service we give to constituents. We have learned a lot in 4 years. We know we still have lots to learn.

We are ready, willing and able to help constituents who have problems involving any Federal agency or policy. We have helped thousands. Our mail from Oregon amounts, on the average, to about 75 letters daily. We often receive more than 100.

The Fourth District is growing. The 1950 census total for our seven counties was 368,007. The recently announced 1960 census total was 461,865. This most recent population countdown incorporated the most advanced of scientific know-how with hard work by enumerators. I serve as ranking Democratic member of the Census Subcommittee of the Post Office and Civil Service Committee.

I value the opinions of my constituents. In 1959 I sent a questionnaire to 10,500 constituents and this year I sent one to 131,000. I also mailed special inquiries to interested parties with respect to the proposed Oregon Dunes park and the proposed Agate Dam.

In deciding how to use his time and how to vote, a Member of Congress has to make up his own mind. He does this best when he has considered the relevant facts and the various opinions. I deeply appreciate the help I have received from many of my constituents.

FOURTH DISTRICT: PUBLIC PROJECTS

My biggest accomplishment during the 2 years of the 86th Congress was the new construction start on the Green Peter Dam project in Linn County. The appropriation for fiscal 1961 was $1.4 million. The total cost will be $64 million, making it the largest of all the Corps of Engineers new construction starts this year.

Green Peter has been ready for construction for 3 years but this was the first year the administration included any money in its budget. I enlisted the aid of both Congressman NORBLAD and Governor Hatfield. We needed all the bipartisan firepower we could mobilize.

At the other end of the district we made continued progress on the planning of the Rogue Basin flood control project. Community support is strong and enthusiastic. Now we have reason to hope that the temperature and flow studies of the Fish and Wildlife Service soon will demonstrate the feasibility of a high dam at Lost Creek on the Rogue River.

You know that our primary industry is the processing of logs. When lumber sales plummet, Fourth District families suffer—as many are suffering now because new housing starts were down 17 percent for the first 8 months of this year as compared to the same period last year.

People need homes now more than ever. We are a growing Nation. The problem is money. That is why I worked very hard for additional funds for Federal Housing Administration loan guarantees and for more liberal terms. My bill to add a billion dollars for small FHA loans passed the House but died in the Senate under the certain threat of a White House veto.

We did extend the college housing loan program by increasing it by $500 million. We extended the home repair improvement loan program and we increased the community facilities loans by $50 million.

In the interests of space and saving your time, let me list briefly several other accomplishments that I am proud to claim:

Established Federal timber policies conferences at University of Oregon as annual event. Third conference will be held there November 10, 1960.

Promoted Selma-Gold Beach Road by organizing horseback expedition over route both in 1959 and in 1960 to speed utilization of tremendous timber, recreational, and mineral resources in that area.

Investigated thoroughly and drafted bill for Oregon Dunes National Seashore Park in the Florence-Reedsport area. This park will mean millions of dollars additional income for Oregonians as well as the development and preservation of a uniquely beautiful portion of this ever more crowded planet.

Intervened to preserve historical Bandon Lighthouse.

Arranged for water level to remain high for recreational purposes in Fern Ridge Lake an additional month—September 1960.

Promoted legislation through House to extend penalties on transporters of explosives to help prevent another Roseburg disaster.

Speeded approval of Willakenzie watershed plan; worked with Agriculture Committee to secure House hearing and approval.

Secured additional $300,000 for work on Forest Service, South Bank Road to Agness.

Helped secure additional access road funds.

Introduced and advanced shoe labeling bill to protect consumers. This legislation is advocated by constituent Wilbur Gardner of Medford. Was promised full hearings next year. We already have fabric and fur labeling laws. Sparked current Federal Trade Commission study of shoemaking practices.

Testified more than 50 times before congressional committees on Fourth District problems and projects such as: Timber management, Camp White, water pollution control, library services act, Federal aid to education, housing, funds for public works projects, mining, abolishing age discrimination in hiring, freight car distribution.

PORTER ON NATIONAL ISSUES

I have already mentioned housing. No legislation is more vital to the Fourth District economy. None is more necessary to counter the high interest, tight-money policies of this Republican administration.

I spent a lot of my time trying to find ways to head off vetoes and the opposition of the Dixicrat-Republican coalition. The needs of our people over the Nation will, I predict, force legislation which will mean that we will hear no more about the alleged overcapacity of our plywood and lumber mills. All their capacity is needed for the production of the lumber that the Nation needs for the building and repair of suitable homes.

MEDICAL CARE AND SOCIAL SECURITY

Medical care for the aged was a big issue in the 86th Congress. The bill amending the social security laws came to the floor of the House under a closed rule; that is, no amendments could be offered. We had expected that the Forand bill, or something like it, would be substituted by the Senate and that we would have a chance to vote on it later in the House.

It turned out that the Senate failed by a narrow margin to pass this needed legislation. The issue is not dead. The legislation enacted is plainly too cumbersome. Each of the 50 States must set up a particular plan and the Federal funds are available to States only on a matching basis. Very few of the States are expected to be in a position financially to take advantage of this program.

The money coming from the Federal Government must come directly from the Treasury, not from the social security trust fund. The Federal law clearly implies that under the new plan some type of income and resource test will be applied by the State.

It would be far better to enact a medical care plan within the well proved social security system. This plan would be self-financed. The recipients would not have to declare themselves paupers in order to be eligible for help.

I predict that such a plan will be enacted during the 87th Congress and, if I am returned, I shall continue to press for its adoption.

I supported and Congress did eliminate the minimum age requirement for persons receiving disability insurance. And the restrictions on the amount of outside earnings for a person receiving social security were improved and clarified so a person does not lose money by working. Under the old law, anyone earning more than $1,200 lost an entire month's benefits for each $80 or fraction thereof above $1,200. Now on earnings

between $1,200 and $1,500, he loses only $1 for each $2 earned. Over $1,500 the ratio is 1 to 1.

AID TO EDUCATION

One out of four of our children has to attend an overcrowded or poorly staffed school. States and localities do not have the funds necessary for adequate facilities. Both parties approved Federal aid to education, in varying degrees, but the Dixiecrat-Republican coalition blocked enactment.

All of the Republican members and three-quarters of the Democratic members of the Rules Committee voted to keep the House from considering Federal aid to education legislation. We shall have to make changes in the Rules Committee early in the next session. This is not the only legislation that this committee has blocked from consideration by the whole House. Its power is too arbitrary, too uncontrolled, too irresponsible. Many House Members are determined to clip this committee's wings.

Other items of legislation on which I acted:

Helped secure health benefits for retired Federal employees.

Helped secure reemployment rights for Federal employees accepting positions overseas.

Supported revisions in Labor-Management Act of 1959.

Supported common situs picketing.

Supported criminal penalties for political preference with respect to applicants for Government jobs.

Helped secure pay increase for Federal employees.

Supported aid to depressed areas.

Supported revisions of draft law.

Helped secure statehood for Alaska and Hawaii.

PURSUIT OF PEACE

Man is a pretty smart animal. He learned the secret of the atom, of electronic directional systems and of rocket power. He put them all together and made intercontinental missiles, weapons of incredible range, accuracy and power. Every day he improves these weapons. The decision time gets shorter and shorter. And many other nations get closer and closer to the possession of such weapons.

Man is also a pretty dumb animal at times. He gets drunk, he misunderstands communications, he blows his top, he panics, and he does many other strange and unexpected things that prove he is a human being, error-prone and quite imperfect in many respects.

Put these lethal weapons in the hands of man—nobody else is available—and what have you got? A serious situation, to say the least. Even if you discount the dangers of an intentional war, because the parties—at least right now—must realize that no one could win this kind of a struggle, you still have the very present danger of war by accident or miscalculation.

The arms race continues. It is not only more dangerous every day but tremendously more expensive. We are spending $45 billion on arms this year alone, more than half our budget. I voted for these expenditures, sometimes very reluctantly. I figured that I would err, if at all, on the side of strength until we worked out some way to disarm with proper safeguards.

Our Department of State has spent less than $800,000 on disarmament in the last 8 years. The whole executive branch of our Government, which has issued many solemn statements about the crucial importance of disarmament has fewer than 40 full-time staff members working on disarmament.

The new U.S. Disarmament Agency, which I helped to force into being by my inquiries about the extent of the administration's efforts, will only employ at most another 80 persons.

WE MUST MOBILIZE OUR INTELLECTUAL AND SPIRITUAL FORCES

We are doing far too little to mobilize our intellectual and spiritual forces in the search for a feasible method of turning back from the arms race. This is why I have participated in the work of the World Parliament Association and of the East-West Roundtable Disarmament Conference. This is why I have journeyed to London, Paris, and Stockholm to discuss these vital problems with legislative leaders of other nations.

This is why, with Senator JOE CLARK, of Pennsylvania, I started an organization of more than 50 Members of Congress, called Members of Congress for World Peace Through Rule of Law. This is why I have been organizing a convention of 500 legislative leaders from all over the world in Washington, D.C., at the end of next May.

It is my belief that too many people, including many leaders of many nations, including our own, underestimate the danger of the arms race. I believe that we are smart enough to figure out a way to survive our terrible and expensive weapons, but I believe we must act quickly and with great determination.

Disarmament is a must. That is one major belief that I have sought to promote as your Congressman. Of course I mean disarmament with appropriate safeguards. Honest disarmament is not easily attained but it is a goal we must seek with all our might. Plainly we do not have much time.

Disarmament, dictators and China are the major categories for my foreign policy actions during the last 2 years. The disappearance of Gerry Murphy, my Eugene constituent, in the Dominican Republic when I first entered Congress early in 1957 led me to deplore publicly and repeatedly this administration's coddling of dictators.

Now, very recently, this administration has publicly condemned Trujillo and we have broken off relations with his government. We have embarked on a Marshall-plan size aid plan for Latin America. We are in trouble there and elsewhere.

Too long we have treated as our friends any government, no matter how cruel and corrupt, just so long as it pretended to be on our side against international communism. We did this with Batista of Cuba. Our Ambassadors fawned on him. We sent him guns, bombs, and warplanes which he used against his own people.

WE REAP WHAT WE SOW

Now we are reaping what we have sown. I tried to help persuade Castro to keep his early pledges of free elections and individual rights. When he broke these pledges, I broke with him. His revolution continues, Red-tinged and violently anti-Uncle Sam primarily because of misguided policies that were not in keeping with our deepest traditions.

If I am returned to Congress I shall continue to do what I can to promote a moral foreign policy. We should indeed give the formal handshake to dictators and the warm embrace to democratic leaders.

This brings me to my last point: That we must increase communication with China, and of course I mean no more than a formal handshake for this cruel and despotic government. We should exchange newsmen and other nonofficial citizens as a beginning. We should enter a period of exploration and negotiation prior to any possible normalization of relationships.

Unless we increase communications with China we face great danger from possible rash acts which we might be able to avert. Equally important, we must have the participation of China in any disarmament treaty because there is no other way to put international inspection stations inside the borders of China.

Certainly we will not stop nuclear tests or otherwise reduce our military strength if China is free to do anything she likes within her borders.

Negotiation is difficult, frustrating, and often infuriating—but what is the alternative today? Instead of talking about breaking off relationships entirely, as Senator BARRY GOLDWATER does, or about getting rough, as others do, we would do better to mobilize our intellectual and spiritual resources squarely and massively to meet the challenge of maintaining peace with freedom in this precarious world.

During the 86th Congress I traveled to Europe, South America, and the Far East in search of knowledge and insights as to how I, a Member of Congress from the Fourth District of Oregon, could help.

When I was first elected to Congress in 1956 I promised my constituents that I would spend at least one-third of my time doing whatever I could, however little, for peace. I have tried to keep that promise. I have tried, not only because I know that my constituents want me to try, but because of the memory of my friends who died in World War II. I want my children and the children of others to have a world of peace and freedom and opportunity beyond that of which we have dreamed.

CONCLUSION

It is a great honor and privilege to represent my friends and neighbors in Congress. I deeply appreciate this chance to serve. The office has great powers and great responsibilities. I do not claim a perfect, or even a near-perfect record of performance. I do claim that I have done my best.

Key votes, 1st sess., 86th Cong.

Date 1959	Measure	Vote
Feb. 4	H.R. 2256, provide more funds for direct loans, remove certain requirements with respect to rate of interest on guaranteed loans. (Passed 310 to 89.)	Yes.
Feb. 5	H.R. 2260, extend as is until July 1, 1963, Universal Military Training and Service Act. (Passed 381 to 20.)	No.
Mar. 12	S. 50, Hawaiian statehood. (Passed 323 to 89)	Yes.
Apr. 15	H.R. 1321, to amend Reorganization Plan 2 to transfer from Secretary of Agriculture to REA authority of approving or rejecting rural electrification loans. (Passed 254 to 131.)	Yes.
Apr. 30	S. 144, to override President Eisenhower's veto of REA bill. (Defeated 280 to 146; ⅔ majority needed.)	Yes.
May 21	S. 57, on final passage of Housing Act of 1959. (Passed 261 to 160)	Yes.
June 9	H.R. 3610, on passage of Water Pollution Control Act authorizing increase in grants for construction of sewage treatment works; to establish the Office of Water Pollution Control; and for other purposes. (Passed 255 to 143.)	Yes.
	H.R. 7590 on final passage of public works appropriations bill. (Passed 381 to 20.)	Yes.
June 23	S. 57, Housing Act of 1959 conference report. (Passed 241 to 177)	Yes.
July 7	H.R. 4957 to amend United States Code to provide for admission of certain evidence and confessions. (Passed 262 to 138.)	No.
July 27	H.R. 7072 to provide for U.S. participation in the Inter-American Development Bank. (Passed 233 to 87.)	Yes.
Aug. 13	H.R. 8342, to adopt Landrum-Griffin amendment (H.R. 8400) to replace language of House committee bill. (Passed 229 to 201.)	No.
Aug. 14	H.R. 8342, to recommit Landrum-Griffin bill to committee. (Failed 149 to 279.)	Yes.
Aug. 14	H.R. 8342 on passage of Landrum-Griffin bill. (Passed 303 to 125)	No.
Aug. 20	H.R. 8609 on Sullivan food stamps amendment to the Agricultural Trade Development and Assistance Act of 1954. (Passed 232 to 127.)	Yes.
	On passage of H.R. 8609. (Passed 305 to 53)	Yes.
Aug. 27	S. 2539, to extend and amend laws relating to the provision and improvement of housing and the renewal of urban communities, and for other purposes. (Passed 283 to 106.)	Yes.
Sept. 2	H.R. 7509, to override President's veto of public works appropriation bill. (Failed 274 to 138.)	Yes.
Sept. 3	H.R. 8678, Federal Aid to Highway Act of 1959. (Passed 243 to 162)	Yes.
Sept. 4	S. 1555, to adopt conference report on Labor-Management and Disclosure Act of 1959. (Passed 352 to 52.)	Yes.
Sept. 8	H.R. 9105, fiscal appropriations for public works. (Passed 303 to 93)	Yes.
Sept. 10	H.R. 9105, to override President's veto of public works appropriations bill. (Passed 280 to 121.)	Yes.

Key votes, 2d sess., 86th Cong.

Date 1960	Measure	Vote
Feb. 25	H.R. 3610, to override the President's veto of bill to increase grants for construction of sewage treatment works. (Failed 249 to 157; ⅔ required.)	Yes.
Mar. 24	H.R. 8601, passage of Civil Rights Act. (Passed 311 to 109)	Yes.
Apr. 21	H. Res. 503, on final approval of conference report on civil rights bill. (Passed 288 to 95.)	Yes.
Apr. 27	H. Res. 498, adopt the open rule providing for 3 hours of debate on H.R. 10213 authorizing purchase by Treasury of $1,000,000,000 of FHA and VA mortgages, etc. (Passed 214 to 158.)	Yes.
Apr. 28	H.R. 10213, to recommit H.R. 10213. (Failed 139 to 235)	No.
Apr. 28	H.R. 10213 to amend National Housing Act, final passage. (Passed 214 to 163.)	Yes.
May 4	S. 722, area redevelopment (depressed areas). (Passed 202 to 184)	Yes.
May 18	H.R. 5, Foreign Investment Incentive Tax Act of 1960. (Passed 196 to 192.)	Yes.
May 25	H.R. 12326, public works appropriation bill. (Passed 388 to 18)	Yes.
May 26	H.R. 10128, to authorize Federal financial assistance to States for school construction. (Passed 206 to 189.)	Yes.
June 15	H.R. 9883, Federal employee's pay raise bill providing for 7½ percent increase. (Passed 378 to 40.)	Yes.
June 17	H.R. 12619, on passage of mutual security appropriations bill. (Passed 259 to 124.)	Yes.
June 23	H.R. 12580, on passage of Social Security Amendments of 1960. (Passed 381 to 23.)	Yes.
June 29	H.R. 7903, to amend United States Code to extend the veterans' guaranteed and direct loan program for 2 years. (Passed 398 to 1.)	Yes.
June 30	H.R. 12677, amend Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of interstate retail enterprises and to increase minimum wages under act to $1.15. (Passed 341 to 72.)	Yes.
July 1	H.R. 9883, override of President's veto of Federal employee's pay raise bill. (Passed 345 to 69.)	Yes.
Aug. 24	S.J. Res. 170, a joint resolution favoring a convention of delegates from Atlantic democracies looking to great cooperation and unity of purpose. (Passed 289 to 103.)	Yes.
Aug. 26	H.R. 12580, to adopt conference report on social security amendments, aged, medical care. (Passed 369 to 17.)	Yes.

Naval Shipyards and Facilities Must Be Maintained on a Fully Operational Basis

EXTENSION OF REMARKS

OF

HON. JAMES C. OLIVER

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. OLIVER. Mr. Speaker, in July of 1959, the Department of the Navy through its Bureau of Ships issued a series of instructions.

One of the instructions, namely, 4860.22, was designed to bring about the closing of shops in naval yards and facilities, such as foundries, forge shops, pattern shops, galvanizing and plating facilities, sail lofts, and gas manufacturing plants. The work performed by these facilities will be let out to private industry. Another instruction, No. 1223.40, was designed to eliminate apprenticeship programs in the shipyards and facilities. The effect of such directives, Mr. Speaker, may well dry up a very valuable source of highly skilled craftsmen whose skills the Navy must rely upon for its continued effectiveness.

Since the issuance of these orders, I have met with several of our colleagues who also have located within their congressional districts naval shipyards and facilities. It is our general feeling that these instructions would decrease the full functioning of existing facilities of our naval shipyards with a strong probability of serious detriment to our national security.

In the event, then, these recent instructions from the Navy Department may not be in the best interest of our national defense, I have cosponsored with several of my colleagues the following resolution which I again call to your attention:

Whereas all of our U.S. naval shipyards and facilities were developed, manned and operated so as to enable our Nation to more adequately meet the vital and continuing needs of our national defense; and

Whereas these U. S. naval shipyards and facilities with their tens of thousands of competent and highly skilled workers have ceaselessly demonstrated the vital role they play in the maintenance of our navy readiness both in peace and wartime by keeping our naval combat vessels in top fighting condition and by serving as a major source of our naval vessel construction, thus making it possible for our Navy to attain and maintain its proud record of effective service in our national interest; and

Whereas the Department of the Navy, through its Bureau of Ships has issued a series of instructions; namely, instructions 4860.22, 5450.94, 12156.16, 10290.25, 1223.40, 4850.10c, to the commanders of its naval shipyards and other Bureau of Ships facilities the effect of which is to decrease the full functioning of existing facilities of U.S. naval shipyards with probable detriment to the national security: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby expresses to the President of the United States its extreme concern and disapproval of these actions, and particularly its alarm at the pattern of these actions with consequential weakening and erosive effect on a major arm of our national defense, and urges the President to instruct the Secretary of Defense to take all necessary steps to insure that these U.S. naval shipyards and facilities be maintained on a fully manned operational basis and that they be assured of sufficient Navy and other Department of Defense work so as to fully utilize these installations and their manpower skills so essential to the preservation of active Navy readiness which is a prime component of our national defense posture.

Summary of the Record and Accomplishments of the Committee on Ways and Means During the 86th Congress

EXTENSION OF REMARKS

OF

HON. WILBUR D. MILLS

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MILLS. Mr. Speaker, the 86th Congress has witnessed a period of intensive activity and sound legislative accomplishment on the part of the Committee on Ways and Means. Legislation which is beneficial, meritorious, and fiscally sound has been reported by the

committee and enacted in all the major fields of the committee's jurisdiction. As Members of the House will recall, this jurisdiction is quite broad, since it covers legislation relating to, first, our Federal internal revenue laws; second, our Federal social security laws; third, customs and tariff laws and programs, including reciprocal trade agreements; fourth, measures relating to the management of the public debt; and, fifth, other important categories of legislation such as the Renegotiation Act, laws for the control of narcotics, legislation on the financing of the Federal-aid highway program, measures relating to the interest rate on Government obligations, and so forth.

It is clear that the nature of the measures falling within the jurisdiction of the Committee on Ways and Means is such that this committee must always proceed with the utmost caution, responsibility, and prudence. Laws on the subject of taxes, tariffs, social security, and fiscal matters generally personally affect the lives of every American citizen, and in all of these areas our committee must act with the highest degree of responsibility and statesmanship. On each of these subjects the committee must always bear in mind not only the immediate effect of proposals upon which it may take favorable action, but it must also consider most carefully the long-range effect and impact of the proposals in addition to the relationship which the precedent which it will set will bear to other proposals which may be made sometime in the future.

Before proceeding to summarize and discuss the accomplishments of the committee, I wish to take this opportunity and means of expressing publicly to the members of the Committee on Ways and Means my appreciation for the conscientious and diligent manner with which they have approached their heavy responsibilities on the committee. As will be demonstrated from the statistics which I shall subsequently set forth, the committee has applied itself diligently to the tasks before it in discharging its responsibilities to the Congress and to the American people. My colleagues on the committee have served ably and conscientiously, and during the course of the 86th Congress we have initiated and acted upon legislation which is meritorious and in the public interest. Members of the committee have not always agreed on all of the measures which have been reported by the committee, just as I have not always agreed with each and every such proposal, but this is the way the committee system operates and the results of our work during this session I am confident will stand the test of time.

As I have heretofore indicated, due to the importance and complexities of the legislative measures which come before the Committee on Ways and Means it is necessary for the committee to devote a great deal of time to a careful and full exploration of the issues involved and an evaluation of the ramifications which any given proposal may have on the economy of the Nation prior to taking action. In the very nature of things, therefore, legislation in the fields of taxes, tariffs, and social security must be approached with great caution and requires thoroughgoing and time-consuming preparation before results become apparent.

In addition to pursuing to enactment major and minor legislation in the areas of its jurisdiction, the Committee on Ways and Means has conducted public hearings touching upon most facets of its legislative responsibilities. The committee also established three subcommittees which have had particular responsibility to maintain continuous watchfulness over the administration of the laws within the jurisdiction of the committee by the administrative agencies concerned. Another major undertaking during this Congress was the initiation of a broad scale study of our entire Federal income tax system by the committee with a view toward consideration of the practical possibilities for constructive tax reform.

Before reviewing in detail legislation which was favorably reported by the committee during this Congress and which was enacted into law, it may be of interest to consider pertinent statistics which disclose the intensive activity on the part of the committee during the two sessions completed.

OVERALL STATISTICS OF COMMITTEE ACTIVITY

During the 86th Congress there were referred to the Committee on Ways and Means a total of 2,156 public bills and resolutions out of a total of 12,215 such bills and resolutions introduced in the House. The figures for this Congress are in accord with the pattern for the past several Congresses, since customarily the Committee on Ways and Means has referred to it one-fifth to one-sixth of all the public bills and resolutions introduced in the House. Of the total of 2,156 such bills and resolutions, there were 1,184 tax bills, 347 tariff bills, 525 social security bills, and some 100 bills relating to other facets of the committee's jurisdiction.

During the 86th Congress the committee favorably reported to the House of Representatives a total of 97 bills, which total breaks down as follows: 55 tax bills, 5 social security bills, 31 tariff bills, and 6 miscellaneous bills. It should be noted that one major bill which the committee orders reported will cover the subject encompassed in dozens of bills referred to it. Most of these measures which were reported by the committee to the House were passed by the House, the Senate, and were signed into law by the President.

It should be observed here that these statistics become more meaningful when it is realized that the customary method of operation of the Committee on Ways and Means is not to enact piecemeal legislation in the area of its principal responsibilities, but rather to report to the House omnibus bills following careful consideration in executive session of all of the individual pending measures on a given subject. For example, while the statistics reveal that the Ways and Means Committee reported five social security bills to the House of Representatives during this Congress, it should be understood that one of the five consisted of the social security amendments of 1960 which consisted of a bill of 261 pages covering an extremely broad variety of aspects of the subject of social security and it resulted from a careful consideration of the some 500 social security bills pending before the committee.

For the further information of the Members, I shall insert at this point a table—table I—which shows a breakdown of the measures referred to the committee, followed by another table—table II—setting forth statistics on the status of bills referred to the committee during this Congress:

TABLE I.—*Committee on Ways and Means, 86th Cong., 1st and 2d sess., Jan. 7, 1959, through Sept. 1, 1960*

Total number of bills introduced in House (public and private) through Sept. 1, 1960	13,304
Total number of House joint resolutions introduced in House (public and private)	808
Total number of House concurrent resolutions introduced in House (public and private)	747
Total number of House resolutions introduced in House (public and private)	647
Total	15,506
Total number of public bills and resolutions	12,215
Total number of private bills and resolutions	3,291
Total	15,506
Total number of bills referred to Committee on Ways and Means through Sept. 1, 1960	2,053
Total number of House joint resolutions referred	15
Total number of House concurrent resolutions referred	82
Total number of House resolutions referred	5
Total number of Senate bills referred	1
Total	2,156

Legislation referred to Committee on Ways and Means, 86th Cong., 1st and 2d sess., Jan. 7, 1959, through Sept. 1, 1960

	Total tax bills	Total tariff bills	Total miscellaneous bills	Total social security bills	Total
House bills	1,179	278	74	522	2,053
House joint resolutions	3	8	2	2	15
House concurrent resolutions	1	59	21	1	82
House resolutions	1	2	2	0	5
Senate bills	0	0	1	0	1
Total	1,184	347	100	525	2,156

TABLE II.—*Statistics on status of bills referred to the Committee on Ways and Means, 86th Cong.*

	Social Security	Tariff	Tax	Miscellaneous	Total
Bills reported to House	5	31	55	6	97
Bills passed House	5	30	50	6	91
Bills reported to Senate	4	25	36	5	70
Bills passed Senate	4	25	32	5	66
Bills enacted into law	4	23	29	5	61
Bills vetoed	------	1	3	------	4

NOTE.—Amendments to one bill passed by the Senate (H.R. 4384) were not accepted by the House.

Mr. Speaker, before proceeding to a substantive discussion of the legislation given favorable consideration by the Committee on Ways and Means, I think it will also be of interest to indicate the time spent by the committee in terms of public and executive meetings of the committee. During the two sessions just completed the committee and its subcommittees conducted 80 days of public hearings and which resulted in the receipt of 8,210 pages of printed testimony. In addition to the public hearings, the committee spent 180 days in executive session considering legislation and subject matters within its jurisdiction. I am confident that this is a record of work which indicates that ours is one of the busiest committees of the House of Representatives. In this regard, I shall insert at this point a table showing the public hearings conducted by the committee during the 86th Congress—table III:

TABLE III.—*Public hearings, Committee on Ways and Means, 86th Cong.*

	Dates held	Number of—	
		Days	Witnesses
Advisory group recommendations on chs. C, J, and K of the Internal Revenue Code	Feb. 24, 25, 26, 27, and Mar. 2, 3 and 4, 1959	7	41
Mineral treatment processes for percentage depletion purposes	Mar. 5, 6, 9, 10, and 11, 1959	5	46
Unemployment compensation	Apr. 7, 8, 9, 10, 13, 14, 15, and 16, 1959	8	95
Extension of the Renegotiation Act	Apr. 27, 28, and 29, 1959	3	19
Public debt and interest rate ceiling on bonds	June 10, 11, and 12, 1959	3	16
Foreign Investment Incentive Act (H.R. 5)	July 7, 8, and 9, 1959	3	52
Children's estate tax deduction (H.R. 7924)	July 10, 1959	1	8
Hospital, nursing home, and surgical benefits for beneficiaries (H.R. 4700)	July 13, 14, 15, 16, and 17, 1959	5	86
Taxation of exchanges and distributions pursuant to antitrust decrees (H.R. 8126, H.R. 8231)	July 20 and 21, 1959	2	11
Highway trust fund and Federal-aid highway financing program	July 22, 23, and 24, 1959	3	68
Administration of the social security disability program	Nov. 4, 5, 6, 9, 10, 12, 13 and Dec. 7, 1959	8	51
Panel discussions on income tax revision, 1959	Nov. 16, 17, 18, 19, 20, 23, 24, 30, Dec. 1, 2, 3, 4, 7, 8, 9, 10, 11, 14, 15, 16, 17, and 18, 1959.	22	178
Tax treatment of earnings of cooperatives	Feb. 1, 2, 3, 4, and 5, 1960	5	54
Permanent suspension of duties on coarse wools	Feb. 29, 1960	1	9
Revising tax on gains from sales of depreciable property (H.R. 10491, H.R. 10492)	Mar. 2, and 3, 1960	2	11
"Gross-up" in connection with foreign tax credit allowed domestic corporations on dividends from a foreign subsidiary (H.R. 10859, H.R. 10860).	Apr. 11, 1960	1	9
Total		79	754

I am also inserting at the end of these remarks a complete table showing the status of all bills acted upon by the Committee on Ways and Means in the 86th Congress—Appendix I.

SUBCOMMITTEE ACTIVITY

The Committee on Ways and Means, under the rules of the House of Representatives, is charged with maintenance of continuing watchfulness over the administration of the laws within the jurisdiction of the committee by the departments and agencies concerned. In order to more effectively carry out its responsibilities in this respect, the committee in the early part of the first session of this Congress established three subcommittees, as follows: Subcommittee on Administration of the Internal Revenue Laws; Subcommittee on the Administration of Foreign Trade Laws and Policy; Subcommittee on Administration of the Social Security Laws. These subcommittees were authorized and directed to maintain watchfulness over the administration of the existing laws within their respective jurisdictions, and to keep the full committee advised.

The time within which these subcommittees had to operate was somewhat limited, due to the very heavy schedule and agenda of the full Committee on Ways and Means. However, solid accomplishments were obtained through these subcommittees, and constructive legislation by the full committee in several instances resulted therefrom. For example, the Subcommittee on Administration of the Social Security Laws conducted an intensive study and review of the administration of the disability provisions of title II—OASDI—of the Social Security Act during the fall of 1959, including a series of public hearings, and ultimately reported a number of findings and recommendations to the full committee, in addition to the publication of a "Disability Insurance Factbook." The Social Security Amendments of 1960 contain several provisions resulting from the findings of the Social Security Subcommittee, for example, the elimination of the age 50 requirement as a qualification for disability insurance benefits. The membership of the three subcommittees follows:

Subcommittee on Administration of the Internal Revenue Laws: WILBUR D. MILLS, Democrat, of Arkansas, chairman; THOMAS J. O'BRIEN, Democrat, of Illinois; EUGENE J. KEOGH, Democrat, of New York; FRANK IKARD, Democrat, of Texas; NOAH M. MASON, Republican, of Illinois; HOWARD H. BAKER, Republican, of Tennessee; JAMES B. UTT, Republican, of California.

Subcommittee on Administration of Foreign Trade Laws and Policy: HALE BOGGS, Democrat, of Louisiana, chairman; CECIL R. KING, Democrat, of California; FRANK M. KARSTEN, Democrat, of Missouri; THADDEUS M. MACHROWICZ, Democrat, of Michigan; JAMES B. FRAZIER, JR., Democrat, of Tennessee, JOHN W. BYRNES, Republican, of Wisconsin; VICTOR A. KNOX, Republican, of Michigan; BRUCE ALGER, Republican, of Texas; JOHN A. LAFORE, JR., Republican, of Pennsylvania.

Subcommittee on Administration of the Social Security Laws: BURR P. HARRISON, Democrat, of Virginia, chairman; A. S. HERLONG, JR., Democrat, of Florida; WILLIAM J. GREEN, JR., Democrat, of Pennsylvania; JOHN C. WATTS, Democrat, of Kentucky; LEE METCALF, Democrat, of Montana; THOMAS B. CURTISS, Republican, of Missouri; JACKSON E. BETTS, Republican, of Ohio; ALBERT H. BOSCH, Republican, of New York.

INCOME-TAX REVISION STUDY

During this Congress, the Committee on Ways and Means initiated the first phase of a broad-scale study of our entire Federal income-tax structure and system with a view toward exploring the practical possibilities of broadening the tax base and lowering tax rates.

The beginning of this study consisted, first, of the preparation of a document, consisting of three volumes of prepared papers, entitled "Tax Revision Compendium," which was printed and made available to the general public. A broad range of experience, training, knowledge, and ability was represented in the contributions made by the many experts in the field of Federal taxation who submitted the papers at the request of the committee for inclusion in the three-volume compendium. These individuals were tax lawyers, accountants, university professors, economists, as well as individuals from the fields of business, labor, and agriculture. This compendium was made widely available to the general public prior to the subsequent phases of the study.

Following the issuance of the compendium, the committee conducted a series of panel discussions participated in by the contributors covering the various principal areas which were the leading subjects in the tax revision compendium. These public panel discussions ran for a period of 5 weeks, during which time the committee received the views, suggestions, and recommendations of approximately 175 individuals in 31 different panels. There was opportunity during this operation for the panelists to state their views and question one another and for the members of the committee to question the various panelists on suggestions made. Following completion of the public panel discussions there subsequently was printed and issued to the public the full record of these discussions. This document entitled "Income Tax Revision Panel Discussions" was given broad circulation, and intense interest was manifested in it by individuals

and organizations throughout the Nation.

After completion of the public panel discussions I indicated in my closing statement the nature of the work which would be required as the next step in the broad-scale study, as follows:

The purpose of these discussions has been to explore the practical possibility of broadening the tax base and lowering tax rates. Some of the suggestions appear to offer some practical possibilities; others do not.

There must be an assessment of the various issues from the standpoint of their effect on fairness among taxpayers, on revenues, on economic growth, on economic stability, and on ability to pay. Before there can be any resolution of the issues raised by these panel discussions, there must be a considerable amount of study of all the problems involved.

Thus, before any plan can be developed, it will be necessary for the staffs of the committee, the Joint Committee on Internal Revenue Taxation, and the Treasury Department to review and analyze the various suggestions which have been made to us and give the committee the benefit of their views as to their feasibility and practicability.

Therefore, I am requesting the staffs to analyze the compendium and the record which was developed and provide the committee such suggestions as they believe meet these standards. After the staffs have completed this study and analysis, and before any overall general revision proposal can be reported by the committee, there will, as I have said in earlier statements, be hearings and an opportunity for the interested public to express its views.

It will not be possible for the staffs to complete this analysis in the remainder of this Congress. Thus, it will not be possible for the Committee on Ways and Means, itself, to give specific consideration in 1960 to any broad proposals of tax revision based on these discussions.

It is certainly my thought that our tax rates are much too high from the standpoint of incentive and economic growth. I hope that as a result of these hearings and their analysis by the staffs, we will be able to find some means for making an adjustment in the tax rates through revision in the tax base while at the same time keeping the level of revenue collections sufficient to meet essential expenditure requirements.

LEGISLATION TO STRENGTHEN AND AID SMALL BUSINESS

Before proceeding to a discussion of the major legislation reported by the Committee on Ways and Means, I will briefly mention at this point several measures which received favorable consideration by the committee which in the aggregate will result in material assistance to small business enterprises throughout the Nation.

As may be recalled, the committee has properly been concerned for the past several years with the continued maintenance of opportunities for successful operation for the Nation's small business activities. Without undertaking to enumerate these measures in any order of relative importance, the following are worthy of mention: Legislation providing that for purposes of the law relating to the payment of the excise tax on gasoline, wholesale distributors of gasoline are to be treated as producers. Under this legislation, a hardship previously existing with regard to the payment of the excise tax by independent distributors and jobbers on evaporated or lost gasoline will be effectively removed. Second, the committee favorably reported and there has been enacted into law a measure to remove a hardship with regard to the taxation of so-called dealer reserves. This legislation, which is summarized at a later point, should be of material benefit in assisting not only dealers in automobiles, but also dealers in other forms of personal and real property. For the most part, these are all small business enterprises. Third, the committee acted to amend the laws relative to the tax treatment of expenditures made to determine the presence, location, quantity, or quality of any deposit of ore or other mineral—except oil and gas. Prior law provided for a maximum deduction which might be taken for any one year of $100,000 but for no more than 4 years. The legislation approved by the committee would remove the 4-year limitation while maintaining an overall limit of $400,000. This legislation would, therefore, assist the small enterprises engaged in this form of activity. Still another provision of law which was agreed to by the committee, in the form of acceptance of Senate amendments to another House bill, was a change in the statute relating to the election of certain small business corporations as to their taxable status.

Specifically, this provision removed a hardship which had developed under prior law in determining the number of shareholders of a small business corporation where a husband and wife owned stock jointly or as community property. Additionally, the law was clarified with regard to the definition of a small business corporation. Finally, these amendments also included a provision to exempt small-business investment companies from the personal holding company tax, a measure which was requested by the Small Business Administration. A further example of legislation which would prove to be of particular assistance to small business enterprises provided for the reduction of the cabaret tax from 20 percent to 10 percent. The 20-percent tax was considered to be discriminatory since the rates of practically all of the other ad valorem excise taxes did not exceed 10 percent, and, moreover, the high rate of tax was believed to have been a substantial deterrent to the employment of musicians and other entertainers, and thus a restrictive influence on the continued operation of many small business establishments in the restaurant and entertainment fields. Still another example of legislation which would be of specific benefit to small business enterprises provided for a reduction in the 5-cent-a-pound tax to 1 cent a pound in the case of the sale of laminated tires not of the type used on highway vehicles, where the tires consist wholly of scrap rubber from used tire casings and have an internal metal fastening agent. The laminated tire industry is both a new and a small industry and this removal of the discriminatory impact of the tire tax should assist this small industry to further develop by removing the competitive disadvantage.

The foregoing is not intended to be a complete or exhaustive discussion of all of the measures which the committee favorably acted upon which will benefit small business, but merely to list a few examples of such measures as indicative of the committee's solicitous regard for the importance of maintaining and strengthening small business enterprises in our great Nation.

BRIEF OVERALL SUMMARY OF MAJOR BILLS ENACTED

The following measures might well be classed in the category of major legislation which was favorably reported by the Committee on Ways and Means and which was enacted into law during the 86th Congress: The Life Insurance Company Tax Act of 1959; the Public Debt Act of 1959; the financing provisions of the Federal-Aid Highway Act of 1959; a bill permitting the issuance under specified circumstances of series E and H United States savings bonds at interest rates above the existing maximum, and so forth; a bill making technical changes in certain excise tax laws; the extension of the Renegotiation Act of 1951; the Tax Rate Extension Act of 1959; the Narcotics Manufacturing Act of 1960; the Public Debt and Tax Rate Extension Act of 1960; and the Social Security Amendments of 1960.

In addition to the foregoing, the Committee on Ways and Means favorably reported several major measures most of which passed the House of Representatives but which, due to various circumstances, failed to complete the legislative journey through the Senate and thus failed of enactment. Among these should be mentioned the Self-Employed Individuals' Retirement Act of 1959; the Foreign Investment Incentive Act of 1960; a bill to make technical revisions in the income tax provisions of the Internal Revenue Code relating to estates, trusts, partners, and partnerships; and a bill relating to interest rate restrictions on bonds of the United States.

A brief summary of each of the major measures enumerated above which were enacted into law follows:

H.R. 4245, BY MR. MILLS; PUBLIC LAW NO. 86–69, SIGNED JUNE 25, 1959

The Life Insurance Company Tax Act of 1959 provided the most comprehensive revision of the taxation of life insurance companies since 1921. In 1921, life insurance companies were taxed only on a portion of their investment income. The portion taxable broadly represented the amount of investment income over and above the company's requirements for adding interest to life insurance reserves. This excess portion has in the past been computed on the basis of formulas derived from the aggregate industry experience. Since 1921, the life insurance companies paid no tax on their so-called underwriting income, that is, the excess of their premium income over their expenses and their provisions for death benefits and additions to reserves.

The new life insurance company tax law makes two fundamental changes. The law provides that the tax will be based only in part on the company's investment income, and in part on the

company's underwriting income. In computing the taxable portion of the investment income, the law avoids the use of industry-wide formulas and provides a method whereby each company's investment income tax liability is based upon its own investment experience.

To explain the new law more specifically, the investment income tax is contained in the so-called phase one tax. For purposes of this tax, the company first determines its net investment income, that is, the total of interest, dividends, and the like, minus investment expenses. From this, it is permitted a reserve interest deduction computed by multiplying its adjusted reserves by its earnings rate. The earnings rate is the lower of its current earnings rate or the average of its earnings rate over the previous 5 years. The adjusted reserves are the book reserves adjusted to eliminate the effect of the company's arbitrary reserve interest assumption.

The so-called phase 2 of the tax is based upon the company's actual net gain from operations which is, generally speaking, its total income. This total income figure is derived from the company's own books with certain adjustments. If the total income exceeds the phase 1 tax base, the company must add to its taxable income from phase 1 one-half of the difference. If the total income is less than the phase 1 tax base, the company may subtract the difference, after limiting its deduction for policyholder dividends to a maximum of $250,000.

To comment on the second alternative first, it should be pointed out that the new law for the first time since 1921 provides that the life insurance company's tax may go down when the company's actual operations show losses. It has been a feature of the investment income tax approach that many new and small life insurance companies have had to pay substantial taxes on their investment income in years when their own books showed an aggregate loss. For this reason, the new tax law will be of great benefit to many new and small life insurance companies.

In the case of life insurance companies whose aggregate income is in excess of the tax base from phase 1, it was explained that they will be taxable currently on only one-half of this difference. The other half will, so to speak, be available as a reserve to meet future contingencies and will be added to the tax base at any time that it is actually paid out to shareholders.

The bill also contained a number of provisions dealing with special situations that might arise in the life insurance industry.

H.R. 7749, BY MR. MILLS; PUBLIC LAW 86–74, SIGNED JUNE 30, 1959

This bill, which became law without amendment, provided for an increase in the permanent debt ceiling of $2 billion, to $285 billion, and for an additional temporary increase of $10 billion for 1 year, making the debt ceiling $295 billion to June 30, 1960.

The administration had requested that the permanent ceiling be raised to $288 billion, with an additional temporary increase for fiscal year 1960 of $7 billion. The committee, however, did not consider it necessary or advisable to raise the permanent ceiling to the full extent requested by the administration, and in subsequent testimony the Secretary of the Treasury indicated to the Senate Finance Committee that the provisions of the bill reported by the Committee on Ways and Means were workable in terms of Treasury requirements, and acceptable to the administration.

TITLE II OF H.R. 8678; PUBLIC LAW 86–342, SIGNED SEPTEMBER 21, 1959.

One quite significant and important action of the Committee on Ways and Means was the development of title II of H.R. 8678, provided financing provisions to secure additional revenue for the Federal-aid highway program, which is financed through the highway trust fund. While the bill H.R. 8678 was formally reported by the Committee on Public Works, title II thereof was developed and drafted by the Committee on Ways and Means in accordance with a prior agreement which had been worked out by the Committee on Ways and Means and the Committee on Public Works. Likewise, the material contained in title II of the House report which accompanied the bill was developed and drafted by the Committee on Ways and Means.

It was drawn to the attention of the committee during the course of the first session that an immediate problem with regard to financing the Federal-aid highway program was in evidence in that without legislation providing further funds for the program, it was estimated that there would be a deficit in the highway trust fund by the end of fiscal year 1960 of some $490 million, and at the end of the fiscal year 1961, an accumulated deficit of $980 million would be in prospect even if no further apportionments were made.

Legislation, therefore, was urgently necessary to provide additional financing for the highway trust fund to meet this immediate problem.

Title II of H.R. 8678, therefore, contained a solution for the financing problems and enabled the continuance of the Federal-aid highway program at a level commensurate with completion of the program and the needs of the economy. Specifically, title II of H.R. 8678 provided for the imposition of an additional 1-cent-per-gallon tax on gasoline, diesel fuel, and special motor fuels, for the 21-month period beginning October 1, 1959, and ending June 30, 1961, and allocation to the highway trust fund of 5 percentage points of the manufacturer's excise tax on passenger cars, and so forth, and of 5 percentage points of the tax on auto parts and accessories for the 3-year period beginning July 1, 1961, and ending June 30, 1964. The additional revenue provided by title II, combined with the existing revenues of the trust fund, should make possible apportionments for the Interstate System of $1.8 billion for the fiscal year 1961 and $2 billion for the fiscal year 1962, in addition to the $2.5 billion of apportionments which had already been made for the fiscal year 1960. These apportionments can be made without suspension of the limitation on the trust fund, which is the so-called Byrd amendment.

H.R. 9035, BY MR. MILLS; PUBLIC LAW 86–346, SIGNED SEPTEMBER 22, 1959

This bill made a number of changes in the laws relating to savings bond interest rates and other aspects of debt management:

First, it permits the maximum interest rate—or investment yield—limitation of 3.26 percent on series E and H savings bonds to be exceeded where there is a finding by the President that the national interest so requires. The bill also authorizes increasing the interest rates on outstanding series E and H savings bonds. In this case also, the existing maximum limitation of 3.26 percent on these bonds may be exceeded but only in the case of a finding by the President that the national interest so requires. A Senate amendment to this section of the bill, which was accepted by the House, added a proviso that in no event may the interest rate or the investment yield on these bonds exceed 4¼ percent per annum.

Second, the bill adds a new section to the Internal Revenue Code providing for nonrecognition of gain or loss on the exchange of U.S. obligations when so provided by regulations. This is intended to aid the Government in its attempts to achieve a better balance in the debt structure by facilitating the refinancing of outstanding securities in advance of their final maturities.

Third, the bill authorizes the issuance of obligations of the United States to Government trust funds at the issue price, whether or not at par. Under existing law in the case of certain trust funds these obligations may be issued to the funds only at par.

Fourth, the bill makes it clear that both the principal and interest on U.S. obligations are exempt from all State taxes except nondiscriminatory franchise, et cetera, taxes.

Fifth, the bill relieves from liability to the U.S. Government agents who erroneously paid U.S. bonds if they did not receive written notice from the United States within 10 years from the date of the erroneous payment.

This legislation was quite important to the millions of American citizens who purchase and hold series E- and H-savings bonds, since it will permit an increase in the interest rate payable to these individuals on this important type of savings, if the President finds that the national interest will thereby be served. The legislation will further encourage investment in these bonds by our individual citizens, and will permit them to continue to participate in this vitally important savings program. It will assist the Treasury in the management of the public debt.

H.R. 8725, BY MR. HARRISON; PUBLIC LAW 86–344; SIGNED SEPTEMBER 21, 1959

In 1958 the Congress passed the Excise Tax Technical Changes Act of 1958, which constituted a comprehensive revision of the technical and administrative provisions of the Federal excise taxes. In a technical revision of this magnitude, almost of necessity there are

changes made which after experience in actual operations will require further modifications. The purpose of H.R. 8725, as amended by the Committee on Ways and Means, was to effect six such modifications which experience under the 1958 act has shown to be required. These technical changes amend the provisions relating to the retailers' excise tax on jewelry, the exemptions from excise taxes for nonprofit educational organizations, the club dues tax, the tax on communications as it relates to common carriers and communication companies, the basis of the documentary stamp tax in the case of transfers of stock rights or warrants, and the occupational tax applicable to so-called claw, crane, or digger machines in certain cases.

This legislation, which was favored by the Treasury Department, became law in the form reported by the committee.

H.R. 7086, BY MR. MILLS; PUBLIC LAW 86–89, SIGNED JULY 13, 1959

As reported to the House by the Committee on Ways and Means, this bill provided for an extension of renegotiation authority for 4 years to June 30, 1963. Certain other amendments were contained in the bill which the committee was of the opinion would be of benefit to industry as well as contributing to the administration of the act. These related to the factors to be considered in determining excessive profits, the provision for carryforward of losses on renegotiable business, the statements required to be furnished by the Renegotiation Board, proceedings before the Tax Court in renegotiation cases, and review of Tax Court decisions in such cases.

The Senate amended the House bill substantially, and it was sent to conference. Under the conference agreement, which was accepted by both bodies, a 3-year extension of renegotiation authority was provided, to June 30, 1962. In addition, a 5-year carryforward to fiscal years ending after December 31, 1958, of renegotiation losses was provided, in the case of losses arising in fiscal years ending on or after December 31, 1956. An increase in the compensation of the General Counsel of the Renegotiation Board was provided, to $19,000 per annum. Further, certain studies of procurement policies and practices, the Renegotiation Act, and the policies and practices of the Renegotiation Board were directed to be made. The overall report developed from these studies is to be made not later than March 31, 1961.

H.R. 7523, BY MR. MILLS; PUBLIC LAW 86–75, SIGNED JUNE 30, 1959

As reported to the House by the Committees on Ways and Means, and as the bill passed the House, it would have provided a 1-year extension, to July 1, 1960, of the existing corporate normal-tax rate and of certain excise-tax rates—the so-called Korean increases, including the increased rates on distilled spirits, beer, wine, cigarettes, passenger automobiles, and automobile parts and accessories. The legislation was designed to implement the request of the administration that these rates be continued for another year.

The Senate, while approving the provisions of the House bill, added several amendments. These included the repeal, as of July 1, 1960, of the excise taxes on communication services, the repeal of the tax on transportation of persons, the repeal of the 4 percent credit against tax presently provided for dividend income, and other amendments relating to the Federal share in certain public assistance programs under the social security law.

Under the conference agreement, and as the bill became law, the bill in addition to providing a 1-year extension of the existing corporate normal-tax rate and the excise-tax rates referred to above, provided that the tax on transportation of persons be reduced to 5 percent as of July 1, 1960, and that the tax on general—local—telephone service be repealed as of July 1, 1960.

H.R. 529, BY MR. KARSTEN; PUBLIC LAW 86–429, SIGNED APRIL 22, 1960

This bill, as reported to the House by the Committee on Ways and Means, was designed to give full effect to treaty obligations of the United States to limit exclusively to medical and scientific purposes the manufacture of narcotic drugs and to require that such manufacture be restricted to persons and premises that have been licensed for the purpose. It was also designed to amend the Narcotic Drugs Import and Export Act to bring the regulations of exports in conformity with current treaty obligations, and to permit the importation and exportation of certain narcotic drugs for scientific research purposes. It established a comprehensive system of licensing and control over the manufacture, distribution, and use of both natural and synthetic narcotic drugs.

The committee received favorable reports on this legislation from the Departments of State and the Treasury, and it had the approval of the pharmaceutical industry. The committee was of the opinion that enactment of this legislation would be of assistance to the agencies charged with administering our narcotic control laws and treaties, and would be beneficial to the citizens of our Nation.

The Senate amended the bill only with respect to certain effective dates, and the House concurred in these amendments.

H.R. 12381, BY MR. MILLS; PUBLIC LAW 86–564, SIGNED JUNE 30, 1960

As reported to the House by the Committee on Ways and Means, this bill contained two titles. Title I provided for a temporary increase, for a period of 1 year, of $8 billion in the statutory debt limit. The permanent debt limitation remained, under the bill, at $285 billion, and the temporary limit was decreased from the existing $295 billion to $293 billion, through June 30, 1961.

The second title of the bill provided for a 1-year continuation, to July 1, 1961, of certain existing tax rates, including the 52 percent corporate income tax rate and the existing rates of excise tax on distilled spirits, beer, wine, cigarettes, passenger cars, automobile parts and accessories, general telephone service, and transportation of persons.

The Senate, in addition to adopting the provisions of the House bill, added a new title III to the bill, containing several sections. Under the conference agreement and as the legislation became law, the bill provided, in addition to the provisions of the House bill, for, first, an investigation and report—as soon as practicable during the 87th Congress—by the Joint Committee on Internal Revenue Taxation with respect to the treatment of entertainment and certain other expenses, with recommendations for any changes in the law and administrative practices which in the judgment of the joint committee are necessary or appropriate. This section also provided for a report by the Secretary of the Treasury on the results of the enforcement program of the Internal Revenue Service relating to the deduction as ordinary and necessary business expenses of expenses for entertainment, travel, club dues, et cetera, together with such recommendations as the Secretary considers necessary or appropriate to avoid misuse of the business expense deduction; and, second, amendment to section 613 of the Internal Revenue Code of 1954, relating to the depletion rate for certain clays and to the treatment processes considered as mining for computing percentage depletion in the case of minerals and ores. A public hearing had previously been held by the Committee on Ways and Means on the legislation proposed by the Secretary of the Treasury relating to this subject.

H.R. 12580, BY MR. MILLS, PUBLIC LAW 86–778, SIGNED SEPTEMBER 13, 1960 (SOCIAL SECURITY AMENDMENTS OF 1960)

I. OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROVISIONS (TITLE II OF SOCIAL SECURITY ACT)

A. Disability insurance, removal of age 50 requirement: Disability insurance benefits will be provided for workers under the age of 50, and for their dependents, on the same basis as such benefits are provided for disabled workers aged 50 to 65 and their dependents. Approximately 125,000 disabled persons and 125,000 dependents will qualify for benefits beginning for the month of November 1960.

B. Disability insurance, broadening of the applicability of the trial work period as an incentive to rehabilitation: Provision is made for extending the 12-month period of trial work, during which benefits are continued for all disabled workers who attempt to return to work, rather than limiting this trial work provision only to those who seek to rehabilitate themselves under the former Federal-State vocational rehabilitation plan, as in prior law. If, after 9 months of trial work—not necessarily consecutive—the beneficiary has demonstrated that he is no longer disabled within the meaning of the law, he will receive benefits for an additional 3 months. Any beneficiary—whether or not he has attempted to work—who has been determined to be no longer disabled within the meaning of the law, will be given an additional 3 months of benefits as above. Effective October 1960.

C. Disability insurance, elimination of a second 6-month waiting period before

paying benefits: A disabled worker who regains his ability to work but again becomes disabled within 5 years, will not be required to wait through a second 6-month waiting period before his benefits will be resumed. Under prior law a 6-month waiting period is required before any disability insurance benefits can begin. Effective September 1960.

D. Disability insurance, children who become dependent after worker's disability: Dependents benefits are provided to a child who is born, or who becomes the worker's stepchild, after the worker becomes disabled or who is adopted within 2 years after the worker becomes entitled to disability benefits if the child was living with the worker at the time of disability or if adoption proceedings had been started at that time. The amendment would be effective as if it had been enacted by the 1958 amendments—that is, for months after August 1958, based on applications filed on or after that date. This corrects a technical flaw of the previous law.

E. Disability insurance, alternative insured status requirement: Under existing law an individual must have 20 quarters of coverage out of the last 40 quarters—5 out of 10 years—elapsing before his disability. The amendment would provide an alternative insured status requirement for a few individuals who would have, first, 20 quarters of coverage—at least 6 quarters earned after 1950—at any time; and second, quarters of coverage in all quarters elapsing after 1950 up to the quarter in which be comes disabled. Effective for benefits payable October 1960.

F. Liberalization of requirements for insured status for older people: Some 400,000 individuals not now eligible for benefits can qualify immediately under the amendment which requires only one quarter of coverage—acquired at any time—for every three quarters elapsing after 1950 and up to retirement age, provided they meet the minimum requirement of six quarters of coverage. Present law requires one quarter out of every two quarters. By January 1, 1960, it is estimated that 1 million persons will be added to the rolls as a result of this provision.

The following table shows the number of quarters of coverage required under prior law, and under the law as amended, effective for benefits starting with October 1960:

Year of death, disability, or attainment of retirement age	Required quarters	
	Prior law	1960 amendments
1953 and earlier	6	6
1954	6- 7	6
1955	8- 9	6
1956	10-11	6
1957	12-13	8
1958	14-15	9
1959	16-17	10
1960	18-19	12
1961	20-21	13
1966	30-31	20
1971	40	26
1976	40	33
1981 and after	40	40

G. Earnings limitation—retirement test: The earnings limitation—retirement test—for people receiving social security benefits was revised so that earnings up to $1,200 a year are exempt—as in prior law—but $1 of benefits is deducted for each $2 earned between $1,200 and $1,500 and deductions are on a $1 for $1 basis above $1,500. This change overcomes a feature of former law which, in deducting 1 month's benefit for each $80, or fraction thereof, above $1,200, could result in an actual loss of more money in benefits than he earned over the limit. For example, in the case of a retired worker whose benefit is $100 a month and whose wife is receiving $50 a month: Under former law, if his annual earnings reached $1,210, the $10 in excess of $1,200 cancels the total family benefit of $150 a month. Under the new law, the family would lose just $5 (half of the $10 in excess of $1,200) instead of $150. Effective in calendar 1961 and thereafter.

H. Benefits for survivors of workers who died before 1940: Some 25,000 persons, most of them widows aged 75 and over, will be eligible for benefits as survivors of workers who died prior to 1940 and who had at least 6 quarters of covered work. Effective for October 1960.

I. Increase in children's benefits: About 400,000 children will get some increase in benefits as a result of the increase in the amount of children's benefits to 75 percent of the worker's benefit subject to the family maximum. Former law paid 50 percent of the worker's benefit to each child and divided another 25 percent of the worker's benefit between eligible children, subject to the same family maximum. Effective for December 1960.

J. Removal of family employment exclusion: Service performed after 1960 by parents in the employ of a son or daughter would be covered, other than service not in the course of the employer's trade or business or domestic service in the private home of the employer. Prior law excluded such coverage.

K. Coverage extended to Guam and American Samoa: Coverage is extended to Guam and American Samoa, in addition to present coverage which includes the 50 States, Puerto Rico and the Virgin Islands, and the District of Columbia. Effective for employees on January 1, 1961 and for the self-employed for taxable years after 1960.

L. Extension of time within which present ministers may elect coverage: An estimated 60,000 present ministers can elect coverage under the program as a result of an extension of the period of time for filing a certificate. Generally ministers will have until April 15, 1962, in which to elect coverage.

M. Coverage of U.S. citizens in the employ of foreign governments and international organizations within the United States: Such employees would be covered on a compulsory basis and under the provisions applicable to the self-employed, effective for taxable years ending after 1960. This employment has heretofore not been covered because the United States cannot levy the employer tax of the program upon foreign governments or international organizations. Coverage of these employees, as self-employed, was deemed "a practical solution to the unique problem of covering American citizens employed by such governments and organizations"—House Report No. 1799, 86th Congress, 2d session, page 22.

N. Coverage of employees of State and local governments:

First. Retroactive coverage: Allows State and local agreements entered into after 1959 to take effect as early as the first day of the fifth year before the coverage is agreed to, but not before January 1, 1956.

Second. Adds Texas to the list of States which can take advantage of the so-called split-system provision, which allows a State to divide a retirement system into two divisions, one to be composed of those persons who desire coverage, and the other of persons who do not wish coverage.

Third. Adds Virginia to the list of States which can cover policemen and firemen in positions under State and local retirement systems.

Fourth. Makes certain technical amendments relating to a State's liability for social security employer taxes, statute of limitations, and appeals procedure; also takes care of various coverage and validation of coverage problems in Maine, California, Mississippi, and Nebraska.

O. Employees of nonprofit organizations: Eliminates the requirement of prior law that two-thirds of the employees of a nonprofit organization must consent to coverage before the organization can cover any employees who desire coverage. Under this change a nonprofit organization can, if it so desires, file a certificate electing to provide coverage for all employees hired in the future and those current employees, if any, who wish to be covered. About 100,000 employees of nonprofit organizations not now covered could qualify under this amendment. Effective for certificates filed after September enactment date.

P. Miscellaneous changes affecting benefits of wives, widows, children, husbands, and widowers: Certain dependents and survivors of insured workers would also benefit by provisions included in the amendments which, first, authorize benefits for the spouse of an insured individual even though there was a legal impediment as defined preventing a valid marriage, if he had gone through a marriage ceremony in the belief that it would create a valid marriage and if the couple had been living together at the time; second, reduce from 3 years to 1 year the period required for marriage for a wife, husband, or stepchild of a retired or disabled worker to qualify for benefits; and, third, assure continuation of a child's right to a benefit based on the wage record of his father, which is now voided if a stepfather was supporting him—and living with him—at the time his father died or retired. Effective for September 1960.

Q. Investment of the trust funds: To improve the status of the Federal old-age and survivors insurance and disability insurance trust funds in relation to their long-term commitments, the amendments provide that the interest received on future obligations issued exclusively to the trust funds be related to the average market yield of all marketable obligations of the United States that are not

due or callable for 4 or more years from the time at which the special obligations are issued. Under present law, the interest on special obligations issued for purchase by the trust funds is related to the average coupon rates on outstanding marketable obligations of the United States that are neither due nor callable until after the expiration of 5 years from the date of original issue—thus relating the interest rate to the coupon rate that prevailed at some time in the past. As a result of the formula in prior law, the average interest rate on special obligation issued to the trust funds is now about 2⅝ percent, while the average yield on outstanding marketable obligations is above 4 percent.

R. Advisory Council: The times at which an Advisory Council on Social Security Financing is to study the status of the trust funds would be changed so that an Advisory Council will be appointed in 1963, 1966, and in every fifth year thereafter. The Council appointed during 1963 will study and report on all aspects of the program not just financing. Previous law provided that these councils would be appointed prior to each scheduled increase in the contribution rates.

II. PUBLIC ASSISTANCE AMENDMENTS (NOT RELATED TO MEDICAL CARE) (TITLE I OF SOCIAL SECURITY ACT)

A. The amendments provide, at the option of the States until June 30, 1962, and on a mandatory basis thereafter, for the disregarding of additional earned income in determining need for aid-to-the-blind programs. At present, the first $50 per month of earned income is not taken into consideration. Under the amendment, the amount of earned income to be disregarded is increased to the first $85 per month plus one-half of that in excess of $85 per month.

B. The amendments also postpone until June 30, 1964, the termination date of special legislation that provides for the approval of certain State plans for aid to the blind—Missouri and Pennsylvania—that do not meet all the requirements for State plans until title X. This legislation is now scheduled to expire on June 30, 1961.

III. MATERNAL AND CHILD WELFARE PROGRAMS (TITLE V OF SOCIAL SECURITY ACT)

A. Increased authorizations: The ceilings on the amounts authorized for annual appropriations were increased to $25 million for each of the three programs under title V of the Social Security Act. They represent an increase from the former amounts of $21,500,000 for maternal and child health services, $20 million for crippled children's services, and $17 million for child welfare services.

B. Grants for special projects of regional or national significance in the field of maternal and child health and crippled children's services: Grants for such special projects to be made directly to institutions of higher learning—as well as State agencies which now receive such grants—are authorized by the amendments.

C. Grants for research or demonstration projects in the field of child welfare: Grants are authorized to public or other nonprofit institutions of higher learning or to public and nonprofit agencies and organizations, for special research or demonstration projects on new methods or facilities which show promise of substantial contribution to the advancement of child welfare services, particularly those on behalf of mentally retarded children.

IV. THE UNEMPLOYMENT COMPENSATION PROGRAM CHANGES

A. Financing: The amendments, first, raise the net Federal unemployment tax—the tax that may not be offset by a credit for taxes paid under a State program—from three-tenths to four-tenths of 1 percent on the first $3,000 of covered wages effective in 1961; second, provide that the proceeds of this higher Federal tax after covering the administrative expenses of the employment security program will be available to build up a larger fund for advances to States whose reserves have been depleted; third, make additional improvements in the arrangements for administrative financing; and, fourth, improve the operation of the Federal unemployment account by tightening the conditions pertaining to eligibility for and repayment of advances.

B. Coverage: The amendments also extend the coverage of the unemployment compensation program to several groups not presently covered, i.e., first, employees of certain instrumentalities of the United States which are neither wholly nor partially owned by the United States, including Federal Reserve banks, Federal credit unions, Federal land banks, and others; second, employees serving on or in connection with American aircraft outside the United States; third, employees of feeder organizations all of whose profits are payable to nonprofit organizations and employees of nonprofit organizations which are not exempt from income tax; and, fourth, certain employees of certain tax-exempt organizations, including agricultural and horticultural organizations, voluntary employee beneficiary associations, and fraternal beneficiary societies.

In addition, the amendments provide that Puerto Rico will be treated as a State for the purposes of the unemployment compensation program.

V. MEDICAL CARE PROVISIONS

The social security amendments of 1960 contain a number of provisions designed to help meet the problems which face persons 65 years of age or older who cannot meet their medical expenses. This would be accomplished by one or the other—or both—of the two approaches described below.

The new legislation, which amends title I of the Social Security Act would first, authorize a new program—medical assistance for the aged—under which the Federal Government would provide funds on a matching basis to the States to assist them, in part, in providing medical assistance for individuals who are not on old-age assistance but whose income and resources are insufficient to meet the costs of necessary medical services, and, second, increase the rate of Federal financial participation in the old-age assistance medical care programs for needy people so as to help improve those programs now operating and to encourage States without such medical programs to undertake them. Federal funds under both approaches would be available to the States for the quarter beginning October 1, 1960.

It should be understood that the new program is for needy individuals who are not on old-age assistance; the other provisions relate to persons who are on old-age assistance.

Participation is optional with a State, and it would be free to participate in either or both programs. Administration of such programs must be under a single State agency.

The historical State-Federal grant-in-aid method of the Social Security Act's public assistance program will be used. Participating States thus have broad latitude in determining eligibility for benefits as well as the scope and nature of medical services to be provided as long as their plans are approved by the Secretary of Health, Education, and Welfare as complying with the requirements of Federal law.

For both programs Federal participation would be restricted to vendor medical payments; that is, payments made by the States directly to the doctor, hospital, et cetera, providing medical services.

A. NEW PROGRAM OF MEDICAL ASSISTANCE FOR THE AGED

First. Eligibility for benefits: States entering the new program must comply with certain provisions of the law relating to eligibility in order to qualify for Federal matching. The State plan must apply to persons aged 65 years of age and over. It must include "reasonable standards, consistent with the objectives of this title, for determining eligibility." The Senate report states:

> Under this program, it will be possible for States to provide medical services to individuals on the basis of an eligibility requirement that is more liberal than that in effect for the States' old-age assistance programs * * *. A State may, if it wishes, disregard in whole or part, the existence of any income or resources, of an individual for medical assistance. An individual who applies for medical assistance may be deemed eligible by the State notwithstanding the fact that he has a child who may be financially able to pay all or part of his care, or that he owns or has an equity in a homestead, or that he has some life insurance with a cash value, or that he is receiving an old-age insurance benefit, annuity, or retirement benefit. The State has wide latitude to establish the standard of need for medical assistance as long as it is a reasonable standard consistent with the objectives of the title * * *. The committee intends that States should set reasonable outer limits on the resources an individual may hold and still be found eligible for medical services (S. Rept. 1856, 86th Cong., 2d sess., pp. 6–7).

A State plan cannot require a premium or enrollment fee as a condition of eligibility. It cannot impose property liens during the lifetime of the individual receiving benefits (except pursuant to court judgment on account of benefits

incorrectly paid), and any recovery provisions under the plan must be limited to the estate of the individual after his death and the death of his surviving spouse.

The State plan must not impose a citizenship requirement which would exclude a citizen of the United States or a requirement which excludes a resident of the State. It must also provide, to the extent required by the Secretary of Health, Education, and Welfare, for inclusion of residents of the State who are absent therefrom.

Second. Scope of benefits: The State plan for medical assistance for the aged may specify medical services of any scope and duration, provided that both institutional—hospitals, and so forth—and noninstitutional—outpatient clinics, and so forth—services are included.

The law specifies that the Federal Government will share in the expense of providing any or all of the following kinds of medical services: First, inpatient hospital services; second, skilled nursing home services; third, physicians' services; fourth, outpatient hospital or clinic services; fifth, home health care services; sixth, private duty nursing services; seventh, physical therapy and related services; eighth, dental services; ninth, laboratory and X-ray services; tenth, prescribed drugs, eyeglasses, dentures, and prosthetic devices; eleventh, diagnostic, screening, and preventive services; and, twelfth, any other medical care or remedial care recognized under State law.

The Senate report states that "a State may, if it wishes, include medical services provided by osteopaths, chiropractors, and optometrists, and remedial services provided by Christian Science practitioners"—Senate report, page 7.

The Federal Government, as in the case of presently established public assistance programs, would not participate in respect to medical services furnished to an inmate in a nonmedical public institution, or to patients in mental or tuberculosis hospitals. However, included for purposes of Federal matching, will be the services, for his first 42 days of care, to a patient in a medical institution—other than a tuberculosis or mental institution—as a result of a diagnosis of tuberculosis or psychosis.

Third. Federal sharing: The Federal Government will share in the total expenditures made by the State. The Federal share as to vendor medical payments will be determined periodically by the relationship between the per capita income in the State as compared to the national per capita income and will range from 50 to 80 percent depending on such income. States at or above the national per capita income will receive a 50-percent Federal share, as will Puerto Rico, Guam, and the Virgin Islands. Under the most recent computation the Federal share, State by State, will be as follows:

[In percent]

Alabama	79.15
Alaska	50.00
Arizona	63.23
Arkansas	80.00
California	50.00
Colorado	53.42
Connecticut	50.00
Delaware	50.00
District of Columbia	50.00
Florida	59.68
Georgia	74.36
Guam	50.00
Hawaii	53.38
Idaho	67.04
Illinois	50.00
Indiana	50.00
Iowa	63.23
Kansas	60.78
Kentucky	76.94
Louisiana	72.00
Maine	65.23
Maryland	50.00
Massachusetts	50.00
Michigan	50.00
Minnesota	58.57
Mississippi	80.00
Missouri	53.42
Montana	54.07
Nebraska	63.41
Nevada	50.00
New Hampshire	57.91
New Jersey	50.00
New Mexico	67.99
New York	50.00
North Carolina	77.46
North Dakota	74.18
Ohio	50.00
Oklahoma	67.54
Oregon	52.58
Pennsylvania	50.00
Puerto Rico	50.00
Rhode Island	50.00
South Carolina	80.00
South Dakota	75.42
Tennessee	76.55
Texas	61.36
Utah	65.00
Vermont	65.82
Virgin Islands	50.00
Virginia	65.44
Washington	50.00
West Virginia	72.69
Wisconsin	54.60
Wyoming	50.92

As in the present public assistance programs the Federal Government will share in administrative expenses on a dollar-for-dollar basis.

Fourth. Costs: The Department of Health, Education, and Welfare has estimated that the first-year costs of the program will amount to $60 million in Federal funds and $56 million in State and local funds. It is also estimated that the Federal cost may be $165 million in a full year of operation after the States have had opportunity to develop these programs—and this figure could be somewhat higher if all States had relatively well-developed and comprehensive plans—see pages 7 and 8 for State-by-State breakdown.

B. OLD-AGE ASSISTANCE MEDICAL PROGRAMS

At the present time, under the provisions of the Social Security Act relating to old-age assistance—title I—the States are authorized to make vendor payments to providers of medical services on behalf of persons receiving old-age assistance payments. These State programs vary greatly. It is understood that some States make relatively adequate provisions for the medical care of needy aged persons; others make little or no provision. The new legislation provides for increased Federal participation as to a specified amount of vendor payments for medical services so as to help improve those programs now operating and to encourage States without such programs to undertake them.

First. Increased Federal matching: Under previous law, the maximum amount within which the Federal Government would match for a combined program of money and medical vendor payments was $65 a month times the number of people on the old-age assistance rolls.

The amendments provide for Federal financial participation exclusively in expenditures to vendors of medical services up to $12 per month in addition to the $65 maximum provision.

For States with average monthly payments over $65, the ceiling can thus be increased to $77 if the $12 earmarked for medical vendor payments is added on top of the existing $65 maximum. The Federal share in the excess expenditures for medical care will range from 50 percent to 80 percent under the formula based on per capita income. Based on May 1960 benefit payments, the following States would be affected and will receive the percentages noted:

[In percent]

California	50.00
Colorado	53.42
Connecticut	50.00
Idaho	67.04
Illinois	50.00
Iowa	63.23
Kansas	60.78
Louisiana	72.00
Maine	65.23
Massachusetts	50.00
Michigan	50.00
Minnesota	58.57
Nebraska	63.41
Nevada	50.00
New Hampshire	57.91
New Jersey	50.00
New Mexico	67.99
New York	50.00
North Dakota	74.18
Ohio	50.00
Oklahoma	67.54
Oregon	52.58
Pennsylvania	50.00
Rhode Island	50.00
Utah	65.00
Washington	50.00
Wisconsin	54.60
Wyoming	50.92

For States with average monthly old-age-assistance payments of $65 or less the Federal share in average vendor medical payments up to $12 will be an additional 15 percentage points over the Federal percentage applicable to the amount of payments falling between $30 and $65, which now ranges from 50 to 65 percent on the basis of a State's per capita income. This percentage, when added to the Federal percentage for the second part of the formula for payments, will give a total Federal share of from 65 to 80 percent. Based on May 1960 benefit payments, the following States will be affected and will receive the percentages noted:

[In percent]

Alabama	80.00
Alaska	65.00
Arizona	78.23
Arkansas	80.00
Delaware	65.00
District of Columbia	65.00
Florida	74.68
Georgia	80.00
Guam	65.00
Hawaii	68.38
Indiana	65.00
Kentucky	80.00

[In percent]

Maryland	65.00
Mississippi	80.00
Missouri	68.42
Montana	69.07
North Carolina	80.00
Puerto Rico	65.00
South Carolina	80.00
South Dakota	80.00
Tennessee	80.00
Texas	76.36
Vermont	80.00
Virgin Islands	65.00
Virginia	80.00
West Virginia	80.00

Provision is also made so that a State with an average payment of over $65 a month would never receive less in additional Federal funds in respect to such medical service costs than if it had an average payment of $65.

As to Puerto Rico, Guam, and the Virgin Islands, their additional matching for vendor medical expenditures will be on an amount up to an additional $6 per month per recipient rather than the additional $12 a month for the States and the District of Columbia. This was done because their matching maximum for old-age assistance is an average of $35 a month per recipient in contrast to $65 for the States. Under existing law there are also overall dollar maximums applicable to Puerto Rico, Guam, and the Virgin Islands for the public assistance programs. These are increased proportionately on condition that the additional increases are used for vendor medical expenditures under old-age assistance.

Second. Costs: The Department of Health, Education, and Welfare has estimated that the increase in old-age assistance medical programs will result in an additional cost of $142 million to the Federal Government and $4 million to the States and localities in the first year. In the long run the additional Federal cost has been estimated at about $175 million a year—see pages 7 and 8 for State-by-State breakdown.

C. MEDICAL GUIDES AND RECOMMENDATIONS

As recommended by the Advisory Council on Public Assistance, appointed pursuant to the Social Security Amendments of 1958, the law instructs the Secretary of Health, Education, and Welfare to develop guides or recommended standards for the information of the States as to the level, content, and quality of medical care for the public assistance medical programs. He will also prepare such guides and standards for use in the new State programs of medical assistance for the medically needy aged.

In addition to the major bills discussed above, there were a number of less comprehensive but nonetheless important bills reported by the Committee on Ways and Means which became public law during the 86th Congress, which are summarized below, grouped as to the subject with which each deals—that is, taxes, social security, customs and tariff, and so forth.

TAX LEGISLATION ENACTED INTO LAW

H.R. 47, BY MR. BOGGS; PUBLIC LAW 86–376, SIGNED SEPTEMBER 23, 1959

As reported to the House by the Committee on Ways and Means, this bill provided that, with respect to the $600 dependency exemption for income tax purposes, a child placed with the taxpayer by an authorized placement agency for legal adoption by him shall be treated in the same manner as a natural born child and a legally adopted child, if the child is a member of the individual's household.

The Senate, in addition to approving the provision of the House bill, added two basic amendments, both relating to the tax treatment of small business. The first, making changes in the statute relating to the election of certain small business corporations as to their taxable status, first, amends section 1371 of the Internal Revenue Code to provide that in determining the number of shareholders of a small business corporation, a husband and wife owning stock jointly or as community property shall be counted as only one shareholder; second, amends section 1374 of the code to make clear that a deceased shareholder will not be denied his pro rata share of a small business corporation's net operating loss; and, third, strikes out paragraph (8) of section 1504(b)—relating to the definition of "includible corporation"—of the code, thereby clarifying the definition of a small business corporation. The Senate Finance Committee report indicates that this paragraph of the code actually operates to have an effect just reverse of its original intent, which was to prevent an electing small business corporation from having an 80-percent-owned subsidiary.

The second Senate amendment amended section 542(c) of the code to exempt small business investment companies from the personal holding company tax. This amendment had been requested by the Small Business Administration in an Executive communication which was referred to the Committee on Ways and Means.

The House agreed to the Senate amendments to this legislation, and the bill became law in that form.

H.R. 135, BY MR. KEOGH; PUBLIC LAW 68–437, SIGNED APRIL 22, 1960

This legislation provided for the exclusion from U.S. tax of the portion of amounts paid to nonresident alien individuals by the United States as civil service annuities and other retirement benefits for services performed abroad as employees of the United States. Nonresident aliens working for an American Embassy or other Government agency abroad are not subject to U.S. tax on salaries paid by the United States; similarly, amounts set aside by the Government for the future retirement of nonresident aliens working abroad are free of tax. However, prior to the enactment of H.R. 135, to the extent such annuities represented earnings on the amounts set aside by the Government, such payments were taxable. The Committee on Ways and Means was advised by the Department of State that nonresident alien employees consider their pensions to be deferred compensation, and that since their earned income is tax free, they expect their pensions also to be tax free. The committee was further informed that the imposition of this tax has caused severe hardships and has engendered resentment against the United States, and that this tax treatment has been objected to by many foreign governments, some of which have repeatedly protested its imposition.

Due to the passage of time between House and Senate action on the bill, the Senate amended the effective date provisions to make the exclusion applicable for taxable years beginning after December 30, 1959. The House accepted this amendment, and in this form the bill became public law.

H.R. 137 BY MR. KEOGH; PUBLIC LAW 86–175, SIGNED AUGUST 21, 1959

This bill prevents a pyramiding of Federal estate taxes where foreign death taxes are imposed on charitable bequests. This is accomplished by allowing a deduction for estate tax purposes for foreign death taxes—as provided under present law for State death taxes—imposed—and paid—on charitable bequests if, first, the property on which the tax is imposed is situated in the foreign country and included in the gross estate of a citizen or resident of the United States; and, second, if the decrease in tax resulting from the deduction is to go to charities—or the entire Federal estate tax is to be equitably apportioned among all of the transferees of the estate. Where this deduction is allowed, no credit against the estate tax is to be available for the foreign taxes which are deducted.

As reported by the Committee on Ways and Means, and as the bill passed the House, this provision would have been effective with respect to the estates of decedents dying after the date of enactment of the bill. The Senate, however, amended the bill to provide an effective date of July 1, 1955; that is, to apply to the estates of decedents dying on or after that date.

The Senate amendment was accepted by the House.

H.R. 147, BY MR. KEOGH; PUBLIC LAW 86-37, SIGNED MAY 29, 1959

This bill, which was enacted into law without amendment, suspended through June 30, 1960, the 3-cent-per-pound tax imposed on the first domestic processing of palm oil, palm-kernel oil, and fatty acids or salts derived therefrom. This action was taken in order to place these oils on a competitive parity with coconut and babassu oils, which are used for the same general purposes. The tax on the first domestic processing of coconut oil was suspended to June 30, 1960, by the provisions of a Senate amendment to H.R. 2842 of the 85th Congress, which the House accepted and which became part of Public Law 85–235; no processing tax is imposed on babassu oil. The resulting situation, therefore, placed palm and palm-kernel oils at a competitive disadvantage, and this legislation was designed to restore the competitive balance.

H.R. 1219, BY MR. BENTLEY; PUBLIC LAW 86–141, SIGNED AUGUST 7, 1959

This bill added a provision to the 1954 code relating to persons who have been mentally incompetent for a period beginning at least 3 months prior to December 31, 1947, and who remain so until

the date of their death. The bill provided that any powers such persons have at the date of their death to change beneficiaries of a trust they created—of the type referred to in section 1000(e) of the 1939 code—are not to result in such property being included in their gross estate for estate tax purposes. This provision is the same as a 1939 code provision — section 811(d)(4) — which was applicable with respect to decedents dying after December 31, 1947, and on or before August 16, 1954.

The provision added to the 1954 code by this bill is to apply with respect to estates of decedents dying after August 16, 1954. Thus, as a result of this bill, and previous actions, the exception for mentally incompetent will apply to all years from 1947 forward, so long as the decedent involved is mentally incompetent from October 1, 1947, to the date of his death.

The bill, which became law without amendment, contained a provision that no interest is to be allowed or paid on any overpayment resulting from its enactment with respect to payments made before the date of enactment.

H.R. 2164, BY MR. FORAND; PUBLIC LAW 86–422, SIGNED APRIL 8, 1960

This bill, which became law in the form reported by the Committee on Ways and Means to the House, provided for the reduction from 20 to 10 percent of the tax imposed with respect to roof gardens, cabarets, and similar establishments. The committee stated in its report on the bill that this action was taken for two principal reasons: First, the existing 20-percent rate was discriminatory in that the rates of almost all other ad valorem excise taxes do not exceed 10 percent; and second, it was believed that the high rate of this tax constituted a substantial deterrent to the employment of musicians and other entertainers.

H.R. 2906, BY MR. M'CORMACK; PUBLIC LAW 86–280, SIGNED SEPTEMBER 16, 1959

As reported by the Committee on Ways and Means, this bill provided that the period of limitations for filing a claim for credit or refund for an overpayment of taxes, to the extent attributable to a creation of or an increase in a net operating loss carryback resulting from the elimination of excessive profits by renegotiation, is not to expire before September 1, 1959, or the end of 1 year after the month in which the agreement or order for the elimination of the excessive profits becomes final, whichever is later. The bill amends both the 1939 and 1954 codes, and applies to all 1954 code years and, with respect to the 1939 code, to claims for taxable years ending after December 31, 1952. While the special period provided under the law where net operating loss carrybacks are involved generally provided adequate time for the filing of a claim for credit or refund, the committee's attention was called to a type of case where this was not true and where the taxpayer may not be in a position to know that he is eligible for a credit or refund before the expiration of the period of limitations. This placed the Government in the position in such cases of taking money away from a taxpayer, on one hand, and yet on the other hand denying him the opportunity to obtain a credit or refund where this decreases his tax liability. This legislation was intended to rectify this situation.

The Senate approved the provision of the House bill, and added an amendment directing the Secretary of the Treasury or his delegate to allow credit or refund to Dexter Phillips and Jeannette H. Phillips of an income tax overpayment for the calendar year 1951, to the extent such overpayment was attributable to the erroneous inclusion in their gross income for such year of the amount received by Dexter Phillips in final distribution of his grandfather's estate.

After conference agreement to the Senate-passed bill, the bill became law in that form.

H.R. 4251, BY MR. BAKER; PUBLIC LAW 86–594, SIGNED JULY 6, 1960

The effect of this legislation, which became public law as amended and reported to the House by the Committee on Ways and Means, was to remove from law the 4-year limitation relating to the allowable deduction for income tax purposes for exploration expenditures made to determine the presence, location, quantity, or quality of any deposit of ore or other mineral. This provision does not apply in the case of oil and gas wells. Under the previously existing law, the maximum deduction which might be taken for any year was $100,000, for no more than 4 years—whether or not consecutive—with respect to all property held by a taxpayer. H.R. 4251 removed the 4-year limitation, and substituted an overall limitation of $400,000; the maximum limitation of $100,000 in any one year is retained.

The committee was advised that the 4-year limitation tended to discriminate against small producers, in that a large producer could obtain the full benefit of these deductions by claiming $100,000 in each of 4 years, but a small producer whose annual exploration expenditures are not as high as $100,000 would have the deductions available to him reduced below $400,000 because of the 4-year limitation. Under the new law, a taxpayer will still not be able to claim exploration expenditure deductions with respect to any year in excess of $100,000, but if his expenditures on a yearly basis are less than $100,000, he will be able to claim such deductions over more than a 4-year period so long as the total deductions claimed are not in excess of $400,000.

H.R. 4586, BY MR. FORAND; PUBLIC LAW 86–413, SIGNED APRIL 8, 1960

The purpose of this bill, which became law without amendment, was to exempt aromatic cachous from the excise tax on toilet preparations. The committee was of the opinion that aromatic cachous—which are aromatic pellets, such as Sen Sen, which are chewed for the purpose of sweetening the breath—should not be subject to tax as toilet preparations since they are more nearly like mouthwashes and candied mints than like the externally applied toilet preparations which comprise the other articles subject to that tax.

H.R. 4857, BY MR. HAGEN; PUBLIC LAW 86–319, SIGNED SEPTEMBER 21, 1960

As reported by the Committee on Ways and Means, this bill amended two of the exemptions from the admissions tax to provide that in determining whether an athletic game is played between students from elementary or secondary schools, or colleges, where the proceeds inure to a hospital for crippled children, or an exempt organization operated exclusively for the benefit of retarded children, the term "student" is to include anyone who was a student at the school or college within the 8 months immediately before the athletic game. This makes the exemption available for all-star and other similar benefit games even though the game is played shortly after the end of the school or college year. The bill was favored by the Treasury Department, and became public law in the form reported by the committee.

H.R. 5547, BY MR. MILLS; REPORTED TO HOUSE AUGUST 19, 1959

See Public Law 86–779, H.R. 10960.

H.R. 5751, BY MR. MACHROWICZ; REPORTED TO HOUSE AUGUST 18, 1959

See Public Law 86–342, H.R. 8678, title II.

H.R. 6132, BY MR. MILLS; PUBLIC LAW 86–416, SIGNED APRIL 8, 1960

This bill, which became public law without amendment, amended the Internal Revenue Code of 1954 with respect to the rate of tax on the issuance of shares of certificates of stock by regulated investment companies.

Under the law the documentary stamp tax on original issues of stock is levied at the rate of 10 cents per $100 of actual value. The documentary stamp tax on stock transfers, on the other hand, is levied at the rate of 4 cents per $100 of actual value.

Regulated investment companies which operate as open-end mutual investment companies, however, do not usually provide for the trading of their securities. Instead they issue new securities to those desiring to buy their stock, and redeem the stock of those desiring to sell. As a result, in the absence of this legislation, they must pay a 10-cents-per-$100 issuance tax on transactions which to others would result in a transfer tax of 4 cents per $100 of actual value.

The new law provides that the issuance tax in the case of qualifying regulated investment companies is to be imposed at the rate of 4 cents per $100 of actual value, rather than the 10-cent rate otherwise applicable.

H.R. 6155, BY MR. BETTS; PUBLIC LAW 86–428, SIGNED APRIL 22, 1960

As amended and reported to the House by the Committee on Ways and Means, this bill amended the Internal Revenue Code of 1954 to exempt from taxation certain nonprofit corporations or associations organized after August 31, 1951, by moving forward from September 1, 1951, to September 1, 1957, the date before which certain mutual deposit guarantee funds must be organized in order to qualify for income tax exemption. The other requirements for the exemption, which are left unchanged by this bill, provide

that the organizations must be mutual, nonprofit organizations without capital stock and operated to provide reserves and insurance for building and loan associations, cooperative banks, or mutual savings banks.

Three of the four presently existing mutual deposit guarantee funds were organized before September 1, 1951, and therefore presently qualify for exemption. A fourth such organization organized after that date but before September 1, 1957, will qualify for exemption under this bill. These organizations perform essentially the same type of services as the FDIC and FSLIC, Federal corporations which are exempt from income taxation.

A Senate amendment, which was accepted by the House, changed the effective date of the legislation and the bill became law effective with respect to taxable years beginning after December 31, 1959.

H.R. 6785, BY MR. FRAZIER; PUBLIC LAW 86–440, SIGNED APRIL 22, 1960

The purpose of the bill, as reported to the House by the Committee on Ways and Means, was to amend section 4071 of the Internal Revenue Code of 1954, so as to provide a tax of 1 cent a pound in the case of the sale of laminated tires not of the type used on highway vehicles if the tires consist wholly of scrap rubber from used tire casings and have an internal metal fastening agent. This is in lieu of the 5-cents-a-pound tax which otherwise would apply. Such tires are used for off-highway purposes, primarily on lifts, cranes, payloaders, weed cutters, and similar types of industrial and farm equipment. The committee was advised that there are relatively few known manufacturers of laminated tires, and it is believed that any revenue loss from enactment of this legislation will be negligible. The bill became law in the form reported by the committee, except for a Senate amendment to correct a typographical error in the bill.

H.R. 7588, BY MR. KEOGH; PUBLIC LAW 86–435, SIGNED APRIL 22, 1960

As reported to and passed by the House, this bill amended the Internal Revenue Code to provide that personal holding company income is not to include income from copyright royalties. Certain conditions were specified to preclude the abuse of this amendment.

The personal holding company tax was developed to prevent the establishment of a corporation to be used as a corporate pocketbook in handling investment income. It has been brought to the committee's attention that existing law does in fact characterize as a personal holding company an organization that is actually an operating company. This problem existed in the case of music publishing companies, which presently get most of their income from royalties on record sales where previously the principal income came from sheet music sales, and this bill was designed to prevent the personal holding company tax from applying to the operating income of such companies. The Senate amended the House bill so as to prevent a possible unintended effect of the House bill as treating certain motion picture and TV film and tape rentals as personal holding company income, and by moving the effective date forward from 1959 to 1960. These amendments were accepted by the House, and the Senate-passed version of the bill became public law.

H.R. 7885, BY MR. FRAZIER; REPORTED TO HOUSE MAY 26, 1960

See Public Law 86–779, H.R. 10960.

H.R. 8229, BY MR. KNOX; PUBLIC LAW 86–667, SIGNED JULY 14, 1960

The purpose of this legislation was to provide a new exempt category for income tax purposes in the case of trusts providing for the payment of supplemental unemployment compensation benefits. Under the new law, the trusts may make supplemental unemployment benefit payments and they may also make such payments together with sick or accident payments, but they may not make any retirement or death benefit payments.

The new exempt category differs from the category, already existing in law, under which some of the trusts could obtain exemption, in that the new provision does not require the SUB trusts to obtain at least 85 percent of their income from employers or employees and not from investment income.

The so-called nondiscriminatory provisions of the Internal Revenue Code applying to qualified pension, profit-sharing, and stock bonus plans are applicable to trusts qualifying under the new exemption category. In addition, the "prohibited transaction" provisions, and the "unrelated business income" provisions—including the business lease provisions—of the Internal Revenue Code are also applicable to the new exemption category.

In general, the new law applies to taxable years beginning after December 31, 1959.

H.R. 8273, BY MR. WALTER; REPORTED TO HOUSE MARCH 28, 1960

See Public Law 86–779, H.R. 10960.

H.R. 8318, BY MR. KEOGH; PUBLIC LAW 86–418, SIGNED APRIL 8, 1960

The purpose of this bill, which became public law as amended and reported to the House by the Committee on Ways and Means, was to exempt from the manufacturers' excise tax on tires and tubes bicycle tires and tubes sold for use, or used, in the manufacture of new bicycles. The taxes will continue to apply to tires and tubes sold, or used, as replacements.

Bicycle tires are subject to the 5-cents-a-pound manufacturers' tax on tires, and bicycle inner tubes are subject to the 9-cents-a-pound manufacturers' tax on inner tubes. This is true both of tires and tubes manufactured in the United States and those imported. These excise taxes do not apply, however, to tires and tubes already mounted on bicycles when the latter are imported into the United States. This legislation was designed to equalize the situation between imported bicycles and domestically manufactured bicycles.

H.R. 8649, BY MR. KING OF CALIFORNIA; PUBLIC LAW 86–432, SIGNED APRIL 22, 1960

This legislation, which became law as amended and reported to the House by the Committee on Ways and Means, continued through June 30, 1963, the suspension of the 3-cents-per-pound processing tax imposed on the first domestic processing of coconut oil, palm oil, palm-kernel oil, and fatty acids, salts, combinations, or mixtures thereof.

The committee was of the opinion that experience under the existing suspensions of tax on the first domestic processing of these oils had been such as to warrant their extension.

H.R. 8684, BY MR. IKARD; PUBLIC LAW 86–459, SIGNED MAY 13, 1960

This legislation pertains to the timing of reporting for tax purposes with respect to dealer reserves and provides transitional rules to bring the reporting of dealer reserve income into conformity with proper accounting methods. As amended by the Committee on Ways and Means and reported to the House, two alternative methods were provided for payment of tax due on such income not previously reported. First, it provided that such amounts can be treated as required changes in methods of accounting. In general this means that the reserves built up prior to 1954 need not be reported for tax purposes, and that only the excess of the current balance over the 1954 balance in the reserve is to be reported. A second alternative provided permits the computation of the deficiencies—or overassessments—which would arise if the income had been reported in the proper years, and then the sum of these amounts—plus interest up to the time of selecting this alternative—to be paid in 10 annual installments, generally beginning in 1961.

The committee agreed that dealer reserve income should be reported on a proper accrual accounting basis; however, it was believed that a hardship would be created by requiring all dealers to make the transition to this method of reporting this income in 1 year, following recent Supreme Court decisions in this matter, especially in view of the numerous circuit court decisions going to the contrary of these Supreme Court decisions, which many dealers had previously been following.

The Senate accepted the substance of the House bill with a number of amendments, which, although some were substantive in character, were for the most part qualifying or relatively technical amendments. Under the conference agreement, the House bill was amended to make it applicable to taxpayers with respect to taxable years that were open on June 21, 1959—the day immediately following the pertinent Supreme Court decision—and to extend to September 1, 1960, the date for making the election to take advantage of the bill. The bill was made applicable to taxpayers who are required to use the accrual method of accounting even though the original return may have been on some other method, and it was further amended to make it somewhat easier for taxpayers to qualify for the installment payment

privilege. The definition of dealers reserves was expanded to accommodate certain cases where the finance company participates from the beginning of the sales transaction by advancing money to the customer. With these amendments agreed upon by the conference committee, the substance of the House bill became public law.

H.R. 9660, BY MR. MILLS; PUBLIC LAW 86-470, SIGNED MAY 14, 1960

As reported to the House by the Committee on Ways and Means, this bill related to the procedure for assessing certain additions to tax. Additions to the tax shown on the return by reason of late filing of income tax returns have since 1926 been assessed without the issuance of a statutory notice of deficiency—commonly known as a 90-day letter. Similarly, the Internal Revenue Service has assessed additions to tax for underpayment of estimated tax without issuing a 90-day letter. Recent court decisions, however, have held that a 90-day letter must be issued before assessment of such additions to tax. The Committee on Ways and Means was of the opinion that immediate enactment of clarifying legislation was necessary to the orderly administration of the internal revenue laws. The bill provided that additions to tax because of: first, late filing of income, estate, and gift tax returns; and, second, underpayment of estimated income tax are to be assessed and collected without the issuance of a 90-day letter. The bill further provided that additions so assessed and collected before enactment of this legislation may not be recovered where the sole basis of the claim is that the assessment was made before the issuance of a 90-day letter.

The provisions of the House bill were approved by the Senate, but that body added two new provisions to the bill—one of which was deleted in conference. Under the conference agreement, which was accepted by both Houses and reflects the bill as it became public law, the House bill was amended by the addition of a section providing that the 3-percent floor in existing law relating to the deduction of medical, dental, and so forth, expenses be removed in the case of medical and dental expenses incurred by the taxpayer for the care of his dependent mother or father, or the dependent mother or father of his spouse, if such mother or father has attained the age of 65 before the close of the taxable year.

H.R. 10087, BY MR. MACHROWICZ; PUBLIC LAW 86-780, SIGNED SEPTEMBER 14, 1960

As reported by the Committee on Ways and Means, this bill would have amended section 604 of the Internal Revenue Code of 1954 to permit a taxpayer earning foreign source income to elect the overall limitation on the foreign tax credit instead of the present per-country limitation, provided that once an election is made it must continue for 5 years. The carryback and carryforward provisions would have been made applicable from per-country limitation to overall limitation years, but not vice versa. The Senate Finance Committee amended the bill to permit an initial election to the overall limitation at any time, but any subsequent change would require consent of the Treasury Department. The second amendment limited carryback or carryforward from a year in which the per-country limitation applies to another year in which the per-country limitation applies, or from a year in which the overall limitation applies to another year in which the same limitation applies. A third amendment provided that to the extent foreign taxes are above those imposed by the United States because of the special 14 point tax differential provided by the United States for Western Hemisphere trade corporations, they cannot be used to offset U.S. taxes at a 52 percent rate on income earned in countries where the foreign taxes involved are less than those imposed by the United States.

In the Senate, amendments were added relating to exclusion from gross income of reimbursed moving expenses for certain employees of corporations operating on Atomic Energy Commission contracts. Amendments were also adopted requiring the filing of information returns with respect to foreign corporations controlled by domestic corporations and also with respect to the filing of returns by certain U.S. citizens with respect to foreign corporate organizations and reorganizations. The conference committee adopted the Senate amendments with changes in two cases. In the case of an affiliated group including a Western Hemisphere trade corporation, the excess credit is allowed with respect to income earned by non-Western Hemisphere trade corporations in countries in which the Western Hemisphere trade corporations operate, but only if the income is from regulated public utilities. The Senate amendment requiring the filing of information returns by domestic corporations controlling any foreign corporations was changed with respect to the type of information required and with respect to the penalty for failure to comply.

H.R. 10960, BY MR. HERLONG; PUBLIC LAW 86-779, SIGNED SEPTEMBER 14, 1960

As reported to the House by the Committee on Ways and Means, this bill related to the excise tax on cigars, and provided for the exclusion of any State or local taxes imposed on cigars from price in determining the retail price for the purpose of establishing the rate of Federal excise tax. The Senate approved the provisions of the House bill, but amended the bill substantially by the addition of numerous provisions not related to the provisions of the House-passed bill. Under the conference agreement and as the legislation became law, the bill included, in addition to the provisions of the original House-passed bill, the following:

First. An amendment, similar in substance to H.R. 12036—which passed the House on August 24, 1960—to section 243 of the Internal Revenue Code of 1954 providing that the 85-percent intercorporate dividends received deduction is to apply with respect to dividends paid by a foreign corporation out of its earnings and profits if such earnings and profits were accumulated by a predecessor domestic corporation which was subject to the income tax under chapter 1 of the 1954 code—or corresponding provisions of prior law.

Second. Provisions generally similar to H.R. 5547—which passed the House on September 9, 1959—relating to limitation on reduction in income tax liability incurred to the Virgin Islands and to the estate and gift tax treatment of certain citizen residents of possessions. Under this amendment, it is provided—with 2 exceptions—that tax liability incurred to the Virgin Islands pursuant to the income tax provisions equivalent to those of the United States, as made applicable in the Virgin Islands by the Naval Appropriations Act, approved July 12, 1921, or pursuant to section 28(a) of the Revised Organic Act of the Virgin Islands, is not to be reduced or remitted in any way, directly or indirectly, whether by grant, subsidy, or other similar payment, by any law enacted in the Virgin Islands.

The first exception relates to United States and Virgin Islands corporations and, in general, provides that subsidies can be paid to these corporations under much the same conditions as those under which income tax exemptions are presently available in the case of U.S. corporations carrying on a trade or business in most other U.S. possessions. The second exception relates to citizens of the United States who are bona fide residents of the Virgin Islands and permits the granting of subsidies in much the same manner as bona fide residents of Puerto Rico may claim an exemption from U.S. income tax with respect to their income derived from sources within Puerto Rico. With respect to this second exception, gain or loss from the sale or exchange of any security—as defined in section 165(g)(2) of the code—shall not be treated as derived from sources within the Virgin Islands. The amendment provides, in effect, that U.S. citizens who are residents of a possession, and whose citizenship is derived from citizenship of that possession, are to be subject to the estate and gift tax imposed by the United States, in general, to the same extent as in the case of nonresidents not citizens of the United States.

Third. An amendment to section 6015 (a) of the 1954 Code, relating to the declaration of estimated income tax by individuals, which (a) provides that no declaration is to be required if the estimated tax can reasonably be expected to be less than $40, (b) eliminates the gross income test of $400 plus $600 times the number of exemptions, and (c) increases from $100 to $200 the minimum gross income which can reasonably be expected to be received from sources other than wages without becoming liable to file a declaration.

Fourth. The addition of a new section 180 to the Internal Revenue Code of 1954 providing that a taxpayer engaged in the business of farming may elect to treat as expenses which are not chargeable to capital account expenditures—otherwise chargeable to capital account—which are paid or incurred by him during the taxable year for the purchase or acquisition of fertilizer, lime, ground limestone, marl,

or other materials to enrich, neutralize, or condition land used in farming, or for the application of such materials to such land. The expenditures so treated are to be allowed as a deduction. For this purpose, "land used in farming" means land used—before or simultaneously with the expenditures described in the preceding sentence—by the taxpayer or his tenant for the production of crops, fruits, or other agricultural products or for the sustenance of livestock.

Fifth. An amendment to section 170 of the Internal Revenue Code of 1954 having the effect of permitting the deduction, as a charitable contribution, of amounts paid by a taxpayer to maintain an individual—other than a dependent or a relative—as a member of his household during the period that the individual is a full-time student in the 12th or any lower grade at an educational institution located in the United States and is a member of the taxpayer's household under a written agreement between the taxpayer and an organization described in paragraph (2), (3), or (4) of section 170(c) of the 1954 code—that is, religious, charitable, scientific, literary, educational, veterans, fraternal, and so forth, organizations—to implement a program of the organization to provide educational opportunities for students in private homes. The deduction is limited, for each taxable year, to an amount equal to $50 times the number of calendar months during the taxable year which fall within the period in which the student is a member of the taxpayer's household under the agreement described above, and will not apply to any amount paid by the taxpayer within the taxable year if the taxpayer receives any money or other property as compensation or reimbursement for maintaining the student in his household during such period.

Sixth. Provisions, the same in substance as H.R. 7885—which passed the House on June 27, 1960—relating to capital contributions to the Federal National Mortgage Association. Section 162 of the Internal Revenue Code of 1954 is amended to provide that, for purposes of subtitle A of the 1954 code, whenever the amount of capital contributions evidenced by a share of stock issued pursuant to section 303(c) of the Federal National Mortgage Association Charter Act exceeds the fair market value of the stock as of the issue date of such stock, the initial holder of the stock is to treat the excess as ordinary and necessary expenses paid or incurred during the taxable year in carrying on a trade or business. A new section is added to the 1954 code relating to special rules as to the basis of property. The new section 1054 provides that, in the case of any share of stock described above, the basis of such share in the hands of the initial holder is to be an amount equal to the capital contributions evidenced by such share, reduced by the amount—if any—required by the new section 162(d) to be treated—with respect to such share—as ordinary and necessary expenses paid or incurred in carrying on a trade or business. This amendment applies with respect to taxable years beginning after December 31, 1959.

Seventh. An amendment relating to the excise tax on mechanical lighters for cigarettes, cigars, and pipes which is somewhat similar to H.R. 8273, which was reported to the House on March 28, 1960. The amendment provides that the tax on the sale by the manufacturer, producer, or importer of such mechanical lighters is to be 10 cents for each lighter sold, but not more than 10 percent of the price for which so sold.

Eighth. An amendment to the Internal Revenue Code of 1954 similar in substance to H.R. 12559, which passed the House on June 29, 1960, providing substantially the same tax treatment for real-estate investment trusts as provided under existing law for regulated investment companies; that is, in general, where 90 percent or more of the ordinary income is distributed, the real-estate investment trusts will be taxed only on retained earnings—thus, the distributed earnings will be taxed only to the shareholders.

Ninth. An amendment providing that the pension fund, Plumbers Local Union No. 775, shall be deemed to constitute a qualified trust and to be exempt from tax for the period beginning May 1, 1957, and ending May 11, 1959, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

H.R. 11405, BY MR. HERLONG; PUBLIC LAW 86496, SIGNED JUNE 8, 1960

This bill, which became public law as amended and reported to the House by the Committee on Ways and Means, made two changes in the existing law, both of which related to the continuation of provisions which had previously been in effect.

First. Existing law provided that the discharge of indebtedness of a railroad corporation in a taxable year beginning before January 1, 1958, is not to result in taxable income for the railroad if the discharge occurred as the result of a court order in a receivership proceeding, or in a proceeding under section 77 of the Bankruptcy Act. H.R. 11405 continued the application of this provision to discharges after December 31, 1959, but only if the court proceeding involved commenced before January 1, 1960.

Second. Congress in the Technical Amendments Act of 1958 provided that a deduction for accrued vacation pay is not to be denied for any taxable year ending before January 1, 1961, solely because the liability for it to a specific person has not been fixed or because the liability for it to each individual cannot be computed with reasonable accuracy. However, for the corporation to obtain the deduction the employee must have performed the qualifying service necessary under a plan or policy which provides for vacations with pay to qualified employees. This legislation extended the same treatment to deductions for taxable years ending before January 1, 1963.

H.R. 12036, BY MR. BOSCH; REPORTED TO HOUSE AUGUST 15, 1960

See Public Law 86-779, H.R. 10960.

H.R. 12536, BY MR. MILLS; PUBLIC LAW 86-781, SIGNED SEPTEMBER 14, 1960

As reported to the House by the Committee on Ways and Means, this bill related to the manner of determining the manufacturers'—or producers' or importers'—sales price, which is the base on which various manufacturers' tax rates are applied. The problem involved the treatment of certain local advertising expenses incurred by the retailer—or other distributor—of the taxed article where reimbursement is to be provided by the manufacturer—or producer or importer—for part or all of these expenses. The Committee on Ways and Means concluded that, due to the existing confusion as to the status of advertising charges in determining manufacturers' sales prices, there was need for statutory clarification, as well as some limitations as to the extent to which such exclusions or adjustments should be allowed. The committee concluded it to be appropriate to exclude from the manufacturers' sales price a reasonable amount of local advertising where the advertising is under the control of the distributor, and as reported to the House this legislation provided that where a manufacturer—or producer or importer—of articles subject to manufacturers' excise tax makes a separate charge for local advertising of the article, or reimburses the retailer—or other distributor—for part or all of his expenses for local advertising of the articles—subject to certain limitations—this charge is to be excluded from the manufacturers' sales price, or this price is to be readjusted for the charge. This would have the effect of reducing the manufacturers' excise taxes which are payable, since the manufacturers' sales price is the base for these taxes. The price exclusion, or readjustment, would be limited to radio, television, and newspaper advertising and to not more than 5 percent of the sales price—excluding local advertising charges.

The provisions of the House bill were approved without amendment by the Senate Finance Committee, but the Senate, while accepting the provisions of the House bill, added several provisions not relating to the original bill. Under the conference agreement and as the bill became law, this legislation included, in addition to the provisions of the original House-passed bill: First, a provision permitting taxpayers mining minerals used in making cement to elect to apply, within 60 days after publication of final regulations on this subject, to open years beginning before 1961, the cutoff provisions adopted in the Public Debt and Tax Rate Extension Act of 1960—H.R. 12381—in determining the percentage depletion deduction; second, an amendment providing that the following pension trusts be deemed to constitute qualified trusts and thus tax-exempt, for certain periods of time specified in each case—where it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries: the Iron Workers' mid-America pension fund; the Pattern

Makers' pension trust fund of Chicago; the Pipe and Refrigeration Fitters Local 537 pension fund of Boston, Mass.; the annuity plan of the Electrical Switchboard and Panelboard Manufacturing Industry of New York City; the District Council No. 19 welfare fund, now known as Painters District Council No. 19 welfare and pension fund; and the local union No. 377 pension fund; and, third, an amendment designed to preclude an accrual basis taxpayer from obtaining a double deduction of State or local taxes in one tax year by reason of any action taken by the taxing jurisdiction after December 31, 1960, which accelerates the accrual date for such taxes.

H.R. 12559, BY MR. KEOGH; REPORTED TO HOUSE JUNE 28, 1960

See Public Law 86–779, H.R. 10960.

SOCIAL SECURITY LEGISLATION ENACTED INTO LAW (IN ADDITION TO H.R.12580, THE SOCIAL SECURITY AMENDMENTS OF 1960)

H.R. 213, BY MR. PATMAN; PUBLIC LAW 86–284, SIGNED SEPTEMBER 16, 1959

As this bill was reported by the Committee on Ways and Means, it amended section 218 of the Social Security Act to provide an additional period of time within which certain State agreements may be modified to secure coverage for nonprofessional school district employees. This provision, under which nine States—including Hawaii—can provide OASI and disability insurance coverage for certain nonprofessional school district employees without a referendum and as a group separate from the professional employees who are in positions under the same retirement system, had expired on July 1, 1957, and the committee was advised that at least some of the named States had not secured the desired coverage before its expiration. In order to accommodate the States whose legislatures meet only in odd-numbered years, the committee-amended bill reinstates this provision to January 1, 1962.

In addition to approving the provisions of the House bill, the Senate added several amendments. These amendments extend to the States of California, Kansas, North Dakota, and Vermont the application of the present provision of the social security law which permits specified States to extend old-age, survivors and disability insurance coverage to policemen and firemen covered by a State or local retirement system. A provision was also adopted which has the effect of validating certain social security contributions which had erroneously been made by certain municipal employees in Oklahoma.

In conference, the House agreed to the Senate amendments, and the Senate-passed version of the bill became public law.

H.R. 3472, BY MR. FORAND; PUBLIC LAW 86–442, SIGNED APRIL 22, 1960

As reported to the House by the Committee on Ways and Means, this bill provided that in determining the eligibility of Federal civilian employees for unemployment compensation, their accrued annual leave shall be treated in accordance with State laws. Under previous law, no compensation could be paid to a Federal employee during a period subsequent to separation from Federal service when he is being paid for accrued annual leave. The committee was of the opinion that there is no inconsistency in the payment of both unemployment compensation and a sum for accrued annual leave to the same person for the same period of time, as the concept of insurance, unemployment, and maintenance of purchasing power—with which unemployment compensation is concerned—are not involved with respect to the matter of annual leave. This legislation placed the Federal civilian worker in the position of being treated in exactly the same manner as workers in private industry who receive similar annual leave payments upon separation, by making the award of unemployment compensation dependent upon the provisions of the appropriate State law.

A Senate amendment, which was accepted by the House, provided, under certain limited circumstances, that a quarter of coverage under old-age and survivors' insurance shall be based on the quarter in which wages are earned, and the bill became law with this section added to the original provisions of the House bill.

H.R. 5640, BY MR. MILLS; PUBLIC LAW 86–7, SIGNED MARCH 31, 1959

The purposes of this bill, which was reported to the House by the Committee on Ways and Means and passed the House without amendment, was to extend from April 1, 1959, to July 1, 1959, the time during which unemployed persons who had established a claim to temporary unemployment compensation under the Temporary Unemployment Compensation Act of 1958 before April 1, 1959, might receive such payments. The legislation was designed to provide a gradual closing out of the program rather than a sudden discontinuance. The unexpended balance of the appropriation which had been made at the time the 1958 program was enacted was more than sufficient to take care of the additional payments and costs which the Department of Labor estimated were involved in this legislation.

The Senate amended the bill to some extent, and under the conference report which was agreed to by the House and Senate, the bill became law as passed by the House, with an amendment which had been suggested to the Senate Finance Committee by the Department of Labor which was designed to assure that individuals who had exhausted their regular benefits prior to April 1, 1959, but whose regular report days, under procedures followed by their State agencies, would be after April 1, 1959, would not be precluded from receiving the benefits of this act—in all cases such claims must have been filed before April 7, 1959.

H.R. 5920, BY MR. BOSCH; REPORTED TO HOUSE AUGUST 31, 1959

See Public Law 86–778, H.R. 12580.

CUSTOMS AND TARIFF LEGISLATION

H.R. 1217, BY MR. BENTLEY; PUBLIC LAW 86–453, MAY 13, 1960

This bill, which became law as reported to the House by the Committee on Ways and Means, provided for a 2-year suspension of import duties on amorphous graphite or plumbago—crude or refined—which is valued at $50 per ton or less. The United States is dependent on imports for nearly all its requirements of natural amorphous graphite, which is a mineral with a wide variety of uses.

H.R. 2411, BY MR. MAGNUSON; PUBLIC LAW 86–262, SIGNED SEPTEMBER 14, 1959

As reported by the Committee on Ways and Means, this bill provided for the addition to the free list of tourist literature issued by certain groups, relating chiefly to places or travel facilities outside the United States, the purpose and effect of the legislation being to simplify the tariff treatment of tourist literature and to extend the present duty-free treatment to a broader class of such literature. Safeguarding provisions against abuse are provided for by law.

The Senate, in addition to approving the provisions of the House bill, amended the bill to include the provisions of two other bills which the Committee on Ways and Means had previously reported, both of which had passed the House: First, H.R. 4576—providing for a 2-year suspension of duty on the importation of book bindings or covers imported by certain institutions; and, second, H.R. 6249—liberalizing the tariff laws for works of art and other exhibition material. The amendments of the Senate were accepted by the House.

H.R. 2886, BY MR. KEOGH; PUBLIC LAW 86–235, SIGNED SEPTEMBER 8, 1959

Enactment of this legislation suspended for 3 years the import duties on certain classifications of spun silk yarn provided for in paragraph 1202 of title I of the Tariff Act of 1930. Spun silk yarns of the fineness provided for in this bill are not produced domestically in any quantity. Imported yarns, which are usually finer in size than those of domestic manufacture, are used for various decorative purposes and in the production of certain types of silk broadcloth and other fabrics. The committee was advised that suspension of the duties on the raw materials for such silk fabrics would improve the competitive position of the domestic silk-weaving industry and would tend to increase domestic production of silk cloth. Favorable reports on the legislation were received from the Departments of State, Treasury, Agriculture, and Commerce, as well as an informative report from the U.S. Tariff Commission.

The bill became law in the form reported by the Committee on Ways and Means.

H.R. 3681, BY MR. OSTERTAG; PUBLIC LAW 86–34, SIGNED MAY 29, 1959

This legislation provided for the duty-free entry of certain chapel bells imported for the use of the Abelard Reynolds School No. 42 in Rochester, N.Y. The committee was advised that these bells are not manufactured in the United States, would be used for the musical training and appreciation of students at the school, and would remain the property of the school. The bill became law without amendment.

H.R. 4576, BY MR. COHELAN; REPORTED TO HOUSE AUGUST 10, 1959

See Public Law 86-262, H.R. 2411.

H.R. 5508, BY MR. MILLS; PUBLIC LAW 86-14, SIGNED APRIL 22, 1959

This bill, which became law without amendment, provided permanent legislation permitting the free entry under bond of imported articles for exhibition or use at fairs designated by the Secretary of Commerce. The bill follows the basic provisions of the numerous trade fair laws which have been enacted for individual fairs in the past, and eliminates the necessity for the enactment of separate laws in behalf of individual fairs and the repeated issuance of regulations, as in the past. The committee was advised that enactment of this legislation, which was recommended by the interested executive departments, would facilitate cultural and commercial interchanges between the United States and other countries.

H.R. 5887, BY MR. KEITH; PUBLIC LAW 86-402, SIGNED APRIL 4, 1960

The purpose of this bill, as amended by the Committee on Ways and Means, was to amend the Tariff Act of 1930, as amended, by placing ground, powdered, or granulated seaweeds on the free list. The seaweed involved is used primarily by domestic processors who produce an end product in the form of a powdered extractive used in foods and other products as jelling, thickening, and so forth, agents. The committee received favorable departmental reports on this legislation. The bill passed the Senate without amendment and became public law in the form reported by the Committee on Ways and Means.

H.R. 6054, BY MR. KARTH; PUBLIC LAW 86-115, SIGNED JULY 28, 1959

This bill, which became law in the form in which it was reported by the Committee on Ways and Means, provided for a 1-year continuation, to June 30, 1960, of the suspension of duties on imports of metal scrap. Favorable departmental reports were received on this legislation, and the committee received no information indicating any opposition to its enactment.

H.R. 6249, BY MR. METCALF; REPORTED TO HOUSE AUGUST 24, 1959

See Public Law 86-262, H.R. 2411.

H.R. 6368, BY MR. HERLONG; PUBLIC LAW 86-325, SIGNED SEPTEMBER 21, 1959

The purpose of this legislation, which became law without amendment, was to transfer from the dutiable to the free list of the Tariff Act of 1930 pumice stone imported to be used in the manufacture of concrete masonry products, such as building blocks, bricks, tiles, and similar forms. The Committee on Ways and Means was advised that enactment of this legislation would benefit the makers of building blocks and other masonry products, and that there were no facts to indicate it would have an adverse effect on any U.S. industry. Favorable reports were received on the bill from the Departments of State, Treasury, and Commerce, as well as informative reports from the Department of the Interior and the U.S. Tariff Commission.

H.R. 6579, BY MR. KEOGH; PUBLIC LAW 86-288, SIGNED SEPTEMBER 16, 1959

This legislation, which was enacted into law in the form reported by the Committee on Ways and Means, provided for the temporary free importation—to the close of September 28, 1960—of extracts, decoctions, and preparations of hemlock suitable for use for tanning, regardless of their chief use. Favorable reports were received on the bill from the Departments of State, Treasury, Commerce, and Labor, and an informative report from the U.S. Tariff Commission.

H.R. 7456, BY MR. BALDWIN; PUBLIC LAW 86-405, SIGNED APRIL 4, 1960

As reported to the House by the Committee on Ways and Means, this bill would have extended for 3 years, to the close of March 31, 1963, the suspension of import duties on casein. The Senate, however, amended the bill to provide a 3-month extension only, in order to afford time for the Senate Finance Committee to conduct a thorough study without allowing the existing duty-free status to lapse. The Senate amendment was accepted by the House, and as the bill became public law, the duty-free treatment of casein was continued to July 1, 1960. The 3-year extension was later enacted through Senate amendment to another bill.

See H.R. 9862.

H.R. 7567, BY MR. MILLS; PUBLIC LAW 86-99, SIGNED JULY 17, 1959

This legislation, which was introduced in behalf of the administration at the request of the Department of Defense, extended for 2 years, to July 1, 1961, the privilege of free importation of gifts from members of the Armed Forces of the United States on duty abroad. This privilege has been provided continuously since 1942, and is limited to shipments of bona fide gifts not exceeding $50 in value.

Adequate safeguarding provisions exist in the act and through appropriate administrative regulations. The bill became law without amendment.

H.R. 9307, BY MR. BOGGS; PUBLIC LAW 86-441, SIGNED APRIL 22, 1960

As amended by the Committee on Ways and Means, this legislation provided for the continuation for 2 years, until July 16, 1962, of the suspension of duty on, first, alumina when imported for use in producing aluminum; second, bauxite, crude, not refined or otherwise advanced in condition in any manner; and, third, calcined bauxite Favorable departmental reports were received on this legislation.

The Senate approved the provisions of the House bill and added an amendment providing for a 90-day extension, to July 16, 1960, of the existing suspension of import duty on crude chicory and the reduction in duty on ground chicory, in order to provide time for consideration of the House bill providing a 3-year extension of the duty treatment accorded chicory—H.R. 9308—without allowing the existing status to lapse. This amendment of the Senate was accepted by the House and was included in the bill as it became public law, along with the provisions of the original House bill.

H.R. 9308, BY MR. BOGGS; PUBLIC LAW 86-479, SIGNED JUNE 1, 1960

As amended by the Committee on Ways and Means, this bill provided for a continuation of 3 years, to the close of April 16, 1963, of the existing suspension of duty on crude chicory—except endive—and for the continuation for the same period of the statutory rate of duty of 2 cents per pound for chicory, ground or otherwise prepared. Favorable reports had been received on this legislation from the Departments of State, Treasury, and Commerce, as well as an informative report from the Tariff Commission.

The Senate amended the bill to provide a termination date of June 30, 1963, having earlier provided a 90-day continuation to July 16, 1960, by amendment to H.R. 9307, so as to coincide with the end of the fiscal year. The House agreed to the Senate amendment, and in this form the bill became public law.

H.R. 9322, BY MR. HARRISON; PUBIC LAW 86-557, SIGNED JUNE 30, 1960

This legislation, which became law as amended and reported to the House by the Committee on Ways and Means, provided that the existing suspension of import duties on certain coarse wools imported under bond for use in the manufacture of rugs and carpets and certain other products be made permanent, added papermakers' felts to such list of products, and provided that the standards for determining grades of wools are to be those established from time to time by the Secretary of Agriculture pursuant to law.

Convincing evidence was presented to the committee that, in the absence of this legislation, foreign carpet manufacturers would be in a position of competitive advantage over domestic carpet producers. In the public hearings held by the Committee on Ways and Means on this legislation, all segments of the wool industry indicated their support of the committee bill, and favorable departmental reports were received on it.

H.R. 9820, BY MR. KEOGH; PUBLIC LAW 86-427, SIGNED APRIL 22, 1960

The purpose of this legislation, which became public law as amended and reported to the House by the Committee on Ways and Means, was to continue for 3 years, through September 30, 1963, the period during which certain tanning extracts, and extracts of hemlock or eucalyptus suitable for use for tanning, may be imported free of duty.

The committee was advised that the conditions which gave rise to the enactment of the earlier legislation providing for this duty-free treatment continue in effect today.

H.R. 9861, BY MR. BETTS; PUBLIC LAW 86-456, SIGNED MAY 13, 1960

This bill, which was enacted into law without amendment, provided for the continuation for a 3-year period, until

September 5, 1963, of the existing suspension of duty on dressed or manufactured istle or Tampico fiber. The committee was advised by the Tariff Commission that the purpose of this legislation—to reduce the burden of higher prices on domestic users of the fibers—would not be accomplished without a continuation of the duty-free treatment.

H.R. 9862, BY MR. BOSCH; PUBLIC LAW 86–562, SIGNED JUNE 30, 1960

As reported by the Committee on Ways and Means to the House, H.R. 9862 provided for a 2-year continuation, to August 7, 1962, of the existing suspension of duty on certain shoe lathes. This action was taken in order to continue to make available to domestic shoe last manufacturers highly specialized and expensive copying lathes which can only be obtained from foreign sources.

The Senate approved the provisions of the House bill, and amended the bill to add a section providing for a 3-year extension, to the close of June 30, 1963, of the suspension of import duty on casein. Under the Senate proviso, this suspension would not have applied to casein imported for use for human food or for conversion to such use. This language was deleted in conference, however, and substitute language was adopted providing that the suspension of duty on casein shall not apply with respect to sodium caseinate, sodium phosphocaseinate, or other caseinates, any of the foregoing of which casein or lactarene is the component material of chief value. The conference agreement was adopted by both the House and the Senate, and as the bill became public law it provided for the 2-year extension of the suspension of duties on shoe lathes as in the original House bill, and the 3-year extension of the suspension of duty on casein with the limitation adopted in conference.

H.R. 9881, BY MR. MILLS; PUBLIC LAW 86–563, SIGNED JUNE 30, 1960

The purpose of this legislation was to extend for 2 years, until July 1, 1962, the provisions of law relating to the free importation of personal and household effects brought into the United States under Government orders. It is stated in the conference report on this legislation—under the terms of which the Senate agreed to the provisions of the House bill—that it is the understanding and intention of the conferees that the departments and agencies charged with the responsibility of administering the law will submit information to the Committee on Ways and Means and the Committee on Finance, not later than January 15, 1962, with respect to the operation and administration of the law, including a statement of actions taken to improve its administration and recommendations for any statutory changes or limitations which may be necessary in order to effect adequate safeguards against abuses.

H.R. 10841, BY MR. CANNON; PUBLIC LAW 86–800, SIGNED SEPTEMBER 16, 1960

The purpose of this legislation, which became law in the form reported to the House by the Committee on Ways and Means, was to amend the Tariff Act of 1930 so as to place bamboo pipestems on the free list, when imported from other than Communist-dominated countries.

Bamboo pipestems are used principally on corncob pipes. The committee received favorable departmental reports on this legislation.

H.R. 11573, BY MR. IKARD; PUBLIC LAW 86–774, SIGNED SEPTEMBER 13, 1960

As it became public law, this legislation incorporated not only the provisions of the House bill as reported by the Committee on Ways and Means, which provided for the duty-free entry of an electron microscope for the use of William Marsh Rice University of Houston, Tex., and an electron microscope for the use of the University of Colorado Medical Center, Denver, Colo., but also two Senate amendments which were accepted by the House providing for, first, the duty-free importation of certain equipment by Kansas State University for a pilot-plant grain and flour milling installation; and, second, an amendment to section 809(g) of the National Housing Act, designed to afford housing at the research and development installation of the Atomic Energy Commission in Los Alamos County, N. Mex.

H.R. 11748, BY MR. MACHROWICZ; PUBLIC LAW 86–606, SIGNED JULY 7, 1960

This legislation, as reported to the House by the Committee on Ways and Means, provided for the continuation of the existing suspension of duties on metal scrap for a period of 1 year, to the close of June 30, 1961. The Senate, in addition to approving the provisions of the House bill, added three new sections to the bill, which were accepted by the House in conference. As the bill became law, in addition to the provisions relating to metal scrap, the legislation provided, first, for a separate tariff classification for certain fresh or frozen coconut; second, for the free importation of tight barrelheads of softwood; and, third, for the withdrawal of certain supplies for vessels and aircraft operating between Alaska and Hawaii and the mainland United States free of customs duty and excise tax.

H.R. 12659, BY MR. IKARD; PUBLIC LAW 86–795, SIGNED SEPTEMBER 15, 1960

As reported to the House by the Committee on Ways and Means, this bill provided for the temporary suspension, for a 3-year period, of the import duty on heptanoic acid. This type of acid is used in the making of special lubricants and brake fluids for use in such important products as military aircraft. The committee was advised by the Department of Commerce that there is no domestic production of this acid, and the U.S. consumption is dependent entirely on imports.

The Senate approved the provisions of the House bill, and added a new section relating to the definition of "waterproof cloth" under paragraph 907 of the Tariff Act of 1930, as amended. The amendment of the Senate was accepted by the House in conference, and became public law as a part of this legislation.

MISCELLANEOUS

H.R. 4029, BY MR. KING OF CALIF.; PUBLIC LAW 86–478, SIGNED JUNE 1, 1960

This legislation amended the sections of the Internal Revenue Code of 1954 which were developed from the National Firearms Act. The primary purpose of that act was to facilitate the control of weapon utilization by gangster and other underworld characters. The purpose of this bill was to eliminate the interference of this police regulation of these weapons with sport and recreational utilization without jeopardizing the deterrence to improper and unlawful uses. The legislation, the provisions of which were worked out in conferences with representatives of the Internal Revenue Service and law enforcement agencies, will be of benefit to gun collectors, rifle associations, and persons having an avocation involving firearms, without interfering with the effective administration of the National Firearms Act taxes. As a result of the conferences on this legislation, a number of features were incorporated in the bill which were designed to aid in enforcement and simplify the administration of these provisions.

H.R. 8685, BY MR. MILLS; PUBLIC LAW 86–368, SIGNED SEPTEMBER 22, 1959

The purpose of this bill, which became law as amended by the Committee on Ways and Means, was to provide that the Assistant General Counsel for the Treasury Department who is to be the Chief Counsel for the Internal Revenue Service is to be appointed by the President by and with the advice and consent of the Senate. The office of Assistant General Counsel serving as Chief Counsel of the Internal Revenue Service, which the new office replaces, was filled by an appointee of the Secretary of the Treasury. The basic compensation rate of the new officer will be $19,000.

Enactment of this legislation was favored by the Treasury Department.

S. 2282, BY SENATOR SALTONSTALL AND SENATOR KENNEDY; PUBLIC LAW 86–371, SIGNED SEPTEMBER 23, 1959

The purpose of this legislation was to provide that no department or agency of the United States shall accept compensation from any State or territory for withholding State or territorial income taxes. Enactment of this bill had become necessary because of a newly enacted State law providing for compensation to employers who withhold State taxes from their employees, and in the absence of legislation to the contrary, there was doubt as to the power of the executive departments or their officers to decline to accept compensation due to the United States. There are compelling reasons against the wisdom of such acceptance. After consideration, the Committee on Ways and Means agreed to the Senate amendment, and so indicated on the floor of the House, without filing a committee report, whereupon the bill was passed and sent directly to the President.

APPENDIX I

Status of bills referred to the Committee on Ways and Means on which legislative action was taken, 86th Cong.

No. and author of bill	Title	Reported	Passed House	Reported in Senate	Passed Senate	Sent to conference	Conference report agreed to in—		Date approved	Law No.
							House	Senate		
H.R. 5 Mr. Boggs	To amend the Internal Revenue Code of 1954 to encourage private investment abroad and thereby promote American industry and reduce Government expenditures for foreign economic assistance.	Feb. 19, 1960 H. Rept. 1282*	May 18, 1960*							
H.R. 10 Mr. Keogh	To encourage the establishment of voluntary pension plans by self-employed individuals.	Feb. 24, 1959 H. Rept. 64*	Mar. 16, 1959 under suspension of rules	June 17, 1960 S. Rept. 1615*						
H.R. 47 Mr. Boggs	To amend the Internal Revenue Code of 1954 to provide a personal exemption for children placed for adoption.	Aug. 10, 1959 H. Rept. 816*	Aug. 18, 1959	Sept. 8, 1959 S. Rept. 913*	Sept. 10, 1959*	Sept. 14, 1959.—House agreed to Senate amendments			Sept. 23, 1959	86-376
H.R. 135 Mr. Keogh	To provide an income credit in the case of civil service annuities received by nonresident alien individuals not engaged in trade or business within the United States.	Aug. 24, 1959 H. Rept. 980*	Aug. 25, 1959	Jan. 19, 1960 S. Rept. 1028*	Mar. 28, 1960	Apr. 11, 1960.—House agreed to Senate amendment			Apr. 22, 1960	86-437
H.R. 137 Mr. Keogh	To allow a deduction, for Federal estate tax purposes, in the case of certain transfers to charities which are subjected to foreign death taxes.	Feb. 26, 1959 H. Rept. 82*	Mar. 23, 1959	July 8, 1959 S. Rept. 483*	July 24, 1959	Aug. 10, 1959.—House agreed to Senate amendment			Aug. 21, 1959	86-175
H.R. 147 Mr. Keogh	To suspend temporarily the tax on the processing of palm oil, palm-kernel oil, and fatty acids, salts, and combinations or mixtures thereof.	Feb. 24, 1959 H. Rept. 65	Mar. 23, 1959	May 7, 1959 S. Rept. 241	May 20, 1959				May 29, 1959	86-37
H.R. 213 Mr. Patman	To provide that certain State agreements under sec. 218 of the Social Security Act may be modified to secure coverage for nonprofessional school district employees without regard to the existing limitations upon the time within which such a modification may be made.	Feb. 24, 1959 H. Rept. 66*	Mar. 23, 1959*	Apr. 10, 1959 S. Rept. 159*	July 24, 1959*	Aug. 20, 1959	Sept. 3, 1959 Conference Rept. 1107	Sept. 1, 1959	Sept. 16, 1959	86-284
H.R. 529 Mr. Karsten	To discharge more effectively obligations of the United States under certain conventions and protocols relating to the institution of controls over the manufacture of narcotic drugs, and for other purposes.	Aug. 26, 1959 H. Rept. 1053*	Sept. 9, 1959	Feb. 4, 1960, S. Rept. 1077*	Mar. 28, 1960	Apr. 11, 1960.—House agreed to Senate amendments			Apr. 22, 1960	86-29
H.R. 1217 Mr. Bentley	To amend the Tariff Act of 1930 to provide for the free importation of amorphous graphite.	Sept. 3, 1959 H. Rept. 1143*	Feb. 2, 1960, under suspension of rules	May 3, 1960 S. Rept. 1332	May 5, 1960				May 13, 1960	86-453
H.R. 1219 Mr. Bentley	To amend sec. 2038 of the Internal Revenue Code of 1954 (relating to revocable transfers).	Feb. 26, 1959 H. Rept. 83	Mar. 23, 1959	July 8, 1959 S. Rept. 478	July 24, 1959				Aug. 7, 1959	86-141
H.R. 1925 Mr. King of California	To extend to fishermen the same treatment accorded farmers in relation to estimated income tax.	June 28, 1960 H.Rept. 2016*	June 29, 1960							
H.R. 2164 Mr. Forand	To repeal the cabaret tax	Aug. 10, 1959 H. Rept. 817*	Sept. 1, 1959 Under suspension of rules	Feb. 17, 1960 S. Rept. 1084	Mar. 29, 1960				Apr. 8, 1960	86-422
H.R. 2397 Mr. Forand	To amend the Internal Revenue Code of 1939 to provide a credit against the estate tax for Federal estate taxes paid on certain prior transfers in the case of decedents dying after Dec. 31, 1947.	June 28, 1960 H. Rept. 2019	June 29, 1960							
H.R. 2411 Mr. Magnuson	To amend par. 1629 of the Tariff Act of 1930 so as to provide for the free importation of tourist literature.	Feb. 24, 1959 H. Rept. 68	Mar. 23, 1959	Aug. 11, 1959 S. Rept. 665*	Aug. 25, 1959*	Sept. 3, 1959.—House agreed to Senate amendments			Sept. 14, 1959	86-262
H.R. 2573 Mr. Yates	To amend the Internal Revenue Code of 1954 with respect to the application of the estate tax marital deduction to widow's allowance or award.	Aug. 10, 1959 H. Rept. 818*	Aug. 18, 1959							
H.R. 2886 Mr. Keogh	To suspend for 3 years the import duties on certain classifications of spun silk yarn.	Aug. 14, 1959 H. Rept. 897*	Aug. 18, 1959	Aug. 25, 1959 S. Rept. 811	Aug. 27, 1959				Sept. 8, 1959	86-235
H.R. 2906 Mr. McCormack	To extend the period for filing claims for credit or refund of overpayments of income taxes arising as a result of renegotiation of Government contracts.	Feb. 25, 1959 H. Rept. 74*	Mar. 23, 1959	Aug. 11, 1959 S. Rept. 663*	Aug. 18, 1959	Aug. 25, 1959	Sept. 3, 1959 Conference Rept. 1105	Sept. 1, 1959	Sept. 16, 1959	86-280
H.R. 3151 Mr. Curtis of Missouri	Relating to withholding, for purposes of the income tax imposed by certain cities, on the compensation of Federal employees.	Aug. 11, 1959 H. Rept. 872	Sept. 1, 1959 Failed of passage under suspension of the rules Feb. 17, 1960 Passed House							
H.R. 3176 Mr. Harrison	To amend sec. 4071 of the Internal Revenue Code of 1954 (re imposition of tax on tires and inner tubes).	Aug. 15, 1960 H. Rept. 2093*								
H.R. 3392 Mr. Watts	Relating to the duty free imports of Philippine tobacco	Aug. 15, 1960 H. Rept. 2094*	Aug. 24, 1960							
H.R. 3472 Mr. Forand	To repeal sec. 1505 of the Social Security Act so that in determining eligibility of Federal employees for unemployment compensation their accrued annual leave shall be treated in accordance with State laws, and for other purposes.	Feb. 25, 1959 H. Rept. 80*	Mar. 23, 1959	Mar. 2, 1960 S. Rept. 1154*	Mar. 28, 1960	Apr. 11, 1960.—House agreed to Senate amendment			Apr. 22, 1960	86-442

*With amendments.

Summary of Veterans' Legislation, 86th Congress

EXTENSION OF REMARKS
OF

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. TEAGUE of Texas. Mr. Speaker, I am inserting for the information of the Members of Congress material showing the status of veterans' legislation at the end of the 2d session of the 86th Congress, along with certain general information relative to various veterans' programs which I believe will be helpful to Members:

SUMMARY OF VETERANS' LEGISLATION REPORTED, 86TH CONGRESS

LAWS ENACTED

Public Law 86–73 (H.R. 2256): Makes $100 million available to the Administrator of Veterans' Affairs, upon his request, for immediate use in the direct-loan program for the purpose of reducing existing waiting lists. Provides that the interest rate on guaranteed and direct loans may be set at a rate not to exceed 5¼ percent per annum and repeals provision of law requiring that VA interest rate be not less than one-half percent below FHA rate. Makes certified agents of Federal Housing Administrator eligible to make VA automatic loans if approved by the Veterans' Administration. Authorizes the Administrator of Veterans' Affairs to refuse to appraise homes for builders and lenders suspended by FHA. (Approved June 30, 1959.)

Public Law 86–103 (H.R. 5447): Extends for a period of 10 years, to June 30, 1970, the existing authority of the Administrator of Veterans' Affairs to maintain offices in the Republic of the Philippines. (Approved July 25, 1959.)

Public Law 86–109 (H.R. 5446): Requires that Veterans canteen service pay reasonable charges for the use of space, buildings, and structures furnished by the Veterans' Administration, the amount of charges to be determined by the Administrator of Veterans' Affairs. (Approved July 28, 1959.)

Public Law 86–113 (H.R. 3269): Liberalizes statutory bar to benefits available to a veteran discharged during a period of hostilities on his own application or solicitation as an alien by presuming that he was not so discharged in the absence of affirmative evidence establishing the fact. (Approved July 28, 1959.)

Public Law 86–116 (H.R. 269): Grants to employees of the Manila, Republic of the Philippines, office of the Veterans' Administration, who are U.S. citizens, certain allowances and benefits similar to those enjoyed by Foreign Service personnel—transportation, home leave, etc. (Approved July 28, 1959.)

Public Law 86–146 (H.R. 6319): Restricts payment, upon death of an incompetent veteran, of gratuitous veterans' benefits deposited in the "personal funds of patients' trust fund" to wife, child, and dependent parent rather than paying to personal representative. Provides that an incompetent veteran receiving hospital care at public expense and having neither wife nor child shall have any gratuitous VA payments stopped when his estate reaches $1,500 and such payments shall not be resumed until the estate is reduced to $500. Payments may be made for the needs of a dependent parent or parents. Where State institutions charge for the care of a veteran patient, payment out of the benefit is permitted. (Approved August 7, 1959.)

Public Law 86–150 (S. 906): Provides that, for veterans of the Korean conflict, receiving education or training under the "Korean GI bill," a change from the pursuit of one program to the pursuit of another will not be considered a change of program if the first program is prerequisite to, or generally required for, entrance into pursuit of the second. As an example, where a veteran may have declared his educational objective to be the attainment of a master's degree and he later decides that he wishes to attain a doctor's degree, this change of objective would not be considered a change of program. (Approved August 11, 1959.)

Public Law 86–152 (S. 1694): Extends authority of the Veterans' Administration to provide hospital and medical care abroad to include U.S. citizens temporarily residing abroad who require hospital care and medical treatment for peacetime service-incurred disabilities. (Approved August 11, 1959.)

Public Law 86–187 (H.R. 267): Increases the presumptive period for service connection for the disease of multiple sclerosis from the present 2-year period to 3 years. (Approved August 25, 1959.)

Public Law 86–188 (H.R. 271): Provides that Hansen's disease (leprosy) developing to a degree of 10 percent within 3 years from the date of a veteran's separation from the service shall be considered to be service connected. (Approved August 25, 1959.)

Public Law 86–195 (H.R. 2405): Includes as a "child" for purposes of laws administered by the Veterans' Administration (except those relating to insurance and the disposition of personal property of a decedent left upon the premises of a VA facility), one who was a member of the veteran's household at the time of his death and who was adopted by the veteran's spouse within 2 years after death, unless at the time of the veteran's death the child was receiving regular contributions toward his support from some individual other than the veteran or his spouse, or from any public or private welfare organization furnishing services or assistance to children. (Approved August 25, 1959.)

Public Law 86–211 (H.R. 7650): Modifies the pension programs for veterans of World War I, World War II, and the Korean conflict, and their widows and children.

1. Provides a sliding scale of pensions based on the income and dependency status of the recipient. Such scale of pension rates applies to veterans, and to widows and children, as indicated below:

Veteran, no dependents

Annual income		Monthly pension
More than—	But equal to or less than—	
	$600	$85
$600	$1,200	70
$1,200	$1,800	40

Veteran with dependents

Annual income		Monthly pension		
More than—	But equal to or less than—	Veteran and 1 dependent	Veteran and 2 dependents	Veteran and 3 or more dependents
	$1,000	$90	$95	$100
$1,000	$2,000	75	75	75
$2,000	$3,000	45	45	45

Above rates increased by $70 when veteran needs regular aid and attendance. In addition, for this group the Administrator may furnish an invalid lift. (Invalid lift benefit applies to all wars.)

Widow, no child

Annual income		Monthly pension
More than—	But equal to or less than—	
	$600	$60
$600	$1,200	45
$1,200	$1,800	25

Widow, 1 child[1]

Annual income		Monthly pension
More than—	But equal to or less than—	
	$1,000	$75
$1,000	$2,000	60
$2,000	$3,000	40

[1] Plus $15 for each additional child.

No widow, 1 or more children

Annual income equal to or less than (earned income excluded)—	Monthly pension
$1,800	$35 for 1 child and $15 for each additional child.

2. All income, regardless of source, counts except:

(a) payments of the 6 months' death gratuity;

(b) donations from public or private relief or welfare organizations;

(c) payments by VA of pension, compensation, and dependency and indemnity compensation;

(d) payments under policies of U.S. Government life insurance or national service life insurance, and payments of servicemen's indemnity;

(e) lump sum social security death payments;

(f) payments to an individual under public or private retirement, annuity, endowment, or similar plans or programs equal to his contributions thereto;

(g) amounts equal to amounts paid by a widow or child of a deceased veteran for—

(1) his just debts,

(2) the expenses of his last illness, and

(3) the expenses of his burial to the extent such expenses are not reimbursed by VA;

(h) proceeds of fire insurance policies.

3. The income of the spouse (if not estranged) may count as the veteran's income. In determining annual income, where a veteran is living with his spouse, all income of the spouse which is reasonably available to or for the veteran, except $1,200 of such income, shall be considered as the income of the veteran, unless in the judgment of the Administrator to do so would work a hardship upon the veteran.

4. All waived income counts.

5. Discretionary authority granted VA for a finding on the net worth of the veteran or the widow or child which could lead to a determination that the applicant is not eligible for pension because of net worth.

6. Places World War II and Korean conflict widows and children on same basis as widows and children of World War I for purposes of pension eligibility.

7. The pension of a veteran being furnished hospital or domiciliary care by the Veterans' Administration will be reduced to $30 a month after the expiration of 2 full months but the Administrator may apportion to the wife or children the balance of the pension.

8. Under the savings provision, the amendments to title 38, United States Code, will

not apply to pensioners on the rolls on the day before the effective date unless they seek and are granted pension under the amended title 38. Thus, no person on the pension rolls on the day before the effective date shall have his pension reduced or shall be removed from the pension rolls because of the enactment. All persons on the pension rolls on the day before the effective date will be permitted election to the higher rates if they qualify under the new program or may elect to remain on the rolls under the old law.

The rate under the old law, which may be continued if the veteran chooses, is $66.15 per month, except that where the veteran shall have been rated permanently and totally disabled and has been in receipt of pension for a continuous period of 10 years or reaches the age of 65 years and is permanently and totally disabled, the rate is $78.75 per month. A rate of $135.45 per month is authorized in the case of an otherwise eligible veteran who is helpless or blind or so nearly helpless or blind as to need or require the regular aid and attendance of another person. Such pension is not payable to any unmarried person whose annual income exceeds $1,400 or to any married person or any person with minor children whose annual income exceeds $2,700.

In the case of widows and children, the rates under the old law are as follows (subject to income limitations of $1,400 per year if widow has no child and $2,700 if she does; $1,400 for each child if there is no widow):

Widow	$50.40
Widow, 1 child	63.00
Each additional child	7.56
No widow, 1 child	27.30
No widow, 2 children	40.95
No widow, 3 children	54.60
Each additional child	7.56

9. Effective July 1, 1960.

Of all single veterans now receiving pension, 278,000 or 78 percent will receive more money. Sixty percent or 262,000 of the veterans with dependents receive more while 70 percent or a total of 298,000 widows and orphans benefit by passage of this law. Eighty-seven percent of veterans receiving aid and attendance will be increased.

Of all pensioners, married and single veterans, widows and orphans, almost 70 percent, or 838,000 cases, will get a raise; 72,000 cases would be added to the rolls because of the higher income limits; 206,000 cases would be added to the rolls because of equalization of death pension eligibility. The total cases helped would be 1,116,000.

Estimate of cost of Public Law 86–211

[In thousands of dollars]

Year	Total with equalization	Equalization	Total living and deceased veterans	Living veterans	Deceased veterans
1st	$309,076	$154,268	$154,808	$104,730	$50,078
2d	294,323	162,085	132,238	85,333	46,905
3d	265,599	177,719	87,880	47,320	40,560
4th	222,512	201,169	21,343	[1] 9,699	31,042
5th	165,104	232,476	[1] 67,372	[1] 85,722	18,350
5-year total	1,256,614	927,717	328,897	141,962	186,935
Period ending—					
1970	1,698,760	1,955,594	[1] 256,834	[1] 353,358	96,524
1975	1,784,981	2,171,533	[1] 386,552	[1] 326,367	[1] 60,185
1980	2,245,862	2,816,755	[1] 570,893	[1] 474,456	[1] 96,437

1995	4,065	3,956,505	[1] 3,952,440	[1] 3,876,711	[1] 75,729
2000	[1] 558,984	3,792,893	[1] 4,351,877	[1] 4,220,747	[1] 131,130
Total	9,319,200	22,742,655	[1] 13,423,455	[1] 13,189,690	[1] 233,765

[1] Savings.

This law makes no change in requirements under the old pension program as to disability, length of service, age, and unemployability of a veteran. These requirements are as follows:

A veteran of World War I, World War II, or the Korean conflict is eligible for pension if he is permanently and totally disabled from non-service-connected disability not the result of willful misconduct or vicious habits. He must either have served in the active military, naval, or air service for a period of 90 days or more during the applicable period and have been discharged under conditions other than dishonorable, or have been discharged for a service-connected disability.

The determination of permanent total disability is made on a liberal basis. Such rating is granted (where the requirement of permanence is met) when there is a single disability of 60 percent, or two or more disabilities one of which is 40 percent in degree, combined with other disability or disabilities to a total of 70 percent, and unemployability attributed thereto.

Although age alone is not a basis for entitlement to pension, it is considered in association with disability and unemployability in determining permanent and total disability. The aforementioned percentage requirements are reduced on the attainment of age 55 to a 60-percent rating for one or more disabilities, with no percentage requirements for any one disability; at age 60 to a 50-percent rating for one or more disabilities; and at age 65 to one disability ratable at 10 precent or more. When these reduced percentage requirements are met and the disability or disabilities involved are of a permanent nature, a permanent and total disability rating will be assigned, if the veteran is determined to be unable to secure and follow substantially gainful employment by reason of such disability.

A widow's age, disability, or unemployability is not considered in determining her eligibility for a pension, either under the old law or under the provisions of Public Law 86–211. Under the old law, a widow of World War I, World War II, or the Korean conflict is required to meet an annual income limitation of $1,400 if she has no dependents or $2,700 if she has dependents. In addition, the deceased husband of a widow of World War II or the Korean conflict must have had a service-connected disability, although his death was not caused by this disability. Public Law 86–211 removes this latter requirement and places the widows of World War II and the Korean conflict in the same status as widows of World War I veterans. (Approved August 29, 1959.)

Public Law 86–212 (H.R. 255): Makes applicable to a competent veteran who disappears the provisions of existing law which provide that where an incompetent veteran who is receiving compensation for a service-connected disability disappears, the Veterans' Administration may pay to his wife, children, and parents the compensation otherwise payable to such veteran, amounts payable to each not to exceed the amount payable if the veteran had died from a service-connected disability. (Approved September 1, 1959.)

Public Law 86–222 (H.R. 7106): Prior to passage of Public Law 86–222, the Administrator of Veterans' Affairs had authority to forfeit the rights of veterans, widows, children, and dependent parents to all gratuitous benefits under laws administered by the Veterans' Administration. Forfeiture was authorized in two categories:

1. Where the Administrator finds the one claiming benefits has been guilty of mutiny, treason, sabotage, or rendering assistance to an enemy;

2. Where a false or fraudulent statement has been made concerning any claim for benefits.

The forfeiture decision of the Administrator was final and not subject to review in the courts. Forfeiture, if adjudged, forfeits all benefits and continues for the lifetime of the forfeited individual, unless pardoned by the President.

This law continues the authority of the Administrator to forfeit in all cases where the guilty person resides, or is domiciled, outside the jurisdiction of the U.S. courts.

Where the accused resides, or is domiciled, within the United States at the time of the offense, the new law eliminates the authority of the Administrator to impose a forfeiture based upon false or fraudulent statements. Forfeitures previously imposed are not affected. This law also provides for automatic forfeiture of rights to gratuitous veterans' benefits in all cases of conviction of certain specified offenses involving loyalty or security. A Presidential pardon restores the right to benefits.

Authority of the Administrator of Veterans' Affairs to make an apportionment award disability compensation to dependents of veterans in cases of administrative forfeiture for fraud or forfeiture for offenses involving loyalty or security is terminated. (Approved September 1, 1959.)

Public Law 86–236 (H.R. 2773): Provides war orphans' educational assistance to children of veterans of the Spanish-American War who die as the result of a disability incurred or aggravated during that period of war service. (Approved September 8, 1959.)

Public Law 86–239 (H.R. 7373): Expands the program of assistance for severely disabled veterans in acquiring homes equipped with special facilities made necessary by the character of their service-connected disabilities. The bill brings into this program those with compensable permanent and total disabilities incurred when such disability includes (1) blindness in both eyes, having only light perception, plus (2) loss, or loss of use, of one lower extremity such as to preclude locomotion without the aid of a wheelchair. Also, it removes the limitation that where eligibility is based on loss, or loss of use, of both lower extremities that such loss must have been due to certain specified conditions. (Approved September 8, 1959.)

Public Law 86–255 (H.R. 7040): Veterans' Administration appropriations, fiscal year beginning July 1, 1959, and ending June 30, 1960. (For details, see: "Veterans' Administration Appropriations," p. 14. This legislation reported from House Appropriations Committee.) (Approved September 14, 1959.)

Public Law 86-490 (H.R. 276): Authorizes payment to veterans of additional compensation for dependents (based on establishment of a disability rating of not less than 50 percent) from the effective date of the increased percentage evaluation, provided basic proof of dependents is received by Veterans' Administration within 60 days from date of notification of rating action. (Approved June 8, 1960.)

Public Law 86-491 (H.R. 641): Authorizes payment of service-connected death compensation to an otherwise eligible widow of a veteran if she was married to him before the expiration of 15 years after the termination of the period of service in which the injury or disease causing his death was incurred or aggravated. (Approved June 8, 1960.)

Public Law 86-492 (H.R. 7502): The service-connected death benefit of dependency and indemnity compensation is payable to a widow at a monthly rate equal to $112 plus 12 percent of the "basic pay" of her deceased husband. Generally, such basic pay is computed by using the rank of the veteran at the time of his death in active service or last discharge therefrom. The law changes the method of computing basic pay for dependency and indemnity compensation purposes by using a higher rank held in service than that held at the time of a veteran's death in service or his discharge therefrom, if the use of such higher rank would result in a greater benefit to the widow. It applies to cases where the veteran had satisfactorily served on active duty for 6 months or more in such higher rank and was so serving within 120 days of death or discharge. (Approved June 8, 1960.)

Public Law 86-494 (H.R. 9785): Grants gratuitous national service life insurance in a maximum amount of $10,000 to any enlisted person who died as the result of an aviation accident incurred in line of duty while undergoing flight training in the active service of the Army or Navy after October 7, 1940, and before August 4, 1942, if such person would have been eligible for life insurance with premiums paid by the United States had he been serving under an appointment as an aviation cadet. Upon application filed generally within 2 years, the insurance is payable effective from the date of enactment of the bill in monthly installments to a limited class of beneficiaries, if living, and no payment is made to the estate of any person. Liability for such payments to be borne by the national service life insurance appropriation. (Approved June 8, 1960.)

Public Law 86-495 (H.R. 9788): Prohibits the payment or furnishing of benefits under laws administered by the Veterans' Administration to or on account of any child by reason of the death of more than one parent in the same parental line. The law permits a child to elect one or more times to receive benefits by reason of the death of any one parent in the same parental line, thus allowing the child to receive the greater of two or more benefits. Applies only to cases where the death of a parent occurs after the date of enactment thereof. (Approved June 8, 1960.)

Public Law 86-497 (H.R. 10703): Grants waiver of payment of national service life insurance premiums, upon application, in any case in which an insured, during World War II or the early Korean conflict, became totally disabled in line of duty after making application for insurance and prior to the effective date thereof and remained continuously totally disabled to date of death or the date of enactment, whichever is earlier. A waiver of premiums under this law would render the insurance nonparticipating while the waiver is in effect. (Approved June 8, 1960.)

Public Law 86-499 (H.R. 10898): Authorizes payment of additional $12 per month for each child of service-connected disabled war veterans who qualify to receive dependents' allowance (50 percent disabled or more) and 80 percent of that rate for peacetime veterans. (Approved June 8, 1960.)

Public Law 86-501 (H.R. 113): Prohibits the severance of a service-connected disability which has been in effect for 10 or more years, except when based on fraud or when military records clearly show that the individual did not have the requisite character of discharge or service. To be effective January 1, 1962. (Approved June 10, 1960.)

Public Law 86-590 (H.R. 10108): Authorizes reimbursement for ferry fares, and bridge, road, and tunnel tolls, in addition to the mileage allowance payable for the travel of certain Veterans' Administration beneficiaries and their attendants. (Approved July 5, 1960.)

Public Law 86-598 (H.R. 7966): Provides for the furnishing of needed services of optometrists by the Veterans' Administration to veterans having service-connected eye conditions. The Veterans' Administration was authorized to furnish outpatient medical care for veterans with service-connected disabilities prior to enactment of this law. This care is furnished primarily in Veterans' Administration clinics but is supplemented by using the services of fee-basis private physicians where it is not feasible to care for veterans at the clinics. (Approved July 7, 1960.)

Public Law 86-625 (H.R. 10596): Reimburses State homes at the rate of $2.50 per veteran per day (or a maximum of $912.50 a year per veteran) rather than at the rate of $700 per annum, for care of veteran members who are eligible for care in Veterans' Administration hospital or domiciliary facilities. (Approved July 12, 1960.)

Public Law 86-626 (H.R. 11776): Veterans' Administration appropriations, fiscal year beginning July 1, 1960, and ending June 30, 1961. (For details, see: "Veterans' Administration Appropriations," page 14. This legislation reported from House Appropriations Committee.) (Approved July 12, 1960.)

Public Law 86-639 (H.R. 7965): Authorizes the Administrator of Veterans' Affairs to furnish medical services for a non-service-connected disability when reasonably necessary in preparation for admission of a veteran in need of hospital care. Outpatient treatment reasonably necessary to complete treatment incident to a veteran's hospital care is also permitted. (Approved July 12, 1960.)

Public Law 86-663 (H.R. 7211): Establishes a new statutory rate of disability compensation for certain service-connected seriously disabled veterans. A monthly rate of $265 is authorized for a veteran who has a service-connected disability rated as total and (1) has additional service-connected disability or disabilities independently ratable at 60 percent or more, or (2) by reason of his service-connected disability or disabilities is "permanently housebound." (Approved July 14, 1960.)

Public Law 86-665 (H.R. 7903): Extends the World War II loan guarantee program and the World War II and Korean conflict direct loan program for 2 years, from July 25, 1960, to July 25, 1962. Permits processing of loan guarantee applications and closing of direct loans subsequent to July 25, 1962, when applications received (for loan guarantee) or commitments issued (for direct loans) before that date. Authority for Treasury advances to the direct loan revolving fund in the aggregate amount of $150 million per fiscal year (but not more than $50 million in any one quarter) are continued through fiscal years 1961 and 1962. Committee amendment adopted on House floor provides (1) for issuance of guarantee when veteran has in fact occupied house as his home but occupancy certifications were not completed; (2) that a veteran's deposit or downpayment be held by seller in a trust account until the loan is closed; and (3) that a revolving fund be established in the Veterans' Administration. (Approved July 14, 1960.)

Public Law 86-670 (H.R. 9786): Permits Indian war and Spanish-American War veterans to elect to receive aid-and-attendance pension at the rates and under the conditions (except service requirements) applicable to World War I veterans. (See Public Law 86-211, p. 2 of this summary.) (Approved July 14, 1960.)

Public Law 86-721 (H.R. 3313): Amends the Soldiers and Sailors' Civil Relief Act of 1940 to provide that facts may be established by written unsworn statements, declarations, verifications, or certificates which are certified to be true under penalty of perjury. These statements would be in lieu of affidavits which are today required in any court action or proceeding where there is default of any appearance by the defendant. In such a case the claimant shall, prior to entering a judgment, file in the court an affidavit setting forth either (1) that the defendant is not in military service, or (2) that the defendant is in military service, or (3) that the plaintiff is unable to determine the status of the defendant insofar as military service is concerned.

Senate amendment extends vocational rehabilitation program until July 25, 1965, for service-connected disabled veterans of World War II who have been prevented from entering or completing training because: (a) they had not attained, retained, or regained medical feasibility for training because of disability; (b) they had not met the requirement of an honorable discharge but character of discharge was later changed by appropriate authority; or (c) they had not timely established the existence of a compensable service-connected disability. Program is also extended for those veterans in training on June 1, 1960, until such time as training is completed. (Approved September 8, 1960.)

Public Law 86-785 (H.R. 4306): Provides educational assistance for the children of persons who die as the direct result of armed conflict or while engaged in extrahazardous service (including such service under conditions simulating war) during the period after January 31, 1955, and before the end of compulsory military service.

Senate committee amendment extends eligibility to children of persons who die as the result of disabilities incurred in the performance of duty and specifies conditions under which training by open-circuit television may be allowed. (Approved September 14, 1960.)

PASSED HOUSE AND PASSED SENATE WITH AMENDMENT, RETURNED TO HOUSE FOR CONSIDERATION OF AMENDMENT

H.R. 1104: Provides a new plan of insurance for national service life insurance (NSLI) policyholders. The plan is modified life insurance which provides a level premium throughout the life of the insured but the face value of the policy will be automatically reduced by 50 percent at the end of the day preceding the insured's 65th birthday. The face value of any extended term insurance in force under the modified life policy would also be reduced by 50 percent at that time. The plan is permissive. Policyholders may elect to retain the insurance otherwise lost at age 65 by paying premiums for age 65 without medical examination. The modified life plan will provide permanent plan insurance at a lower premium rate than the existing permanent plans of insurance. This is true because the protection is cut in half at age 65 and a

more realistic table is used for calculation of premiums on participating insurance. A comparison of premiums per $1,000 of participating insurance is as follows:

Age	Annual premium for the modified life plan	Annual premium, present rates		Level premium after age 65	
		5 LPT	O.L.	If 50 percent face continued	If 100 percent face continued
30	$9.83	$8.41	$18.47	$9.83	$43.22
35	11.72	9.00	21.31	11.72	45.11
40	14.09	10.06	25.10	14.09	47.48
45	17.17	11.72	30.07	17.17	50.56
50	20.84	15.04	36.94	20.84	54.23
55	25.22	20.95	46.53	25.22	58.61
65		47.00	78.97		

Senate amendment permits issuance of national service life insurance to persons eligible to apply between October 8, 1940, and December 31, 1956, both dates inclusive. Application to be submitted in writing within 1 year after January 1, 1961, with proof of good health at time of application. Veterans who served between April 26, 1951, and December 31, 1956, with service-connected disabilities may obtain a special type of policy. Administrative cost and cost of physical examination to be borne by veteran.

House Report No. 1543; April 21, 1960.

Passed House May 2, 1960.

Referred to Senate Finance Committee May 3, 1960.

Senate Report No. 1485; May 26, 1960.

Passed Senate June 2, 1960, with amendment.

PASSED HOUSE, AMENDED BY SENATE, RETURNED TO SENATE BY HOUSE FOR RECONSIDERATION OF AMENDMENTS

H.R. 270: As originally passed by House, increased from $10 to $100 the monthly pension payable to holders of the Congressional Medal of Honor, permits payment at any age instead of the present requirement of attaining the age of 65 years, and pays holders of the medal whether or not they are on active duty.

Senate amendment permitted election of $10 or $100 rate, subject to reduction by the amount of any non-service-connected pension payment received by the veteran. Those veterans receiving compensation or retirement permitted election of $10 or $100 rate, not subject to reduction, but paid in addition to compensation or retirement payments. Age requirement reduced from 65 to 62.

House amendment to Senate amendment reduced qualifying age from 65 to 50 and provided that a veteran receiving non-service-connected aid and attendance pension may receive, in addition, the special $100 a month Medal of Honor pension. Not payable to active duty or retired personnel.

House Report No. 413; June 2, 1959.

Passed House July 20, 1959.

Referred to Senate Finance Committee July 21, 1959.

Senate Report No. 1837, with amendment, August 17, 1960.

Passed Senate August 19, 1960, with amendment.

Passed House August 29, 1960, with amendment to Senate amendment.

BILLS PASSED BY HOUSE, REFERRED TO SENATE COMMITTEES

H.R. 268: Adds "deafness of both ears, having absence of air and bone conduction" to the other types of service-connected disabilities specified in the law pertaining to veterans' disability compensation for which an additional award in the amount of $47 monthly is provided.

House Report No. 411, June 2, 1959.

Passed House August 31, 1959.

Referred to Senate Finance Committee September 1, 1959.

Senate committee action: Tabled April 4, 1960.

H.R. 283: Provides that if a veteran, as a result of service-connected disability, has suffered the anatomical loss or loss of use of one foot, or one hand, or both buttocks, or blindness of one eye, having only light perception, the rate of compensation therefor shall be $47 per month for each such loss or loss of use independent of any other compensation provided in subsections (a) to (j). At present this provision limits payment thereunder to one statutory award of $47 per month for all such losses, except where the losses are in addition to other combinations of disabilities specified in subsections (l) to (n). Under the bill as reported, the total payment in any case may not exceed $309 and the loss of more than one creative organ would, for this purpose, be considered a single "loss." In peacetime cases the rates are 80 percent of the above-mentioned rates.

House Report No. 415, with amendments, June 2, 1959.

Passed House August 31, 1959.

Referred to Senate Finance Committee September 1, 1959.

Senate committee action: Tabled April 4, 1960.

H.R. 5996: Authorizes payment in a lump sum of the total amount of compensation, representing the statutory awards of $47 monthly for the anatomical loss or loss of use of a creative organ and $67 monthly for arrested tuberculosis disease, which would have been payable for the period August 1, 1952, to date of bill's enactment had claim therefor been filed on August 1, 1952 (the effective date of Public Law 427, 82d Cong., which first provided such statutory awards for World War II and Korean conflict veterans). Applies to all cases in which the condition was determined, before August 1, 1952, as service connected, and would require reduction of the amount payable by any such statutory awards paid during that period.

House Report No. 419; June 2, 1959.

Passed House July 20, 1959.

Referred to Senate Finance Committee July 21, 1959.

Senate committee action: Tabled April 4, 1960.

H.R. 8098: Permits the combination, or tacking, of two or more separate periods of service during more than one period of war in satisfying the 90-day service requirement for payment of non-service-connected disability or death pension to veterans and their widows and their children.

House Report No. 1536; April 21, 1960.

Passed House May 2, 1960.

Referred to Senate Finance Committee May 3, 1960.

H.R. 9792: Provides that the salaries of managers of Veterans' Administration hospitals, domiciliaries, and centers shall be not less than $16,500 per annum and the salaries of directors of professional services shall be $16,250 per annum.

House Report No. 1539; April 21, 1960.

Passed House May 16, 1960.

Referred to Senate Committee on Post Office and Civil Service May 17, 1960.

H.R. 12566: Requires that decisions of the Board of Veterans' Appeals shall be in writing and shall contain findings of fact and conclusions of law separately stated.

House Report No. 2030; June 29, 1960.

Passed House August 23, 1960.

Referred to Senate Finance Committee August 24, 1960.

BILLS REFERRED TO HOUSE COMMITTEE FOLLOWING PASSAGE BY SENATE

S. 1138: Provides readjustment benefits to persons with more than 180 days of service, entering the service after January 31, 1955, and before the termination of compulsory military service (July 1, 1963), as follows:

1. Education and vocational training;
2. Vocational rehabilitation (for veterans with service-connected disabilities); and
3. Guaranteed and direct-loan assistance for the purchase of a home or farmlands, livestock, machinery, etc., to be used in farming operations conducted by the veteran.

S. 1138, 86TH CONG. (AS PASSED BY THE SENATE ON JULY 21, 1959)

TABLE 1.—*Sec. 2. Education and training—Estimate of expenditures for direct benefits and monthly average trainees* [1]

Fiscal year	Expenditures for direct benefits			Monthly average trainees				
	Total	Educational loans [2]	Grants	Total	College	Below college	Job	Farm
1961	$178,000,000		$178,000,000	134,000	76,000	47,000	8,000	3,000
1962	360,000,000	$25,000,000	325,000,000	271,000	128,000	108,000	22,000	13,000
1963	379,000,000	37,000,000	342,000,000	285,000	134,000	114,000	24,000	13,000
1964	375,000,000	34,000,000	341,000,000	281,000	128,000	116,000	24,000	13,000
1965	362,000,000	39,000,000	323,000,000	272,000	124,000	112,000	23,000	13,000
1966	359,000,000	38,000,000	321,000,000	269,000	121,000	112,000	23,000	13,000
1967	322,000,000	38,000,000	284,000,000	242,000	109,000	104,000	18,000	11,000
1968	247,000,000	31,000,000	216,000,000	186,000	84,000	81,000	12,000	9,000
1969	182,000,000	24,000,000	158,000,000	137,000	62,000	61,000	8,000	6,000
1970	130,000,000	18,000,000	112,000,000	98,000	45,000	44,000	4,500	4,500
1971	90,000,000	13,000,000	77,000,000	67,000	32,000	30,000	2,000	3,000
1972	58,000,000	9,000,000	49,000,000	44,000	21,000	20,000	1,000	2,000
1973	37,000,000	6,000,000	31,000,000	27,500	13,500	12,500	500	1,000
Total [3]	3,079,000,000	312,000,000	2,767,000,000					

[1] This estimate assumes enactment early in fiscal year 1961, prior to the beginning of the school year. Amounts which might be expended because of retroactive payments for training subsequent to Sept. 1, 1959, as currently provided in the proposal, are not included in the estimate. With retroactive payments for fiscal year 1960, approximately $46,000,000 additional would be expended for grants, and approximately $10,000,000 of the total expenditures shown for fiscal year 1961 would be for loans.

[2] Assumes persons taking loans would take as much as they would have received on a grant basis.

[3] Total is through fiscal year 1973 only. Additional expenditures for direct benefits beyond fiscal year 1973 have not been estimated. The program will continue for several years beyond fiscal year 1973.

TABLE 2.—*Sec. 3. Vocational rehabilitation—Estimate of expenditures for direct benefits and monthly average trainees* [1]

Fiscal year	Expenditures for direct benefits	Monthly average trainees
1961	$6,000,000	3,200
1962	13,000,000	6,800
1963	18,000,000	9,000
1964	19,000,000	9,800
1965	19,000,000	9,900

[1] These estimates assume that there will be no concurrent readjustment education and training program. Participation and cost would be reduced to approximately ½ the amounts shown if there is a concurrent readjustment education and training program.

Administrative costs, including counseling and beneficiary travel, would approximate one-sixth of the direct benefit cost.

S. 1138, 86th Cong. (as passed by the Senate on July 21, 1959)

TABLE 3.—*Sec. 4. Home and farm loan benefits*

Participating veterans [1]—1,000,000–1,250,000
Administrative cost—$40,000,000–$50,000,000

[1] Assumes that the number of entries into the Armed Forces continues at approximately the present rate and that from 3 to 4 million veterans will become eligible for the loan benefits.

The cost to the Government of the proposed extension of the loan guaranty benefits is not subject to precise estimate. It is quite problematical whether a one-half of 1 percent fee (the maximum permitted by the bill) would be adequate for offsetting the expenses resulting from claims under the guarantee and the subsequent expenses which might result from acquisition of properties, their management and sale. To the extent that the mortgage guarantee fund, which would be derived primarily from such fees, proved inadequate to meet these expenses, they would be paid out of appropriated funds.

No additional direct loan funds would be provided by the bill beyond those which will be available under present law for the World War II and Korean veterans. Hence, no additional direct loans would be authorized, but there would be an increased demand for the limited amount of direct loan money available.

Senate Report No. 514, July 14, 1959.

Passed Senate July 21, 1959, with amendment.

House committee action: Hearings, February 23–26, March 3, 4, 9, and 14, 1960.

S. 2201: Proposes to amend the definition of the term "Veterans' Administration facilities" contained in 38 U.S.C. 601(4)(C) to include private contract facilities for veterans of any war in a State if (1) no Veterans' Administration hospital is located in the State on the effective date of the act, and (2) no Veterans' Administration hospital is located within 500 miles of the border of the State.

This would permit the use of private contract hospitals for the care of war veterans with non-service-connected disabilities in the State of Alaska. Hawaii having become a State, private hospitals there could also be used for hospitalization of veterans with non-service-connected disabilities.

Senate Report No. 1730, June 24, 1960.

Passed Senate June 28, 1960.

Referred to House Committee on Veterans' Affairs June 29, 1960.

BILLS REPORTED BY HOUSE COMMITTEE, FAILED TO PASS HOUSE

H.R. 12653: Establishes a Court of Veterans' Appeals consisting of five judges to be appointed by the President with the advice and consent of the Senate. Judges are to be appointed for 10-year terms.

The bill also authorizes the court to appoint not more than 50 commissioners. The commissioners shall perform such duties as the court may prescribe, including the conducting of hearings, the receiving of evidence, and the making of such reports as the court may prescribe.

The court is given exclusive jurisdiction to review by appeal decisions of the Board of Veterans' Appeals except in cases involving life insurance contracts, housing or business loans where jurisdiction is now vested in the U.S. courts.

The decisions of the court shall be final. This, for the first time, subjects decisions of the Administrator of Veterans' Affairs to review by a separate and independent agency.

House Report No. 2031, June 29, 1960.

Passed over, August 23, 1960, House Consent Calendar.

Estimated distribution of compensation and pensions, fiscal years 1960 and 1961

	Fiscal year 1960			Fiscal year 1961		
	Total	Living	Deceased	Total	Living	Deceased
Compensation (service-connected), total	$2,043,731,000	$1,563,904,000	$479,827,000	$2,066,288,000	$1,581,394,000	$484,894,000
Spanish-American War	1,794,000	542,000	1,252,000	1,774,000	509,000	1,256,000
World War I	264,463,000	204,019,000	60,444,000	252,334,000	190,172,000	62,162,000
World War II	1,422,747,000	1,102,476,000	320,271,000	1,437,509,000	1,119,059,000	318,450,000
Korean conflict	227,396,000	178,070,000	49,326,000	236,698,000	186,310,000	50,388,000
Peacetime service	127,331,000	78,797,000	48,534,000	137,973,000	85,344,000	52,629,000
Pensions (non-service-connected), total	1,202,539,000	848,676,000	353,863,000	1,715,807,000	1,144,796,000	571,011,000
Yellow fever experiments	5,000	5,000		5,000	5,000	
Mexican War	2,000		2,000	2,000		2,000
Indian wars	615,000	83,000	532,000	574,000	63,000	511,000
Civil War	2,775,000	3,000	2,772,000	3,012,000	2,000	3,010,000
Spanish-American War	103,131,000	41,826,000	61,305,000	99,042,000	41,761,000	57,281,000
World War I	978,312,000	727,188,000	251,124,000	1,316,093,000	991,824,000	324,269,000
World War II	110,049,000	73,781,000	36,268,000	279,897,000	102,008,000	177,889,000
Korean conflict	7,579,000	5,744,000	1,835,000	17,112,000	9,090,000	8,022,000
Peacetime service (private acts)	71,000	46,000	25,000	90,000	43,000	27,000
Other—Total	60,730,000	17,659,000	43,071,000	57,905,000	13,407,000	44,498,000
Emergency officer's disability retirement (World War I)	3,408,000	3,408,000		3,406,000	3,406,000	
Adjusted service and dependent's pay	1,000		1,000	1,000		1,000
Subsistence allowance for disabled veteran trainees	14,151,000	14,151,000		9,916,000	9,916,000	
Initial burial allowances	43,070,000		43,070,000	44,497,000		44,497,000
Special allowance, dependents (70 Stat. 857)	100,000	100,000		85,000	85,000	
Program total	3,307,000,000	2,430,239,000	876,761,000	3,840,000,000	2,739,597,000	1,100,403,000

VETERANS IN AMERICA

Population of veterans

America's population of living veterans is over 22,500,000.

About two-thirds, or more than 15 million served in World War II. They average nearly 42 years of age.

Almost 5,500,000—average age 31—served during the Korean conflict period. Approximately 960,000 of them are "double duty" veterans, serving both in World War II and the Korean conflict.

Less than 2,700,000—average age 66—served in World War I.

Spanish-American War veterans—average age 83—number 36,000. Less than 50 oldtimers served in the Indian wars. Their average age is 91 years.

The Nation's veterans, together with their families and survivors of deceased veterans, make up about 45 percent of the total population of the United States.

MEDICINE

VA operates 170 hospitals for the care of ill and disabled veterans. On any average day, VA's patient load exceeds 114,000. During an average year, VA admits nearly half a million veterans in its hospital program.

Admissions are under a priority system.

First call goes to veterans with service-connected conditions. Generally, the service-connected are admitted immediately.

And next—if beds are available—come veterans with non-service-connected ailments who are unable to pay for private hospitalization. In addition to signing a statement of inability to pay, they also must submit a statement of their assets and liabilities.

INSURANCE

Approximately 6 million veterans today hold GI insurance policies valued at over $42 billion. The breakdown:

Nearly 5 million World War II veterans hold $34.7 billion of participating national service life insurance; 620,000 Korea veterans hold $5.9 billion of special nonparticipating national service life insurance; 43,000 disabled Korea and post-Korea veterans hold $380 million of special nonparticipating insurance—the only type that may now be newly issued; 275,000 World War I veterans hold $1.4 billion of participating U.S. Government life insurance.

GI LOANS

Eligibility: Any person who served in the armed services at any time on or after September 16, 1940, and prior to July 26, 1947, or on or after June 27, 1950, and prior to February 1, 1955, discharged under conditions other than dishonorable after active service of 90 days or more or because of disability incurred in line of duty is eligible. Generally loans, or applications for guarantee, must be made prior to July 26, 1962, for World War II veterans; veterans of Korea have until January 31, 1965. Widows of deceased veterans whose death was due to service may also qualify.

Amounts: Non-real-estate loans up to $2,000 and real-estate loans in certain cases up to $7,500, or a prorated portion thereof, or loans of both types or combinations thereof, may be guaranteed with interest at not more than 5¼ percent per annum, repayable in not more than 30 years, except in the case of farm realty, which may run for 40 years. (Maturity on non-real-estate loan may not exceed 10 years.) If the proceeds of the loan are to be used for the acquisition of residential property, the amount guaranteed may be 60 percent of the loan but not over $7,500. Banks or other lending institutions make the loans, with the Government guaranteeing 50 or 60 percent of the loan, but in no case to exceed the above amounts. Under certain conditions, Veterans' Administration is authorized to lend, until July 25, 1962, up to $13,500 directly to the veteran when private sources are not available.

Under this program, veterans of World War II and the Korean conflict have borrowed more than $48 billion for homes of their own. VA has guaranteed more than half of this amount, or $26 billion.

The record established by veterans in meeting their GI loan obligations is unparalleled.

So far, veterans have repaid in full nearly 1,600,000 GI loans having a total value of $10 billion.

Defaults on GI loans—for which VA has had to make good the guaranteed portions to lenders—number a mere 61,000, or slightly more than 1 percent of the total number of loans granted.

EDUCATION

More than 10½ million veterans so far have trained under the four programs. That's more than three times the total enrollments in every college and university in the United States of America.

Of the 10½ million total—

More than 7,800,000—one-half of all World War II veterans—trained under the World War II GI bill. Of them, 44 percent went to schools below the college level (such as trade and technical schools); 29 percent studied in college, and the rest trained on the job and on the farm.

Another 2,330,000—more than 2 out of every 5 Korea veterans—trained under the Korean GI bill. Their numbers will grow (the program doesn't end until 1965).

A new trend has developed under the Korean GI bill. Fewer veterans have attended schools below the college level (36 percent), and more have gone to college (more than 50 percent). Enrollments in on-the-job and on-the-farm courses account for the balance.

Another 615,000 disabled World War II veterans and 64,000 disabled Korea veterans have received vocational rehabilitation training. Some 40 percent have trained for top-level jobs in professional and managerial fields.

It has helped raise the educational level of veterans to better than 4 years of high school, whereas the level of nonveteran males, same age group, is but 2 years of high school. "Your every voter, as surely as your chief magistrate, exercises a public trust," said Grover Cleveland. Through more education, veterans have become better prepared to exercise this public trust.

It has helped build up America's reservoirs of trained manpower, so urgently needed for our Nation's strength and well-being. This country has gained immeasurably from the 478,000 engineers, 391,000 schoolteachers, 275,000 in the medical and related fields (130,000 doctors, dentists, nurses), and 140,000 scientists who learned their skills under the GI bill and the vocational rehabilitation programs.

Approximately 20,000 war orphans have trained since the war orphans educational assistance program began in the fall of 1956. Of these, 79 percent trained in college and

the rest in schools below the college level. Approximately 1 in 6 had selected objectives in the scientific field. Of the 1,400 training in the medical and related fields, more than 900 were female students most of whom selected the field of nursing. Almost all of the 1,100 training to be engineers were males. More than 500 trained to be scientists. Approximately 2,300 trained to be schoolteachers.

NUMBER OF PARTICIPANTS AND DEATHS IN SERVICE DURING ALL WARS; NUMBER OF LIVING VETERANS, AND VETERANS AND DEPENDENTS ON COMPENSATION AND PENSION ROLLS, JUNE 30, 1960

Revolution (1775–83): Participants, 395,000; deaths in service, 4,000; last veteran died April 5, 1869, at age 109; last dependent died 1906, at age 92.

War of 1812 (1812–14): Participants, 536,000; deaths in service, 2,000; last veteran died May 13, 1905, at age 105; last dependent died 1946.

Mexican War (1846–48): Participants, 130,000; deaths in service, 13,000; last veteran died September 3, 1929, at age 98. Dependents on compensation and pension rolls: Widows, two; children, one.

Civil War (1861–65) (Union forces only): Participants, 2,213,000; deaths in service, 364,000; last veteran died August 2, 1956, at age 109. Veterans and dependents on compensation and pension rolls (Union and Confederate forces): Widows, 3,164; childern, 749.

Indian Wars (approximately 1860–98): Participants, 106,000; deaths in service, 1,000; living veterans, 44. Veterans and dependents on compensation and pension rolls: Widows, 665; children, 21; veterans, 44.

Spanish-American War (1898–1902): Participants, 392,000; deaths in service, 11,000; living veterans, 36,000. Veterans and dependents on compensation and pension rolls: Parents, 2; widows, 77,395; children, 2,336; veterans, 33,373.

World War I (1917–18): Participants, 4,744,000; deaths in service, 131,000; living veterans, 2,673,000. Veterans and dependents on compensation and pension rolls: Parents, 10,889; widows, 435,240; children, 78,511; veterans, 1,025,730.

World War II (Sept. 16, 1940–July 25, 1947): Participants, 16,535,000 [1]; deaths in service, 409,000; living veterans, 15,202,000.[2] Veterans and dependents on compensation and pension rolls: Parents, 252,030; widows, 93,664; children, 189,615; veterans, 1,633,451.

Korean conflict (June 27, 1950–January 31, 1955): Participants, 6,807,000 [1]; deaths in service, 54,000; living veterans, 5,482,000.[2] Veterans and dependents on compensation and pension rolls: Parents, 36,771; widows, 10,843; children, 22,579; veterans, 212,857.

Total, all wars: Participants,[3] 31,858,000; deaths in service, 989,000; living veterans, 22,534,000.[4] Veterans and dependents on compensation and pension rolls: Parents, 317,805,[5] widows, 638,065 [6]; children, 306,115 [7]; veterans, 3,008,935.[4]

[1] Includes 1,476,000 who served in both World War II and the Korean conflict.

[2] Includes 962,000 with service in both World War II and the Korean conflict.

[3] Persons who served in more than one war are counted as participants in each.

[4] Includes 103,480 former members of the (peacetime) Regular Establishment who are receiving VA disability compensation.

[5] Includes 18,113 parents of deceased former members of the (peacetime) Regular Establishment.

[6] Includes 17,092 widows of deceased former members of the (peacetime) Regular Establishment.

[7] Includes 12,303 children of deceased former members of the (peacetime) Regular Establishment.

Report to Ohioans

EXTENSION OF REMARKS
OF

HON. JOHN E. HENDERSON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. HENDERSON. Mr. Speaker, at the close of this, my last year in Congress, I desire to continue a previous practice of summarizing the legislative activities of the year, particularly as they affect the people of the 15th District of Ohio whom I represent here. These Ohioans are joining with the millions of other Americans in paying the gigantic cost of supporting the Government and are naturally interested in knowing how their money has been appropriated and what laws have been enacted to increase further this burden upon them. Then, too, they would like to know in what respects the Congress has acted to restrict their freedoms or regiment their activities. The people of southeastern Ohio are not dreamers, but they are not entirely despairing in the thought that Congress might enact legislation which would remove some of the bonds which restrict their freedom of action or lessen the burden of taxation. Legislation in the latter category, unfortunately, seems to be reaching the same point of virtual extinction as the whooping crane.

HOW MUCH WAS APPROPRIATED?

One of the most important functions of the Congress is to appropriate funds for the operation of the Federal Government. During the past session, the Congress focused its attention on the projected fiscal needs for the 12 months beginning July 1, 1960, as well as for funds to supplement the requirements of Federal agencies during the first 6 months of this year. In 19 separate bills, the Congress appropriated $73,634,335,922. These are bills which provide for operating funds. They do not reflect additional millions in backdoor financing, a method devised by the Congress to avoid the yearly review of expenditures by the Appropriations Committees of Congress, and the payment of the interest on the national debt which has now reached $9,316 million annually.

The cost of this $73.6 billion Federal appropriation to the people of the 15th District of Ohio is approximately $414 for each of the residents of our 7 counties. The average taxpaying family of four therefore, can expect its share of the cost will be $1,656.

By far, the greatest amount of these funds were set aside for national defense expenditures in one form or another. While the total cost of our national defense is not reflected only in appropriations for our military forces alone, the funds consigned for the Department of Defense for the next 12 months were $39,337,867,000. This is, of course, a sum far in excess of the total amount required to operate our entire Federal Government only a few short years ago. Thus it is apparent that the price of preparedness and national survival in the world today is tremendously high.

What else did we do besides spend money?

A partial answer to this question can be found in the groundwork laid for spending additional sums in the future. Many of the 417 bills passed during the 124 days of the session carry with them the expectation or requirement that funds will be appropriated to carry out the purposes of the legislation.

It would require much space to explain and analyze in detail all of the bills which were passed. However, it is sufficient for this purpose to outline briefly some of the more important measures enacted into law. They are as follows:

CIVIL RIGHTS

The 1960 legislation authorizes Federal courts, through appointed referees, to safeguard voting rights to all citizens; fixes penalties for the obstruction of court orders and for flight to avoid prosecution for vandalism. It also requires the preservation of Federal election records for 2 years and authorizes arrangements for education of servicemen's children in areas where public schools are closed by disputes over school integration.

INCREASED PAY FOR FEDERAL EMPLOYEES

This measure brought an across-the-board pay increase to all Federal employees.

REDUCED CABARET TAX

The reduction in the cabaret tax from 20 percent to 10 percent was virtually the only tax reduction to emerge from the past session. Without belittling this congressional action and regardless of our attitude toward places of entertainment, there has been no question that this tax has done great harm to the music profession and to the performance of live music in the Nation.

TAX EXTENSIONS

A number of taxes due to expire were extended for 1 more year. Among these were the 52 percent corporate income tax rate and the existing schedule of excise taxes on alcoholic beverages, cigarettes, automobiles and parts, passenger transportation, and telephone calls.

NATIONAL DEBT LIMIT

Legislation authorized raising the temporary limit of $293 billion for the national debt for 1 year to June 30, 1961.

INCOME TAX DEDUCTION

An amendment to the Internal Revenue Code permits an income tax deduction of all medical expenses incurred by any taxpayer as part of the care of a dependent parent over 65 years of age.

VETERANS' LOANS

The authority for direct and guaranteed loans to veterans for homes, farms, or businesses was extended for 2 years to July 25, 1962.

LIBRARY SERVICES

The present Library Services Act was extended for 5 years (to June 30, 1965) to provide mobile library facilities for rural areas.

COAL RESEARCH

Special legislation created an Office of Coal Research to find new uses for coal, encourage production and conservation, and otherwise stimulate the industry.

What can we be thankful for?

Once again, by chance, miracle, or by deft legislative maneuver of the minority, many costly and irresponsible schemes were defeated or failed to receive final favorable consideration. In many such instances, the Nation should be grateful. It is one of the excellent commentaries upon the American lawmaking process that legislative pitfalls—sometimes called safeguards—are available to protect the people's interests from the efforts of their representatives to curry favor in return for political support.

What was done to benefit the 15th District of Ohio?

Insofar as the 15th Congressional District is concerned, appropriations were approved permitting the completion of the Dillon Reservoir on the Licking River. This large project, to provide long-awaited flood control for Zanesville and the Muskingum Valley, will now add the measure of safety the people of the valley have sought for many decades. In addition, new funds allow for the continued work on the Belleville Dam on the Ohio River below Marietta.

What about committee work?

Each Member of Congress is occupied with work of a legislative committee to which he has been assigned. I have served as a member of the Judiciary Committee of the House of Representatives and as ranking minority member on the Subcommittee on Claims. My subcommittee had referred to it and held hearings on a total of 813 bills originating in the House of Representatives and 64 Senate bills in 1960. This assignment has been a busy and extremely time-consuming one. However, the sense of gratification in considering bills largely intended to assist individual Americans has been very great. Other general problems have been considered by the subcommittee in addition to its regular work with special private legislation. Chief among these proposals was the study of the problems encountered by persons over 40 years of age in their search for employment.

In the Judiciary Committee itself, the most important legislation considered this year was the civil rights bill. Another measure which aroused interest throughout the Nation was the proposed amendment to the Constitution to accord residents of the District of Columbia the right to vote for President and Vice President.

What was the theme of the session?

If there was one prevailing theme of the past session, it was, beyond doubt, politics. Politics, more obviously than usual, entered the legislative picture very early in the year. In an election year, the floor of the House of Representatives was utilized as a sounding board for schemes to woo voters, create public images of potential candidates for national office, and to raise issues which might be useful in the campaign later in the year. Thus it often seemed that the creation of issues was a greater motivation than any genuine effort to reach conclusions on legislative programs. There were days and weeks when little or no legislative business was brought before the Congress. Through this time, however, the paper mills and printing presses droned on at full capacity reproducing long tracts for the public eye and ear. Some observers felt that a session following the midsummer political conventions might produce a new theme and that the paralysis of the earlier months might be ended. However, the August session was played out on the same theme with, if anything, less inspired results as the short session ground to an unproductive and unlamented halt before Labor Day. When the finale had been reached on September 1, most of the audience had left Washington and many of the Senators and Congressmen as well had departed.

What can we expect?

One is inclined to conclude that little harm was done by a session of Congress which talked volubly, did little, and in which most of the bad proposals were defeated. This is, I believe, a short-sighted conclusion. It may well be that the past session, so undistinguished in its work, was more in the nature of a rehearsal than a full-fledged congressional performance. Legislation which died aborning is certain to be revived in the new Congress next year. Better preparation, more propagandizing of the public, additional salesmanship at the grassroots level may be needed before many of the schemes which will wrench our way of life into a more unrecognizable form can be put through the Congress at some future time. This kind of effort will be made. The answer lies with the people. Their government is the image they create. They elect their representatives to do their bidding. The electors who keep silent or who stay at home on election day cannot expect to find their reflection in the troubled waters of Washington.

The De Gasperi-Gruber Agreement

EXTENSION OF REMARKS
OF
HON. DONALD J. IRWIN
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. IRWIN. Mr. Speaker, there has arisen a dispute between two nations—Italy and Austria—over the interpretation of a treaty between those nations, the De Gasperi-Gruber agreement, signed in Paris September 5, 1946, which concerns Alto Adige, the Bolzano Province of Italy, which is known to Austrians as South Tyrol.

The Government of Austria has claimed that Italy has acted in violation of the terms of the 1946 treaty, and on July 6, 1960, Austria submitted its argument to the General Assembly of the United Nations for consideration at its session now under way in New York.

The Italian Government, on the other hand, offered to submit its case to the International Court of Justice at The Hague, as the principal judicial organ of the United Nations.

At issue is the question of where the dispute should be resolved.

It seems to me that since the dispute involves a treaty between the two nations, it would be best suited for presentation to the International Court of Justice.

Current Status of the Passamaquoddy Tidal Power Project

EXTENSION OF REMARKS
OF
HON. JAMES C. OLIVER
OF MAINE
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. OLIVER. Mr. Speaker, our national security is indispensably tied to maximum economic growth. Equally, indispensable, therefore, to our national security is the development of electrical power. As we well know, this kind of energy is the lifeblood of industry. Not only is electrical power the lifeblood of industry, but we further know that the growth rate of any industrial economy is determined and measured by the growth rate of electrical power development. A less than maximum rate of power development results in a less than maximum rate of economic growth. This is a situation we just cannot afford, especially when we are reminded that the Soviets are estimated to be well ahead of their schedule of hydropower development and that by 1975 if they merely remain on schedule, their hydropower output may equal our own.

I am calling these items to your attention, prefatory to my remarks on the current status of the Passamaquoddy project because it would seem that I would be remiss in my duty to the people of my district and State and the Nation if I did not indicate the vital importance of Quoddy not only to the economy of the State of Maine, but to the national economy as well, especially when we reflect upon the rapid advancement of the Soviets.

What then is the present status of the Quoddy project? I am pleased to note that solid commitments are now being made to the development of this project. As an example, Mr. Speaker, I would insert the following:

THE DEMOCRATIC PLATFORM: THE RIGHTS OF MAN

(Report of the committee on resolutions and platform as adopted by the Democratic National Convention, Los Angeles, July 12, 1960)

The Republican administration would turn the clock back to the days before the New Deal, in an effort to divert the benefits of the great natural energy resources from all the people to a favored few. It has followed for many years a "no new starts" policy.

It has stalled atomic energy development; it has sought to cripple rural electrification.

It has closed the pilot plant on getting oil from shale.

It has harassed and hampered the TVA.

We reject this philosophy and these policies. The people are entitled to use profitably what they already own.

The Democratic administration instead will foster the development of efficient regional giant power systems from all sources, including water, tidal, and nuclear power, to supply low-cost electricity to all retail electric systems, public, private, and cooperative.

The Democratic administration will continue to develop "yardsticks" for measuring the rates of private utility systems. This means meeting the needs of rural electric cooperatives for low-interest loans for distribution, transmission and generation facilities; Federal transmission facilities, where appropriate, to provide efficient low-cost power supply; and strict enforcement of the public-preference clause in power marketing.

The Democratic administration will support continued study and research on energy fuel resources, including new sources in wind and sun. It will push forward with the Passamaquoddy tidal power project with its great promise of cheaper power and expanded prosperity for the people of New England.

It was also a pleasing and happy experience for me to hear the remarks of Senator JOHN F. KENNEDY:

THE DREAM OF PASSAMAQUODDY

(Excerpts of address by Senator JOHN F. KENNEDY, Democrat, of Massachusetts, at Maine Democratic Party issues conference banquet, Augusta, Maine, Sunday, November 15, 1959.)

Let us examine the impact of this coming revolutionary decade on the State of Maine, selecting only one vital area: The demand for electrical energy. By 1970, this State alone, according to official estimates, will need 405,000 more kilowatts of capacity than all existing and planned private power sources can possibly supply. Without this added power, your industrial development, your competitive status, your business costs and home conveniences, will all lag behind other parts of the country. But there is an answer—an answer now based on a solid, factual study—and that answer is a dream 40 years old that must now become a reality: Passamaquoddy.

The recent report of the International Passamaquoddy Engineering Board fully justifies all the years of urging, planning and hoping. Soon after I took my oath of office as Senator, nearly 7 years ago, I urged an immediate study of the economic feasibility of harnessing these huge tides which surge and recede every day through Passamaquoddy and Cobscook Bays. I said then that such a study was urgently needed if we were to plan and prepare for the pressing power needs of Maine and all New England. And it is clear from this recent report that to tap this fantastic flow of 70 billion cubic feet of water each day would be a tremendous spur to the economic growth of Maine, and New England, and the entire United States.

I do not say that it is a simple undertaking. It will require vision and effort and leadership—more than we have been accustomed to in recent years. It will take money—more than many would like to spend. But if we have leaders who are willing to look ahead—who are willing to spend money now in order to reap vast returns in the future—then we can look forward to a new supply of 550,000 kilowatts—to some 1 million tourists a year coming to view one of the most spectacular products of modern technology—to the attraction of innumerable new industries with growing power needs—and to the regeneration of the whole economy of Maine and Washington County in particular.

I know something of Maine's economic problems—for we see them in Massachusetts as well: the problems of the hard-hit textile and fish industries, the problems of chronically depressed areas, the problems of transportation, unfair competition and so-called "economic old age." But I also know the advantages which Maine possesses: a highly skilled and well-educated labor force, easy access to oversea raw materials, and abundant supplies of fresh water. Combine these assets with a tremendous new supply of power at Passamaquoddy and Rankin Rapids—and new industries will flock to Maine.

This is not a relief measure, born of the Great Depression, that we are talking about. It is not a visionary dream—or an expensive pork-barrel project. We are talking about a great national asset, like TVA, the Grand Coulee Dam or the St. Lawrence Seaway. It is, moreover, a great undertaking in peaceful international cooperation. For New Brunswick and all of Canada also need power to expand their economies. As in the case of the Seaway, their needs and their problems will also be considered along with our own in determining the precise form this project will take.

But even if the United States must go it alone, the combined Passamaquoddy and Rankin Rapids projects will not meet all of Maine's power needs by the year 1980. And if the power is to be shared with Canada, it will not even fulfill your additional needs in 1970. In short, there is no time to be wasted. The money, the labor, the plans and the contracts and the equipment—on all of these a start must be made in the near future.

It will be a breathless undertaking—one of the most impressive wonders of the modern world. It need not—it should not—be a partisan undertaking. Both parties have played a role. There is work enough for all—the benefits from this project will be withheld from none. But this bold undertaking will require progressive leadership, unlimited vision and tireless determination—and these are the qualities which this Maine Democratic conference is talking about tonight.

My own efforts of recent date to expedite the realization of Quoddy was to arrange for a meeting in my office on Monday of this week. The story of that meeting is best described by the following news release:

Congressman JAMES C. OLIVER, Democrat, First District, Maine, announced today after a meeting in his office, "That there is no question in my mind that there is a sincere conviction on the part of all present today that the Passamaquoddy tidal power project will be realized at a time not as remote in the future as some would have us believe."

OLIVER further added, "The results of the meeting were encouraging in that there was an opportunity to become better acquainted with the mutual problems involved."

OLIVER said that "an informal discussion of this kind often leads to frank talks and this was the situation in my office today."

Present at the meeting were Congressman Frank M. Coffin, member of the Subcommittee on American and Canadian Affairs; Congressman Robert Jones of Alabama, chairman of the Subcommittee on Public Works; Congressman Frank Smith of Mississippi; Congressman Joe Evins of Tennessee, member of the Appropriations Committee; E. A. Bacon, Chairman of the U.S. Section of the International Joint Commission; Francis Adams, member of the U.S. Section, International Joint Commission; Gen. Samuel Sturgis, who works in a consulting capacity with the board which made the Passamaquoddy tidal power project survey; and, finally, John Roach, of the Army Engineers, who has been identified with Quoddy from the early thirties.

OLIVER said that "the purpose of the meeting was to indicate to the U.S. members of the IJC that there is decidedly favorable interest on the part of Members of the House of Representatives, as well as to develop with the members of the IJC some understanding of the problems involved in negotiating with their counterparts of the Canadian section of the IJC.

OLIVER finally added as to purpose that it was his idea and Congressman FRANK COFFIN'S "to gather some indication of any specific action which they might be taking in the next few months, which would be helpful in getting the IJC report expedited."

On Wednesday, I sent the following letter to Hon. E. A. Bacon, Chairman of the U.S. Section of the International Joint Commission:

AUGUST 31, 1960.

Hon. E. A. BACON,
Chairman, U.S. Section, International Joint Commission, Washington, D.C.

DEAR MR. CHAIRMAN: Thanks for your courtesy and cooperation in participating in the meeting on Monday in my office when the present status and current problems incident to the negotiating of an agreement with your Canadian counterpart on the IJC of the Rankin Rapids-Quoddy report were discussed.

I hope that you were similarly impressed as I was with the sincere interest of Congressman JONES of Alabama, Congressman SMITH of Mississippi and Congressman EVINS of Tennessee in the project and their desire to cooperate in expediting a favorable report and recommendations by the Commission.

I agree with Congressman SMITH and the implied support of Congressman JONES that we should proceed on the basis of U.S. underwriting of this entire project. I realize that this entails consent of the Provincial or Dominion Governments of Canada or both that we may build on their soil and in their sovereign waters.

However, this should not prove too difficult to achieve because of the direct quid pro quo which obviously falls into Canadian laps as a "windfall" resulting from the downstream benefits on the St. John River, which is created by upstream storage, necessary to the Rankin Rapids installation.

You will recall that General McNaughton, your counterpart on the Canadian section, in his testimony before the External Affairs Committee of the House of Commons on Wednesday, March 14, 1960, stated, on page 152, "Rankin Rapids is one of the possibilities of firming up the tidal power, but we have to persuade our friends who live on the St. John River above Fort Kent to build a dam at Rankin Rapids or perhaps a smaller dam at Big Rapids in construction with another at Lincoln School and between them to make available something like 1¾ to 2½ million acre-feet of storage.

That storage water would be released through an installation at Rankin Rapids or Lincoln School in the United States and would be used to regulate the flows of the St. John River, and enable an increased installation to be made at Beechwood for which, on our recommendation the government of New Brunswick has already made provision, would, also, enable a couple of other plants to be installed * * *" and (2) on page 159, "I have nothing new to report on the St. John River except to say that we cannot go ahead with our Beechwood Mor at site run of river plants until we get storage. But we hope that someday our U.S.

friends will see fit to undertake in cooperative arrangement the development of the Rankin Rapids and the Lincoln School."

These statements of General McNaughton, in my opinion, underscore the value to Canada of the Rankin Rapids storage capacity which is a must if Beechwood expansion and additional downstream projects are to be undertaken on the St. John in New Brunswick.

Why, then, should we not proceed on the assumption that Canadian cooperation in the matter of authority for us to build on their tidelands and soil is clearly and justifiably indicated?

It is my opinion that the Rankin Rapids-Quoddy project as a unilateral undertaking of the United States can be far more favorably presented to the Congress than could any alternative proposals involving long, complicated and, I feel, impossible negotiations with the Canadians. Single U.S. sponsorship of the project might include reciprocal interchange of power when and if mutually advisable. Perhaps it should be borne in mind that the Canadians do not need to participate in the power output of the project once their own plans for expansion of Beechwood and additional installations on the downstream of the St. John have been made possible by the Rankin Rapids-Quoddy proposal.

The recreational, navigational, and highway connection benefits which would automatically accrue to the people of New Brunswick would add to the downstream windfall, once we have completed this project.

These are some of the conclusions which I have reached as a result of our several discussions, and I present them to you for what they may be worth. It is my hope that they make some sense for you as well.

In closing, let me apologize for burdening you with additional correspondence and to express my deep and sincere appreciation for your willingness to consider our problems in Maine in respect to Quoddy with such an open and tolerant understanding. I feel certain that, if the deserving people of Maine are to benefit from the untold benefits of this great natural resource project during this generation, then we must act forthwith. I feel certain that the good people of New Brunswick are of similar mind, General McNaughton to the contrary, notwithstanding.

Let me repeat, I am available for any and all possible cooperation which in your opinion may be constructive and in the best interests of the Rankin Rapids-Quoddy project.

Sincerely,

JAMES C. OLIVER,
Member of Congress.

P.S.—I have taken the liberty to send copies of this letter to our friends John Roche, Congressman Frank Smith, Congressman Joe Evins, Congressman Robert Jones, Congressman Frank Coffin, Francis Adams, General Sturgis, and Roscoe Emery.

In discussing the current status of Quoddy, I would also call to your attention the relation of low-cost power to industrial development:

SOME NOTES ON THE RELATIONSHIP OF LOW-COST POWER TO INDUSTRIAL DEVELOPMENT

A recent survey by the publication Mill & Factory indicated that in the decade 1950 to 1960 New England was the only region in the country suffering a decline as an industrial market. In contrast, the Tennessee Valley region enjoyed a 21-percent increase; the Pacific coast, also a region of low-cost electricity, gained 53 percent.

As a contrast, let us look at the recently published 10-year (1950–60) report of the Tennessee Valley Authority. During the decade $2½ billion was invested by private industry in expanding existing industries in the TVA area and in building new ones. One hundred thousand new jobs were created. Industrial use of electricity increased from 7.5 billion kilowatt-hours to 16.38 billion kilowatt-hours.

A more recent and more direct example of the lure of low-cost electricity was provided last month (August 1960) by the Bonneville Power Administration. Bonneville had announced earlier this year that an additional 300,000 kilowatts of firm and secondary electricity would be sold to industry. Last month, Bonneville reported that the power had been allocated to provide for the establishment of two new electroprocess industries and plant additions for two existing industries. Investment in new plant facilities alone is expected to approximate $140 million, as a result of this power allocation.

The impact of new jobs on a community has been measured by the U.S. Chamber of Commerce in nine counties enjoying rapid industrial growth, two of them in the TVA area. According to the chamber's publication, "What New Industrial Jobs Mean to a Community," each 100 new factory workers bring a total of 296 new people to the community; create 112 more households, and $590,000 more personal income per year. Of this income, $360,000 goes into retail sales. A further breakdown shows that $70,000 of this would go to grocery stores; $30,000 to eating and drinking places; $45,000 to department stores; $25,000 to clothing stores; $50,000 to automobile dealers; $20,000 to gasoline service stations; $15,000 to lumber yards and building materials dealers; and $105,000 to other stores. The 100 new factory workers also would bring four more retail establishments into the community and would create jobs for 74 other workers in retail trade, construction, professional and related services, transportation, government, and other trades and services.

It is not surprising that TVA's 100,000 new jobs were accompanied by a rise in per capita income (average) from $890 in 1950 to about $1,296 at the close of 1958.

The Governor of Washington State, Albert D. Rosellini, recently summarized the benefits which Federal multipurpose development of the Columbia River has brought to his State. In summary, these benefits were: A high degree of electrical living among the people; industrial diversification and expansion which have been a direct benefit of low-cost power. He reported that the aluminum companies which played such a vital role in our war effort were the first major industrial users of Bonneville power. Subsequently, other industries have been added, ranging from carborundum reduction to chlorine manufacture. "These industries have stabilized our economy, increased taxable income, and have provided badly needed diversification of employment," he said.

A good example of industry following low-cost power can be seen at the St. Lawrence project. In a report by the New York Power Authority (28th Annual Report, Feb. 9, 1959) it is pointed out: "Industrial and commercial development and expansion in the north country are directly attributable to the St. Lawrence power project. Alcoa, pioneer in the use of electric power embarked on a $25 million program of modernization and expansion. Reynolds Metals is constructing a new plant scheduled to employ 1,000 workers while Chevrolet Motors is building a casting plant expected to provide employment for 700. At Rouses Point the Quebec Lithium Corp. has scheduled a new plant where 800 will be employed. These construction projects, costing well over $100 million have not only provided employment for local labor but commerce for area merchants and businesses, while related activities in new motels, hotels, shopping centers, gas stations, and other service businesses have contributed heavily to the further growth of the St. Lawrence Valley's economy."

Finally, in order to develop a proper perspective as to the meaning of Quoddy when related to the Maine economy, I would refer you for your study and thoughtful consideration to a statement presented in testimony before the Senate Committee on Banking and Currency, March 3, 1959:

AN UNTIDY GRAVEYARD

(Statement filed by Benjamin J. Dorsky, president, Maine State Federated Labor Council, AFL–CIO, Bangor, Maine)

REPORT ON WASHINGTON COUNTY IN THE STATE OF MAINE

The Senate Committee on Banking and Currency now conducting hearings on area redevelopment legislation should, in the judgment of the organized labor movement in the State of Maine, have before it the attached rather startling report on a little-known depressed section of our State. This report on a depressed area, described as an "Untidy Graveyard" has been prefaced by a competent student and observer who knows the county from firsthand experience and who has studied sufficient documentary material to verify the conclusions which the naked eye plainly reveals.

We, the officers of the Maine AFL–CIO, believe that Washington County, Maine, should be studied in depth by trained observers representing the Senate Banking and Currency Committee. We are confident that further investigation would prove that the situation we describe is in fact worse than we depict it to be.

The existence of even one such spot as Washington County in these United States makes it imperative and urgent that the Congress adopt legislation which will attempt to mitigate and finally correct such conditions as are set forth in the statement we offer herewith.

Situated in the extreme northeastern part of the United States exists a strange phenomenon. It is no exaggeration to say that in Washington County, Maine, exists an untidy graveyard, its inhabitants belonging neither to the living nor the dead.

Here are just a few of the essential facts about Washington County and its people. What we set forth here are not stories from some melancholy bygone day and age; these are cruel, hard facts about life in one American county today.

The families in 6 of the 217 counties in the Northeastern States had median income of less than $2,000. Three of these six counties are located in Maine. Washington County ranked next to the lowest.[1] Sixty and three-tenths percent of Washington County families have incomes of less than $2,000 a year.[1]

Subsistence living is also seen in the way people in Washington County spend what little money they have. It goes for the necessities of life—food and general merchandise. The only two luxuries that are extensively enjoyed are television and the automobile.

Again in the Northeastern States, the average value of farmland and buildings was $11,684. Only two counties have houses the value of which averaged less than $4,500. These are Piscataquis and Washington Counties, both of which are located in Maine.[1]

Restricting ourselves to comparisons within Maine, Washington County has the lowest percentage of persons employed in manufacturing, the fewest per capita number of hospital and nursing home beds, the highest rates of illegitimacy and unemployment and maternal deaths. Again, among the Northeastern States, 21 counties had nonfarm single-family houses that averaged less than $4,000 in value. Three of these were in Vermont, nine in Pennsylvania and eleven in Maine. In only Washington County the median value of houses was less than $3,000.[1]

[1] 1950 Census Bulletin PB 19.

Again, among the Northeastern States, 10 of the 217 counties were such that less than 40 percent of their dwelling units had hot running water, a private toilet and bath, and were not dilapidated. Four were in Pennsylvania. The remaining six were in Maine. Washington County consistent again was the most primitive.

The low average of the gross wage for manufacturing in Washington County is $3,047. The gross wage for manufacturing statewide is $3,551.

The textile, paper, and hard goods plants within Washington County which are the only industries which provide steady employment account for only 40 percent of the labor force engaged in manufacturing.

For a 3-month period during the winter months in 1956–57 almost half of the entire Washington County labor force was unemployed.

During the winter months of 1957 and 1958 more than half of the Washington County Labor force was unemployed.

All of the industries in Washington County, all but lumber, paper, and poultry, are highly seasonal and insecure.

For instance, their sardine plants operate for the period from the latter part of June through September; the blueberry season—a few weeks in August and early September.

Returning to income analysis again for Washington County, it is startling to note that the model income for families is between $1,000 and $1,499.[1] Eight and six-tenths percent of Washington County families earn less than $500 per year.[1]

Only 57.9 percent of Washington County children who entered the ninth grade from the years 1953 through 1957 completed their high school years.

In 1954 more than half of the commercial farms in Washington County received gross income of less than $2,500.

As of January 1959, according to figures released by the Maine Employment Security Commission, estimated unemployment was 3,590. Of this group 2,339 are covered for unemployment compensation. Three hundred and thirteen of that group have exhausted their unemployment compensation. Average weekly payments in unemployment compensation made for the year 1958 were $21.53.

Only 19 percent of Washington County schoolchildren participate in the school-lunch program.[2]

Injury frequency rates in manufacturing in Washington County for the year 1956 were 24.3 percent as compared to 19.2 percent for the State of Maine, and 12 percent for the Nation.[3]

Workers in manufacturing organized under union contract were 18.5 percent in 1956 as compared to 43.5 percent for the State of Maine.

Aid to dependent children payments per 1,000 population for the year 1957 in Washington County was 70 percent as compared to 41 percent in the State of Maine. An examination of the level of income in the Washington County communities suggests a real correlation between the level of income and the aid to dependent children payment rate. In all of the three categories of the public assistance program, old-age assistance, aid to the blind, and aid to the disabled—the rate here is again high when compared to the overall State percentage.

The preceding is merely a random sampling which points to the overall hardships endured by the over 35,000 inhabitants of Washington County. It is still difficult, however, to depict the social climate and accompanying problems which subsistence living and consequent social isolation has produced.

One observer who visited the county summed it up this way. "These people keep going by virtue of hope alone. They hope for better times—that an economic miracle of some sort will occur. They hope that maybe somehow or other job opportunities will improve."

For the most part, the population lives in scattered coastal communities. Another observer visiting Washington County and going from one community to another, talking with shopkeepers, professional people, and, in one community, a minister, factory workers, clerks, school children, and others, found that the people of the county are incessantly hopeful of a change for the better. One gas station owner, when queried with the question as to what high school graduates do, said they have two choices—"They either leave the State or go into the service."

A shopkeeper had this to say. "There is absolutely nothing for young men and women to do here—absolutely nothing." A sardine factory worker put it this way when asked, "What do you do for a living?" "Nothing." He further indicated that he had one more unemployment compensation check to draw. When it was pointed out that his new benefit period would begin on April 1, he said, "I didn't work enough last year to draw anything after April this time."

A restaurant operator said, "Things are slow and I don't mean this year; they have always been. It doesn't seem that we can even hope for a change any more. Some people haven't learned yet that we have always had it bad, and I'm convinced now that we always will. It's sort of funny. You'd think we would have enough sense to just pack up and leave, but we have our roots here." The minister had this to say: "It's hard for people to live a good moral life when they can't even feed their bodies. You wouldn't believe it, but the only way some people get through the winter here is on a straight clam diet. If we didn't have the sea at our front yard, we just wouldn't be able to even subsist."

The shopkeeper made this comment on the high migration of young people out of Washington County: "I know these youngsters. My own boy would give his right arm, and I mean it, his right arm, if he could come back and find a job and live in the county. But there's nothing for him here and nothing for any of the others either. The only thing they can do is to work a few months in the sardine factory and draw State checks during the winter."

A variety store manager in the town of Eastport said: "People here make their income working a few months in the fish factory and drawing State aid checks of various sorts." This comment was repeated time and time again. Welfare payments and unemployment checks are an integral part of the moneys which people use to live on in Washington County. It is a strange thing to find that the "public dole" should be regarded as an integral part of income.

It is strange, too, when one compares the average income of fishermen in some of the many fishing towns in the Province of Nova Scotia, Canada. For example, the 45 active members of the fishermen's cooperative of Port Bickerton, a fishing village of 90 families on the eastern shore of Nova Scotia, last year had an average gross income of $10,500. It should be noted before they woke up to the possibilities of group effort, their highest income was not over $1,000 and most of the fishermen received only $200 to $300 a year.[4] Here is a possible way out for the fishermen, not only along the coast of Washington County, but for the entire coastal area wherever its inhabitants are oriented toward the sea and its resources.

The visitor is struck by the dreadful shabbiness of the people's dress in the towns where unemployment is acute; it was reminiscent of Tobacco Road. One interview was particularly humiliating for the observer. The man's jacket had been taken from the inner lining of a coat and wrapped around his body and secured by a rope. Aware that cigarettes might be considered luxury in the community, the observer offered the man his pack. The man, 26 years of age, refused the gesture, saying, "I'm afraid not. I had to give them up some time ago. They are just too expensive and now I just can't afford to smoke anymore."

Just how do the people in Washington County feel about rural and industrial development? A word should be said about the industrial barons of the county and their effect on the growth of industry. This is a very difficult problem to get at but it would seem to be a safe conjecture that there has been for decades deliberate sabotage by this group to circumvent any attempts to develop the county. We know, of course, that in this area of Maine there has been for some time a surplus labor pool.

We know too that some types of industries hire as cheaply as possible and are able to do so because of the low level of industrial development and the constant surplus labor pool. During one trip through Washington County a particular textile mill was pointed out by one of the town residents. This plant, we were told, had once been situated elsewhere in Maine, and paid prevailing wages. To escape from the necessity of paying just ordinary standard rates of pay, this plant folded up and came to this area of Maine where the workers would, without question take whatever pay the employer wished to give.

Interviews seem to indicate that there are two groups in Washington County. The larger group which favors industrial development and the smaller group of industrial barons who strive to conserve the status quo and its consequent economic and social problems.

The information would be worth while if the wage rates, particularly for the fish processing plants, were available for analysis. But such is not the case. The Labor and Industry Department of the State of Maine, although permitted by law to request such information, has failed to exercise its statutory authority and make such a survey. The high injury frequency rates in manufacturing in Washington County suggest at least sympathy between the Department of Labor and Industry of the State of Maine and the industrial barons of the county.

Any report, even such as this, as brief and sampling as it is, would not be complete if it didn't make mention of the proposed Passamaquoddy Hydro Development which would be a key dynamic forward thrust for Washington County as well as the whole State.

Attention should be called to the answers to questions which were made by the Maine State Department of Education; the purpose of which was to determine the vocational needs of the county. Given the low standard of living, acute unemployment, distressing social problems, the results of this survey would at first glance seem to be disturbing and puzzling, since the survey indicated that the people of Washington County were not interested in the development of personal job skills in relation to the needs of a variety of industries. The results were puzzling because they seemed to indicate that these people are some type of a zero quantity.[5]

[5] Vocational Needs Survey, 1958, Maine State Department of Education.

Why? There is data, even at this time, that has been developed, which, if interpreted, might suggest the answer as to why the Vocational Needs Survey showed a negative attitude on the part of Washington County people toward the development of personal job skills. Might it be suggested here something that has been known to educational people for some time—that the learner is the center of the learning process, that the curriculum in programs must be built around the learner's basic needs. Therefore, it would seem reasonable to suggest that any rural development programs must be geared to the real needs of the people rather than develop a program of frills, which, although they may be nice things in themselves, have no conscious value to these people and their unanswered needs. Another reason which might be suggested to explain the negative attitude of the people of Washington County to the Vocational Needs Survey is that they are living in a type of economy far removed from challenging and stimulating personal development.

The low percentage of persons employed in manufacturing, the few per capita, number of hospital and nursing home beds, the high rates of illegitimacy, unemployment, maternal deaths, the bare subsistence standard of living, the low value and ill-equipped homes, and other almost incredible economic and social features of Washington County were mentioned earlier in this report. It is easy to suggest a real correlation between the level of income created by the lack of industry and these problems. Washington County strikes one as an untidy graveyard whose inhabitants belong neither to the living nor the dead—where hope is dying or dead. This is another way of saying that the pattern of living of its people is a reflection of a static and binding economy. It is assumed that people are people wherever they may be found—that at the moment of conception they inherit the promise of creative greatness. We must probe deeply into the problems of the people of Washington County and ask ourselves why this promise of creative greatness has been thwarted.

The Problems of Small Business 1960–61: Iowa Small Business in Trouble—130 Bankruptcies in 1950—809 Bankruptcies in 1959—Hope for the Future in Legislation Proposed by Len Wolf

EXTENSION OF REMARKS

OF

HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WOLF. Mr. Speaker, the past few years have not been good years for small business. According to a Dun and Bradstreet report there were 14,964 business failures in 1959 in the United States. This was the greatest number of business failures in any year since 1933. For example, in 1950 there were 130 bankruptcy petitions in Iowa while in 1959 there were 809 bankruptcy petitions.

Because of this very serious business downturn, we might even call this period the "quiet depression." The first bill that I introduced when I came to the House of Representatives was one which, had it been passed, would have done much to remedy the present business depression. This bill, H.R. 2812, allowed small business a tax reduction on earnings which are plowed back into the business. The amount that would be allowed is 20 percent or $30,000, whichever is the lesser amount. This bill has become a necessity because of the unfair competition which now exists between small and big business. Small business cannot compete against businesses that have unlimited credit and reserves unless given a helping hand.

My major efforts in the Congress have been directed to preventing the big from getting bigger, and the small from getting smaller or eliminated.

I know firsthand the heartbreak and disappointment that can come to a family when the hard work of many years is wiped out. I know the pressures and the sleepless nights caused by unsatisfied creditors forcing accounts you owe, and when doing the best you can is still not enough for the creditors. I know the anxiety which comes to a family when business reverses come through no fault of its own. If we are serious about free enterprise, then we will help protect it through effective legislation to eliminate many of the problems from which small business is suffering today.

One of the great problems that we in the Middle West face concerns the serious decline of our small towns. With this decline, of course, has gone the decline of small business. I have endeavored to provide solutions to these problems through certain legislation that I offered in the 86th Congress. I proposed the establishment of a county industrial agent program. The county industrial agent program would be set up in the same manner as the county agricultural extension program. The financial support for it would come from State, Federal, and county governments on the same basis that the present farm extension program is supported.

The basic purpose of this program is to reinvigorate our small towns with new employment opportunities so that they may again thrive—industrially and culturally. I believe in the life of the small town and in the importance of the small businessman in these towns. But they need help and new direction—direction which could come from the enactment of the county industrial agent program. The Small Business Administration, many colleges, and industrial groups have shown great interest in this program.

My proposed concurrent resolution—which Senator KEFAUVER also came to sponsor—directs the U.S. delegation to the United Nations to work out ways to stop world monopoly. Pricing and protective arrangements today exist between some of the largest companies in the world in order to control the price on about 140 different raw material items. Furthermore, these activities ultimately come back to haunt American foreign policy so that it looks as if we are invariably taking the sides of the world monopolists. This program which I sponsored was the American foreign economic policy before 1953, and because of pressure from the mining and oil interests this policy was changed by the present administration.

I have worked hard for the fair trade bill so that it could get a fair hearing on the House floor. I believe that there is great merit in this proposal, and I signed the discharge petition so that this bill could be jarred loose from the Rules Committee. Unfair competition from so-called wholesale mail order houses could be stopped if we win this one.

Vertical integration in the meatpacking and animal-raising industries could be prevented with passage of a bill which I introduced this past year. The competitive relationship with chainstores is also improved from independent business.

I believe that the excise tax on telephones is a detriment to small business, and since I have been in the Congress I have worked for its repeal.

In view of the difficulties experienced by small businesses in securing operating money at prices they can afford, I have consistently worked for low interest rates and have opposed legislation which would breach the traditional ceiling on long-term Federal borrowing, since any such change in connection with Federal borrowing would be extended to the field of private borrowing.

In efforts to arrest the continuing upward spiral in costs of natural gas charged by pipeline companies, I worked very hard to secure action on my bill to prohibit pipeline companies from imposing consecutive gas rate increases while it still has a previously filed application pending before the Federal Power Commission. I have also worked for legislation to require the FPC to act more promptly on rate increase applications and carry out its statutory duty to regulate natural gas rates. One hundred and seventy-nine communities and more than 200,000 families in Iowa have been affected by 8 gas rate increases imposed on the consumers since 1951. The Denver Post stated that "the Federal Power Commission would become a beehive of activity, grinding out decisions in rapid order," if my bill were to become law.

I have worked in support of legislation creating a Central Mortgage Reserve Facility which would have provided a sound national monetary approach to homebuilding finance. Unfortunately, this proposal died in the Rules Committee. Tight money has in many periods pinched the lifeblood of building—which has an unfavorable cumulative affect on our entire economy—not only to builders, but to workers, and to the public. When mortgage funds for homes dry up, builders lay off workers, stop buying lumber, cement, and appliances. In terms of jobs, this means millions of man-hours lost in factories, forests, and local communities.

I am proud of my record in the fight for small business. It is my hope that in the next year the kinds of proposals that I have worked for will become law, for unless they do I fear that the small businessman will be forced out of business—and the American people as a whole will be the losers.

Mr. Speaker, on many other occasions I have taken the floor to bring to the

attention of the Congress the problems of the independent merchants of America, and I pledge to continue my fight to improve the economic climate for our small businessmen.

Congressman O'Hara Reports on the 86th Congress

EXTENSION OF REMARKS
OF

HON. JAMES G. O'HARA

OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. O'HARA of Michigan. Mr. Speaker, as the 86th Congress draws to a close, it is appropriate that we take inventory of our legislative efforts. It is appropriate, too, that as representatives of the people we should report to those whom we represent. I am therefore taking this opportunity to speak to the people of the 7th District of Michigan on the activities of the 86th Congress.

This Congress has been subject to a great deal of criticism because it did not accomplish more than it has, and indeed it has not accomplished as much as many of us had hoped. On the other hand, this Congress has had to deal with more controversial issues and has carried out its deliberations in a greater atmosphere of crisis than perhaps any other peacetime Congress in history.

Our efforts have been hampered by a Rules Committee whose only purpose at times seemed to be to prevent consideration of any but the most innocuous measures. In spite of this handicap, the 86th Congress accomplished a great deal of which we can be proud.

LABOR REFORM

The most outstanding achievement of the first session of this Congress was the labor reform bill. In spite of extreme pressures brought to bear by some elements of labor and management, the measure which finally emerged was substantially sound and well worth the effort.

Much remains to be done in this area, however. The need for corrective and improving amendments to the labor reform bill are already evident. The provisions of the Taft-Hartley Act dealing with national emergency strikes are inadequate and unworkable. The National Labor Relations Board has been conducting an investigation of the Kohler strike for over 6 years, and only within the last month has a decision been rendered. Investigation shows that the average time elapsed between the filing of an unfair labor practice complaint and the rendering of a decision by the NLRB is 2½ years. Justice so long delayed is hardly justice at all. Congress must next year address itself to the problem of expediting the procedures of the Board and of the courts in dealing with labor disputes.

SOCIAL SECURITY

The social security bill had some very necessary and admirable provisions. Social security beneficiaries can now earn more without a loss of benefits, and for those who do earn more than the new limit the loss in benefits is substantially reduced. The requirement that a worker must be at least 50 years of age to be eligible for disability benefits has been eliminated. As a result of this year's amendments a great number of older people will now qualify for benefits who would otherwise be excluded. Starting next year a parent who works for a son or daughter, outside the household, will be covered. All of these changes are steps in the right direction.

I had hoped to be able to report a general health insurance bill for the aged as one of the accomplishments of this Congress. Unfortunately, the bill which we passed, while it pays lipservice to the health needs of the aged, continues to withhold adequate protection. I voted for it with reluctance and only because it establishes a precedent which we can elaborate on and strengthen next year.

The system we have set up is bound to fall of its own weight. In the long run the only practical way to provide adequate health protection to our elder citizens is to let them pay the premiums in the form of social security taxes while they are earning wages and able to do so. To say that such a proposal is socialism is utter nonsense. One could say with equal accuracy that our public schools, fire departments and parks are socialistic because they represent a community effort financed through public taxation.

EDUCATION

The House Rules Committee stymied our efforts to provide more Federal assistance to hard-pressed school districts. Both the House and the Senate passed school construction bills, but the committee refused to let the bills go to conference, and they died with the adjournment.

I am reminded of what George Washington once said:

> In a country like this if there cannot be money found to answer the common purposes of education, there is something amiss in the ruling political power, which requires a steady, regulating and energetic hand to correct and control it.

Some Federal funds are flowing to local school districts, however. In recent years the State of Michigan has received about $44 million for construction and operation of schools in areas where there is substantial Federal activity, around such installations as Selfridge Field and the Detroit Arsenal. Similarly, some Federal funds are flowing to our schools under the National Defense Education Act. It is worthwhile noting that under both of these programs Federal assistance has been provided without Federal interference or control.

With passage of the Library Services Act, we insured continuation of joint Federal-State efforts to extend public library services to our rural communities.

MINIMUM WAGE LEGISLATION

Many of us had hoped to raise the minimum wage and to extend coverage to many workers not protected by the Fair Labor Standards Act. A bill was passed by the House and another by the Senate. The conferees could not agree, and the committee broke up without even reporting to their respective Houses. As a result we had no minimum wage bill.

This was the work of a coalition of northern and southern conservatives. It was, however, a success only for the southern Congressmen, who sought to help the South attract northern industry on the basis of a regional substandard wage scale.

NATIONAL DEFENSE

Throughout the past year distinguished experts have questioned the adequacy of our national defense effort. While there were some who insisted our defense organization was the strongest in the world, there were many others, I among them, who felt that budget considerations had been placed before our defense needs.

American superiority in many fields is unquestioned. The atomic submarine and the development of the Polaris missile will vastly increase our striking power. The development of rocket warfare, however, raises serious doubt about the usefulness of big Navy carriers and the effectiveness of our expensive oversea bases.

Defense Department officials have admitted the existence of a missile gap. Testimony before congressional committees made it clear that we also lack adequate means to carry out a conventional military operation. Inadequate manpower, outmoded equipment, and insufficient transport would hamper any limited-war effort should we need to act.

In this regard I should like to make it clear that I derive no personal or partisan satisfaction from calling your attention to this tragic situation. Acknowledgment of the strength of our enemies is not treason, however, and a recognition of our own weakness is a necessary first step in the elimination of that weakness.

I do derive satisfaction, however, in informing you that this year the Congress appropriated $600 million more for defense programs than had been requested. The bulk of these funds will be used to step up missile development and to modernize our Armed Forces.

Obviously, our defense problems will not be solved simply by the expenditure of more public funds.

Administration of the Department of Defense has been hampered by a lack of continuity over the last 8 years. We have had three different Secretaries and eight different Deputy Secretaries, each with his own policies, each with his own advisers, and each with limited experience. The much-needed overhaul of the Department of Defense will not be achieved unless administrators at the top policy level serve a reasonable period of time so that continuity of command is maintained.

Even more critical, however, is the need for elimination and revision of wasteful procurement practices. More and more the Defense Department has moved away from the competitive bid procedure to a greater utilization of the so-called negotiated bid. There is ample

evidence that we are not getting our military hardware at the lowest possible cost to the taxpayer.

For 2 years now I have fought against policies that virtually prohibited utilization of publicly-owned arsenals and depots for the production of military hardware. Partly as a result of my efforts, Chrysler Corp. was finally granted a contract for the production of tanks at the Detroit Tank Arsenal in Centerline. Until that contract was let, the taxpayer was paying three-quarters of a million dollars a year to maintain that plant in idleness.

THE BUDGET

The most recurrent argument of this Congress has been the level of Federal expenditures and who is responsible for all of the spending in Washington.

It must be admitted that Federal expenditures are at an astronomical level, and the need for these expenditures is clear only if we understand for what the money has been spent.

For fiscal 1960 we had a budget of over $70 billion. Of this, almost $42 billion was spent for national defense; $3½ billion for the foreign aid program which is related to our national security; $2½ billion was appropriated for atomic energy development and research; $5½ billion for the cost of veterans benefits, past, present, and future; an additional $9.2 billion was spent in fiscal 1960 to pay the interest on the national debt, the greatest portion of which was incurred in fighting World War II. As you can see, over 70 percent of our entire national budget went to pay the cost of past wars and to protect ourselves in the event of possible future wars.

An additional $5½ billion was spent on the farm support program. The rest, about $10 billion, paid for all other important functions of the Government, including the frequently criticized welfare programs.

During this Congress the President's spending requests were reduced by $2,093 million. For my part, I supported the reduction in Federal expenditures. As I told you before, however, I did vote for additional funds for national defense. I also voted for additional funds for expanded Government research into the causes, control, and prevention of cancer, heart disease, arthritis, blindness, mental illness, and other crippling and killing diseases.

FOREIGN AFFAIRS

Under our Constitution the sole responsibility for initiating policies and executing programs of an international character resides in the President. While it can to some degree influence Executive decisions in this area, the power of the Congress is strictly limited. In spite of these limitations and in spite of the natural reluctance of the Congress to interfere with the actions of the President in the conduct of our foreign affairs, a number of important congressional actions have taken place.

The Congress established the office and approved the appointment of a comptroller to oversee the mutual security program. It placed numerous specific restrictions on the disbursement of funds under our foreign aid programs. It conducted careful and thorough investigation of administrative practices and policy decisions in the field of foreign relations.

The approval of U.S. participation in the International Development Association and the establishment of the Inter-American Development Bank are evidences of congressional desire to change the emphasis in our international assistance programs from grants and gifts to loans.

The Antarctic Treaty limiting the use of that continent by all nations to peaceful purposes is perhaps a forerunner of more extensive international agreements to demilitarize areas of the world toward the goal of eventual disarmament and world peace.

HOUSING

An omnibus housing bill designed to halt the decline in home construction and to make more money available to low- and middle-income home buyers failed to clear the Rules Committee. In a last-ditch effort, however, Congress did pass a stopgap measure to extend the home-improvement loan program of FHA and two other housing programs which would otherwise have lapsed.

AREA REDEVELOPMENT

For the second time in 3 years the President vetoed a program authorizing loans and grants for the relief of chronically depressed industrial and rural labor surplus areas. I find it difficult to understand the President's position on this measure. It was not a handout or a giveaway bill, but an effort to help economically distressed areas in this country to help themselves in the same way we are helping underdeveloped countries around the world.

GENERAL AND MISCELLANY

The Congress enacted a civil rights bill aimed at safeguarding the voting rights of all Americans.

Basic new safeguards against the introduction of cancer-producing ingredients in our food products were enacted. A measure was passed requiring the labeling of hazardous and poisonous products used in the home so that parents will know to keep them out of the reach of children. Home accidents in which children had swallowed such products had reached a total of 600,000 a year.

Additional funds for the highway program were provided, but Congress refused to accede to the President's request for another increase in the gasoline tax.

An amendment to the Constitution was approved giving the residents of the District of Columbia the right to vote for the President and Vice President. The Michigan Legislatiure will no doubt ratify this amendment when it meets in January.

Congress authorized the Secretary of Agriculture to establish a program for the distribution of surplus commodities to the needy by means of a food stamp plan. So far, however, he has not taken steps to use this authority.

These are a few of the achievements of the 86th Congress. More than 740 public laws have been enacted in this Congress. Obviously I have not mentioned all of them. Nor have I dealt as extensively as I would have liked with many of the subjects I have mentioned. If you have questions concerning my position on any legislative matter, please feel free to write me in care of my Fraser office, 32909 Utica Road.

PERSONAL REPORT

In addition to my legislative duties I have undertaken a great deal of other work in connection with my responsibilities as your spokesman in Washington.

I have acted on a number of occasions as a liaison man for municipalities seeking to procure Federal assistance for water pollution programs and for school districts applying for funds under Public Laws 815 and 874. I have attended numerous conferences with Department of Defense officials in an attempt to bring a greater portion of Government defense contracts into our area. Over 500 people have sought and received my assistance in substantiating their claims for social security and veterans' benefits, and in helping them solve the many problems which individuals have with agencies of the Federal Government.

To keep you better informed of my activities in Washington, I have published a newsletter, issued press releases and recorded statements for the use of radio stations in our district. I have taught civic lessons in many of the high schools in our district, and I have at every opportunity met with and spoken to social and service groups, both to explain my own position on legislative matters and to keep them better informed of the workings of the Federal Government.

In representing you in Washington I can honestly say that I have done my very best. I have diligently striven to maintain an independence of mind and to avoid undue influence by any group or special interest. I earnestly hope that my efforts have met with your approval.

REA in Kansas

EXTENSION OF REMARKS

OF

HON. ANDREW F. SCHOEPPEL

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. SCHOEPPEL. Mr. President, in Kansas we are proud of the accomplishments of the Rural Electrification Administration. For that reason I ask permission to have printed in the CONGRESSIONAL RECORD my statement "REA in Kansas."

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REA IN KANSAS

(Statement by Senator SCHOEPPEL)

Throughout the Nation the standard of living on our farms has been continuously improving. I am happy that this progress being made is also true in Kansas, the State I have had the privilege of representing in the Senate since 1948. One of the most important contributing factors to the steady improvement of our rural standard of living in Kansas has been good, dependable electric and telephone service made possible largely through REA.

We in Kansas who have worked for the furtherance of REA are especially proud of the outstanding job the rural electric co-ops, the rural telephone companies, and telephone co-ops have done—all made possible by funds from REA. As Senator of our State I, too, have had the opportunity to work for the continued progress of the REA program and I, too, feel a sense of accomplishment in knowing that my efforts have borne fruit in easing the load on our Kansas farmers, their wives and children by providing needed central station electric service and good telephone service to them.

The record of accomplishment we have been able to make in Kansas for REA is an outstanding one. Yet we find there are those who for purely partisan political gain will attempt to obscure and confuse that record and especially will they do so in regard to my own service as a strong supporter of REA in Kansas. In order that our farm people and others living in our Kansas rural areas can judge for themselves it is my intention today to set out in simple and concise terms what we have been able to do in Kansas to further good electric and telephone service. This record will also reveal the strong and helpful support which I have always willingly and gladly contributed as a Member of the U.S. Senate.

1. AMOUNT OF LOANS MADE IN KANSAS

I am proud of the fact that there has never been a loan application submitted to REA from the people of Kansas that has been disapproved. This speaks well for our Kansas citizens who have worked in the REA program. It has been my job to lend a helping hand in getting these loan applications through in Washington and I have been especially proud that I could give them my wholehearted support.

When I went to Washington in 1948 there had been about $45 million granted in loans for electric service in Kansas. At that time the program had been in effect since 1935—about 13 years. Since that time the amount of electric loans has more than doubled so that now the amount stands at more than $118 million—an increase of over $73 million in my two terms in the Senate. Of course there were no telephone loans when I first went to Washington and I was very happy to work for the Rural Telephone Act making such loans possible after my first year in the Senate. Since then, over $40 million has been made available in Kansas to provide our rural people with good telephone service. I might also add that the record will show that in addition to providing these added amounts in Kansas, I have voted for adequate funds to provide REA loan money for all of America's rural areas.

2. NUMBER OF KANSAS PEOPLE BEING SERVED

The amount of money loaned in Kansas does not tell the whole story, for, of course, we all want these REA loan funds used wisely and economically to serve the most number of people in Kansas. When I first came to the Senate in 1948 only about 36,000 people were getting REA electricity. As of June 30 this year, this number is over 93,000—nearly a threefold increase. The number of people getting REA telephone service has come from nothing in 1948 to nearly 60,000 in March 1960. In 1948 only about 50 percent of our Kansas farms had electricity. Today, over 92 percent of all Kansas farms are completely electrified with central station service.

3. COST OF ELECTRICITY HAS DROPPED

In a period when our Kansas farmers have had to pay more and more for the supplies they use on their farms, it is especially heartening to me to know that the cost of REA electric service has gone down. In 1948, the average cost for every kilowatt-hour of REA electricity on Kansas farms was 4.7 cents. In 1952, the average cost was 4.1 cents. In 1959 this cost had been cut again to 3 cents per kilowatt-hour and is now estimated below 3 cents for every kilowatt-hour. As the cost to Kansas farmers has come down they have turned more and more to electricity, to help them produce for America so that today we find electricity not only being used to lighten the household chores but also working in the barns, tool shops, silos, poultry houses, and milking parlors. That is as it should be for I want to see that our Kansas farmers get the greatest use out of their REA electricity at the least possible cost.

4. SCHOEPPEL VOTING RECORD

Throughout the 12 years I have served in the U.S. Senate I have consistently voted and worked to make the record of accomplishment that I have outlined possible. In fact, not one vote has been cast that would hurt or detract from the outstanding record of performance accomplished in Kansas. A recently completed study of my voting record over all the 12 years pertaining to REA reveals that it is 100 percent in favor of those measures necessary to make this record of accomplishment in Kansas what it is today.

The managers and directors of the REA borrowers in Kansas can be justly proud of the record they are helping to make in Kansas. I am proud that I can work for and with them in furthering this great REA program. "The proof of the pudding is in the eating" is a saying that well applies here also. The proof of the job they are doing and that I am doing is written in the accomplishments I have just spelled out. I want to continue that kind of a job for our Kansas farmers so long as I can serve them in the U.S. Senate.

Equal Pay for Equal Work Is Elementary Justice

EXTENSION OF REMARKS

OF

HON. JAMES C. OLIVER

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. OLIVER. Mr. Speaker, consistent with our oath of office, we are committed to the continuing task of securing fair and equitable treatment for all our citizens. When in the performance of this sworn duty one frustration is deliberately added to another, it becomes necessary under such circumstances to identify the origin of these frustrations which have worked a breach between our concept of elementary justice and its application. I am referring, Mr. Speaker, to our long standing and accepted principle of equal pay for equal work and would include the following letter:

JULY 19, 1960.

The Honorable DWIGHT D. EISENHOWER,
President of the United States,
Washington, D.C.

DEAR MR. PRESIDENT: Your refusal, once again, to approve the recently reenacted Kittery-Portsmouth wage equalization bill, in my opinion, was ill advised and based upon unfair conclusions.

I realize that your decision was sincerely motivated, but, representing, as I do, some 4,000 Maine citizens employed in the yard, it is my duty to express our resentment of the character assassination of these loyal Americans which was implied in your pocket-veto memorandum, in these quotes: "This kind of legislation—this expectation of something-for-nothing from the Government just because it is the Government—weakens our national fabric and with each occurrence leaves it more seriously impaired," and, further, that the measure would give yard workers "a much higher hourly wage" than that paid by "fairminded private employers in the Portsmouth area."

In this instance, the something-for-nothing from the Government, as you have termed it, is equal wages for equal work, which is only elementary justice. Certainly, as President of all the people, you will agree that legislative and executive justice is far from being something for nothing. Rather is it the basic obligation of all office holders, particularly elected officials, which your office symbolizes, as the top man.

The threat of weakness in our national fabric to which you have referred is certain to develop, directly, from practiced injustice. This is what your disapproval of this wage equalization legislation represents to the thousands of naval yard employees and their families in the Kittery-Portsmouth Yard.

It would be well for your advisers, who have on two occasions recommended your act of disapproval, to pay heed to these facts:

1. Fuel costs in Maine equal or exceed those in Boston.

2. Food costs in general in Maine are not lower than those in Boston.

3. Clothing and costs of shelter for comfortable housing are as high or higher than Boston.

4. Local and State taxes in Maine exceed those in Massachusetts, as well as 47 other States of the Nation.

Your protection of the "fair-minded private employers in the Portsmouth area," to which your memorandum alludes, falls rather flat when it is recognized that these same employers are waxing fat, economically speaking, from the very wages of these Navy yard employees which they have persistently urged you to downgrade. This is some sort of civic masochism in which the leaders of the Associated Industries indulge without really appreciating what they are doing to themselves and the economy of the area.

It is a rather significant fact, I think, about which you may be presently uninformed, that several of the high ranking naval officers, now in the Pentagon and advising you on this issue, recommended, while in command of the Kittery Yard, that their wage scales be equalized, as they were prior to 1947. It is rather ironical that your veto action on two occasions should be recommended by these very same officers. There is no basis for a compromise approach to basic justice. You are either for it or against it. Your disapproval of wage equalization for Kittery Naval Yard employees with Boston employees for performing the same kind of work is not an act of justice.

Respectfully yours,

JAMES C. OLIVER,
Member of Congress.

Years of Frustration and Failure

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MULTER. Mr. Speaker, we are about to conclude the 2d session of the 86th Congress. It is a good time to look back at what we have done, to review the bills we have enacted and to place upon the record the reasons for the fail-

ure to enact other bills. It is also appropriate to direct attention to the conduct of the executive departments of our Government during this Congress.

As a proper prelude to these remarks I have placed in the CONGRESSIONAL RECORD the statements I have made upon the conclusion of the work of each prior Congress in which it has been my honor and privilege to serve. I believe they demonstrate that I have approached my service not as a Democrat, which I am proud to be, but as an American.

I make this statement now, as an American, to alert all of those who agree with me to the opportunity of returning me to this high office, knowing full well that I hereby give notice to those who disagree with me that theirs will be the privilege of voting to return me to private life.

Immediately after the 1952 election, and again after the 1956 election, most of my Democratic colleagues joined me in pledging the Eisenhower-Nixon administration our wholehearted support in acting in the best interests of our country.

Throughout all of these 7½ years we have done just that. We have not been the loyal opposition. We have been a responsible, coordinate body of our Government. We have never opposed for the sake of being contrary. We were ready to follow the path that led to what was best for our Nation. We had no leader in the White House and none in the second in command. When we sought to lead we were abused with vitriolic, unreasoned and illogical vetoes.

Ties that could have been broken by a Vice President's vote in favor of progress found the vote favoring reaction and opposing progress.

Just as the 80th Congress has found its niche in history under the title of "the do-nothing Congress" this Eisenhower-Nixon administration will go down as "the could-not-have-done-worse administration." Its voice of experience is the voice of frustration and failure.

The record of this Republican Eisenhower-Nixon administration is so bad that more and more candidates running for office under the Republican Party's label will disown their party and try to disassociate themselves from it in order to get elected.

The Republican cry throughout this Congress has been that the Democratic program, the Democratic Party philosophy, is fine but they, the Republicans, know better how to implement it. Unfortunately, too frequently they have voted contrary to the way they talked. All too often they were joined by those Democrats from the southern part of our country who are just as reactionary as most Republicans.

When Democratic Congresses had Democratic Presidents and Vice Presidents we moved forward. We were not scourged with vetoes. All we needed was a majority of each House of Congress and a President in sympathy with our goals, in fact, setting our goals, and we had good, sound, responsible Government.

If we had had a President, or even a Vice President, who took the trouble to find out what the people wanted or what was good for the people, either of them, the President or the Vice President, could have delivered enough Republican votes to help us do the job. It is useless to consider where they were or why they were missing when this aid was needed. The sad fact is that they were nowhere to be found when they could have been so helpful.

I have heard the taunts that the Democrats in Congress could have passed any legislation they wanted because two-thirds of each House were Democrats. That just is not so. At no time did the Democrats in the Senate, even counting all the southerners, constitute a two-thirds majority. The nearest they came to that was a count of 66 to 34, which was one short of two-thirds of the 100 Members of the Senate. In the House we were never that close. 283 to 154 was as close as we got in this Congress. We failed to override vetoes by from one to six votes. The result was, instead of rule by the majority we had rule by just more than one-third plus a veto.

Those are the reasons why we have had no aid to depressed areas, no aid to education, no aid to housing, no real liberalization of our social security laws, no increase in minimum wages, no good farm bill, no sufficient liberalization of our immigration laws, no proper conservation and water pollution control bills, and an insufficient, unworkable and improperly financed bill for medical care for the aged.

We authorized and appropriated more money than requested for national security and defense. We believe that the lives and liberty of Americans cannot be measured by dollars and no sum is too great to preserve them. But a see-nothing, hear-nothing, learn-nothing Eisenhower-Nixon administration has refused to spend that money. They have talked big and acted little. That is why our entire defense and missile program is outdated.

Our loss of prestige throughout the world, among our friends and neighbors, is bad enough. It is, however, as nothing when compared to the real danger that now besets us. What answer can they give us? They know that the Atlantic and Pacific Oceans are no barrier to trouble in the Middle East and the Far East. But we do not even have those oceans separating us from the troubled areas at our backdoor and at our front-door—in Cuba, in Panama, in Central America, and in South America.

While talking about containing communism, they have permitted it to move in upon us. Imagine the cries of treason, and worse, if a Democrat were President.

During all this time, while prating about keeping us safe from our enemies, this Eisenhower-Nixon team has been demanding that we fight inflation at home by spending less. How have they done it? Let me tell you.

During 7 years of the Truman administration the cost of living rose just over 1 percent. Under Eisenhower and NIXON it has been pushed up 11 percent.

Everyone concedes that 4 percent unemployment is dangerously near a depression. Eisenhower and NIXON have pushed unemployment up to almost 6 percent.

They have pushed up the interest rate on GI mortgages more than 25 percent and on Government-guaranteed FHA mortgages almost as much. They have pushed up the interest our Government pays on the public debt almost 50 percent, to $9 billion a year.

Bankruptcy rates are the highest they have ever been in the history of this country. But the Eisenhower-Nixon administration ordered a curtailment of loans to small business while continuing to grant more and bigger favors to big business.

In 7 years the Eisenhower-Nixon farm program has cost the taxpayers $26 billion, 5 times more than in the entire 20 years prior thereto. In those same 7 years the Eisenhower-Nixon administration received and spent more billions of dollars than in all the prior administrations put together, starting with President Washington and ending with President Truman.

Had enough? I have.

Any doubts or questions about any of the foregoing will be quickly resolved by dropping a note to me at Room 1305, New House Office Building, Washington, D.C.

Aged Medical Care in Review

EXTENSION OF REMARKS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. RABAUT. Mr. Speaker, the controversy that waged during the 86th Congress concerning the question of medical care for our elderly citizens was assuaged to some extent in the Social Security Amendments of 1960. Neither of the two major points of view prevailed. Both the contributory social security approach, as embodied in the famed Forand bill and in the Anderson-Kennedy amendment, and the Javits amendment, so strongly supported by the administration, which provided for Federal grants to the States for subsidizing voluntary health plans, all met with defeat. The action finally taken came, as you recall, in the form of amendments to title I of the Social Security Act.

As you know, Mr. Speaker, this section provided for Federal financial participation only in State plans for old-age assistance. These plans, of course, must be approved by the Federal Government. Basically what has been done this year amounts to three basic changes in this section of the law. These amendments allow the States to develop plans that fall into one of three categories: First, those that cover both old-age assistance and medical assistance for the aged; second, those that cover only old-age assistance; and, third, those that apply only to medical assistance for the aged. A separate set of requirements has been

set down for each of these three types of plans. These requirements constitute necessary prerequisites for Federal approval of State plans. It is important to realize that until now the Federal Government could participate in State plans providing monthly payments to those people eligible for old-age assistance benefits. This was done under the Federal percentage formula by which a State received from the Federal Government four-fifths of the first $30 of its average monthly payments for each recipient plus the Federal percentage of the remainder of the average monthly payment excluding that part of the payment in excess of $65. This Federal percentage, of course, varies for each State in an inverse relationship with the square of the per capita income of the States, but it has a minimum of 50 percent and a maximum of 65 percent. Under the new amendments this payment to the States would continue but would be increased by adding a further payment based on the newly created Federal medical percentage. What this would do, in effect, is pay the States an additional amount based upon that portion of the average monthly assistance payment or of an amount up to $12 in excess of the average payment which the State spends for medical care of recipients of old-age assistance. This feature is specifically designed to encourage the several States to broaden and strengthen their medical programs for these people or to initiate new programs. In addition a whole new area of Federal participation has been created. That is to enable the States as far as possible to furnish medical assistance for the aged who are not recipients of old-age assistance but whose incomes and resources are not sufficient to meet necessary medical expenses, and to allow the Federal Government to participate in such efforts.

As one who has from the very start actively supported the Forand bill and consequently that approach which would pay for medical care through an increase in the social security tax, I was understandably disappointed at the defeat of that bill. I still favor that approach. But these new amendments are at least a start and I welcome them as a beginning toward the final solution of what to me is a "crying human need," not merely a pressing social problem. I feel sure, Mr. Speaker, that the years to come will see a continuing improvement and augmentation of this vitally necessary program.

Foreign Aid

EXTENSION OF REMARKS

OF

HON. MORGAN M. MOULDER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MOULDER. Mr. Speaker, at the end of World War II, the United States stood at the highest point of worldwide respect and power. For a short time, the United States stood ready to fulfill the world's hopes and aspirations. It had no part in kindling the flames of war. Our country had made a decisive contribution to victory. During the postwar years, the United States seemed dedicated to an infinite purpose—the purpose of binding up the wounds of war for building the machinery for the preservation of peace, of aid and guidance to the underprivileged, and of directing the great newly discovered forces of atomic energy exclusively toward peaceful human betterment. This was the short era of magnificent good intentions, many of which were realized.

Unfortunately, there was also the era of dangerous delusion. Now, there are at least 27 Federal agencies engaged in either loaning or giving away our dollars and resources to foreign countries. I cannot reconcile the totally different attitudes and policies of our Federal Government toward the economic problems of our own people and those of people in foreign lands. There is no agency and no money for doing for our own people what many of these foreign lending and giving away agencies are doing for people abroad. It seems to me that if such assistance as all these foreign lending agencies are providing for people abroad are based upon sound economics, then surely such assistance for our own people is equally sound economics. If our Nation cannot afford the money for Federal aid to education, for pensions to veterans of World War I, farm price support programs, and help to distressed areas at home, then most certainly we cannot afford to spend our taxpayers' money for the same purpose in foreign countries.

And now, what about Federal Government receipts from the public?

Total tax receipts from Apr. 30, 1789, to Jan. 1, 1946 (157 years) (Washington to Truman)	$233,124,696,392
Total tax receipts from Jan. 1, 1946, to Jan. 20, 1953 (7 years) (Mr. Truman)	337,661,865,422
Total taxes collected and received since Washington's time and including the Truman administration (164 years)	570,786,561,814
Total tax receipts under the Eisenhower administration from Jan. 20, 1953, to June 1, 1960 (7 years, 4 months, 11 days)	572,258,819,664

In other words, the Eisenhower-Nixon administration collected $1,472,257,850 more in taxes and revenue than was received in the 164 years preceding them. Our national debt—Federal, State, local corporation and private, total a staggering $1,300 billion. Our Government owes more money than all other nations in the world combined and since the present administration has been in power the National or Federal Government debt has increased from $266 billion to $289.9 billion. This increase has occurred even though Congress has reduced the President's budget request each year to a total reduction during the past 8 years amounting to $24.3 billion. To increase taxes would be almost certain to bring diminishing returns. We cannot continue spending at the present rate without undermining our economy, which is what the Communists want us to do.

During World War II and for several years after, American exports of machinery and food went to wartorn countries, sometimes as foreign aid and sometimes as commercial sales. But when foreign countries reached the point where they could produce their own requirements, many of our exports were shut out completely by various economic restrictions. During that period when our products were barred, their manufacturers suffered no competition from us; and many of them copied our designs which saved them all of the cost of research, experimenting, and designing. With such advantages they have been continuously and are now taking over more and more of our export trade. Their invasion of our domestic markets is more evident each day, resulting in the loss of foreign trade and employment in our own country.

The so-called foreign aid program has financed and contributed every possible assistance toward diminishing our export trade and discouraged the development of industry at home. In spite of the fact that one of the Federal agencies engaged in giving our money and resources away to foreign countries had a total unexpended balance at the fiscal year beginning July 1, 1960, of $8,154,355,000, almost $4.2 billion was requested of the Congress by the President for this fiscal year.

We are virtually working to set up a planned economy in nearly every country in the world but the adverse impact of foreign aid upon our own economy is disastrous. Forty-five percent of our entire national debt has gone for foreign aid and our cumulative interest paid on indebtedness incurred for foreign aid alone is over $31 billion. Approximately $3 billion will be the 1960 interest obligation on all U.S. taxpayers.

Foreign aid programs are the greatest cause of inflation in America today and if we really want to benefit the American people, let us discontinue the foreign-aid spending program and pass these savings on to the American people. Certainly our own fiscal economy should not take second place to any nation.

Unemployment—Solutions to the Problem

EXTENSION OF REMARKS

OF

HON. JAMES G. O'HARA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. O'HARA of Michigan. Mr. Speaker, there is reason to believe that when the 87th Congress convenes in January, the Nation may be facing a full-scale recession.

For several months now economists have been predicting a worsening of business conditions. Business Week, the Wall Street Journal, the financial pages of the New York Times, and other publications have reported a growing volume of opinion that an economic downturn is imminent.

The Secretary of Labor has just reported that unemployment in August rose to 5.9 percent of the labor force—a new high for the year. Unemployment in Detroit and southeastern Michigan now exceeds 10 percent.

UNEMPLOYMENT—POSTWAR

The postwar years have brought a new kind of problem to the national economy—a new and growing type of joblessness that persists in good times as well as bad. It is time something was done about it.

Since World War II there have been three economic downturns which have resulted in periods of substantial labor surplus. There are two facts worth noting about these recessions, both equally alarming. First, the amount of unemployment for each was greater than the recession which preceded it. Second, recovery from each of these recessions left us with substantially higher levels of unemployment.

After the 1947–48 recession, unemployment was reduced to 3 percent of the labor force, but it never got below 4 percent after the 1954 recession. Since 1958 it has never been less than 5 percent.

What I have described is a trend of increasing joblessness running through the cyclical changes of recession and recovery. If this trend continues, and if we are in another economic downturn, unemployment in 1961 may hit 8 to 10 percent of the Nation's workers, and the period of recovery will still find 5.5 to 6 percent of them unemployed.

The principal characteristics of the postwar economy that have caused this trend are three: A growing labor force, a slow rate of growth, and automation.

Since the Korean war there has been a substantial slowdown in the rate of growth of the economy as a whole. As a result, the economy is generating new jobs at a slower rate than that at which the labor force is growing. Automation and technological advances in the form of laborsaving devices have reduced manpower requirements in many industries and permit a substantial increase in production without a corresponding increase in the number of jobs.

The flat statement that unemployment has reached about 6 percent of the labor force does not reveal the real magnitude of the problem. It does not take into account the 2.4 million workers who are working only part time. The total idle time of part-time workers is the equivalent of having another 985,000 workers unemployed.

Moreover, the average duration of a worker's unemployment status has increased markedly in recent years, and, increasingly, joblessness is concentrated in particular areas, communities, and industries.

Even if predictions of an economic downturn are erroneous, there is an obvious need for Federal action on a wide front to remedy some of the causes of unemployment and to relieve the human suffering it entails.

AUTOMATION

Automation of our productive processes is a source of potential abundance for our Nation. In the years ahead we hope to raise our own standard of living. We must maintain a costly military machine, provide for the needs of a rapidly growing population, create jobs for a working force that will reach 86 million by 1970, and we must continue to help less favored nations through the foreign aid programs. We can achieve these goals and satisfy these needs only by achieving monumental increases in productivity, and increased use of our scientific, technological know-how is absolutely essential.

Automation, however, must be used to serve the needs of all the people. Experience has shown that it can contribute to serious dislocation in the lives of individuals and virtually destroy the economy of whole communities. Automation contributed to a 6 percent decline in the number of factory production workers between 1948 and 1958 during a period when the index of industrial production increased by 35 percent. In the case of the auto industry, the number of employees is one-half of what it was some 8 or 10 years ago, yet auto production has increased.

Automation threatens to destroy thousands of jobs; it has created fear among workers and among their families. In some areas it has created poverty and hunger, as in the coal fields of West Virginia, Pennsylvania, and Kentucky. It has become a national problem, transcending the boundaries of communities and States. It is creating problems to which the Federal Government must immediately address itself.

It is, unfortunately, a problem we know far too little about. We have no firm basis for anticipating what its ultimate impact will be. At the present time we do not know how heavily our labor markets will be burdened with the task of redistributing displaced workers. We do not know its effect upon skills. Many skills will be rendered completely obsolete; new skills will be needed, but at present we have no way of knowing what these skills will be. We need to know more about the overall social and economic consequences of automation.

The search for the answers to these questions is beyond the means of single individuals, business management or State and local governments. There is immediate need for a national conference of industrial and union leaders, under the sponsorship of the Federal Government, to make a comprehensive and continuing study of automation and its effect on this Nation's manpower needs.

A PROPER SUBJECT OF COLLECTIVE BARGAINING

The Republican minority leader of the Senate, Mr. DIRKSEN, has introduced a measure to remove from the area of legitimate union-management discussion the question of discontinuation of jobs and job descriptions. This measure is aimed directly at the worker whose job is or may be destroyed by the introduction of automated processes. In many if not most collective bargaining contracts today management and labor have recognized their mutual responsibility to solve the problem of transition. It is unthinkable that the Federal Government should interfere in the efforts of the two most interested parties to solve the problem of concern to them both.

The Federal Government must make every attempt to encourage and assist joint union-management efforts through collective bargaining to minimize the hardships that result from the introduction of automated equipment. The working man must retain the right to bargain about the discontinuation of his job, not because he will use this power to prevent economic growth, but because he must have some protection during the period of transition so as to keep to a minimum the dislocations that result to him, to his family, and to his community.

The Federal Government through the Department of Labor should be in a position to render technical assistance to business management which is in general seeking an honest solution to the problems resulting from the introduction of technical change without causing undue hardship to their employees.

EMPLOYMENT SERVICE

The functioning of the U.S. Employment Service must be strengthened and expanded. Right now when a worker becomes unemployed, say at an auto plant in Macomb County, the local employment service knows little or nothing about the job opportunities that may be available to this worker in another part of Michigan or outside the State. Far too little guidance and counseling is available to him. There are substantial areas in the Nation in need of skills which exist in large surpluses in other areas of the Nation. The operation of the Employment Service should be expanded. A clearinghouse for information concerning job surpluses and manpower requirements should be set up in Washington with branches operating on a regional and statewide basis so that workers whose skills are surplus in one area can be informed of the need for their skills in other areas.

UNEMPLOYMENT COMPENSATION

Existing unemployment compensation programs in most States are inadequate in almost every respect. They are inadequate in terms of the number of people who are covered. Some 13 million workers—20 percent of the labor force—are not covered at all. Benefits are too low and their duration too short.

The individual State in competition with its neighbors to attract industry is unwilling and unable to improve the situation. We need national standards raising the level of benefits to at least 50 percent of the weekly wage, extending the benefit period to 26 weeks and giving protection to those not presently covered. Only Federal legislation can accomplish this.

RETRAINING

The Federal Government in cooperation with State and local governments, labor organizations and business management must work to devise new and effective programs to retrain workers whose skills have become obsolete.

Incidentally, I propose that we should revise our outmoded unemployment compensation laws so as to permit a worker who has been laid off to engage in a retraining program without losing his unemployment benefits. Workers should be encouraged to retain their skills, not hindered in their efforts to develop new and needed capabilities.

With results of information gathered from a study which I have proposed, the needs of American industry for particular skills can be projected. Our high schools and vocational training institutions can be alerted to our future needs and begin to train students in accordance with the findings.

DEPRESSED AREAS

Immediate attention must be addressed to the particular type of joblessness that characterizes the so-called depressed areas of the Nation where chronic and substantial unemployment has existed for months and years and where there is little hope for improvement unless the Federal Government undertakes a program to help these communities to help themselves.

I am impatient with those who state that the unemployed in these depressed regions should migrate to more prosperous areas and thereby solve their problems. It is unreasonable to expect people to pull up their roots, to leave the communities where they have lived all their lives, where their families and their friends are, to settle elsewhere where job opportunities are probably also limited. Rather than dismantle communities, it makes much more sense to me to assist these communities in their attempts to encourage expanding industries, both new and old, to locate in their areas.

The techniques for solving area unemployment are well known. They have been an integral part of our foreign aid programs since the days of the Marshall plan and the point 4 program. They are embodied in the area redevelopment bill which was unfortunately vetoed by the President on two different occasions. They are simply a combination of technical assistance for economic planning, loans to industry for planned expansion, loans and grants to communities for the utilities necessary to attract new industry and for the retraining of jobless workers to equip them with needed new skills.

I am happy to note that both political parties have endorsed such a program in their platforms, and perhaps it is not too much to expect that the Federal Government will finally act to help distressed communities meet the problems which are too far-reaching to be resolved by local initiative.

FOOD-STAMP PLAN

At the present time about 5½ million Americans are receiving surplus commodities consisting of flour, butter, rice, cornmeal, and powdered milk. During the last session of Congress we gave the Secretary of Agriculture authority to revive the food-stamp plan so that our huge agricultural surpluses could be more effectively used than they are today in feeding our hungry people. The Secretary, for some reason known only to him, has refused to use this authority. I propose that early next year we enact legislation that will require him to use this authority.

RATE OF ECONOMIC GROWTH

My proposals thus far have been directed mainly toward relieving the distress that results from unemployment and toward meeting the special problems that have resulted from automation. In the last analysis if we are to find a final solution to the problem of unemployment as well as to the problems resulting from automation, then the American economy must increase its rate of growth.

We must reverse the unrealistic and stifling monetary policies of this administration. High interest rates and tight money have stifled the American economy. We must consciously and vigorously set about the task of stimulating economic expansion.

The needs of our Nation are great. In the great cities and in many small towns and rural areas people are inadequately housed. There are shortages of hospital facilities; we have too few schools, too few teachers; we need additional vocational and recreational facilities. Our transportation facilities are antiquated and are in themselves a hindrance to economic development. If we set about meeting these needs through responsible public investment, not only will we get the things done which we should be doing, we will put men to work, and in doing so we will stimulate economic growth which of itself will provide increased Federal revenues with which to pay for the work we are doing.

Let us plan to act. We cannot continue to ignore the future. It does not promise to take care of itself.

Congress and National Defense: A Summary of the Action of Congress in the Vital Field of National Defense by the Honorable George H. Mahon, of Texas

EXTENSION OF REMARKS

OF

HON. GEORGE MAHON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MAHON. Mr. Speaker, the contributions of Congress toward a strong national defense have been outstanding. Congress and the country generally can take pride in the work that Congress has done. In a nonpartisan manner, Members of Congress—Democrats and Republicans alike—have worked, worked hard and effectively, to safeguard the security of our great country.

It seems at times that under both Democratic and Republican administrations, the Congress, not the executive branch, has carried the ball, provided the zeal and sense of urgency, provided the drive and determination, provided the initiative that has sparked our most spectacular gains in defense.

In this statement I shall review in a limited way the defense actions of the 86th Congress embracing the calendar years 1959 and 1960, and the fiscal years 1960 and 1961. For this period Congress has been under the control of the Democratic Party, but in the references which I shall make to Congress I shall include, of course, both Democrats and Republicans. The party in power in Congress must take the major responsibility for what Congress does or does not do, but the minority party can and does share in the credit or blame. In defense matters the 86th Congress has been markedly nonpartisan. It could be said that I, as a Member of Congress, speak from a biased standpoint, but I welcome an objective weighing of my statement by the people of our country.

Congress is not meddling when it seeks to influence defense programs and defense policies—it is not meddling, it is performing its proper and mandatory function. Article I, section 8, of the U.S. Constitution provides:

> The Congress shall have Power * * * to raise and support Armies * * * to provide and maintain a Navy; to make Rules for the Government and Regulation of the land and naval Forces.

This language has been interpreted to cover the raising and support of all military forces of the Department of Defense.

In the course of my remarks I shall briefly outline some of the key areas where leadership has been taken by Congress in pushing toward the attainment of a stronger defense. Congress, in fulfilling its constitutional responsibilities, seeks the honest advice of the best available military thinkers before engaging in actions affecting defense planning, new concepts, and weapons systems.

At times it will be found that in a given year Congress appropriates almost identically the amount of money for the Department of Defense, and I include all the services, as is requested by the executive branch. The quick conclusion in such instances would be that Congress has merely rubber stamped the budget requests for funds. A brief examination will reveal that such a conclusion would be far from the truth.

Congress, often within the framework of defense funds requested, has substantially and importantly changed the course of defense programs, giving them new direction and emphasis. In some cases the change may represent a reduction such as a cutback in funds for outmoded nonballistic missiles or other weapons considered by Congress to be of low priority value. A high priority weapon may be substituted for a low priority weapon. A high priority program such as the intercontinental ballistic missile program may be accelerated beyond the point recommended by the Executive. Good examples of the latter are the Polaris missile-firing submarine and the Atlas ICBM.

The changes made by Congress in the programs submitted by the Executive have been both up and down. Through this system Congress has placed its imprint in a most helpful way upon the course of our defense effort. The influence of Congress would have been greater except for the frequent tardiness of the executive branch in carrying out the in-

tent of Congress, as will be discussed hereafter.

Congress has been especially sensitive to the demand inherent in the present world situation that we positively must be as well prepared as possible to deter an attack upon this country. We need to do everything in our power to acquire a state of instant readiness. We must be able to cope with the danger of surprise attack. We have sought constantly to improve our state of readiness and our capability to discourage surprise attack or cope with it if required to do so.

Good examples of our actions this year in this respect are our increases above the budget programs for the development of reconnaissance satellites designed to give us information about the U.S.S.R. and our acceleration of the airborne alert program.

The executive branch does not always move to accelerate programs in consonance with congressional intent. At times the funds are impounded and not used for the year in which appropriated. This is the exception to the rule. However, while prompt action is not always taken by the executive branch to carry out the will of Congress, some action along the lines recommended by Congress is usually taken after a short or long delay and within the fiscal year for which the funds are appropriated.

AIRBORNE ALERT

For example, Congress on June 30 of this year provided $85 million above the budget for the purpose of improving our ability to maintain an airborne alert; that is, the ability in an emergency to keep aloft and ready for instant action a proportion of our B–52 bomber strike force. The executive branch recommended against additional funds above the budget for the airborne alert effort which Congress nevertheless provided. It seemed for a time that the efforts of Congress had come to naught in this special area of great importance to the defense effort. Then on August 9, 1960, 5 weeks after Congress took final action on the bill, the Secretary of Defense advised Congress that the airborne alert funds were to be used as directed by Congress for the purpose of improving our defense capability against surprise attack.

POLARIS MISSILE-FIRING SUBMARINE

The Polaris ballistic missile, designed to be fired to a range of 1,200 miles or more, from a submarine while submerged, is a weapon system which has captured the imagination of the world. Everyone is pointing with pride to Polaris. To the Congress must go a large share of the credit for the rapid development of this weapon.

In the 1959 budget estimates only two Polaris submarines were requested. This was for the fiscal year beginning July 1, 1958. Congress boldly added $609 million for an additional four submarines and for acceleration of the entire Polaris program. Unfortunately, these additional funds were frozen by the executive branch and 6 months elapsed before the Navy was permitted to place contracts for the first of the four Polaris submarines added by the Congress. The funds for three of these additional four submarines remained frozen throughout the entire fiscal year 1959. In the early part of the next fiscal year, these funds were finally released to the Navy and the objective of Congress was substantially attained—although there was a delay in the program which could not be made up.

In the 1961 budget, the budget for the current fiscal year, funds were requested to complete three Polaris submarines and for a start on three additional submarines. Here is what Congress did. We added $394 million above the President's January budget for the completion of an additional two submarines and for the initial procurement for an additional four Polaris submarines. This brought the funding program for fiscal year 1961 to five fully financed Polaris submarines plus advance components for seven additional submarines.

In recent weeks, the executive branch has announced its approval of a revised Polaris program for fiscal year 1961 for the construction of five submarines plus advance components for five additional submarines. However, even today the executive branch is withholding about $70 million of the $394 million additional provided by the Congress. The Navy is very grateful for the foresight and aggressive support of Congress for the Polaris program, and I believe the people of the country share the sentiments of the Navy.

ICBM PROGRAM

In the intercontinental ballistic missile program, the leadership and initiative of Congress is highly significant. Last year, the executive branch submitted a budget based on a 9-squadron Atlas ICBM program. Congress took the position that the program as submitted was inadequate and proceeded to increase it from 9 to 17 squadrons. The sum of $85 million was appropriated over and above the budget request for the purpose of getting under way promptly the accelerated Atlas ICBM program. It should be pointed out that presently the Atlas missile is our only operational ICBM and accordingly is the most important.

Last year Congress also added funds above the budget to accelerate the follow-on Minuteman ICBM program. Again this year, Congress has added funds to speed the development of a mobile capability for the Minuteman missile. Congress also added $136 million to the fiscal year 1961 budget to expand and accelerate the Atlas ICBM program.

It cannot be disputed that the actions of Congress on the Polaris, on the Atlas and Minuteman, and many other key weapons, have added immeasurably to the deterrent strength of the military forces of this country. This country would be much weaker today except for the forceful actions of Congress in these important areas. We would be stronger today had not the executive branch been tardy in a number of instances in implementing the will of Congress with the funds provided. And the funds were provided, as I have said before, by both Democrats and Republicans in Congress, on a nonpartisan basis. In that connection, I cite the committee reports and the congressional debates and the defense hearings.

THE B–70 BOMBER PROGRAM

During the calendar year 1959 Congress provided $345,600,000 for the fiscal year 1960 program for the B–70—the follow-on bomber to the B–52. These funds had been included in the President's budget. After Congress provided the funds, $195,600,000, or all but $150 million, was withheld by the executive branch from the B–70 program.

The budget program for the present fiscal year cut back the B–70 to a mere two prototype aircraft program, without providing for concurrent development of the elements needed for an operational weapons system. Congress refused to accept a cutback in this critical program which promises to open up a new era in manned flight and in weaponry. Funds for the development of a complete weapons system for the purpose of making this aircraft a fighting instrument, and not merely a prototype flying machine, were added by the Congress. Testimony given to the Congress indicated that a major consideration in the slowdown on the B–70 last year and again this year was the fear that expenditure ceilings would be exceeded.

The fiscal year 1961 budget request for the B–70 amounted to $75 million. The Congress appropriated an additional $190 million specifically for the B–70 program and provided an additional $100 million which was earmarked for use only for air defense aircraft or the B–70. The judgment shown by Congress in making an additional $290 million available for the B–70 was, to some degree, accepted by the Secretary of Defense when he announced on August 9, 1960, that $100 million of the additional funds would be released to the Air Force for the B–70 program.

ARMY MODERNIZATION

In each of the sessions of the 86th Congress, funds have been made available above the requests of the executive branch for the increased modernization of the Army. The amounts appropriated provide for various equipment running the gamut from armored personnel carriers, through modern rifles, to the Zeus antimissile missile. Over one-half billion dollars have been appropriated above the budget estimates for Army modernization during the 2-year period. Our purpose was to make our country better prepared to meet the threat of limited war. Unfortunately, the executive branch has not seen fit to use a large part of the additional funds provided by the Congress for this purpose.

AIRLIFT FOR DEFENSE FORCES

For years Congress has been dissatisfied with our capability for airlifting military forces and their equipment. Certain military exercises earlier this year reemphasized this inadequacy. Congress as a result of this inadequacy appropriated for the current fiscal year the sum of $200 million above the request of the executive branch for the procurement of modern, high-speed, long-range aircraft necessary for troop movements. Even though such funds

were not a part of the budget proposals, it is understood that the executive branch has now concurred in the action of Congress and is proceeding with procurement.

ANTISUBMARINE WARFARE

Other good examples of efforts to meet the demands of the present world situation are the congressional increases above the budget programs for antisubmarine warfare in recent years. The increase for the current fiscal year approximates $107 million. However, despite the critical importance of antisubmarine warfare, thus far the executive branch has cut back the antisubmarine warfare program and has withheld a total of $174 million provided by the Congress for this purpose. The net effect is the nullification of much of the congressional add-on and a withholding of certain antisubmarine warfare funds provided in the original budget request. Involved in the cutback are three nuclear attack submarines, plus some funds for research and development.

EFFECT OF CONGRESSIONAL ACTIONS

These examples give an understanding of the sense of urgency with which Congress has approached the problems of national defense. The atmosphere created by Congress has been wholesome. The actions referred to have encouraged defense-minded officials in the executive branch to move, and move faster, in many important areas.

REDUCTIONS IN FUNDS IN LOW-PRIORITY PROGRAMS

I have pointed out examples, and many more are available, of instances where Congress has increased budget estimates in order to initiate new programs or accelerate going programs. The objective has been achieved more or less within the framework of budgets which have been submitted to Congress. Reductions made in low-priority programs have made possible the achievement of these objectives in most instances without the necessity for large increases in the overall dollar amounts of the defense budget.

A few examples are in order. At the insistence of Congress, a review of the entire air defense program was made last year by the Defense Department. Many Members of Congress had concluded that the air defense program was unrealistic and geared to the past. The Defense Department itself, following a congressional study and a further Pentagon review, recommended in April of this year a reduction in the trouble-plagued Bomarc program in the sum of $381 million. Congress accepted reductions recommended in this program, and in this and related air defense programs, made further adjustments downward. In total, for the 2 years of the 86th Congress, the reductions effected amount to approximately $880 million, in all phases of air defense.

These congressional actions in air defense do not indicate a lack of interest in Congress in proper air defense. They relate chiefly to the newer concepts of how to meet the threat of attack and the deemphasis of the manned bomber threat in the light of the greater long-range threat of the ICBM. As heretofore stated, Congress has accelerated above the budget requests the Nike-Zeus program, designed to counter the ICBM.

REDUCTIONS MADE TO STIMULATE BETTER MANAGEMENT AND GET MORE VALUE FOR DEFENSE DOLLARS

The Congress has consistently emphasized the need for elimination of overlapping and duplicating functions, facilities, and organizations. Each year, funds ranging from a few millions to in excess of a hundred million dollars have been recovered through economy reductions in these areas.

In reference to economy reductions, it is pertinent to describe efforts made by Congress this year with respect to overstaffing.

Studies have revealed that in Defense Department headquarters alone, principally in the Washington, D.C., area, the annual cost approaches about $450 million. The total manpower involved, civilian and military, approximates 54,000. To get better control of this expenditure of money and manpower and facilitate economy in this area, Congress this year imposed limitations on Defense Department administration and reduced the funds by approximately 4 percent, and also took steps to reduce civilian payrolls in this field by about 10 percent.

In the area of travel Congress made a reduction in the budget this year of $55 million.

In another area, the Congress, upon the recommendation of the House Appropriations Committee has, for the past several years, made general reductions in the amounts of money available for the procurement of military materiel, not to cut the numbers of items to be procured, but in an effort to enforce better contracting methods. Wasteful practices in this area have caused widespread criticism in and out of Congress. Startling evidences of mismanagement and poor judgment have been brought to light, and Congress has sought to force economy and more effective procedures. The amount cut from the budget this year for this purpose exceeds $400 million.

IMPACT AND OBJECT OF CONGRESSIONAL ACTIONS

I repeat, the United States is immeasurably stronger today, and is more adequately prepared to meet its grave responsibilities by reason of the aggressive action of Congress taken upon its own initiative above and beyond the recommendations of the executive branch. Members of Congress know this. It is proper that the people of our Nation should know this, especially since the issue involved is the survival of the United States.

My position is, generally, that if Congress is due any credit, and I think it is, the credit comes principally not from increasing or decreasing defense budgets but from redirecting, reemphasizing, and accelerating key defense programs. The important role of Congress has been in the downgrading of marginal projects or low priority projects and the acceleration of high priority projects having a direct relation to our ability to survive.

It is not to be inferred that Members of Congress feel that they are great experts in defense strategy and weaponry. It is true, of course, that within Congress is a vast reservoir of information and experience in defense matters. Rarely does Congress provide funds for a defense project or policy that lacks a strong segment of support from military experts in the Pentagon. Nor does Congress in taking actions to reduce or accelerate defense programs act hastily. On the contrary, months of study are usually devoted to the question at issue. A good example of this would be the cutback of the Bomarc air defense missile program to which reference has been made.

As to whether or not the actions of Congress in modifying defense programs have been reasonably sound, I cite the fact that in a large number of cases the Joint Chiefs of Staff, the Secretary of Defense, and the administration itself, have quickly or tardily approved and adopted the congressional actions taken. This fact testifies to the soundness of congressional actions in defense matters.

At times there is a strong sentiment in Congress for major changes and increases in defense budgets and programs. The majority of the Members of Congress have been realistic with respect to this situation. Vast sums of money above budget estimates, which obviously would not be utilized for any effective purpose by the executive branch, have not been provided. Had the atmosphere and sense of urgency in the executive branch been different, then Congress might have undertaken certain programs of a much more far-reaching nature. The point is, Congress has not seen fit to play politics with the defense issue or provide funds for programs which would obviously not stimulate effective defense action. In other words, Congress has refrained from engaging in exercises in futility.

GENERAL SUMMARY OF DEFENSE APPROPRIATIONS FOR 86TH CONGRESS

In brief summary, for the two sessions, Congress has appropriated almost $80 billion in the regular annual defense appropriation acts. This total and the figures which follow below do not include funds appropriated during the 86th Congress for military construction. Appropriations for military construction for fiscal year 1960 were about $1.4 billion and for fiscal year 1961 were just under $1 billion.

In the first session, the estimates submitted were $39,248,200,000. Congress appropriated $39,228,239,000, representing program changes which resulted in a net reduction of $19,961,000. In the second session, the regular annual estimates presented officially were $39,335 million. Congress made program changes as heretofore summarized, which resulted in appropriations of $39,996,608,000, a net increase of $661,608,000 above the request of the executive branch.

ACTIONS IN DETAIL ON FISCAL YEAR 1961 DEFENSE APPROPRIATIONS

Mr. Speaker, on June 30, 1960, when I presented to the House the conference

report on the defense appropriations bill for the current fiscal year, I stated that at a later time I would insert in the RECORD a more comprehensive statement as to the actions of Congress on the measure then before us. In keeping with the statement heretofore made, I shall insert in the RECORD a table reflecting the various changes in the Department of Defense appropriation requests effected by the Congress as the 1961 defense appropriation bill progressed toward final approval. This table reflects the additions and the reductions made by the House, by the Senate, and in the final version of the bill approved in conference, as compared with the January budget submission from the President. I will not further discuss each of these changes. Within the detailed tabulation for 1961 there is an explanatory note of the House action, the Senate action, and the final conference action on each item. In addition, each of these items was explained in some detail in the House and Senate committee reports and my comments accompanying the conference report on June 30 in the CONGRESSIONAL RECORD.

Referring to the tabulation of the current year, it should be of considerable interest to Members to note that in acting on the 1961 defense appropriation bill, the House made program increases totaling $1,996,100,000, while at the same time the House made reductions in that bill totaling $1,993,300,000. This resulted in a net of approximately $2,800,000 more than the overall budget request.

The changes up and down were effected in a number of appropriations and in many programs. They have been summarized here into about 25 major items for purposes of brevity. Following these items through the legislative process, it will be noted that in taking action on the bill, the other body approved most of the program increases made by the House except for air defense, airborne alert, and antisubmarine warfare programs. At the same time, the other body included additional amounts above the House figures, for the B–70 aircraft program, Army equipment modernization, and the Samos space project. In addition, the other body restored a substantial portion of the reductions made by the House so that the bill as passed by the other body provided for program increases totaling $1,866,500,000 and program decreases of $686,500,000, or a net increase over the budget request of about $1,180 million compared with the $2,800,000 increase over the budget approved by the House.

In the compromise that was agreed upon in conference, many of the reductions made by the House were reinstated, and some of the Senate increases were retained, so that the final version of the bill reflected program increases totaling $1,921,500,000 and program decreases totaling $1,259,900,000, or a net increase over the original budget estimates of about $661,600,000.

The actions taken all along the line in connection with the defense appropriation bill were very carefully considered. Each change upward and downward was thoughtfully weighed for its effect on the overall defense posture.

ACTION ON FISCAL 1960 DEFENSE APPROPRIATIONS

I shall also insert a summary tabulation reflecting the adjustments accomplished by the Congress in connection with the defense program for fiscal year 1960, during its consideration of the defense appropriation bill for that year. This table covers the past fiscal year 1960 and, of course, is not in the same detail as the table which reflects changes and explanatory notes for fiscal year 1961. Nevertheless, it does give an idea of the extent of congressional action on defense programs during the 1st session of the 86th Congress. While the bill as it finally passed Congress appropriated about $20 million less than the budget request, the program changes effected by the Congress substantially increased the defense potential of the United States and the majority of these changes were eventually concurred in by the executive branch. For a more detailed explanation of the congressional actions taken in connection with defense appropriations for 1960, Members are referred to the CONGRESSIONAL RECORD of August 4, 1959.

Changes in Department of Defense appropriation bill, 1961, from the January budget submission

[Dollar amounts in millions]

	Changes from budget estimates approved by—		
	House	Senate	Conference
ADDITIONS			
1. Army National Guard and Reserves	+$105.4	+$112.9	+$110.4
House: Added funds to maintain the respective strengths of the Army National Guard and Army Reserves at 400,000 and 300,000 rather than 360,000 and 270,000 as proposed in the budget.			
Senate: Approved House increases for strengths and added $7,500,000 for National Guard technicians.			
Conference: Approved increases for strengths and approved addition of $5,000,000 for National Guard technicians.			
2. Air National Guard	----------	+11.3	+11.3
Senate: Added $11,300,000 for the Air National Guard at the request of the Department, to provide for increased expense due to shift of F–102 aircraft.			
Conference: Agreed to increase.			
3. Marine Corps	----------	+40.0	----------
Senate: Added funds for pay and support of Marine Corps strength of 200,000 rather than 175,000 as proposed in the budget.			
Conference: Deleted funds for increased strength of Marine Corps.			
4. Modernization of Army equipment	+207.6	+260.2	+212.6
House: Added $207,600,000 to provide additional high priority equipment for so-called Army modernization. This increase was partially offset in the Army procurement appropriation by other program reductions totaling $170,500,000, thereby reflecting a net increase in the Army procurement appropriation of only $37,100,000 over the total dollar budget request. The offsetting reductions made were $120,000,000 for anticipated reimbursements for off-the-shelf sales of surplus equipment not reflected in the budget estimates, $42,500,000 as a part of the overall economy reduction applying to all procurement accounts; and $8,000,000 for procurement of jeeps.			
Senate: Added $215,100,000 above the House for additional Army modernization but offset this increase by indicating that the figure included restoration of all but $8,000,000 of the House reductions. Thus the Senate only approved $45,100,000 of the House increase for Army modernization and in effect added $215,100,000 more for a total modernization addition of $260,200,000.			
Conference: Agreed to an appropriation for Army procurement which is $158,400,000 above the budget estimate. This increase for Army equipment modernization, however, is supplemented by the reductions made in this appropriation in the same manner that other program adjustments are reflected in this tabulation. Therefore, the final action in conference on the item of Army equipment modernization provided $212,600,000, including the $158,400,000 over the budget estimate, the $46,200,000 economy reduction applied in this appropriation as in all procurement appropriations, and the $8,000,000 reduction for jeep procurement. In addition, the conferees agreed that if and when any part of the $120,000,000 anticipated to be realized as reimbursements for off-the-shelf sales of surplus stocks is realized, these funds should also be applied to Army modernization.			
5. Airlift	+250.0	+210.0	+200.0
House: Added $250,000,000 over the budget for procurement of urgently needed modern aircraft to provide a greater airlift capability.			
Senate: Approved $200,000,000 of the House amount for modern airlift and added $10,000,000 for procurement of F–27 aircraft.			
Conference: Deleted $10,000,000 for procurement of F–27 aircraft and agreed to the Senate figure for airlift.			
6. Air defense	+382.9	+167.9	+267.9
House: Added $215,000,000 for F–106 fighter aircraft as replacement for Bomarc missiles. This committee increase was augmented by an increase of $167,900,000 for air defense items proposed by the Department as a semiofficial budget adjustment.			
Senate: Eliminated $215,000,000 for the fighter aircraft added by the House.			
Conference: Added $100,000,000 to the Senate figure to provide for fighter aircraft, with the understanding that if these additional funds are not needed for fighter aircraft the money may be applied to a step-up in the B–70 bomber program.			
7. Airborne alert	+115.0	----------	+85.0
House: Added funds to provide for a greater capability to undertake an airborne alert, if and when necessary.			
Senate: Eliminated the House increase, relying upon the authority provided in sec. 512(b) of the bill.			
Conference: Agreed to an increase of $85,000,000 which doubles the amount in the budget for preparation toward attaining an airborne alert capability. Of this amount, $70,000,000 is for procurement of spare parts and $15,000,000 for operation and maintenance.			

Changes in Department of Defense appropriation bill, 1961, from the January budget submission—Continued

[Dollar amounts in millions]

	Changes from budget estimates approved by—		
	House	Senate	Conference
8. Antisubmarine warfare	+$207.0	+$41.9	+$107.0
House: Added $207,000,000 over the budget request for ASW, including $100,000,000 for research, $57,000,000 for an additional nuclear powered submarine and $50,000,000 for 2 destroyer escort vessels, and in addition refused to accept a reduction of 2 nuclear submarines estimated to cost $114,000,000 as proposed by the Department in the semiofficial budget amendment.			
Senate: Eliminated $58,100,000 of the House funds for research, $57,000,000 for 1 nuclear submarine and $50,000,000 for the 2 destroyer escort vessels.			
Conference: Provided $50,000,000 for ASW research and restored $57,000,000 for the attack submarine deleted by the Senate.			
9. Polaris	+394.0	+394.0	+394.0
House: Added $241,000,000 to the Polaris program and accepted the semiofficial budget adjustment request for $153,000,000. This approved a program for fully funding 5 submarines, with supporting missiles and equipment, and partially funding 7 submarines, instead of fully funding 3 and partially funding 9 as proposed in the semiofficial budget adjustment request of the Department. The original budget requested full funding for 3 and partial funding for 3.			
Senate: No change from House.			
Conference: Not in conference.			
10. Minuteman missiles	+47.7	+27.0	+27.0
House: Added $20,700,000 above the budget to speed development on a mobile capability for the Minuteman missile and accepted an increase of $27,000,000 as proposed in the semiofficial budget adjustment request.			
Senate: Deleted the $20,700,000 added by the House.			
Conference: Agreed that extra funds added by the Senate for Samos could be made available to extent of $20,700,000 for Minuteman missile if deemed advisable.			
11. Atlas	+136.0	+136.0	+136.0
House: Accepted the addition of $136,000,000 for Atlas as proposed in the semiofficial budget adjustment request.			
Senate: Approved the House action.			
Conference: Not in conference.			
12. BMEWS	+35.0	+35.0	+35.0
House: Accepted the addition for the ballistic missile early warning system as proposed in the semiofficial budget adjustment request.			
Senate: Approved the House action.			
Conference: Not in conference.			
13. B–70 aircraft program	----------	+285.0	+190.0
Senate: Added funds to carry on the B–70 program at a level designed to produce a complete weapons system rather than the 2 prototype aircraft program proposed in the budget.			
Conference: Provided funds for development of a complete weapons system as proposed by the Senate but with reduced funding during fiscal year 1961. In addition, agreed that $100,000,000 added for fighter aircraft may be used for the B–70 if such fighter aircraft are not procured.			
14. Space projects:			
Midas	+36.6	+26.4	+26.4
House: Added $10,200,000 to the $26,400,000 increase proposed in the semiofficial budget adjustment request for the Midas project.			
Senate: Deleted the $10,200,000 House increase for this project.			
Conference: Agreed that extra funds added by the Senate for the Samos project could also be used for this project to the extent of $10,200,000.			
Discoverer	+45.0	+35.0	+35.0
House: Added $10,000,000 to the $35,000,000 increase proposed in the semiofficial budget adjustment request for the Discoverer project.			
Senate: Deleted the $10,000,000 House increase for this project.			
Conference: Agreed that extra funds added by the Senate for the Samos project could also be used for this project to the extent of $10,000,000.			
Samos	+33.8	+83.8	+83.8
House: Added $33,800,000 for this satellite project.			
Senate: Accepted the House increase for this project and added $50,000,000 more.			
Conference: Agreed to the Senate increase but also agreed that the increased funds could be used for the Minuteman, Midas, and Discoverer projects to the extents indicated.			
Total additions to budget	+1,996.1	+1,866.5	+1,921.5
Army	+313.1	+373.2	+323.1
Navy	+601.0	+475.9	+501.0
Air Force	+1,082.0	+1,017.4	+1,097.4
Office Secretary of Defense	0	0	0
REDUCTIONS			
1. Travel	−73.1	−57.4	−55.8
House: Made a 10-percent reduction in all travel funds for the Department of Defense.			
Senate: Made partial restoration.			
Conference: Agreed to Senate restoration plus an additional $1,600,000 for the Marine Corps.			
2. Transfers of surplus stock fund cash	−15.5	−15.5	−15.5
House: Transferred surplus stock fund cash to certain military personnel appropriations.			
Senate: Approved House action.			
Conference: Not in conference.			
3. Communications	−84.3	----------	−24.3
House: Held funds for communications to the 1960 level to compel consolidation and better management.			
Senate: Restored the increases requested for 1961.			
Conference: Agreed to restoration of the increase in funds associated with various warning systems.			
4. Departmental administration	−33.6	−13.6	−18.6
House: Made a reduction in salary and expense items for all departmental headquarters offices and placed a numerical limitation on military personnel and a fiscal limitation on amounts available for the expenses of such headquarters.			
Senate: Restored a part of the House reduction and deleted the limiting language from the bill.			
Conference: Agreed to a reduction of $18,600,000 applicable to departmental headquarters offices but making personnel reductions effective by Dec. 31, 1960, and restored the language limitations.			
5. Operation and maintenance generally	−85.8	−63.7	−66.3
House: Made a number of economy adjustments in operation and maintenance funds in addition to travel, communications and departmental administration. These reductions were for aviation fuel, mission support, flying, costs related to proficiency flying, motor vehicle hire, maintenance of Wherry and Capehart housing, and education of dependents.			
Senate: Restored parts of each of these reductions, except for family housing maintenance which was reduced further.			
Conference: Agreed to Senate restorations except administrative use of aircraft and dependents education for which only a part of the Senate restoration was agreed to.			
6. Army procurement	−128.0	−8.0	−8.0
House: Made $8,000,000 reduction for jeep vehicles because of slippage in the program and $120,000,000 reduction for unbudgeted funds anticipated to be realized from reimbursements from off-shelf sales of surplus equipment not to be replaced.			
Senate: Restored House reduction of $120,000,000 for anticipated reimbursements for off-shelf sales.			
Conference: Agreed to Senate action in restoring $120,000,000 reduction reflecting anticipated reimbursements but agreed that if and when any part of such reimbursements are realized they should be applied to Army equipment modernization.			
7. Procurement generally	−400.5	----------	−418.1
House: Made a percentage reduction in all procurement items to force more economical procurement management and practices.			
Senate: Restored the House reduction.			
Conference: Agreed to a percentage reduction in all procurement items as proposed by the House. The increased amount reflects restoration of other House reductions in procurement appropriations and Senate program increases.			
8. Aircraft procurement	----------	−17.8	−17.8
Senate: Approved a reduction of $17,800,000 in aircraft procurement for F–102 support equipment at the request of the Department.			
Conference: Agreed to the Senate action.

9. Aircraft carrier	−$293.0		
House: Eliminated funds for an aircraft carrier. Senate: Restored funds for the aircraft carrier. Conference: Agreed to provide funds for an aircraft carrier.			
10. Air defense	−204.4	−$204.4	−$204.4
House: Accepted the reduction proposed in the semiofficial budget adjustment package for SAGE and other air defense items. Senate: Approved the House action. Conference: Not in conference.			
11. Bomarc	−675.1	−306.1	−431.1
House: Accepted the reduction in the Bomarc program proposed as a part of the semiofficial budget adjustment package and took further action to eliminate the Bomarc-B program entirely and recover as much of the funds as possible. A part of these funds were then applied to buy fighter aircraft to replace the Bomarc missiles as indicated above. Senate: Restored the House reduction in the Bomarc program and reinstated $75,000,000 for 2 bases proposed for elimination by the Department as a part of the semiofficial budget adjustment request. Conference: Agreed to a modified Bomarc-B program which is $244,000,000 above the House action, $125,000,000 below the Senate action, $431,100,000 below the January budget, and $50,000,000 below the revised program proposed by the Department as a part of the semiofficial budget adjustment proposal in April.			
Total reductions from budget	−1,993.3	−686.5	−1,259.9
Army	−224.7	−41.6	−100.2

Another One for the Books

EXTENSION OF REMARKS

OF

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. ASHLEY. Mr. Speaker, the public library services of our Nation are a vital part of the educational opportunities which we provide our citizens in an effort to give equal opportunity to all. Although the library services program, which came into being with enactment of the Library Services Act during the 84th Congress, has been in operation for 5 years, the condition of library services in rural areas is far from adequate.

We are spending vast sums to insure our Nation's strength abroad. Of great and equal importance is our strength at home and I believe there is no question that an informed and educated citizenry is the backbone of that strength. Today's libraries serve their communities in many important ways. Every public library is, in fact, a center for the dissemination of a wide variety of educational, vocational, and recreational materials; a source of guidance in the exploration and development of personal interests; a clearinghouse for the gathering and discussion of ideas, practical as well as cultural, important to the community and an invaluable extension of the school on all levels.

Mr. Speaker, I am proud to point to the fact that the first bill which I introduced upon coming to the Congress of the United States was a bill to establish the library services program. Last month the House of Representatives approved and cleared for the President's signature a bill to extend the Library Services Act "to promote the further development of public library service in rural areas" for an additional 5 years. It is, of course, impossible to adequately assess the value and the rich rewards realized by our citizens, particularly those in rural areas, as a result of this wise investment of Federal funds through the library services programs. The modest sums made available to the States through the program has not only done a good deal to provide our rural areas with library services, but has stimulated local governments and communities to doing their part in giving library facilities and services to our children and adults. In this connection, Mr. Speaker, and in an effort to clear up any

misunderstanding which may have resulted from the limited debate in the House of Representatives last month—with particular reference to the State of Ohio—I would like to record a few facts and figures.

In earlier discussion on this legislation it was observed that $21,261,612 of Ohio's intangibles tax money is spent each year on libraries in Ohio. And it is certainly true that $21 million is a lot of money. But take a look at where the $21 million went and what it means to the 88 counties in Ohio: $16 million or 75 percent of that total went into the 9 metropolitan counties in which are situated the cities of Cleveland, Cincinnati, Columbus, Toledo, Dayton, Akron, Canton, Youngstown, and Lorain; $19 million or 90 percent of the total went into the above counties and adjacent industrial counties containing such cities as Warren, Hamilton, Lima, Ashtabula, Springfield, Salem, Mansfield, Steubenville, Newark, and others.

Thus 31 counties received $19 million or 90 percent of the total library income in 1959. Fifty-seven counties had to exist on 10 percent of the total or approximately $2,200,000.

And what does this mean to the libraries in some of these 57 counties? Adams County, had a total of $6,526 on which to operate two libraries in the county, located in the communities of Peebles and Manchester. This is not enough to hire one librarian and rent a building, to say nothing of buying books, which is the library's reason for existence; yet this amount had to be divided among two libraries. How could such a library or libraries even begin to think of buying a bookmobile to serve the small towns and rural areas in the county? A bookmobile itself costs $15,000 to purchase and another $15,000 annually to operate.

How could a county like Carroll, situated right next to wealthy Stark County in northeastern Ohio but with a library income of $17,713 get an additional $30,000 to establish bookmobile service? If it received 100 percent of the collection in that county, which it did not, there would not be enough to do this.

How could Union County, with a library budget of $27,000 which might be considered adequate, pick up an additional $30,000 to start bookmobile service?

Monroe County in 1959 had a total intangibles collection of $10,509. How much library service will that provide? Noble County had a collection of $6,170 of which only $4,000 could be spared for the library. Pike County had a total of $6,333, not much better. Vinton County had $4,417. The library there received 100 percent of the collection, which sounds wonderful but still only represents about one-eighth of the cost of a bookmobile.

Finally, Mr. Speaker, I wish to insert in the RECORD an editorial which appeared last month in the Toledo Blade together with a feature article from the same newspaper which gives a pretty clear idea of the extent to which the State of Ohio has participated in the program, the services which our State library has provided under the competent leadership of State Librarian Walter Brahm, and the effectiveness of Federal legislation in this area. Mr. Speaker, I commend this body for its prudent action in extending the Library Services Act for an additional 5 years.

[From the Toledo Blade, Aug. 27, 1960]

PAGE OF OPINION

A little bill that had been snagged in the House Rules Committee, and which might easily have been lost in the shuffle, was passed this week by the House under a suspension of the rules and sped on its way to the White House. It is at least a small plus mark for the shirttail session of Congress.

The bill involved—and its prospects had seemed very dim for a while—was a 5-year extension of the Library Services Act of 1956. Under it, the Federal Government is authorized to provide a total of $7.5 million a year in matching aid to the States to encourage the development of rural library services.

This moderate Federal help has been most useful in Ohio. The chief and almost only public support for libraries in this State comes from the intangibles tax. Of approximately $22 million distributed to them from this source last year, 90 percent went to libraries in 31 industrial and urban counties.

These counties, of course, contain most of the population and supply the bulk of intangibles revenues. But that's no excuse for depriving people in rural areas, and particularly children who are the best customers of libraries, of books that educate and entertain.

The people of rural Ohio, and rural America, will benefit from the extension of this inexpensive form of pump-priming Federal aid. There's no surplus of books on the farms and in the small towns.

[From the Toledo Blade, Sept. 11, 1960]

EXPANSION OF STATE LIBRARY FACILITIES CHARTED UNDER THE LEADERSHIP OF FORMER TOLEDOAN—NEW PROJECTS IN THE WORKS FOR 143-YEAR-OLD AGENCY

(By Frank Kane)

COLUMBUS.—One of the oldest and yet perhaps least known of the State agencies is the State library.

It dates back to 1817 when Gov. Thomas Worthington used some State contingency funds to buy books for his legislators.

For many decades the State library remained largely an information center for State officials and members of the general assembly.

But in recent years, under the leadership of Walter T. Brahm, former assistant librarian of the Toledo Public Library, and with the aid of Federal grants, it has been rapidly expanding its activities.

Today Mr. Brahm, the State librarian, has big plans for its future, including a proposal to issue statewide library cards to Ohio residents which could be used to draw books from any public library in the State and establishing nine regional book storage and service centers to aid small libraries throughout the State.

As Mr. Brahm points out, most of the 270 tax supported libraries in Ohio are small, with budgets of less than $25,000 a year and staffs of fewer than a half dozen employees.

With the high cost of books today, they need every bit of help that they can get from the State in order to provide adequate service.

The first regional book storage and service center has already been established in Napoleon, to service about 30 small northwestern Ohio libraries. And Mr. Brahm is asking the general assembly to appropriate funds next year for eight other such centers.

The State library itself is housed on 2½ floors of the State office building in Columbus and has about 900,000 volumes, ranging from the latest fiction to all types of nonfiction.

Any resident of Ohio is eligible for a card enabling him to draw books from the State library. But as might be expected, most of the persons who visit the library are residents of Franklin County and State employees.

Governor DiSalle makes frequent use of the library in researching executive questions. For example, the library recently furnished him with a sheaf of material on the clemency powers of the Governor that he utilized in writing a formal statement commuting a death sentence.

Since State agencies are required to furnish copies of their official publications to the library, it also is used extensively by legislative research committees. Other States also mail copies of their documents and publications to the library.

In addition, the library houses a large genealogical collection, including census records which show the names of persons residing in Ohio up to 1880. It also has some valuable Ohio historical records, including letters of Arthur St. Clair, first Governor of the Northwest Territory, and replies to him from President Washington.

The library also does a considerable mail order and traveling book collection business throughout the State.

Persons can write for volumes unavailable locally and the library will either furnish them, with the customer paying the mailing costs, or make arrangements with another library in the State to ship the volume to the resident's local library for his use.

The State pays the loaning library 50 cents for handling and packaging of the volume. In addition it loans collections of books to small libraries for a year at a time.

It also provides advice to local libraries on financing and operations and distributes about $270,000 a year in State subsidies to them.

A total of $40,000 goes to the Cleveland and Cincinnati libraries for providing braille service to the blind and the rest is distributed on a needs formula.

The biggest boost to the library came in recent years when the Federal Government started allocating money to the States to improve rural library service.

Ohio now gets about $270,000 a year from the United States, and this money has been spent on bookmobile service to Adams and Brown Counties in southern Ohio and Fulton and Henry Counties and parts of Defiance County in the northwestern sector, the establishment of the regional center in Napoleon, purchase of additional books for the State library, and the start of a statewide cataloging service.

(The bookmobiles, incidentally, are almost self-supporting once they start operating because of local contributions, according to Mr. Brahm.)

The cataloging center, located in a former supermarket in Columbus, was inaugurated because today "it costs almost as much to catalog a book as it does to buy it," Mr. Brahm said.

Many small libraries simply cannot afford to hire skilled catalogers, and the State is trying to set up a system whereby it will furnish any of the indexing and cataloging operations at cost. It is already servicing about 15 small libraries, mostly in southern Ohio.

Mr. Brahm's most controversial project has been his proposal for a statewide library card. Officials of many smaller libraries have welcomed the idea, he said, but officials of some large libraries oppose it because they fear it will result in a lot of nonreturned books.

Mr. Brahm would have the State guarantee any losses and assume the responsibility for recovery from forgetful borrowers.

The State librarian, who receives $11,280 a year (less than head librarians receive in many major cities), has spent most of his life working with books. When he was in high school in his native Massillon, Ohio, he worked in the Massillon Library and then received a scholarship to Western Reserve University where he received a bachelor's degree and a master's degree in library science.

Later he worked in the Western Reserve Library before moving to Toledo in 1937 as head of the business and technology section of the Toledo Public Library.

In 1938 he was made assistant Toledo librarian and served in that post until 1942 when he became State librarian.

Today, he supervises a staff of about 60 persons working on a budget of about $769,000 per year, including the $270,000 a year in State subsidies to local libraries and $270,000 in Federal subsidies.

Let Us Be Worthy of Victory

EXTENSION OF REMARKS

OF

HON. FLORENCE P. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mrs. DWYER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the text of an address which I was honored to deliver before the biennial convention of the National Federation of Republican Women in Atlantic City, N.J.

The address follows:

Women have a reputation for facing facts, whether in their personal and family lives or in their political and public activities.

At this point in the 1960 campaign, it seems to me there are two overriding facts about American political and national life which we, as Republicans and as Republican women, have a special interest in facing.

The first fact is this: the Republican Party is a minority party in America today.

In recent years, it has been the exception rather than the rule when we have attracted to our party a majority of American voters.

The second fact is related to it: America is a minority country in the world today.

Our free institutions, our working democracy, our high standard of living have placed us in a uniquely fortunate position among the nations of the world—but a position from which it is increasingly difficult to win friends and influence people.

Together, these facts comprise the greatest challenge we have ever faced.

If the values and the principles on which our party and our country have been built are to live and thrive, then we cannot rest content with our minority status.

The party of Abraham Lincoln, Theodore Roosevelt, and Dwight Eisenhower possessed the vigor, the sense of purpose and the active public conscience which won for them and their administrations the personal respect and enthusiastic support of the American people.

It is our task to translate their vital and progressive approach to government—which is the finest tradition of Republicanism—into terms the American people will understand and to which they will respond. This is the way to generate the approval and the popular force which will win elections and help save our country.

In the same way, the American people have built a nation out of diverse peoples and different interests and varied regions, and have given it unprecedented unity and strength, freedom, and justice.

We must take this heritage and give it new meaning, not only for ourselves, in the new perspectives of the atomic age, but for the hundreds of millions of people in the new and developing nations of the world who—even now—are beginning to shape the future of our planet.

We must give new life and fresh significance to the ideas of freedom and justice and opportunity as they exist in America, demonstrating in practice our conviction that these fundamental values belong to all people without difference or distinction. Only in this way can we win the friendship and respect of peoples who want desperately to believe that America still holds out hope for a better world—of progress toward personal liberty, enough to eat, and a chance in life for their children.

In what way can we set about to attain these goals—to demonstrate our party's capacity to govern and to exercise the kind of leadership our country and the free world must have?

We shall be judged, I suggest, on our attitude toward the great issues and problems of our time, and on our ability to fashion solutions to these problems and to exert effective leadership in making those solutions work.

Three great issues stand out in my mind as being decisive for us: Science, education and civil rights. Actually, they are more than issues. They represent three vast areas of human activity in which our performance and our accomplishments will count far more heavily than our words or good intentions—whether as a political party or a Nation.

Consider science for example. To be first in the race for scientific achievement means more than national prestige, important as that is. Every new scientific breakthrough, every new discovery about the functioning of our universe, opens up vast and uncharted worlds—and, with it, creates great new resources of national power.

I do not believe we can afford to be less than best, for I do not believe we can permit such immense potential for good or evil to be controlled by those who do not share the fundamental values of Western civilization.

Education is another case in point. We cannot master the new science and the new technology, not to speak of the complex social, political, and economic problems which these developments have brought, without an intelligent and informed citizenry. In a democracy, where responsibility for everyone rests to some degree upon all of us, we can assure excellence in our national life only by providing the opportunity for excellence for all our people.

Until every young man and woman in America has a chance to develop his God-given talents to the fullest, we shall have work to do. Let us begin this work by harnessing the resources of our Federal, State, and local governments—as well as our private institutions—in a more effective partnership, in which every part makes its fullest contribution.

Underlying, or perhaps dominating, all other issues is the question of civil rights. This is the one great human test of our society—whether we who were conceived in liberty and born in human dignity are prepared to extend equal recognition and equal opportunity to all our brothers, of whatever color or religion or origin.

More than on any other issue, we in America are judged by the peoples of Africa, Asia, Latin America, and Europe on our record in civil rights.

The people of the world, including our own, may not appreciate the fine points of astronautics, but they see with an intense clarity what it means to put a man into space or to reach the moon.

They may not understand the sociological and psychological roots of prejudice, but they know the bitter face of discrimination as well as the warm hand of brotherhood.

We shall be judged, therefore—as a party and as a people—by the fruits of our ideals, by the success or failure of our effort to broaden the dimensions of the American dream to fit the framework of a new age.

As a party, we are well equipped for the task. Not only have we inherited a progressive spirit from our party's past, but we have fashioned a platform for 1960 which is as fine a statement of our national goals as we have ever written.

And in our party's leaders—in Vice President Nixon, Ambassador Lodge, and Senator Case—we have men of compassion and conviction, men who know with their minds and hearts the extent of the problems before us and who have committed themselves, as men of integrity, to the never-ending struggle for progress.

By now, it is a well-known fact that women in American politics provide the bulk of our workers and, perhaps by November, will account for the bulk of our voters.

Is it not time, therefore, for us to reassess our place in our party? Is it not time for us to assume a greater measure of responsibility, not only for practical precinct politics, but for the infinitely more important matter of assuring that our party lives up to its high ideals?

The opportunities are unlimited, and the means are at hand.

Let us be worthy of victory in November.

The Tight-Money Policy Has Shortchanged America

EXTENSION OF REMARKS

OF

HON. JAMES C. OLIVER

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. OLIVER. Mr. Speaker, we presently live in hope that the tight-money policy, which in effect has shortchanged America by restricting its economic growth, will soon be relegated to its proper limbo. The National Democratic platform wisely identified the restrictive effects of tight money upon our economic growth in the following statement:

ECONOMIC GROWTH

The new Democratic administration will confidently proceed to unshackle American enterprise and to free American labor, industrial leadership, and capital, to create an abundance that will outstrip any other system.

Free competitive enterprise is the most creative and productive form of economic order that the world has seen. The recent slow pace of American growth is due not to the failure of our free economy but to the failure of our national leadership.

We Democrats believe that our economy can and must grow at an average rate of 5 percent annually, almost twice as fast as our average annual rate since 1953. We pledge ourselves to policies that will achieve this goal without inflation.

Economic growth is the means whereby we improve the American standard of living and produce added tax resources for national security and essential public services.

Our economy must grow more swiftly in order to absorb two groups of workers: The much larger number of young people who will be reaching working age in the 1960's, and the workers displaced by the rapid pace of technological advances, including automation. Republican policies which have stifled growth could only mean increasingly severe unemployment, particularly of youth and older workers.

AN END TO TIGHT MONEY

As the first step in speeding economic growth, a Democratic President will put an end to the present high-interest, tight-money policy.

This policy has failed in its stated purpose—to keep prices down. It has given us two recessions within 5 years, bankrupted many of our farmers, produced a record number of business failures, and added billions of dollars in unnecessary higher interest charges to Government budgets and the cost of living.

A new Democratic administration will reject this philosophy of economic slowdown. We are committed to maximum employment, at decent wages and with fair profits, in a far more productive, expanding economy.

The Republican high-interest policy has extracted a costly toll from every American who has financed a home, an automobile, a refrigerator, or a television set.

It has foisted added burdens on taxpayers of State and local governments which must borrow for schools and other public services.

It has added to the cost of many goods and services, and hence has been itself a factor in inflation.

It has created windfalls for many financial institutions.

The $9 billion of added interest charges on the national debt would have been even higher but for the prudent insistence of the Democratic Congress that the ceiling on interest rates for long-term Government bonds be maintained.

The effect of the tight money policy has caused anxious concern on the part of many from all areas of the country. Indicative of this concern, several weeks ago I received the following letter from E. G. Johnston, editor and publisher of the Georgia Tribune. Some of my thoughts on the problem are contained in my reply to him.

THE GEORGIA TRIBUNE,
Columbus, Ga., July 14, 1960.

Hon. JAMES C. OLIVER,
House of Representatives,
Washington, D.C.

MY DEAR SIR: I have just finished reading a reprint of the CONGRESSIONAL RECORD, proceedings of the 86th Congress, 2d session, of March 21, 1960.

This document was sent to me by a gentleman of St. Louis, who is an ardent reader of my newspaper, the Georgia Tribune, which has national circulation, and it deals, as you know with a subject of which the Bible tells us, the "Love of which is the root of all (kinds of) evil."

Now, the thing I wish to do, inasmuch as I have recently run an article taken from Mr. Wickliffe B. Vennard Sr.'s book, "The Federal Reserve Hoax." I have been castigated, defumigated, and otherwise hounded by certain interests who were not begging bread by any means, and I am now seeking to proceed with handling through the columns of my paper some of your remarks made in the above-mentioned document, "not printed at Government expense," and I should like very much to have a word from you, whom I believe to be honest and honestly interested in this "age of deception," relative to "our money."

I shall be happy to place you on the mailing list of our Georgia Tribune, a newspaper seeking to tell as much of the truth as possible and especially that portion of truth which our dear daily press, bought and paid for by certain interests, doubtless, will not touch with a 50-foot pole.

With every good wish for your happiness and success, I am,

Sincerely,
E. G. (PARSON JACK) JOHNSTON,
Editor and Publisher.

AUGUST 30, 1960.

Mr. E. G. JOHNSTON,
Editor and Publisher, the Georgia Tribune, Columbus, Ga.

DEAR MR. JOHNSTON: Thank you for your letter of July 14. I am delighted that you have expressed some interest in my comments in the CONGRESSIONAL RECORD in which I inserted several articles dealing with Congressman WRIGHT PATMAN'S views and proposals concerning our money system.

I can imagine the criticisms and the difficulties which a crusading editor such as yourself encounters in trying to educate his readers on our monetary system. I will, of course, be glad to have you print any remarks of mine which you consider to be worthy of your readers' attention.

First of all, let me say that I do not belong to that small school of thought which holds that the Federal Reserve System is a hoax. It misreads history to suggest that such men as President Woodrow Wilson, Senator Robert L. Owen, and Congressman Carter Glass did not know what they were doing in framing the Federal Reserve Act. Those who suggest that the Federal Reserve System was created, in 1914, merely to serve some conspiracy of the "international bankers" also overlook the history of the periodic money panics and the chronic inadequacies of the pre-1914 money system which the Federal Reserve was intended to correct, and largely has corrected.

All of this does not mean that improvements in the money system are not needed, nor that reforms in the management of the system are out of order. On the contrary, there are inadequacies and abuses which cry for correction.

Let me give just a thumbnail sketch of the improvements which seem to me to be clearly and urgently needed.

1. The method of naming officials to the Federal Reserve System should be modified so that the policymaking bodies represent more of the broad public interest and are less heavily weighted in favor of the bankers' interests. Specifically, the Federal Open Market Committee should be changed. This is the committee within the System which decides how much money and credit the country will have and what interest rates we shall all pay the banks and other financial institutions for the use of money. This committee has on it five representatives elected by the banks. It is hard to escape the belief that the tight-money, high-interest policy which the System has forced upon the country during the Eisenhower administration has not been completely free of bias in favor of the bankers' profits. Certainly the System has imposed tight money and high interest in the name of "fighting inflation" even in periods of high unemployment, idle plant capacity, and surpluses of goods of all kinds.

Since 1952, personal income alone from interest has been more than doubled and is now at the rate of $25 billion per annum, which is more than twice the total farm income of the country. It would be hard to exaggerate the importance of this redistribution of the income, in favor of a relatively few families, which has been brought about by the high-interest policy.

2. The highly advertised fiction that the Federal Reserve is independent of the rest of the Government in all of its activities must be brought to an end.

When the Federal Reserve System was set up, it was with the intention that the System would, by its very existence, provide an elastic money supply. That is, the System was to provide a money supply which would automatically expand with expansions in economic activity. And similarly, the money supply was to contract automatically with contractions in the production of real wealth, should such contractions occur. But in recent years, the Federal Reserve officials have been operating on the reverse theory. Specifically, they have deliberately and consciously restrained the production of real wealth by reducing the money supply, and they have taken the position that it is one of their main duties to do this, whenever they consider it in the public interest to do so. I believe you will find, however, that these officials have no legal authority for trying to regulate the country's level of economic activity, except for such authority as is contained in the Employment Act of 1946.

The Employment Act of 1946 declares the national policy that the Federal Government shall coordinate and utilize all of its policies, resources, and agencies to maintain maximum employment production, and purchasing power—within a system of free enterprise. Since the act says that the Federal Government's agencies, resources, and policies are to be coordinated, I think we can assume that the law means just that. Obviously, we cannot have either rational Government or Government responsible to the people if the Federal Reserve is to operate as an independent, fourth branch of the Government, making the Nation's economic policies independently of the President's duties and responsibilities for economic policies. This would mean that the Federal Reserve people would exercise practical veto powers over decisions and policies reached in the constitutional way, by Congress' enacting bills and the President's signing them. Indeed, the Federal Reserve has, in practical fact, vetoed such policies and decisions during the Eisenhower administration, though I suspect with at least the tacit consent of the administration.

You know, of course, that the Democratic platform adopted at Los Angeles recognizes this unconstitutional state of affairs and pledges the Democratic Party to correct it. There is no suggestion, of course, that the President will or should impinge upon the independence of the Federal Reserve in the performance of its quasi-judicial duties and its quasi-legislative duties, which are the kinds of duties assigned to the System by the Federal Reserve Act. But determining monetary policy is an executive duty, and it would be folly to think that a Democratic President could carry out his economic pledges to the country without having a voice in deciding monetary policies. The pledge to restore our economy to a wholesome rate of growth and to provide the world with a practical demonstration that our economy can grow under a free-enterprise system as rapidly as the Russian economy grows under the Communist system most certainly cannot be kept under a continuation of the present tight-money policy.

3. The so-called stock which the private banks own in the Federal Reserve banks should be retired. While the private banks do not, in truth, own the Federal Reserve banks—indeed, they would own the Government's power to create money if they did—the existence of this stock causes many people and many of the bankers themselves to believe that the banks do own the System. This misunderstanding leads to banker pressures for Federal Reserve policies which maximize bank profits rather than for policies which are best for the general public. Canceling this stock and repaying the banks their money would clear up the confusion which leads to bad policies.

4. The Federal Reserve's method of buying and selling Government securities in the so-called open market needs drastic reform. The System buys and sells annually many billions of dollars of Government securities in this so-called open market, a "market" which in fact consists of a select group of 17 Wall Street dealers. This market should be opened up to all who care to trade in it—or to all who can trade in amounts above some reasonable minimum. The importance of obtaining a truly open and competitive market is that prices at which the Federal Reserve trades Government securities have a decided influence on interest rates throughout the economy.

Further, this so-called open market in Government securities should be put under public regulation. The people of this country have long since recognized the necessity for public regulation of the stock exchanges and the commodity markets for such things as cotton, wheat, onions, and so on—regulation not, of course, to fix prices, but to assure open and fair competition to safeguard against prices being rigged or the market's being manipulated.

5. A variety of steps should be taken to strengthen the smaller banks which serve the cities, towns, villages, and crossroads outside of New York and Chicago. One of these steps would be for the Federal Reserve to make available through the 12 regional Federal Reserve banks more of the total credit it does make available, rather than channeling, as now, substantially all of this credit through the New York City banks.

Furthermore, in turning out more of its credit through the regional Federal Reserve banks, the Federal Reserve should also return to the practice of discounting eligible loan paper for the local banks. This would mean more credit available to small and independent businesses, because the local banks needing more credit for this purpose could themselves obtain it. Independent, local businesses are rapidly losing out to the nationwide chains no less in Maine than in Georgia, and one of the main reasons for this is that the great corporations can, and do, obtain whatever credit they wish to have, while the smaller firms get only whatever is left over, if any.

Strong local banks having a fair share of the Federal Reserve's credit are the best hope that the Main Streets of America will not all become absentee owned—that the door of opportunity for initiative and independence will be kept open. Under its recent policies and methods of operation, the Federal Reserve System has not, I think, proved to be a complete solution to all of the problems it was set up to meet. Woodrow Wilson described these problems in 1911, in part, as follows:

"The plain fact is that control of credit—at any rate of credit upon any large scale—is dangerously concentrated in this country. The large money resources of the country are not at the command of those who do not submit to the direction and domination of small groups of capitalists, who wish to keep the economic development of the country under their own eye and guidance. The great monopoly in this country is the money monopoly. So long as that exists our old variety and freedom and individual energy of development are out of the question. A great industrial nation is controlled by its system of credit. Our system of credit is concentrated. The growth of the Nation, therefore, and all our activities are in the hands of a few men who, even if their action be honest and intended for the public interest, are necessarily concentrated upon the great undertakings in which their own money is involved and who necessarily, by the very reason of their own limitations, chill and check and destroy genuine economic freedom. This is the greatest question of all, and to this statesmen must address themselves with an earnest determination to serve the long future and the true liberties of men."

I am sorry for the delay in answering your letter. However, I am sure you will understand the pressing nature of my legislative duties.

Sincerely,

JAMES C. OLIVER,
Member of Congress.

The restrictive effect of the tight-money policy upon our economy is no illusion.

As a further demonstration, may I refer to an article, "New Business Rhythm," published in the October 1959 issue of Challenge.

Without the three postwar recessions, our GNP would now be running at an annual rate of about $600 billion, instead of the current $500 billion. The cumulative loss to our economy cannot be estimated with the precision required for the balance sheet of a business concern. But estimates I have undertaken, starting from various assumptions, range from $400 billion to $500 billion at 1958 prices—approximately the same order of magnitude as the cost of our participation in World War II.

In order to make any kind of estimate as to what an increase of $100 billion a year in the gross national product would mean to the economy, certain assumptions must be made. The following estimates assume that the additional output would have been possible without increasing prices on the average. It also assumes that the division of output between the private and public sectors of the economy would not be significantly changed.

Since in recent years personal income has averaged about 80 percent of gross national product, it is reasonable to assume that an increase of $100 billion in GNP would mean an increase in personal income of about $80 billion. This would mean an increase of $444 in per capita income, based on present population of about 180 million in the United States. Using the figure of the loss to the economy in the postwar period of $400 billion to $500 billion in GNP, this would correspond to a loss in average personal income, per capita, of some $1,600 to $2,000, or the equivalent of a full year's personal income for most of the years in the 1950's.

If we assume that government expenditures—Federal, State, and local—account for about 20 percent of total GNP, then an annual increase in GNP of $100 billion would mean an increase in Government purchases of goods and services of about $20 billion, and an increase of purchases in the private economy, by consumers and by business, of $80 billion a year. An increase of $20 billion annually can be visualized as being equivalent to the construction of an additional $1 million school and a $3 million hospital in every one of the 3,050 counties in the United States, plus in addition the construction of over 7,000 miles of modern highways, based on recent construction cost averages of about $110,000 per mile. Twenty billion dollars is almost twice the total expenditure for public schools in the United States in 1956, which was just under $11 billion.

The increase of $80 billion in GNP which can be attributed to the private sector of the economy would in dollar terms be the equivalent of the construction of 3 million $20,000 homes plus 40,000 industrial establishments of $500,000 each.

Of course, it must be recognized that any such increase in the GNP would be used for a wide diversity of purposes, the exact distribution of which, both within the private and public sectors of the economy, cannot be predicted. Hypothetically one might anticipate that if there were an increase of 20 percent in the GNP—from $500 billion to $600 billion—there could be a corresponding—20 percent—increase in number of houses started, about 280,000; and an increase in number of factory sales of automobiles of nearly 2 million.

If gross national product were now increasing at a rate of 5 percent a year, instead of 2½ percent, it would mean, in terms of a $500 billion GNP, an increase of $25 billion a year instead of $12.5 billion a year.

Using the same proportions as used above, this added increase of $12.5 billion would mean additional Government expenditures of $2.5 billion and private expenditures of $10 billion. The $2.5 billion would make possible in a year the construction of a $1 million school in each of 2,500 counties; that is, all except 550 counties, or the construction of 1,000 $2.5 million hospitals. The $10 billion private expenditure would be equivalent to the construction of 500,000 $20,000 houses, or 20,000 half-million-dollar industrial establishments.

Mr. Speaker, America has been shortchanged.

We Need Cool Heads and Stronger Defense

EXTENSION OF REMARKS
OF
HON. HARLEY O. STAGGERS
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. STAGGERS. Mr. Speaker, the world in which we live and work and play is getting more dangerous day by day. It is impossible any longer to ignore the steady pressure of foreign ideologies on American life. The threat to freedom of thought and of action grows more vivid and more direct as turmoil rises in Africa and in nearby Cuba. Every day's issue of newspapers and every day's reports on radio and TV offer new evidence of Soviet intransigence in parts of the world hitherto counted on the side of democratic freedom. Open threats to attack immediately any ally of the United States which dares to assist the deterrent program of this Nation have apparently paralyzed resolution in the smaller nations. Pakistan, Japan, Norway, Finland, and others have been subjected in rapid succession to the demand that they withdraw support to Western civilization or suffer the consequences. Cuba is promised military assistance in the event of any American action to defend our

rights in that next-door republic, and the Organization of American States is disinclined to raise any protest. In the Congo, direct Soviet intervention seems to be a present fact. From our viewpoint, the news is all bad. As the international situation worsens, Communist confidence grows more blatant. Either they have succeeded in perpetrating a gigantic bluff, or they have the power to do what they say they intend to do.

Public opinion in this country has already assumed that the latter is the fact. As a consequence, anxiety over world security, even over our own national security, is the No. 1 worry of a vast section of our people. How far behind the Russians are our military capabilities that they dare to taunt us on our very doorstep? What possibilities do we have of catching up with them? No domestic problem of inflation, of unemployment, of rising crime, of race relations, serious as these problems really are, engages a fraction of our concern. Are we, too, being hypnotized by fear of the imminence of something dreadful which we are powerless to prevent? Has that greatest of all fear, the fear of fear, reduced us to administrative inaction and impotence?

For a number of years prominent individuals in and out of Government have been warning us of the danger and protesting a do-nothing policy. Some of them have felt compelled to resign key positions in administrative office or in military research and production in order to express disagreement with things as they are. They include high officers in the Armed Forces and some of the most eminent scientists engaged in atomic research and development. They are on both sides of the political fence. Governor Rockefeller has not hesitated to add his voice to the theme, and it was so strong and impressive that the Republican candidate for President was forced to yield as far as he dared.

The President's budget for the fiscal year 1961 revealed that some $18 billion of funds previously appropriated for national defense had not been expended. The major part of these unexpended sums were specifically designated for research and procurement. If they had been expended for the purposes intended, would our military position be now inferior to that of Russia? Would we be compelled to endure fearfully and helplessly the hostile movements of the Communists? In the face of our rapidly declining power and influence in the world, we still persist in neglecting the all-out efforts necessary to reestablish ourselves. We hold fast to our foolish promise to abandon testing. While we claim overall superior deterrent power, we are admitting one by one our inferiority in specific arms. We know that in long-range missiles and in the ability to put into space heavy projectiles we are far behind the Russians. Now we are beginning to admit that we are also inferior in submarines, in aircraft, and in paratroops. In what particular, then, are we superior? Our advanced bases in countries which are supposed to be our allies may soon have to be abandoned. On the other hand, the Russians may soon have similar bases within easy distance of our borders.

Perhaps worst of all, we have advertised that we never intend to use what power we have until and unless we are directly attacked. We propose to wait until the initial fury of the enemy has been unleashed on our cities and our factories and our bases, and then attempt to reply with what resources we have left. If we are inadequate while our forces are unimpaired, what will be our situation when a half or three-quarters of our striking power lies broken and in ashes? A recent appraisal of Russian plans assumes that their attack will be directed first of all at our military installations. They would hope to immobilize them with the first outburst. Submarines and air force would then land troops and equipment which could seize our factories and our cities almost without opposition, and turn these to their own uses. The sickening details, and they are too realistic to deny that they are practical, are too horrible to contemplate. Undoubtedly our enemy possesses accurate maps of every flying field, of every missile base, of every military installation whatsoever. With time on his hands to plan the details of every move, and with assurance that we will not interfere until after the event, he can choose the hour best suited to his purposes. What point is it that we are supposed to have warning systems in operation, and that those systems will give us 15 or 30 minutes before the attack falls? Missiles once sent on their way cannot be turned back or turned aside from their target. They will speed to their appointed destiny and the holocaust will be upon us.

Philosophers thousands of years ago looked forward to an age of reason, when men would use their intelligence and their divine humanity to avert the destructiveness of war. They knew that a few days of conflict could destroy more than a century of civilization could build up. Why cannot men spend their energies and their ingenuity on building up instead of on tearing down? Unfortunately, to large and vigorous groups of human beings, war is a natural state of affairs. Whether we like it or not, naked force is the only thing respected. Prestige is earned and kept only by the ability to make good our word. The Communists believe that the kind of social organization they espouse is best for the world. They consider it realistic to impose that organization on the whole world because they know that as long as a different ideology is in existence their own is in peril. They know also that the only way to secure acceptance of their system is by force. They do not entertain for an instant any conscientious scruples in regard to methods that may be successful. Shall we abandon the field of realism to them?

In the first great crisis of our national history, when we were just entering on our contest with England for our independence, there were many prominent citizens of this country who favored compromise and negotiation with the mother country. Patriots such as Thomas Paine and Patrick Henry and Samuel Adams argued ceaselessly that the time for compromise was past and that negotiation only resulted in further yielding and submission. Our position today is by no means dissimilar. We must stop fooling ourselves with the vain delusion of some kind of accommodation with communistic philosophy. We must begin at once a heroic effort to match the striking power of the Red world. Things have already gone far enough—too far. The sooner we initiate a show of force, the sooner will our prestige and influence begin to rise among the nations.

A Report to My Constituents

EXTENSION OF REMARKS
OF

HON. ALFRED E. SANTANGELO

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, September 1, 1960

Mr. SANTANGELO. Mr. Speaker, in the Holy Book we are told: "Let justice roll down as waters; and righteousness as a mighty stream." This old Biblical injunction has for many years served as a guidepost for me in my public functions and in my efforts to obtain justice and righteousness for the people of my district.

I have just completed 4 years of service in the U.S. Congress representing the people of the 18th District of New York. This is a good occasion to inform my constituents about my record, and especially about my efforts to serve their needs and their interests. They are entitled to know it. I believe that a well-informed public is an intelligent public.

My district, which includes Yorkville and East Harlem, is one of the most cosmopolitan areas in New York. It is a community that is made up of people from every nationality, every religious faith, every race; there are 32 ethnic groups. Yet we live in harmony and peace, as good neighbors, and with little friction. For the most part they are working people and low-income families, but decent and loyal American citizens. I regard it as a great honor to serve as their Representative in Congress.

U.S. SECURITY AND DEFENSE

The security and defense of the United States against the onslaught of international communism still is the paramount issue in world affairs. Soviet Russia and Communist China have stepped up their activities in the past year to foment trouble, chaos, and disorder in many parts of the world. Through infiltration and subversion they have made inroads into peaceful areas of Asia, Africa, and Latin America. Cuba and the Congo are two such examples of Communist infiltration which is endangering the peace of the world and directly threatening the security of the United States.

Recently I forwarded to my constituents a copy of my speech entitled "Fidel Castro—From Liberator to Infidel." Consequently, I shall not repeat my opinion of Castro, and my endeavors to warn

against the Communist influence in the Castro government in Cuba.

Early in 1959 I was appointed as member of one of the most important committees in Congress, the House Appropriations Committee, which deals with appropriating funds for all Government departments and functions, including national defense. This has given me an excellent opportunity to learn at first-hand about our defense setup, the huge cost to maintain it, and the efforts to keep the United States prepared for any eventuality and to assure the security of our Nation. During the current fiscal year, for example, we appropriated close to $40 billion for defense purposes alone, and this constitutes about half of the Nation's total budget.

At hearings of our committee it was disclosed that the United States still possesses the greatest overall military strength in the world, despite the fact that in missiles and certain scientific achievements in space we may have fallen somewhat behind Russia. Our position remains strong, but we must not remain complacently smug, and we must continue all efforts to maintain our superiority with its deterrent capacity. For this reason, Congress approved some $660 million more for defense than the President requested. We felt that the present Republican administration was not doing enough in this respect, that it was more interested in balancing the budget than in safeguarding the Nation's security. We must continue to hope for peace, but we must also be prepared with our defenses. We cannot negotiate peace and security from a position of weakness; we can obtain peace through strength.

To further strengthen our position abroad, I supported the mutual security appropriation for military and economic aid to our allies. Wherever possible we sought to eliminate waste in our program to help underdeveloped nations. Our primary aim remains to strengthen our allies in order to eliminate poverty and hunger and to remove the causes which could bring communism to them. In this way we make it possible for them to join with us in the worldwide struggle against communism. In order to avoid waste and bribery in our foreign aid program, I introduced an amendment to eliminate certain practices by our officials abroad. The amendment was adopted and is now a part of American policy.

On several occasions, when we discussed the security of the United States and our lagging behind Russia in scientific progress, I appealed to my colleagues in Congress for national unity and casting aside partisan politics. On one such occasion I said: "We do not gain anything by talking about who is at fault. We know we have a struggle against communism. Let us face it as Americans and let us forget partisan politics."

I also supported legislation against seating Communist China in the United Nations; encouraging private investment abroad to promote American industry and reduce Government expenditures; and the so-called captive nations resolution calling for the restoration of freedom and human rights to the peoples of Eastern Europe suffering under communism. The latter resolution, of which I was coauthor, was passed unanimously. I was coauthor of a resolution to set aside a fleet, to be known as the Great White Fleet, to render emergency aid to nations suffering from famine, epidemics, and natural disasters.

WASTE IN DEFENSE CONTRACTS

During hearings of our committee, it was established that there were many wasteful practices in Government defense procurement, as well as useless programs. It was our estimate that about $4 billion is being wasted in this way, which could be used more efficiently and with better results or for reduction of the tax burden of the American people. In the past 2 years, I harped continuously on this subject, calling attention to the waste, and particularly the harmful influence of retired military officers in procuring defense contracts through methods described as "influence peddling."

As a result of my efforts, the Defense Appropriations Subcommittee investigated the situation. I testified before the committee, refraining from bringing direct accusations against such officers, but merely stressing the dangers involved when such officers take on employment with defense contractors. Their influence has proven costly to our defense budget, but certain elements of the press attacked me for my attempts to eliminate this influence.

I introduced bills last year and this year to correct this situation. In one bill it is proposed that the armed services use competitive bidding methods in awarding contracts, instead of negotiating such contracts. Another bill provides that there should be a ban on employment of retired officers by defense contractors for at least 2 years to eliminate influence peddling. When the appropriation for the Defense Department came up for consideration, I introduced an amendment which provided that none of the funds could be used to enter into a contract which provided compensation to retired military officers. Unfortunately, Congress did not approve my amendment by a close vote, which shows that many of my colleagues felt it was a worthwhile proposal. I shall continue my fight to eliminate waste and influence peddling in this important phase of our defense effort.

CIVIL RIGHTS AND CIVIL LIBERTIES

Civil rights continues to be a major issue in American life. We must strive to eliminate discrimination against minority groups because of their racial or national origin or their religious belief. The civil rights bill passed by Congress is a protection of the voting rights of all U.S. citizens, a right which is guaranteed in the U.S. Constitution. During the consideration of the civil rights I expressed my views when I declared that the "four cornerstones of the temple of equality are the right to vote, the right to decent housing, the right to education, and the right to employment. Of these, right to vote is the key to all civil rights." The significance of civil rights, I stressed in these words: "The bread of full freedom, human dignity, universal suffrage, and equality of opportunity has also been the American dream." I shall continue to fight for a meaningful civil rights legislation and equal opportunity for all.

MEDICAL AID FOR THE AGED

The 15 million citizens of our country who are 65 and over are today a most disappointed group because the medical care plan, as provided in the Forand bill, was not enacted. It was my belief that this bill was a humane and practical measure which advocated hospitalization, surgical and medical aid, and nursing home care for these elderly people under the social security system. It was the best approach to the solution of this problem, and for this reason I was a cosponsor of the Forand bill.

Several times in the past 2 years I spoke in support of the measure. I showed how it would help our elders in their twilight years, and I also pointed out that the Republican administration's proposal would merely be a cruel hoax on the people. I appeared before the House Ways and Means Committee to plead for adoption of a Forand-type bill. Unfortunately, the measure that was finally adopted is nothing more than a "pauper's oath" type of medical aid which will benefit very few, only the poorest of the poor, and it is not under social security. It will be handled instead by the States and there is no guarantee that all States will adopt, so that the overwhelming majority of the needy elderly people will not benefit by it.

I am disappointed by this measure. We could have done better. I think the elderly folks have been misled, and I would blame the Republican administration for this because of its opposition to the Forand bill. I am convinced that not until there is a change in administration will an adequate plan to meet the medical needs of the aged be adopted. I shall continue to work in that direction.

In addition, I have also sponsored and supported other legislation to increase social security benefits. One of my bills calls for reduction from 62 to 50 the age at which widows can become eligible to receive such benefits. Women over 50 who become widowed find it most difficult to obtain employment and are faced with many years of hardship. Another of my bills provides that tips and other cash gratuities received by wage earners should be regarded as wages under the social security system. Tips are considered as wages for income tax purposes but not for social security. This will enable service workers at hotels, restaurants and other places where tips are customary to receive higher social security payments when they retire.

LABOR LEGISLATION

Labor has not fared too well in the 86th Congress, due mainly to a coalition of Republicans and southern Democrats who defeated every effort to pass legislation to aid those in labor's ranks and to institute labor reforms where necessary.

My view was that economic advantages motivated the passage of the labor bill and not true labor reform. I supported

the Kennedy-Ives bill in the 85th Congress which was designed to eliminate racketeering and corruption. I opposed the Landrum-Griffin bill which went far beyond the measures to stamp out corruption and abuses in union activities. This bill, by its restraints on legitimate unions, perpetuates the economic advantages which southern and antilabor States enjoy because of their low wages and total lack of social legislation laws, such as minimum wage, disability compensation, and unemployment. This bill aids the flight of industry from New York and the industrial East to the South.

The situation was no better in the case of increasing the minimum wage from $1 to $1.25 an hour and to extend coverage of this benefit to several million more workers. I was one of those who had introduced a bill to increase the minimum wage, as did a number of my colleagues in both Houses of Congress. Senator JOHN F. KENNEDY, the Democratic Presidential candidate, worked hard to obtain passage of the measure. But the story is the same. The Republican-southern Democratic coalition stalled on it and finally defeated it. Our fight will continue in the next Congress.

I supported the area redevelopment bill which was intended to help depressed localities through various rehabilitation and works projects and would have provided much employment, but the President vetoed this bill. Another measure for the protection of American labor dealt with the importation of cheap labor from Mexico to work on U.S. farms. Nearly a half million such workers are imported yearly for this purpose, and this is hurting our own farm laborers. It was my opinion that the Government should not permit the entry of this labor, except for cultivation and harvesting of food supplies.

HOUSING

Adequate housing for millions of people still remains an acute problem in the large cities. In my district many families are still compelled to live in substandard dwellings. Not enough housing units are being built for the low- and middle-income families. There is also a great need to provide housing for elderly persons and for single people.

All efforts to pass effective legislation to provide adequate housing proved futile because of Republican opposition. Several times I called on Congress to take definite action to rejuvenate the Nation's housing program and to provide housing for all income levels. I urged that slum areas be eliminated, that deteriorating industrial centers be restored, and that displaced families be relocated in better housing. I cited the difficulties encountered in finding proper housing by elderly persons, veterans, college students, and most of all by minority groups who run into discrimination. I also introduced a bill to amend the Housing Act so as to provide aid to families and business concerns displaced by housing projects.

All these efforts were of no avail. Only a measure to extend for 1 year the home improvement program and to provide for college housing was enacted. The country still needs a decent housing program, which should include slum clearance, urban renewal, lower premium rates on housing loans, and so forth. Only under a Democratic administration will this be achieved.

SCHOOL LUNCH PROGRAM

Ever since coming to Congress I have taken an active interest in the school lunch program, which I consider an important medium for improving the health of the Nation's children by providing them with well-balanced and nutritious lunches at school. It also serves as an outlet for some of our agricultural commodities. I recently stated in the House: "The school lunch program is one of the most worthy programs we have in this country and it should be expanded. It is inexcusable that needy children do not have a school lunch program."

But instead of expanding it, the Republican administration and the Department of Agriculture are trying to curtail this program.

Several years ago I succeeded in increasing the cash appropriation for school lunches from $100 million to $145 million. This year, for reasons of economy, it was cut back to $95 million.

EDUCATION AND CARE OF OUR YOUTH

We all agree that we must give our youth the best possible education, but we have fallen behind in several respects. Higher education has become most expensive, so that families of limited means cannot afford to send their children to college. Our teachers are woefully underpaid. We are not building enough schools and youngsters must study in overcrowded classrooms or attend school in shifts. This is incredible in our country with its vast resources, and explains in part why we are falling behind the Russians in education.

When the bill to authorize financial assistance to the States for the construction of schools was brought in Congress, I supported it ardently. According to this bill, a sum of $325 million was to be allocated each year for the next 3 years to build schools. It is estimated that we have a shortage of about 132,000 classrooms, and if this bill had been enacted it would have reduced the shortage to about 85,000 classrooms. But as in the case of housing, minimum wage, medical care for the aged, and other programs to help the people, the measure was killed through inaction by the Republican-southern Democratic coalition.

Now the matter will have to come up again next year and, let us hope, under a favorable Democratic administration. It means another year's delay, and that means again overcrowded schools, double shifts, and low-salaried teachers. We are not fooling anybody but our own children and ourselves.

To cope with the problem of higher education, I introduced a bill to allow taxpayers a deduction from their income tax for tuition expenses paid for the education of their dependents. This deduction, if enacted, would be available for those whose dependents are attending college or high school where tuition is required, and would apply to tuition up to $600 annually. This would be of great assistance to parents.

Closely linked with education is the care of our youth, juvenile delinquency, proper employment for teenagers no longer attending school, and similar problems. These should not be ignored. Juvenile delinquency is a national problem and only an enlightened public can deal with it. Courts alone are not enough, but rehabilitation and preventive measures should be adopted with the aid of communities everywhere. I introduced a bill this year to provide Federal assistance for projects which will demonstrate or develop techniques toward a solution of this problem. I have also advocated that industry and government could make a valuable contribution toward the control or prevention of juvenile delinquency by providing jobs for young people, because too much leisure time and no outlook for the future leads them to crime.

AMERICANS OF PUERTO RICAN ORIGIN

Among the various nationality groups in my district, Americans of Puerto Rican origin have assumed a prominent place. They are becoming more integrated into the community with the passing of time and are making fine progress in overcoming the language barrier, social and economic adjustment, educational problems, and so forth. The community treats them as equals, and they in turn are assuming the responsibilities of good citizenship. Many Puerto Ricans have become active in politics, and some are working in Democratic ranks.

In addition to helping these people overcome economic, social, and language barriers, we are also doing everything possible to raise their standard of living, and especially their standard of health. For example, I have traveled through the district with a tuberculosis mobile unit urging the public to take chest X-rays and to protect themselves against the ravages of this disease. We have also sponsored programs designed to promote better understanding and intergroup relations between Puerto Ricans and other ethnic groups in the district, into which we have brought church leaders, community and labor representatives, and young people. We arranged for an exchange visit of seven boys of Italian origin from the district who spent a week in Puerto Rico last Christmas, and a similar group of Puerto Rican youths visited us.

Last year I visited Puerto Rico as a member of the Appropriations Subcommittee on Agriculture to study the rural electrification program there. I was pleased to see it was working efficiently, that 50,000 rural homes now have electrification and it is hoped to increase this to 100,000 homes in the next 3 or 4 years. Puerto Rico is undergoing a peaceful economic and social revolution, agriculture and industry are expanding, and the people look better fed and better dressed. I was pleased to learn that 240,000 children in Puerto Rico are benefiting from the school lunch program, for which I have been working these past few years. The United States can be proud of its

achievements in Puerto Rico and its relationship with the people there.

CONSUMERS AND FARM PROBLEMS

As a member of the Appropriations Committee one of my assignments was on the Subcommittee on Agriculture. Coming from a big city, I felt that I could best serve as a spokesman for the city people and consumers. I have come to the conclusion that there is no class war between farmer and city dweller; we are all interested in education, decent housing, human rights, and a better standard of living. When it comes to the high cost of living, farmers and consumers actually face a common struggle. Farmers are receiving less and less of the consumer dollar, yet the prices of food keep soaring—thus showing that the middlemen are really the ones who are profiting.

As spokesman for the consumers I shall continue to do all I can for the consumer benefit and protection, such as the school lunch program, poultry and meat inspection for consumer health, donations of food supplies to needy people, improvement of marketing systems and inspection, reduction of storage rates for agricultural products, donations of our food surpluses to famine-stricken areas abroad, and in other ways. I have also called attention to the so-called "quick-buck" operators in the food industry who are making excessive profits and have urged that these operations be investigated.

I led the fight to reduce the high cost of storing grains in commercial warehouses and bins, and as a result of my activities, the cost of storage has been reduced by $100 million. Nevertheless storage costs are exceedingly high and while bins are overflowing, poverty stalks in America and in underdeveloped nations. That is why I have supported many measures for an intelligent distribution of foods in our own country and in poverty-stricken areas of the world. Our economic superiority is our greatest weapon in the struggle for friends and peace, and we must use our surplus intelligently and must not store it without utility like Midas stored his gold.

I sponsored legislation to establish a Department of Urban Affairs which is to deal with urban problems, such as housing, urban renewal, slum clearance, water supply, air and water pollution, sewage facilities, public utilities, commuter transportation, and others, in order to make life more pleasant for those of us living in the big cities.

In connection with my service on the Appropriations Subcommittee on Agriculture, I was pleased when the chairman of the subcommittee, Representative J. L. WHITTEN, paid public tribute to me on the floor of the House on May 10, 1960, saying:

> The gentleman from New York is a splendid lawyer and a tireless worker, who is interested in the subject. He has contributed greatly to the considerations of this subcommittee and he has performed great services not only on the subcommittee, but also by his understanding of the problems of the industrial and city areas. Mr. SANTANGELO has done a great service on this committee, and I am glad to say so.

POSTAL AND GOVERNMENT WORKERS

I was happy to see Congress enact this year a pay increase for postal and Government workers. I strongly supported this increase, although I had hoped that it would be higher than the 7½ percent actually voted. Early in 1960 I introduced a bill to increase the salaries of postal and Federal employees by about 12½ percent. I felt that this was an adequate pay raise which these employees deserve and which would provide them with an income to work in dignity and to maintain the family as a unit.

When the pay raise bill came up for consideration, I spoke in favor of it and voted for it. When President Eisenhower vetoed the bill, I voted to override his veto because I felt that these workers deserved the raise. It was always my belief that the Government must treat its employees fairly, and for that reason I supported the raise and other measures which would improve the lot of postal and Federal workers.

Last year I voted in favor of the health benefits program for Government workers, and this year I supported the bill to extend these health benefits to retired employees. I also sponsored legislation to increase the annuity of retired Government workers.

VETERANS' LEGISLATION

Several important bills were enacted by Congress which are of interest to veterans, their dependents and survivors. I supported the bill to provide funds for direct loans to veterans for the purchase of homes and to extend the guaranteed loan program for another 2 years. I also supported bills to permit conversion of policies of national service life insurance for World War II and Korean veterans, additional compensation for children of disabled veterans, improvement of the pension program for all veterans and their dependents.

On several occasions I spoke in favor of providing decent housing for veterans, and also for protection of veterans' deposits on homes and giving them lower interest rates so that their monthly payments would not be so high. I sponsored legislation to remove certain provisions from the law which are unfair to veterans who have less than 90 days of service in the matter of non-service-connected disability. The veterans of this country deserve our fullest support at all times.

IMMIGRATION

With the exception of one small measure, there was practically no action by Congress in the field of immigration legislation. The one measure enacted would admit about 5,000 European refugees and would continue the alien orphan program.

I was cosponsor of a bill to revise the present discriminatory immigration and to abolish the national origins quota system, but the committee did not even hold hearings on any of these bills. Another of my bills proposed that 30 percent of the quotas each year be made available for issuance of visas to qualified immigrants who are parents of U.S. citizens or unmarried children of such parents. There was no action on this bill either. Despite these delays and setbacks I shall continue to work for liberalization of our immigration laws.

MISCELLANEOUS MATTERS

Among other bills which I supported were: admission of Hawaii as the 50th State; Water Pollution Control Act to eliminate pollution in rivers and along shores in the interests of public health; the Small Business Investment Act to help small business people obtain long-term loans; public works projects which include major improvements in New York harbor; food stamp plan for distribution of surplus commodities to needy persons in the United States, and other measures.

I sponsored legislation authorizing the Federal Government to participate in the New York World's Fair to be held in 1964; to establish a Joint Committee on Intelligence Matters to study the activities relating to the gathering of intelligence affecting the security of the United States; to reimburse States for certain free and toll roads on the national highway system; to designate March 9 of each year as Amerigo Vespucci Day in honor of the Italian navigator after whom America is named.

I was also cosponsor of a resolution, passed by both Houses of Congress, for U.S. participation in the centennial celebration in 1961 in honor of the 100th anniversary of the unity of Italy and recognition of the achievements of the Italian people during the last century.

I was cosponsor of a bill, enacted into law, which provides a deduction from income tax for all medical and dental expenses incurred by dependents over 65 years of age. If your parents or your wife's parents reside with you or are dependent on you for support, you may now deduct their medical expenses from your income tax. I also voted to reduce the cabaret tax from 20 to 10 percent.

I strongly supported the resolution in Congress expressing indignation at the desecrations of churches, synagogues, and other houses of worship of all religious faiths. We must not tolerate such indignities to religious edifices in this country. I have often participated in brotherhood rallies and on such occasions I have protested against those who seek to spread religious hatred and bigotry.

Similarly, I have protested against certain elements of the press and other media of expression who are defaming and maligning, directly and by innuendo, Americans of Italian descent. Such defamation of a proud ethnic group must be stopped, and henceforth we must cease the practice of guilt by association, which is un-American and undemocratic. In this connection, it is worth reporting that last year it was my great pleasure to sponsor 55 members of the Columbia Lawyers Association, an organization of lawyers of Italian origin in New York, for admission to practice before the U.S. Supreme Court. This year I again sponsored for admission 38 members of the same group.

I also supported the efforts in Congress to obtain the records of the Port of New York Authority in order to examine thoroughly its operations and the

charges of favoritism. The Port of New York Authority still permits extortionate tolls over bridges and tunnels in the New York area, although some of these, such as the Holland Tunnel, have been paid for several times over. It is high time that Congress looked into its financial dealings and operations.

On the anniversaries of the independence of various countries, I have made it a custom each year to extend greetings to the people of those nations and their kinsmen in America. I do this annually on the anniversary of the establishment of Israel, and express my continued support for that country. In the case of countries in Europe which have fallen under Communist domination, such as Poland, Lithuania, Hungary, Czechoslovakia, I protest the inhumanities perpetrated against the people of those countries and express the hope that they will soon be liberated.

My offices in Washington and New York perform many personal services for several thousand people each year who contact me or my staff on various problems. My staff and I are ready at all times to be helpful in any way we can to the people of my district. I am very proud of this record of service and want to express my sincerest thanks for a job well done to my Washington staff, Mrs. Melba Coutsonikas and Miss Maria Gobbi, for their invaluable help. Likewise, I want to thank my New York assistants, Max Feigin, Modesto Munoz, and Michael Lazzazaro, who are doing a splendid job in the district. Over 21,000 residents have been served in my area in the past 4 years.

I hope and trust that the people of my district will permit me to continue to serve them in the U.S. Congress. They know that I am devoted to the community, I understand its problems, and I have the interests of the people close at heart. They know that in my public service I have always tried to live up to the Biblical precepts of justice and righteousness for the people.

I ask you to read my record of service to the people and to judge it on its merits. Feel free to write to me about your problems or about your views on various issues and legislation. Your letters will be welcome and will receive full consideration. Please address your letter to: Congressman ALFRED E. SANTANGELO, New House Office Building, Washington 25, D.C.

Charles Flammand Renders Patriotic Service

EXTENSION OF REMARKS

OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. PHILBIN. Mr. Speaker, there recently came to my attention an outstanding and most unusual record of patriotic service which has been achieved by my friend and constitutent, Charles Flammand, of Northbridge, Mass.

For the past 41 consecutive years, Mr. Flammand has served as an official member of the firing squad designated by his American Legion post to participate in the community observance of Memorial Day. During these many years, Mr. Flammand, who is now 70, has been active in three American Legion posts and it now has become a tradition with Oliver Ashton Post No. 343, American Legion, of Northbridge, to name this wonderful gentleman to the Memorial Day firing squad.

With each passing year, new comrades have joined him in this annual tribute to Northbridge veterans of all wars and some of his fellow firing squad members who saw service in Korea can now recall Mr. Flammand's faithful service during the Memorial Days of their youth.

Often, this memorable and devoted service to his community and to his comrades has meant an early rising hour of about 5:30, but Charles Flammand has never been heard to complain. In fact, his fellow members of Oliver Ashton Post state that he has always been among the first to volunteer his services for the Memorial Day observance.

A well-known barber for many years in the Blackstone Valley, Mr. Flammand is now retired, but he maintains an active interest in community affairs and participates in many veterans activities. He served as a corporal during World War I.

I am very thankful to my friend, Mr. Rosaire Rajotte, of Northbridge, for writing me about the patriotic contributions of his fellow townsman. I am pleased, indeed, to have this opportunity to bring this most distinctive record of Charles Flammand to the attention of my colleagues in the House.

Schoeppel Answers COPE

EXTENSION OF REMARKS

OF

HON. ANDREW F. SCHOEPPEL

OF KANSAS

IN THE SENATE OF THE UNITED STATES

Thursday, September 1, 1960

Mr. SCHOEPPEL. Mr. President, in the days since the Congress adjourned I have been preparing the attached statement to be made a part of the CONGRESSIONAL RECORD. This statement which I have titled "SCHOEPPEL Answers COPE," I would like to have made a part of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SCHOEPPEL ANSWERS COPE

The most highly organized and most adequately financed political action machine in the United States today—financed in part by the dues money of individual union members—is the AFL–CIO committee on political education, better known as COPE.

The activities of COPE are supposed to be supported from voluntary sources. These funds enable COPE to operate like a well-greased political machine in all elections, besides subsidizing a nationwide propaganda offensive.

Before the 1956 election, COPE published a booklet entitled "How Your Senators and Representatives Voted 1947–56." Again, before the 1958 election, COPE distributed a second booklet entitled "How Your Senators and Representatives Voted 1957–58." COPE stated that "if the voters have full information about the record of candidates running for office they will vote for the best ones. On that belief is built the political education program of the American Federation of Labor and Congress of Industrial Organization."

COPE has assumed the responsibility of telling the American people how their Senators and Representatives voted, based on a very small percentage of the total record votes held. Because of the wide distribution of these booklets—some 16 million copies—I have made the following analysis of the votes selected by COPE. I am confident that the people of Kansas will be a fairer judge of my record than the AFL–CIO committee on political education.

In 1956, I had the honor of being chairman of the Republican senatorial campaign committee. I charged that COPE had selected only 20 Senate rollcalls for the 10-year period, 1947–56, representing only 1.3 percent of a total of 1,528 Senate rollcalls. One must tell the whole truth and even if those 20 rollcalls were correctly described, they could not possibly constitute the whole truth concerning the record of any U.S. Senator.

Of the 20 votes selected, on 2 votes I was not yet a Member of the Senate; I was absent on official business on another 2 votes; and of the 16 votes in which I participated, I voted, according to COPE, right 2 times, and wrong 14 times.

The issues COPE selected as representative of the categories of labor, general welfare, domestic policy, and foreign aid were most unrepresentative. I would like the people of Kansas to know how COPE has distorted the description of the issues, and has judged me as voting wrong in 14 instances.

A. LABOR

Under the heading "Labor" I was listed by COPE as voting wrong on six occasions.

I. COPE charges: Taft-Hartley (H.R. 3020); June 23, 1947, veto overridden, 68 to 25; nay=right. Vote to override President Truman's veto of act destroying protection of Norris-La Guardia and Wagner Acts; subjecting unions to injunctions and suits for damages; outlawing closed shop, secondary boycott, and union hiring halls.

My position: I was not a Member of the Senate on June 23, 1947. I was elected to office in November 1948 and took my oath of office in January 1949.

In spite of the fact that during the past Congress, there was a 2-to-1 Democratic majority, the Taft-Hartley Act was retained and strengthened by the adoption of the Landrum-Griffin bill to better protect the rights of the rank-and-file members of unions rather than their leaders.

II. COPE charges: Lucas anti-injunction amendment (S. 249); June 28, 1949; defeated, 44–46; yea=right. Amendment to Taft-Hartley by Senator Lucas, Democrat, of Illinois, would have abolished injunctions in so-called national emergency strikes.

My position: This amendment would have eliminated the use of injunctions in national emergencies after a plant had been seized by the Government.

The issue before the Senate when this vote was taken was simply this: Should the Government—and only the Government—during a national crisis be permitted to use the injunction to maintain production during the period of Government seizure.

COPE again gave the impression that the vote was a vote to permit private employees to invoke the injunction. Nothing could be further from the truth.

I voted against the amendment. I would do it again. The welfare and the very life

of this Nation must always be placed above the interest of any person or group. I say that COPE was wrong.

III. COPE charges: Byrd injunction amendment (S. 2594); June 10, 1952; passed 49–30; nay=right. Asked President Truman to use Taft-Hartley injunction against striking steelworkers (he refused).

My position: When this amendment was before the Senate the Korean war was in progress. American boys were giving their lives in defense of their country. On April 4, 1952, the steelworkers went on strike and on April 8, President Truman seized the steel plants. One month later the Supreme Court declared President Truman's act unconstitutional and again the steelworkers went on strike. This amendment requested the President to use the Taft-Hartley injunction against the steelworkers.

I voted for the amendment because I believed that we owed it to our boys in Korea, who had no injunctive rights to see to it that they received the supplies they needed to protect their lives and your country. It is now apparent that the efforts to avoid the use of the Taft-Hartley Act only interfered with the progress of our troops who were fighting a gallant war in defense of freedom under very difficult conditions. I say that COPE was wrong.

IV. COPE charges: Bacon-Davis amendment (H.R. 10660); May 29, 1956; passed 42–37; yea=right. Amendment to give the Secretary of Labor, rather than local agencies, the right to fix minimum wage rates on interstate highway construction.

My position: H.R. 10660 was actually the Federal Aid Highway Act of 1956. The Senate first voted for an amendment to permit the States to determine prevailing wages for interstate projects within the State. Later the Senate reversed itself and supported the Chavez amendment which COPE lists here as a "key vote." Again, COPE misleads its readers. H.R. 10660 was the Federal aid to highway bill; the Bacon-Davis amendment was just one of many amendments offered. I say that COPE was wrong.

V. COPE charges: Minimum wage (S. 653); August 31, 1949 defeated 26 to 51; nay=right. Amendment by Senator ELLENDER, Democrat, of Louisiana, to hold hourly minimum wage at $0.65 instead of raising it to $0.75 and to permit it to drop even lower in times of business recession.

My position: COPE did itself proud in distorting this issue. In the first place COPE's description of the vote is misleading. The Senate did not defeat the minimum wage bill as COPE infers. In 1949, we raised the minimum wage from $0.40 to $0.75 per hour. In 1955, we passed a bill raising the minimum from $0.75 to $1 per hour.

The amendment in question would have established an hourly minimum wage fluctuating from a base of $0.65 instead of raising it to $0.75. It would have moved up and down with the Consumer Price Index from $0.55 to $0.75. Hence as the living cost moved up the minimum wage would also move up.

It is strange that COPE criticizes tying wages to the BLS Index yet union after union protect themselves by putting this type of escalator clause in their contracts.

What COPE also fails to mention is that I supported the legislation providing for a minimum wage of 75 cents per hour.

VI. COPE charges: Civil service (H.R. 4974); June 3, 1953; defeated 35 to 36; nay=right. Motion to permit vote on amendment by Senator CARLSON, Republican, of Kansas, creating patronage plums and letting Government agencies fire career employees arbitrarily, without regard to veterans' preference.

My position: Here again COPE distorted the purpose of the amendment. The bill was not a civil service bill and the Senate was not voting against civil service which the description infers. To begin with H.R. 4974 was an appropriation bill. This amendment would have given the State and Justice Departments the authority to dismiss noncivil-service employees who were poor security risks or suspected Communist subversives in Government. It applied only to positions excepted from competitive civil service. It applied to political patronage appointments and appointees who had never taken a civil service examination but later were blanketed in under civil service. I voted for this amendment aimed at getting Communists and subversives out of Government who slipped into the State and Justice Departments without taking civil service examinations.

In view of the perilous conditions which confront us throughout the world today, it is difficult for me to conceive of any loyal American who would challenge my desire in 1953 to take adequate steps to reinforce the integrity of our State and Justice Departments which are charged with so great a responsibility in dealing with the Communist menace. I say that COPE was wrong.

VII. COPE charges: Postal pay (S. 1); May 24, 1955; defeated 54–39; yea=right. Vote to override President Eisenhower's veto of bill increasing postal worker pay 8.5 percent.

My position: This was only one of five votes on postal pay recorded during the 1st session of the 84th Congress. I voted to sustain the President's veto.

Later a new bill was passed by Congress and signed by the President which provided for an 8-percent increase. I supported this bill. COPE again demonstrated its technique of telling half truths by completely ignoring and not mentioning this latter legislation.

B. GENERAL WELFARE

Under the heading of "General Welfare" I am recorded as voting wrong four times.

VIII. COPE charges: Unemployment compensation (H.R. 5173); July 13, 1954; defeated 30–56; yea=right. Amendment by Senator KENNEDY, Democrat, of Massachusetts, would have raised weekly benefits and provided 26 weeks of coverage in all States. The Eisenhower administration argued these improvements should be left to the States and opposed the bill.

My position: Here again, COPE infers that the Senate defeated a bill concerning unemployment compensation. The fact is the bill H.R. 5173 passed by a vote of 78 to 3 and I voted for passage. The vote used by COPE was on an amendment offered by Senator KENNEDY. It was one of three rollcalls but again COPE fails to mention the vote on the entire bill. It prefers to speak in half truths. Historically unemployment insurance is a State program. If this amendment had been adopted, the responsibilities for financing this program would be automatically shifted to the Federal Government. This would have been a step toward greater Federal control and a loss of State rights.

I voted for the bill, but because I was against this amendment which tried to impose more Federal control, COPE says I voted wrong. I say COPE was wrong.

IX. COPE charges: Offshore oil (H.R. 5134); July 30, 1953; passed 45–43; nay=right. Vote to overrule Supreme Court and give offshore oil, gas and mineral resources valued at $50 billion to $300 billion to coastal States. An amendment by Senator HILL, Democrat, of Alabama, stricken from this bill, would have applied revenues from offshore leases to aid education in all States.

My position: The description of this bill by COPE is completely false. This bill called the Outer Shelf Act, was a sister act to the tidelands bill (H.R. 4198) which gave the States title to offshore submerged lands and their resources within their historic boundaries.

H.R. 5134 did not give any lands to the States; on the contrary it clarified the situation so that the Federal Government could develop the lands beyond the 3-mile limit. To date, revenues from leasing these lands have brought millions of dollars to the Federal Treasury which it would not otherwise receive. I supported this bill. I say COPE was wrong.

Senator HILL's amendment was an attempt to earmark these funds for education. No funds would be paid to Kansas or any other State without additional legislation by Congress. There were some who would have earmarked these funds for aid to the aged. Personally, I do not believe that it is a sound practice for the Government to collect money and earmark it for any specific purpose. Any Federal program to assist education may be authorized by the Congress from the General Treasury funds without taking the action contemplated in this measure. Many States are now facing serious financial problems because their revenue have been allocated for specific purposes. Such earmarking limits the effectiveness of the legislature in determining how best to meet the needs of the people with the available resources. COPE says I am wrong.

X. COPE charges: Public housing (S. 866); April 21, 1948; defeated 35–49; nay=right. An amendment to strike provisions for public housing from the Taft-Ellender-Wagner housing bill.

My position: I was not a Member of the Senate when this amendment was voted upon. The amendment was defeated on April 21, 1948. I did not assume my duties as a Senator until January 1949.

XI. COPE charges: Public housing (S. 3855); May 24, 1956; defeated 38–41; nay=right. CAPEHART, Republican, of Indiana, amendment to Housing Act to cut the number of new low rent public housing unit starts authorized from 135,000 each year to 35,000 each year.

My position: No one denies that good housing is necessary to promote the health, welfare and happiness of our people. The Federal Government should aid our citizens to become homeowners and I have always supported this objective.

However, the issue with respect to this amendment was, "How far the Government should go in spending the taxpayers' dollars to construct units and rent them to people." I believe that our Government should help its people become homeowners but it should avoid making them dependent upon Uncle Sam to supply rental properties and then become a landlord.

The record shows that as of July 31, 1960, we had built 474,000 rental units. We have approximately 150,000 under construction, preconstruction, or under reservation. Yet in Kansas there is not one single unit that has been built. United States, 474,000; Kansas, 0. That is the score to date. The monthly rent charged by the Government has not been sufficient to take care of the operating costs, maintenance, and interest, to say nothing of the cost of construction. Last year the taxpayers in addition to paying for the units had to furnish another $130 million because the rents would not pay the bills.

On the basis of our previous experience, President Eisenhower had recommended 35,000 units, but COPE's position supported 135,000 units. Senator CAPEHART'S amendment attempted to keep this program in line with what it had been in the past.

What COPE failed to say was that 2 months after the Capehart amendment was defeated by a vote of 38 to 41, the Senate by a standing vote accepted it.

I support programs for better housing. I think we should carefully consider how fast we should travel down the road to make Uncle Sam the biggest landlord on earth. I say COPE is wrong.

XII. COPE charges: Social security (H.R. 7225); July 17, 1956; passed 47 to 45; yea=right. Vote on a provision to expand the social security program to include pensions at

age 50 for persons totally disabled. The Eisenhower administration opposed the measure.

My position: I am not a vindictive person by nature but I don't mind telling you that some of the half-truths being broadcast by COPE makes my blood boil. A good case in point is H.R. 7225, the social security measure which passed the Senate on July 17, 1956, by a vote of 47 to 45.

COPE tells you that I voted against the amendment which expands the social security program to include benefits beginning at age 50 for persons totally disabled.

What COPE does not tell you is that I voted for the bill with the amendment attached.

C. DOMESTIC POLICY

On the issues listed under this heading COPE says I voted wrong four times.

XIII. COPE charges: War profits tax (H.R. 4473); September 26, 1951; defeated 33 to 54; yea=right. An amendment by Senator Lehman, Democrat, New York, to set January 1, 1951, as starting date on new taxes on corporation profits, instead of April 1, 1951. This amendment's defeat permitted corporations, with record profits, to escape payment of $500 million in taxes.

My position: Here, COPE resorts to fancy titles for an amendment which is completely misleading. S. 4473 was actually the revenue bill of 1951. In an attempt to place the defense program on a more nearly pay-as-you-go basis Congress in 1951 increased taxes by $5.7 billion. Of the total amount $2.2 billion was to come from increased corporation taxes. The Congress increased the taxes on corporations from 25 to 30 percent.

This amendment raised one issue. Should January 1, 1951, be the starting date on new taxes on corporations or should it be April 1, 1951. This bill was before us in September 1951. A business, like an individual, sets aside money to pay its taxes. The majority of Senators including myself, felt that it wasn't fair to increase the taxes and at the same time make them retroactive when the businesses had not made provision to accumulate reserves to pay the taxes. COPE says I am wrong. Suppose Congress decided in August 1961, to increase your income tax and make it effective as of January 1, 1961. Would I be right in voting for this kind of legislation? I say COPE is wrong.

XIV. COPE charges: Seven hundred dollar income-tax exemption (H.R. 8300); June 30, 1954; defeated 46 to 59; yea=right. An amendment by Senator George, Democrat, Georgia, to increase the $600 tax exemption by $100 for all taxpayers and dependents and to eliminate loopholes.

My position: Here again COPE attempts to lead its readers to believe that the Senate had before it one simple amendment. The fact is that the Senate was considering a complete revision of the entire Internal Revenue Code.

Personally, nothing would have given me more satisfaction than to have been able in good conscience to support this amendment. I was running for reelection to the Senate in 1954. It would have been much easier and far more advantageous from a vote-getting standpoint to have supported the amendment. But its passage could have brought about only one result—namely, such losses of revenue that the Federal Government would have been forced into deficit spending, which in turn would have generated a new wave of inflation. Governments, like people, must live within their budgets. I, too, would like to give tax relief to our citizens, but you can't "spend your way out of debt." Let COPE join with me in getting rid of some of the unnecessary spending, and we can give our people the tax relief they are entitled to.

XV. COPE charges: Natural gas (H.R. 6645), February 6, 1956; passed, 53 to 38; nay=right. Passage of bill to permit producers of natural gas to increase prices without Government approval.

My position: Production of natural gas is vital to the economy of Kansas. COPE rated me as voting wrong because I supported this legislation.

Here again COPE's description of the bill is misleading. The bill provided that the Federal Power Commission have the power to regulate the price paid by pipelines to the producers to a level which the Commission finds to be a reasonable market price. Prior to the Supreme Court decision on the Phillips case in 1954, independent producers generally were exempt from regulation. It was to remove the inequities of this decision that this bill was passed.

Kansas is an important oil- and gas-producing State and receives little or no gas from across State boundaries for consumption in Kansas. My vote on this legislation was in the direct interest of Kansas and the employees engaged in this industry. COPE says I am wrong. In terms of the interest of the Kansas economy, COPE is wrong.

XVI. COPE charges: Dixon-Yates giveaway (S. 3690), July 21, 1954; defeated, 36 to 55; yea=right. An amendment to forbid President Eisenhower to carry through a plan to weaken TVA and give the Dixon-Yates power combine a contract to make $40 million profit on a $5.5 million investment.

My position: On the issue of TVA facilities, COPE was a master at distortion.

President Eisenhower did not believe that all the taxpayers (and that includes the people of Kansas) should be asked to pay for the building of additional power facilities in the Tennessee Valley Authority area to take care of the growing needs of the city of Memphis.

The Dixon-Yates contract made it possible for a private power company to furnish electricity into the TVA system for use in Memphis. This power replaced energy which the Atomic Energy Commission was taking from the TVA system for use at Paducah and Oak Ridge. After the contract was signed, the city of Memphis decided to build its own steam plant at no cost to the taxpayers. When the plan became definite, President Eisenhower canceled the Dixon-Yates contract. In this particular instance the Eisenhower administration brought a suit against the individual who was responsible for negotiating this contract as it was charged that there was a conflict of interest involved. However, the case was dismissed by a judge appointed by a Democratic administration when he found that there was no evidence on which to base such an action. The fact of the matter is that this contract did not cost the taxpayers of Kansas a single cent.

I might add further that we in Kansas are seeking new industries. Therefore, I for one will not vote for legislation which will build Government powerplants to produce cheap energy in other States at the expense of Kansas taxpayers.

XVII. COPE charges: Honesty in government (S. 2391); August 1, 1955, passed 36 to 34; nay=right. A motion by Senator CAPEHART, Republican, Indiana, to excuse businessmen holding nonpaying jobs in Government from filing personal financial statements. Such statements were recommended to prevent the use of a Government position for private gain by an individual or a firm.

My position: COPE again distorts the intent of Senator CAPEHART'S amendment. Senator CAPEHART in the conference between the House and the Senate proposed that all persons serving the Federal Government without compensation should be required to file for publication in the Federal Register, the name of his employer, the salary he is receiving, the companies in which he had stock or the partnership in which he had an interest. This is the extent of personal information which could have any possible bearing on one's ability to serve the Government without a conflict of interest. The conference reported an amendment which required continuous periodic reports and additional information. The vote reported by COPE was a vote to recommit the measure to conference so that Senator CAPEHART'S proposal could be reviewed.

XVIII. COPE charges: Farm price supports (H.R. 12); April 11, 1956; passed 50–35; yea=right. Passage of bill, later vetoed by President Eisenhower, to support basic crops at 90 percent of parity and to assist farmers with soil bank provisions.

My position: This is the one vote on which COPE is apparently in agreement with my position.

D. FOREIGN AID

XIX. COPE charges: Point 4 (S. 3304); May 5, 1950; passed 37–36; yea=right. Motion by Senator Connally, Democrat, of Texas, to add the point 4 program to the Foreign Economic Cooperation Act. This was a necessary step to prevent Communist expansion by relieving distress and raising the standard of living in backward areas of the world.

My position: I was not present when the vote was taken on this amendment. In view of the mismanagement of our foreign-aid program during this period as well as the closeness of the vote, I am sure that if I had been present, I would have voted against the adoption of this amendment.

IN 1957–58

Prior to the 1958 election, COPE again issued a booklet entitled, "How Your Senators and Representatives Voted 1957–58," and continued to distort the issues.

Sixteen votes were selected for a 2-year period which represents only 5.2 percent of a total of 307 such rollcall votes.

If we accept the narrow definition of issues COPE proposes, it would be equally logical to presume that on the remaining 94.8 percent of the issues I voted right.

Of the 16 votes selected, I was absent because of illness on 1 vote, COPE says I voted right on 1 and wrong on 14. Again, let's analyze the 16 votes which COPE says is the record.

I. COPE charges: Hells Canyon Dam (S. 555); June 21, 1957; passed 45 to 38; yea=right. Passage of bill to use valuable natural resources for low-cost public power, flood control, irrigation and recreation instead of for benefit of Idaho Power Co.

My position: Only one major issue was involved in this instance. "Who should construct the Hells Canyon Dam? Should it be constructed by private concerns or should it be constructed at Government expense?" In either instance, whether the dam was built by private industry or the Government, organized labor would be employed in its construction. I believe that private industry should be given an opportunity to develop any project that conforms to the specifications and requirements of Federal regulatory agencies. This was the case in connection with the Hells Canyon Dam. This procedure places the development on the tax rolls and at the same time eliminates Government spending.

The passage of this bill would have authorized the Federal Government to spend a half-billion dollars and in addition would have jeopardized a further half-billion dollars of potential tax revenues, making the venture a billion-dollar mistake. Although this measure was offered as a reclamation project, its passage would not have provided an additional drop of water for irrigation or for municipal or industrial use in Idaho or in any other State.

I was judged wrong by COPE because I insisted that Kansas taxpayers should not be saddled with the development costs of a dam that private business was ready and willing to build. I was wrong, says COPE because I opposed subsidizing industry in another State at a cost to Kansas taxpayers.

Had the legislation been adopted, Congress would have been committed to spend an additional $100 million a year for 6 years for this single project designed primarily to supply cheap power to two States and thus enable them to compete with Kansas in attracting new industries.

II. COPE charges: Rule XXII; January 4, 1957; passed 55–38; nay=right. A motion by Senator JOHNSON, Democrat, Texas, killing a proposal to change the Senate rules to provide a workable means of ending filibusters.

My position: If a Senator voted for the Johnson motion COPE rated him wrong. I have favored civil rights legislation. The Congress in 1957 enacted the first broad program of civil rights in almost 80 years without a change of rules. At the opening of the 86th Congress, I voted for a change in rule XXII which had the support of the leadership of both parties and thus had a reasonable chance of being adopted. I support the Republican platform which provides that the Senate will endeavor to make any further revisions that are warranted in rule XXII, so that a willful majority cannot prevent the Senate from acting. On the other hand, it is important that those who are concerned with any particular issue affecting a minority group realize the importance of maintaining the Senate as a forum for free expression.

I have exerted every effort to prevent abuse of free debate and will continue to do so, but I am unwilling to participate in the destruction of the world's greatest deliberative body merely to gain passage of a particular bill. If the right of free debate is completely eliminated, it would be possible to push through a bill that would be completely obnoxious. Incidentally, this motion was sponsored by the Democratic Party's Vice Presidential nominee whom COPE supports.

III. COPE charges: Civil rights bill, section III (H.R. 6127); July 24, 1957; passed 52–38; nay=right. An amendment by Senators ANDERSON, Democrat, of New Mexico, and AIKEN, Republican, Vermont, eliminating from the civil-rights bill section 121 of part III which would have empowered the Attorney General to use Federal court injunctions to enforce court decisions and civil rights laws generally.

My position: I was absent from the Senate because of illness when this vote was taken.

IV. COPE charges: Foreign aid (S. 2130); June 14, 1957; defeated 32–54; nay=right. An amendment to the Mutual Security Act of 1957 by Senator MORSE, Democrat, of Oregon, to eliminate the Development Loan Fund which was intended to help other nations by providing long-term, low-cost loans for economic development.

My position: COPE says I voted right on this issue. I am pleased to know that for once COPE saw the light.

V. COPE charges: Housing, veterans' interest rates (S. 3418); March 12, 1958; passed 47–47; nay=right. A motion by Senator Knowland, Republican, California, which had the effect of permitting the Veterans' Administration to raise the interest rates on GI housing loans from 4.5 to 4.75 percent (Vice President NIXON cast the tie-breaking vote in favor of higher interest rates on GI mortgages.)

My position: Again, COPE distorts the issue. In the first place the bill did not increase interest rates. It merely raised an artificially low ceiling which has dried up the funds available to thousands of veterans and prevented them from taking advantage of the GI loan program.

Thousands of veterans were able to get approvals from the Veterans' Administration but found it impossible to find a bank or building and loan association which would lend them any money to build a house. As long as the prevailing rates available to banks and other financial institutions were more advantageous, there was no prospect that they would buy any sizable number of GI mortgages. My vote was cast to assist veterans in securing homes.

Yet COPE says I voted wrong when I voted for a bill which would make it possible for GI's to get money to build homes and thus provide jobs to laboring men in the construction field.

VI. COPE charges: Welfare and pension funds (S. 2888); April 24, 1958; defeated 28–59; nay=right. An amendment to the Welfare and Pension Plans Disclosure Act by Senator ALLOTT, Republican, Colorado, which would have excluded employer-operated plans from the requirements and penalties of the law. Passage of this amendment would have denied this protection to about 90 percent of the workers now covered by pension and welfare plans.

My position: S. 2888 was a bill to provide for the registration, reporting and disclosure of employees' welfare and pension plans. It was drafted to prevent abuses in certain pension plans that were disclosed before a Senate commitee. In every instance where abuses were found the employee was not guaranteed a definite sum of money upon his retirement.

Such plans merely provided that the employee pay a certain amount into a fund that was collectively managed by the union and the employer. On the other hand 90 percent of the pension plans were already adequately protected by the Internal Revenue Service. An employer, in order to qualify for tax exemption on those funds contributed must work about 3 years in order to satisfy the Internal Revenue Service that the fund is properly organized and that it will be conducted according to law. Once a plan is authorized, the company is required to file annual reports. This bill would have required many companies to file additional forms with another branch of the Government. The principal difference between the plans covered by the Allott amendment and those in which abuses had been disclosed is that under a level-of-benefit plan the worker is guaranteed a fixed benefit in accordance with the agreement between his union and the company.

What was back of COPE's reasoning except to make it appear that the employers were getting by with something—no one will ever know.

VII. COPE charges: Public works interest rates (S. 3497); April 15, 1958; defeated 40 to 41; yea=right. An amendment to the Community Facilities Act of 1958 by Senator FULBRIGHT, Democrat, of Arkansas, to lower from 3.5 to 3 percent the interest rate on funds loaned by the Federal Government to State and local governments for the construction of needed public works in the broad program to relieve unemployment.

My position: When the communities facilities bill was reported by the Senate Banking Committee, the committee agreed that the proper rate of interest to charge the communities should be exactly the same rate which the Government had to pay, namely 3½ percent—no more and no less.

I opposed this amendment because I believed that if a community borrowed money from the Government it ought to pay the Government at least the exact interest charge which the Government had to pay to borrow money. I say COPE was wrong. Does it make sense that Uncle Sam borrow money and pay 3½ percent and loan it to a community at 3 percent? Why should the taxpayers of Kansas make up the other one-half percent?

VIII. COPE charges: Davis-Bacon (S. 3497); April 15, 1958; passed 54 to 25; yea=right. An amendment to the Community Facilities Act of 1958 by Senator CASE, Republican, of New Jersey, to incorporate provisions of the Davis-Bacon Act requiring prevailing wages and a 40-hour week in public works construction.

My position: This amendment again proposes Federal interference in local projects. The local community would have spent its own money and should have been able to specify the conditions of employment rather than have a bureaucrat in Washington dictate the terms. I have confidence that State and local officials, who must seek the approval of the voters in every respective State, will completely administer the laws. I say COPE is wrong.

IX. COPE charges: Depressed areas (S. 3683); May 13, 1958; passed 46 to 36; yea=right. Passage of Area Redevelopment Act providing $379.5 million in Federal loans and grants for the redevelopment of localities suffering from long-time chronic unemployment.

My position: For 5 consecutive years the President has urged the Congress to enact sound area-assistance legislation.

No one will deny that (a) need exists for a program to alleviate the suffering of the unemployed; (b) depressed areas are dangerous and costly since unemployment breeds sickness, discontent, and crime; (c) unemployment is costly as these people cannot pay taxes. Further, common decency requires that we must take care of the less fortunate; (d) a government that can spend billions to aid the underdeveloped nations of other lands has an obligation to assist those in our own land who are ready, willing, and able to work but through no fault of their own are unable to find suitable employment.

I am in complete agreement with the objectives of this legislation. If I thought for a moment that S. 3683 would have brought about increased productivity, provided jobs for the unemployed, and improved the economy of this country, I would have been one of the first to stand on the floor of the Senate and support the measure. High sounding phrases and laudatory declarations of policy do not create jobs.

President Eisenhower proposed a $50-million program which was realistically designed to meet conditions which confronted the country. The bill which was finally passed was vetoed because President Eisenhower believed it called for too little local responsibility.

X. COPE charges: Unemployment compensation (H.R. 12065); May 27, 1958; defeated 21 to 63; yea=right. An amendment by Senator KENNEDY, Democrat, of Massachusetts, to the Temporary Unemployment Compensation Act of 1958 to extend coverage, increase benefits, and lengthen duration of emergency benefits.

Unemployment compensation (H.R. 12065): May 28, 1958; defeated 36 to 47; yea=right. An amendment by Senator KENNEDY, Democrat, of Massachusetts, to the Temporary Unemployment Compensation Act of 1958 to extend the duration of benefit payments by 16—instead of 13—weeks and to provide Federal administration of the program if the States failed to act.

My position: In May 1958, the Senate was considering a bill to provide additional unemployment compensation. That bill as enacted into law provided for payments from the Federal Treasury to those States which agreed to extend by a maximum of 50 percent the unemployment benefits provided by State laws. It applied to persons who had exhausted their unemployment benefits under State law. That bill passed the Senate by a vote of 80 to 0. Senator KENNEDY's amendment proposed substantial alterations to the State laws. By extending these benefits in the form of Federal grants, Congress would have completely undermined the principles of a sound State unemployment program and would have replaced an insurance program with a dole. The Kennedy proposal would have cost the taxpayers $1½ billion.

In voting against the Kennedy amendment I was voting with 65 percent of the Senate. The second Kennedy amendment would have extended unemployment compensation in all States regardless of their wishes. From my experience as a Governor, I am convinced that the initiative in these programs should come from the States, where there is a better opportunity to develop a program which meets local needs and requirements. I am a strong believer in local control wherever possible. I say COPE was wrong.

XI. COPE charges: Public assistance (H.R. 12065); May 28, 1958; defeated 40–40; yea=right. An amendment by Senator LONG, Democrat, of Louisiana, to increase public assistance payments to the aged, blind, and disabled by about $5 per month. It would have benefited over 2 million people. (Vice President NIXON declined to break the tie in favor of the aged, blind, and disabled.)

My position: Here again, COPE proves itself to be a master of deceit. On the front page of its booklet, COPE says, "That is why we have distributed a record of key congressional rollcalls prior to election." First, you will note that this amendment is to H.R. 12065, a bill to extend the benefits to the unemployed. This amendment had nothing to do with the temporary extension of unemployment benefits legislation. The attachment of this amendment upon which no hearings had been held could have jeopardized the enactment of H.R. 12065 or delayed the availability of benefits to unemployed workers. Two months later, on August 16, the Senate passed H.R. 13549, the fifth successive bill to liberalize the Social Security Act, which increased old-age and survivors insurance benefits by 7 percent. This measure also increased from $60 to $65 the maximum benefit which the Federal Government shares with the States on old-age assistance.

It also increased the Federal contribution for aid to the blind and totally disabled for those States whose income was less than the national average. The key vote on H.R. 13549, which increased social security benefits, was adopted by the Senate without any opposition. This is the measure which really affected social security benefits, yet COPE ignored it and instead mentioned the above amendment to H.R. 12065. This is a typical example of COPE's deceit in misleading its members.

The last four issues listed by COPE are all amendments to the labor reform bill considered by the Senate in 1958:

Labor relations (S. 3974): June 13, 1958; defeated 37 to 53; nay=right. An amendment to the Labor-Management Reporting and Disclosure Act of 1958 by Senator Watkins, Republican, of Utah, to permit States and territories to assert jurisdiction over labor disputes which the NLRB declines to handle.

Knowland 20 percent petition (S. 3974): June 14, 1958; defeated 31 to 52; nay=right. An amendment by Senator Knowland, Republican, of California, to the Labor-Management Reporting and Disclosure Act of 1958 to require unions, on petition of 20 percent of the members, to hold secret-ballot referenda on the recall of officers or changes in the constitution.

No-strike clauses (S. 3974): June 17, 1958; defeated 32 to 57; nay=right. An amendment by Senator Knowland, Republican of California, to the Labor-Management Reporting and Disclosure Act of 1958 to outlaw no-strike clauses in union contracts unless approved by a majority of the membership in secret ballot.

Building trades (S. 3974): June 17, 1958; defeated 29 to 60; nay=right. An amendment by Senator MCCLELLAN, Democrat, of Arkansas, to strike from the Labor-Management Reporting and Disclosure Act of 1958 a provision permitting building trades and construction employers to conclude contracts in accordance with traditional industry practices.

On all four votes I was rated wrong. COPE gave the impression they were all antilabor, but insofar as dues-paying, rank-and-file union members are concerned, these amendments sought to protect the rights of the laboring man in Kansas and throughout the Nation.

In 1958, I sent a letter to the Committee On Political Education, Wichita, Kans. In this letter I set out my beliefs. In that letter I said:

"Frankly, I'm at a loss to understand why you suggest such action. Not a single amendment offered by Senator Knowland could in the slightest degree be labeled a 'damaging' amendment insofar as dues-paying union members are concerned. Every amendment seeks to protect the rights of the laboring man against abuses in labor relations exposed by the McClellan committee.

"I cannot believe that you are opposed to legislation which provides that no person shall be eligible to serve as an officer unless elected by a popular vote of the membership at an election in which all members of such organization shall have been entitled to vote and at which the voting shall have been by secret ballot. Are you opposed to giving every member of a labor organization the right to vote? Are you opposed to the use of secret ballots properly supervised where every member may vote without fear of reprisal?

"Why should any workingman be opposed to legislation which provides that the filing of a petition by 15 percent of the membership would be sufficient to require an election at which the workers again would be entitled to vote by secret ballot on the question of recalling any elected officer? Many union constitutions provide for the removal of officers found untrustworthy or derelict in the performance of their duties. There are others that do not. Why do you label an amendment 'damaging' which would grant the workers the right to recall any officer without fear of reprisal is beyond me. What is antiunion about such a proposal?

"If my memory serves me correctly, approximately 30 years ago the coal miners in southeast Kansas lost their right to elect their district officials. To this day, the miners in this area are required to pay dues but are given no voice in the selection of such officers. Recent hearings held by the McClellan committee pointed out time and again how certain union leaders through the establishment of trusteeships and supervisorships controlled activities and funds of local unions. What is damaging with legislation which provides that no national or international organization shall have the power to remove officers of local unions for the purpose of establishing a trusteeship unless such provision is authorized by and is in accordance with the provision of its constitution or its bylaws—and then only for 1 year? What is so damaging with legislation which provides that the funds of the local union are to be used exclusively in connection with the affairs of the local union when a trusteeship has been established? Am I to understand that you feel that such protection for the membership of any local union against unjustifiable action of some national organization is not in the best interest of the union members?

"The McClellan committee found instances where the leadership of labor unions had established a system of class membership whereby only those in a certain class could vote and participate in union affairs, yet all members were required to pay dues.

"All Senator Knowland's amendment attempted to do was to provide that no labor organization shall be a representative of any employee for the purpose of collective bargaining, unless such organization agrees to admit all of the employees it seeks to represent to membership in the union on the terms and conditions and with the same rights and privileges accorded to all other members of the union. Frankly I do not believe that such legislation is antiunion and I feel in my heart you must feel the same way. I honestly believe that any reputable and competent union man who wants to join a union should be permitted to do so and such membership should carry with it the right to participate in union activities. For the life of me I cannot see why you consider any proverb, that grants every workingman equal rights within the labor organization, a damaging amendment, or against the best interest of the laborer whom I'm sure you want to represent.

"With respect to the calling of a strike, the Knowland amendment provides that no strike shall be called or sanctioned by a labor organization unless, at least 30 days prior to the commencement of such strike, such labor organization shall give notice to the Board and the employer of its intention. If the Board then receives a petition signed by 15 percent of the employees requesting an election, the Board must hold an election to determine whether a strike should or should not be called. If the majority of the members oppose the strike, no strike shall be called for 90 days. All this proviso provides for is, that if a strike is called it must be sanctioned by the majority of the members and not by a minority group or some national organization. What is so damaging in granting to the workers the right to determine whether a strike should or should not be called? After all it is the workingman, his wife, and his children who must make the sacrifices that are required when a strike is called and not the salaried officials of the organization, State or National.

"Why do you label as a 'damaging amendment' a proposal that gives to every union member the right to petition the NLRB when such member feels that his right to vote has been denied in violation of the union constitution, charter, or bylaws? All the Knowland amendment attempts to do is provide safeguards to protect every member's right to vote. When does protecting a union member's voting rights become antilabor in nature?

"Under the NLRB it is illegal for an employer to pay or promise to pay a representative of the workers or for a representative of the worker to receive gifts from the employer. The McClellan committee exposed a number of these so-called sweetheart arrangements where representatives of management and union representatives engaged in collusive arrangements which resulted in benefits to management and to the union officials—but detrimental to the best interests of the union members. All that Senator Knowland's amendment proposed to do was to close this loophole and yet you label such legislation as a 'damaging' amendment. 'Damaging' to whom, the honest union members or to the corrupt officials and companies who enter into these agreements?

"I supported all of the Knowland amendments. So long as I am in the Senate, I shall continue to support legislation in the field of labor-management relations which I think is in the best interest of the rank-and-file worker and my country. During my last campaign for the Senate the Committee On Political Education attempted to brand me as antilabor. I have no doubt but that they will again brand my support of the Knowland amendments as antilabor.

"In utter candor, I say to you that I have faith in the sound judgment of the rank-and-file laborer. I do not believe that the great mass of honest union laborers will ever condemn any effort on my part or any other public official's part to enact legislation that is aimed at protecting their rights and

their liberties against corrupt practices whether it comes from within the leadership of labor organization or management. I fully realize that the vast majority of union officials and union organizations are honest. But corruption and rank discrimination must be eliminated wherever and whenever found.

"If supporting legislation which protects the rights and liberties of the rank-and-file laboring man against corrupt practices is 'damaging' and antilabor in the eyes of the committee on political education, then I shall have to depend upon the laboring men to judge my actions."

IN 1959–1960

During the 86th Congress COPE has again selected 10 issues out of 400 rollcalls to judge the effectiveness of a U.S. Senator as a friend of labor. These issues are unrepresentative.

I. COPE charges: Labor's enemies win (S. 1555); April 22, 1959; NIXON broke tie 45–46; nay=right. Trick political maneuver to cement antilabor provisions in reform bill brings the vote, broken by NIXON'S vote to subject labor to endless legal battles in court and cripple legitimate union procedures.

My position: This vote was to insure that an amendment, sponsored by Senator MCCLELLAN, Democrat of Arkansas, to provide a bill of rights which would protect union members against unauthorized or unscrupulous actions by their leaders would be included in the Labor-Management Reporting and Disclosure Act of 1959.

I voted for the protection of the rights of the thousands of dues-paying union members of Kansas rather than accept the demands of a small group of union officials in Detroit and Washington.

II. COPE charges: Unions score victory (S. 1555); April 24, 1959; 41–50; nay=right. Senate defeats McClellan amendment to ban secondary boycotts, a legitimate, fair and necessary trade union tool used for years to protect decent working conditions.

My position: COPE attempts to give the impression that the unions secured a victory in the defeat of an amendment by Senator MCCLELLAN which banned secondary boycotts.

I voted for this amendment. What COPE fails to state is the fact that, again, the substance of this amendment is included in the Labor-Management Reporting and Disclosure Act of 1959 as section 704, entitled "Boycotts and Recognition Picketing." The final Senate vote was 95 to 2.

COPE says I am wrong, but, after all of the facts had been developed through hearings by both Houses of the Congress, there was an overwhelming support for my original position. I took this stand to insure that no union member would find he could not earn his livelihood because of a dispute in which he had no direct interest.

III. COPE charges: Helping depressed areas (S. 722); March 23, 1959; 49 to 46; yea=right. Area Redevelopment Act would have approved $389.5 million to help people help themselves in depressed industrial and rural areas with high unemployment over an extended period. Unfortunately, the final version of this bill was vetoed by President Eisenhower.

My position: COPE says I was wrong in voting against the so-called Area Redevelopment Act. It admits that this measure was vetoed by President Eisenhower, although the President had requested area redevelopment legislation in his budget message. This bill was vetoed because COPE supporters so increased its scope and cost that it ceased to have any semblance of practicality. Had it not been for the addition of many unworkable provisions, it would have been possible to have started the program recommended by the President.

I voted for the establishment of a workable program. COPE says I am wrong, but I know that there are areas in Kansas that would have benefited from a reasonable program and these areas know that I was right in supporting a measure which would have helped them.

IV. COPE charges: Filibuster triumphs (Rules); January 9, 1959; 36 to 60; nay=right. This vote hurt civil rights by killing the drive to provide a meaningful way to stop Senate filibustering tactics and force voting on an issue. Rule XXII was slightly modified later.

My position: COPE says I was wrong in maintaining rule XXII, although it admits that it was subsequently modified. It fails to state that I supported the final passage of Senate Resolution 5, which so liberalized Senate procedures that it was possible to enact civil rights legislation in 1960.

Again, by telling only a portion of the story and omitting the rest, COPE is not providing its members with all of the facts. I have always supported civil rights legislation, but my 12 years of experience in the Senate convinces me that taking an extreme position will only insure the defeat of a step-by-step approach. COPE's position is a disservice to those who are seeking greater protection in enjoying the freedoms to which every American is entitled.

COPE says I am wrong, but based on an intimate knowledge of Senate procedures, I know that I was right in casting my vote in support of the Senate leadership of both parties, including Senator JOHNSON.

V. COPE charges: Civil rights knifed (H.R. 8601); April 4, 1960; 56 to 34; nay=right. Passage of Dirksen motion ends Javits and McNamara attempts to give U.S. Attorney General more "legal teeth" in school desegregation and other civil rights areas.

My position: Civil rights legislation is a complex and difficult subject. It is impossible for the Congress to legislate brotherhood and good feeling among all Americans.

In supporting this motion I was again striving to avoid the inclusion in a civil rights bill of provisions which would have made it impossible for the Senate to enact any legislation. An understanding of Senate procedures often insures progress which a dogmatic position jeopardizes.

COPE says I was wrong, but the fact of the matter is that civil rights legislation was enacted during this Congress because those whom it says voted wrong exercised reasonableness and secured the support of a majority of the Senate.

Now that the Congress has enacted the first civil rights legislation in more than 80 years, I know that it will be far easier than it was in the past to make even further progress.

VI. COPE charges: Housing enemies licked (S. 57); February 4, 1959, 37 to 50; nay=right. Move by CAPEHART to cut 35,000 urgently needed public housing apartment units from Housing Act was defeated.

My position: COPE says I voted wrong in supporting an amendment to reduce the number of public housing units authorized in the first housing bill of the 86th Congress that President Eisenhower was forced to veto.

There are very few communities in Kansas which receive Federal grants for public housing. By including numerous provisions, such as the authorization of these public housing units, all housing legislation was delayed as the President was forced to veto the bill. He stated that "even though we have over 100,000 previously authorized public housing units as yet unbuilt, the bill would authorize 190,000 more." All Senator CAPEHART was trying to do was to delay a program and save the taxpayers $21 million.

Again, COPE fails to provide its members with all the facts. After President Eisenhower's veto was sustained, a second bill, again including extravagant provisions, was passed by the Congress and vetoed.

Finally, on September 23, 1959, after months of needless delay a bill was signed by President Eisenhower, which provided substantially fewer public housing units.

Again, COPE says I was wrong, but history proves that I was right since valuable time, from July 7, when the first housing bill was vetoed, until September 23, was lost. On the latter date a reasonable bill was passed which I supported and it was enacted into law.

A workable, moderate program will provide more homes for those who need them, and I believe that this was in the best interest of Kansas.

VII. COPE charges: School kids win (S. 8); February 4, 1960; 51–34; yea=right. Grants about $40 over 2-year period for each school-age child to build classrooms and increase teachers' salaries, with more money going to the less wealthy States. Yet, final action on even this modest bill was deferred due to July recess of Congress.

My position: COPE misleads its members in stating that school kids win, and that I was wrong in voting against the passage of this measure.

COPE's inference is that I am opposed to education for our children. Nothing could be further from the truth. COPE states, no action was taken due to the July recess of Congress. The fact of the matter is that even though the Congress reconvened following the national conventions and had a 2-to-1 Democratic majority pledged to a bill incorporating these provisions, no such legislation was enacted.

I believe that a reasonable measure to assist needy school districts in Kansas in accordance with President Eisenhower's program, which was completely neglected in COPE's ranking of the U.S. Senate, would have accomplished a great deal more. My support of the administration's program was ignored. It would have allocated $600 million per year for 5 years to assist school construction. Again, COPE says I was wrong. I know that I was right. The extreme measure COPE supported prevented the enactment of any school aid. It would have used the money for school construction and teachers' salaries. The moneys which a reasonable measure would have made available to many districts in Kansas have been denied to them because of the actions of COPE supporters.

VIII. COPE charges: Taxing dividends fairly (H.R. 1281); June 20, 1960; 42–41; nay=right. Passage of McCarthy amendment to repeal 4 percent tax credit on dividend income over $50 could have increased Federal revenues by $350 million a year. But this proposal was removed from final bill in conference with the House. Earned income now is taxed at higher rate than dividend income.

COPE implies that I voted against labor by encouraging investors through a modest dividend credit to create more jobs for our expanding population. Although some labor leaders have opposed a dividend tax credit, there are many millions of union members who are today acquiring stock in the companies for which they work and are benefiting from the dividend credit.

COPE is incorrect in stating that earned income now is taxed at higher rates than dividend income since corporations must first pay a corporate income tax to the Government before any dividends are declared and these dividends are then subject to tax as well.

COPE says I was wrong, but I was right in voting to provide the necessary capital to make more jobs for Kansas workers and to assist any employees who will ultimately become the owners of American industry.

IX. COPE charges: Foreign loans saved (S. 1451); July 2, 1959; 30–50; nay=right. Senate defeated Ellender attempt to cut drastically Development Loan Fund which helps underdeveloped countries help themselves. Under Mutual Security Act, long-term loans are

made to help finance needed economic programs. Good way to fight communism peacefully.

My position: COPE says I took a position against labor by limiting the funds available for foreign aid.

The fact of the matter is that I was absent when this vote was taken, but if I had been present, I would have supported this limitation on foreign aid. I have always been more concerned with creating jobs for Kansas than in burdening our taxpayers for dubious projects throughout the world.

What COPE fails to state is that the Ellender amendment did not eliminate funds for the Development Loan Fund, but it merely authorized a smaller amount. My experience in the Senate convinces me that when a program is effectively curbing communism, there are no difficulties in securing increased authorizations to make it more effective.

COPE says I was wrong, but I know that I was right in curbing expenditures at a time when our own internal demands were at a very high level until this program had been proven useful for the defense of the free world.

X. COPE charges: Unemployed lose out (H.R. 5640); March 25, 1959; 38–49; yea=right. Senate rejected McNamara move to help jobless workers by extending Temporary Unemployment Compensation Act of 1958 to July 1, 1960. This would have provided assistance for still jobless workers whose unemployment insurance benefits had been exhausted and other workers not already receiving benefits. Final bill extended benefits only from April to June 1959.

My position: COPE states that I voted against the unemployed. This is not true. Information, which was made available to the Congress by the President, clearly showed that an extension of this program through June 1, 1959 would enable the States to then pick up the burden and operate their unemployment compensation systems in a satisfactory manner.

If a real need had been indicated for continued assistance after the expiration date of the program, it would have been a very simple matter to have extended it again. Employment increased, the numbers of those unemployed decreased, and the States had the necessary resources to cope with their problems.

In the coming 1960 election, COPE is again distributing millions of copies of a distorted analysis of the voting records of Senators and Representatives in the U.S. Congress. As I have already indicated, out of more than 400 rollcall votes in the Senate during the 86th Congress only a minute number have been considered.

It is amazing that labor leaders who have the opportunity to know the fact have such contempt for the intelligence of their members. I cannot believe that these analyses by COPE will influence the votes of these 16 million citizens who are members of the AFL–CIO. Rank and file union members have shown over the years that they, like all other citizens, vote their convictions based on their own analysis of the facts and issues. In the spirit of fair play, does it not seem reasonable to examine a Senator's complete record—the bills he introduced, his work in committees as well as his actions on the Senate floor, most of which are never recorded by rollcalls but vitally affect the lives of a Senator's constituents.

The citizens of Kansas have twice elected me as their Governor. They have twice elected me to represent them in the U.S. Senate.

I have expended my efforts to protect the interests of my country and the people of Kansas. COPE's highly distorted documents provide little information concerning the entire record of candidates seeking public office. They do not meet the test of furnishing the whole truth.

Two-Year Report to His Constituents of Progress on His 10-Point Program

EXTENSION OF REMARKS

OF

HON. LEONARD G. WOLF

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. WOLF. Mr. Speaker, 2 years ago in my campaign for Congress, I campaigned on a 10-point program. I believe that the voters in my district are entitled to a report on my stewardship and on the progress made on my 10-point program.

I would like to outline each of these 10 points and to discuss some of the work I have done on each of them. I am proud to state that we have made some progress on every one of the 10 points.

1. PEACE AND MILITARY COSTS

The promise: Encourage and foster international understanding with the hope that thereby a gradual reduction of our vast military and defense machine can be brought about.

Mr. Speaker, I intend to delve deeply into this particular point because I believe this is my most important job as a Congressman—to help insure world peace; therefore, I worked harder on this program than on any other.

The performance: Peace. In efforts to promote an international climate for peace I have worked unceasingly to gain acceptance for my plan to use our agricultural abundance as a tool for peace.

March 26, 1959, I introduced the food for peace through the United Nations bill. The purpose of this bill was to utilize our food and fiber resources through the United Nations in order to promote economic development in underdeveloped areas as well as to stave off starvation. At that time I pointed out that if the plan were enacted and implemented over a 10-year period over $1,540 million in storage costs would be saved. Twenty-seven members of Congress cosponsored this bill with me.

Since we did not receive a hearing from the Agriculture Committee on this bill, I proposed the plan as an amendment to the Mutual Security Act both in the 1st and in the 2d sessions of the 86th Congress. It was not adopted either time. However, I am very happy to report now that Vice President NIXON and Senator KENNEDY have both endorsed the United Nations food for peace plan which I introduced at the beginning of the 86th Congress. It is my guess that during the 87th Congress the United Nations food for peace plan will pass since both candidates of the national parties now support my proposal.

Because I led the fight for the United Nations food for peace bill in the Congress, I was appointed by the Congress as an official observer at the World Food and Agriculture Conference in Rome, Italy, in November 1959. Here I had a great opportunity to work for the cause of world peace through feeding the hungry.

I was an official emissary for the Governor of Iowa in the delivery of 35 hogs to the typhoon-ravaged area of Japan in January 1960. International peace was greatly strengthened by this gesture of the people of Iowa in behalf of the people of Japan.

The director of agriculture for the Karachi area of Pakistan worked in my office last spring in the capacity of a staff assistant, under the sponsorship of the American Political Science Association. In addition to observing the democratic process at work in the Congress, I am convinced that Mr. Zafar took back with him to Pakistan happy memories of his sojourn in the United States and warm feelings for our people which will strengthen the bonds of friendship between our countries.

In connection with my work as ranking member on the Research and Development Subcommittee of the House Science and Astronautics Committee, I have attended two conferences on the question of world aeronautical problems and one conference on the law of outer space in the United Nations.

One of the great dangers which the world faces today is nuclear destruction by recklessness, blackmail, or accident. The chances for this occurring increase greatly as more and more nations gain access to information and equipment necessary to the building of nuclear weapons. I have led the fight in Congress against the sharing of nuclear weapons and nuclear information with other countries because of this great danger. It is interesting to note that within the administration now there are serious difference of opinion on this matter, with the State Department not wanting other nations to have nuclear weapons because of the realization that there is no deterrent against nuclear accident whereas the Defense Department and the Atomic Energy Commission have tried to lobby Congress—but not successfully—into changing the law.

I am very happy to report that as a result of the fight which I and others made on this issue during the 86th Congress, 1st session, the changes which the Atomic Energy Commission and the Defense Department asked for in the 2d session, 86th Congress, were denied by the Joint Committee on Atomic Energy.

As a member of the House Committee on Science and Astronautics, I introduced House Concurrent Resolution 613, a resolution which expresses the sense of the Congress that outer space be given over completely to peaceful exploration rather than be used for military purposes. It would be a bad thing, indeed, to continue the cold war in space as well as on the ground. The danger of allowing military exploration of outer space is that nuclear weapons could circle the earth in manmade satellites. I am working on a program which will outline more completely the role of the United Nations in outer space so that there will be a shared sovereignty of all the nations in outer space rather than risk the chances of nuclear destruction.

MILITARY COSTS

In the 1st session of the 86th Congress, I led the fight against blanket extension of the 4-year draft. I favored a 2-year extension with the establish-

ment of a joint congressional committee to conduct an extensive study of the procurement and utilization of military manpower for the purpose of seeking alternative methods to military conscription. I felt that the draft law was becoming a crutch to lean on which was not necessary. It is interesting to note that the draft call across the United States now averages less than 7,500 men a month. This, I felt, was small enough so that alternative methods could have been found to enlist this number of men. As a result of my efforts a Committee on the Utilization of Military Manpower was appointed by the chairman of the Armed Services Committee. Congressman FRANK KOWALSKI, a member of that subcommittee said:

DEAR LEN: You are to be congratulated on your part in the formation of the Military Manpower Utilization Subcommittee last year.

I hope you are aware of the full extent to which your leadership in the fight on the draft led to the formation of this subcommittee.

As a member of this subcommittee, I sincerely believe that it has already been responsible for great savings to the taxpayers.

Each year for the past few years we have spent over $40 billion on defense. Over 60 cents of each tax dollar goes for the military budget. There have been many reports in Congress which have shown existing waste and duplication as a result of poor planning and management within the Pentagon structure.

I introduced in the 2d session of the 86th Congress a bill which would act to reunify the Department of Defense under a single civilian command to eliminate duplication and waste. Studies which have been done on this subject suggest that as much as $7 billion a year could be saved if a good reorganization plan were followed. Besides this, the gross inefficiency which exists results in a defense force not as strong as it could be. Priorities are given to wrong things. Unnecessary competition exists between the services and petty opportunism exists among too many of the officers of our services.

2. COMMUNIST INFILTRATION

The promise: Guard against Communist infiltration on all fronts in Government and industry.

The performance: Recent revelations of American defectors to the Soviet Union point up, I feel, our need for greater security measures to counter the international Communist conspiracy. I voted for H.R. 12753, to amend the Subversive Activities Control Act of 1950, to require the registration of persons disseminating political propaganda within the United States as agents of a foreign government.

I supported also H.R. 9069 to tighten up our passport laws to make it more difficult for Communist agents to move about the world. I have made several speeches both in Congress and throughout the United States on Communist penetration, in an effort to awaken the people. I have appeared before many youth conferences in Washington in an effort to stimulate their interest in American Government and to stiffen their moral fiber, to prepare them for the psychological war being conducted by the Communists for the minds of the young people.

3. TAX RELIEF

The promise: Work for a tax program which will be based on your ability to pay—a tax which will call on lower income groups to pay less. Fight for renewal of the excess profits tax on big business, the removal of which has done much to increase costs of consumer goods. I will support tax reductions and adjustments to strengthen small business in order to provide for expansion and growth.

The performance: I voted for Public Law 86–470 which permits personal income tax deduction of all medical expenses incurred by any taxpayer in care of a dependent parent over 65.

The first bill which I introduced in the Congress (H.R. 2812) was for the purpose of allowing small business a tax reduction on earnings which are "plowed back into business." This bill, I think, is a necessity because of the great competition small business presently faces from monopoly and oligopolistic industries which are able to destroy small business. It is about time that Congress defended in a positive way small business and free enterprise. The best way to do this is through the tax laws.

I introduced H.R. 7991, the purpose of which is to prevent double taxation in the case of gifts to bona fide charitable institutions by a person by means of a will.

I have made several speeches urging the renewal of excess-profits taxes.

I introduced legislation and supported measures to eliminate the telephone excise tax.

Although I voted against the 1-cent-per-gallon increase in the gasoline tax, I favored a continuation of the interstate highway program. My vote for not increasing the gas tax was based on the fact that Congress was not given a chance to consider an amendment to the gas tax bill which would have reduced the oil depletion allowance from 27½ percent to 15 percent. If this amendment had passed the gasoline tax would not have had to be raised and the small taxpayer would not have been hurt. At that time I said "I am very sorry that one of the true beneficiary groups of the new highway system—the billion dollar oil companies—are able to escape the tax burden which other people not in oil have to pay." I also noted at that time that the administration had diverted other moneys collected from the Federal highway fund for other purposes. At least $1.2 billion a year which should have specifically been earmarked for the Federal highway fund is not getting into that fund. This was the reason the taxes had to be raised.

I fought for the repeal of section 34 of the Internal Revenue Code. This section allowed credit against tax and exclusion from gross income for dividends received by individuals. Over $335 million are lost annually in additional revenue by the American people because of preferential treatment given to those who receive their incomes from dividends rather than from salaries and wages. There seems to me to be no logical reason why a person who earned his money through wages and salary should be treated differently from those who draw their income from dividends. This amendment passed the Senate but was not considered by the House because of a procedural maneuver.

4. AGRICULTURE AND CONSERVATION

The promise: Work for a farm program which will bring the income of the farmer up to the level of other workers in our economy.

The performance: I was one of the original sponsors of the Family Farm Income Act. I am still convinced that this type of legislation will become law when we have a Democratic President and a Democratic Congress.

I sponsored a food stamp plan which would utilize our surplus food in the United States to feed the millions of people who live on inadequate diets and who have little or no money for the purchase of food. Charitable organizations and educational institutions would be able to utilize to better advantage surplus food and fiber, also. Part of my food stamp plan was incorporated in Public Law 86–341.

I have consistently supported soil conservation programs.

I introduced a Chemical Pesticides Coordination Act which would require greater coordination between Federal agencies and State conservation agencies before any Federal agency embarks on a major pest eradication program. This measure was unanimously reported by the House Merchant Marine and Fisheries Committee but was objected to when it was brought upon the House floor.

I introduced a Milk Sanitation Act to set up a national sanitary code for milk to eliminate artificial barriers in the sale of milk.

I supported a bill to create an Agricultural Research and Development Commission to find and promote new industrial uses for farm products. This bill passed both Houses of Congress but died in a conference committee.

The provisions of my bill, H.R. 12394, were passed by both Houses of Congress and sent to the President for signature, providing a realistic floor in the support price for manufacturing milk of $3.22 instead of the present $3.06, and for butterfat of 59.6 cents per pound instead of the present 56.6 cents.

Also, I introduced the Green Acres Act of 1960 providing for land retirement under a payment in kind program.

Introduced a bill to establish permanent authorization of a fully adequate nationwide milk-for-children program, in order to make sure that all of our youngsters get enough milk in their daily diets.

I introduced a bill to make it possible for the growers and feeders of livestock to be heard before the U.S. Tariff Commission at any time they feel that the importation of meat is having a seriously adverse effect on the domestic industry.

I have strongly supported the Rural Electrification Administration to provide

electric and telephone service to areas not serviced by private utility companies.

5. SOCIAL SECURITY

The promise: Fight for a program which will, first and above all, increase social security benefits.

The performance: In the closing days of the 86th Congress, a bill was passed, which I supported, which included the following features: (a) Removal of the provision formerly required that a person be 50 years old before he could qualify for social security disability benefits even though he might be totally disabled; (b) a voluntary health insurance program for our senior citizens, through the States, based on Federal contributions to the States which are willing to participate in the program; and (c) raised the limitation on income which can be earned in any calendar year by a social security recipient.

6. WORKING PEOPLE

The promise: Oppose any legislation or any other action which would destroy the right of working people to bargain collectively. Support laws to protect people over 40 against job discrimination.

The performance: The following actions were taken to benefit working people:

A bill to prevent job discrimination against people over 40 years of age.

A county industrial agent bill under which new employment opportunities can be created in rural communities and depressed areas.

I supported Public Law 86–470 which permits personal income tax deduction of all medical expenses incurred by any taxpayer in care of dependent parent over 65.

Worked to halt the continuing upward spiral in costs of natural gas; 179 communities and more than 200,000 families in Iowa have experienced 8 gas rate increases since 1951, most of which have not been approved by the Federal Power Commission. My bill would prohibit pipeline companies from imposing consecutive gas rate increases while they have a previously filed application pending before the Federal Power Commission, and to require the FPC to act more promptly on rate increase applications.

Introduced a food stamp plan so that our surplus foods can be made available to our needy citizens. Part of my proposal was incorporated in Public Law 86–341.

7. EDUCATION

The promise: Work for a program which will provide funds and other aids to outstanding students, thereby enabling them to continue further education. Put Military Academy appointments on merit basis without regard to party politics, family influence, or financial position.

The performance: Sponsored a bill to extend the benefits of the GI education bill in peacetime to those members of the armed services who have served 2 years or more. A similar bill passed the Senate but was bottled up in the House Rules Committee.

Supported the school construction bill which would have helped the States meet the rising cost and the increasing need for classrooms. This bill which passed both Houses of Congress died in the House Rules Committee which refused to send them to conference.

Sponsored a House concurrent resolution to encourage an international educational program by allowing freer and greater exchanges of students between our country and other countries.

Introduced a bill, the provisions of which were incorporated in Public Law 86–679 to extend the Library Services Act for 5 years. This act is of vast importance to Iowa since it serves as an important means of communication and education to people of all ages in our rural communities.

Have given every young man from my district who applied an opportunity to compete for an academy appointment. All appointments have been made after careful study of civil service examination grades and scholastic achievements—after the applicants have met established physical and medical requirements.

8. MONOPOLY AND SMALL BUSINESS

The promise: Fight against mergers of giant corporations causing unfair competition to small business, and against vertical integration in agriculture.

The performance: Introduced House Concurrent Resolution 430, joined by Senator KEFAUVER in the Senate, which would instruct our delegation to the United Nations to work to eliminate harmful restraints on international trade. This resolution was aimed specifically at world monopolies which keep prices at artificially high levels.

Introduced H.R. 11959 to prevent vertical integration in the retailing, feeding, slaughtering, and packing of meat food products, livestock products, and other food items.

Introduced H.R. 2812 to allow small business a tax reduction on earnings which are plowed back into the business.

Supported the fair trade bill, H.R. 1253, and signed the petition to get it reported out of the House Rules Committee. This bill would protect small business against unfair competition in nationally marketed items.

9. RISING GOVERNMENTAL COSTS

The promise: Fight hard to reduce cost of Government.

The performance: Introduced H.R. 11775 to reunify the armed services under a single civilian head. This would save billions of dollars.

My food for peace program would result in an average annual saving of over $100 million.

I vigorously dissented to an unnecessary expenditure of $12 million on the part of the House Committee on Science and Astronautics for the Century 21 Exposition at Portland, Oreg., in 1961. I lost on this one.

The reorganization of the Department of Agriculture proposed in my Family Farm Income Act would have reduced substantially the costs of that Department. It is interesting to note that within the last 7 years the Agriculture Department under Secretary Benson has spent $37 billion—$2 billion more than was spent by all the previous Secretaries of Agriculture in a period of more than 90 years.

10. SECOND DISTRICT REPRESENTATION

The promise: Do my best to fight for the best interests of the many people in this district not now being represented.

The performance: I have made the words "district representation" truly meaningful with my mobile office and a full-time field secretary. Our mobile office has traveled literally thousands of miles and has been in every county once a month during the past 2 years, and by September this office had visited at least once every town in this 12-county district. Through personal contact with this office many people experiencing problems involving the Social Security Administration, Veterans' Administration, Housing and Home Finance Agency, the armed services, the Internal Revenue Service, Post Office Department, and other Federal agencies have secured a more thorough consideration of their problems and in many instances their problems have been solved.

Other accomplishments: I have supported other measures, which have been enacted into law, for the benefit of all our people, although they are of a less dramatic nature than the foregoing. A few examples are:

Public Law 86–613, which requires that hazardous substances normally sold for household use such as disinfectants, and cleansers shall be boldly labeled "Poisonous—Keep Out of Reach of Children."

Public Law 86–618, which tightens control over use of cancer-causing coal-tar coloring in food, drugs, and cosmetics.

Public Law 86–673, which authorized the Post Office Department to seek court orders to curb use of mails for distribution of obscene or fraudulent matter.

Dubuque Harbor: I am happy to report that in my first term in the Congress I was able to get Congress to authorize and to appropriate money to carry out the much-needed dredging of the Dubuque Harbor. This project is now included in a list which the Corps of Engineers will submit to the Secretary of the Army within the next few days for his approval to go ahead with the work.

Improved telephone service: Within the past 2 years many miles of new telephone lines have been built in the Second District and many rural families now have telephone service which they did not previously have—all made possible through Rural Electrification Administration telephone loans.

Federal Housing and Home Finance loan for Clinton Bridge: During my term as your Congressman an HHFA loan was approved to meet engineering fees for the proposed new Lyons-Fulton Bridge. The new bridge will replace the present Lyons-Fulton Bridge which spans the Mississippi River between North Clinton, Iowa, and Fulton, Ill. Traffic dangers will be lessened by more adequate approaches, lengthened span and widened roadway of the new bridge. Construction will begin by about April 1, 1963.

Northeast Iowa has shared in Government contracts: During my 2 years in Congress several million dollars worth of Government contracts have been awarded to industries in our district. I hope that my service on the Science and Astronautics Committee will continue to be of benefit not only to our country, but to Iowa so that it can figure prominently in the space age through new job opportunities.

Reimbursement to city of Clinton has been made since I have been your Congressman for sewer damages caused by creation of navigation pool No. 14 on the Mississippi River which was opened to navigation in 1939. This reimbursement was in the amount of $146,800.

I am proud of the work that I have done in the Congress for my constituents, for the cause of world peace and for economic and social justice for our citizens. But I shall not rest on the accomplishments of my first term in Congress. This has been just a start for what I humbly hope will be even greater accomplishments in the future.

My Pledges and How I Fulfilled Them, 1947–59

EXTENSION OF REMARKS

OF

HON. ABRAHAM J. MULTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 1, 1960

Mr. MULTER. Mr. Speaker, in order to accommodate the many requests I have been receiving for copies of my reports to my constituents, I am setting them forth as they previously appeared.

Incidentally, they provide a good comparative review of the conduct of our Government since 1948:

MY PLEDGES AND HOW I FULFILLED THEM

(Remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Saturday, August 7, 1948)

Mr. MULTER. Mr. Speaker, during my campaign for election last year, I told my constituents my political philosophy and what they could expect of me if I were elected to represent them in the House of Representatives. They elected me with an overwhelming majority of the votes cast.

I believe that I kept my every promise and more. I think I have the right to assume that my constituents approve my conduct and my voting record here because this year the Republican Party and the Liberal Party, as well as the Democratic Party—the only party in which I have ever been enrolled—have unanimously designated me as their candidate to succeed myself.

Nevertheless, I think I should here record my pledges and how I fulfilled them.

LABOR

During my campaign, I said:

"I favor a broad social security program including old-age pensions, unemployment insurance, security for crippled and dependent children, and the blind.

"I will support a legislative program which will endeavor to establish fair-employment practices and prohibit discrimination in employment.

"Risk capital, new enterprise, and the development of our natural resources must be encouraged. Small business must be promoted. Competitive private enterprise free from control by monopolies, cartels, or any arbitrary private or public authority must be continued.

"The Taft-Hartley law is bad for the reasons stated by President Truman in his veto message to Congress. As pointed out by the President, it invites 'conflict between the National Labor Relations Board and its general counsel.' Furthermore, it puts the employer in a position where he can refuse to bargain with his employees. In fact, it puts him in the anomalous position of being able to choose the workers' bargaining agent.

"By the simple expedient of refusing to bargain with his employees the employer can force a strike.

"While the men are on strike the employer can replace them with other workers of his own choosing and then call for an election of the bargaining agent to represent the workers. At the election the strikers who were replaced will be deprived of the right to vote, with the result that the bargaining agent selected will be representative of the employer rather than the employee, whom it is supposed to represent.

"I favor increasing the minimum wages now fixed by law to a sum that will more closely approach the realities of present-day cost of living."

During my incumbency, I urged broadening the social security laws. I opposed legislation attempting to limit and to emasculate the social security laws. I urged extended benefits under the unemployment insurance laws. I urged and voted for increased compensation for the lower income Federal employees, including postal workers. I repeatedly pointed out the advantages of the New York State Fair Employment Practices Act as reasons for enactment of a similar national law. I urged enactment of a law increasing minimum wages. Nothing was done about the Taft-Hartley law because the Labor Committee could not be induced to take any action with reference thereto. I voted against weakening the antitrust laws.

TAXATION

During my campaign, I said:

"Our tax laws must be adapted to an expanding peacetime economy, having in mind, however, that tax cuts must go first to the low-income groups. This should be accomplished by increasing the tax exemption granted to all taxpayers. By doing that the low-income earner may get complete tax exemption. At the same time, the man in the higher brackets will get an equal advantage. It will be fair to all, while, at the same time, helping those who need it most. I also favor the enactment of a law which will grant the same income-tax privileges to all married people throughout the country, regardless of whether they live in a so-called community-property State or not. It is rank absurdity to permit a man and wife in one State by the simple expediency of changing their residence to another State to obtain tax advantages under our Federal income-tax laws. The situation can be remedied only by Federal legislation."

During my incumbency, I urged enactment of tax legislation to effectuate my promises. That part putting all our citizens on an equal basis as to so-called community property has been enacted into law. I opposed the tax bill submitted and voted to sustain the Presidential veto of that bill because it unfairly gave the largest tax cuts to those best able to pay and gave the smallest cuts to those least able to pay. About 70 percent of the tax cut was given to about 6 percent of our taxpayers. Ninety-four percent of our taxpayers received only 30 percent of the tax cut. Bills which I introduced to broaden the tax exemption base, to eliminate inequalities, to exempt pensions, and to eliminate wartime nuisance taxes failed of enactment.

HOUSING

During my campaign, I said:

"The Taft-Ellender-Wagner bill should have long since been enacted into law. It should be passed at the earliest possible moment. The Government must do everything possible to encourage and aid private industry in relieving the housing shortage by the building of permanent homes for all those who need them."

During my incumbency, I fought continuously for adequate housing legislation. My first official act, after taking my oath of office, was to sign the petition to bring the Taft-Ellender-Wagner bill before the House for debate and for a vote. My effectiveness was increased by my election to the Committee on Banking and Currency which had this legislation before it. My efforts are reflected by the CONGRESSIONAL RECORD and were publicized by the press.

PRICE AND RENT CONTROL

During my camgaign, I said:

"Control of the price to be paid for any commodity, whether it be the use of property or the purchase of food, clothing, or anything else, can be justified only as the use of police power in an emergency. That the emergency has existed and still exists cannot be denied as to both food and rents. Some relief may be obtained by the enactment of rent-control statutes by the various States. Such local control can be made effective by proper legislation and by proper administration. Houses cannot be moved across State lines to avoid such local legislation.

"Foodstuffs, however, must be controlled on a national scale. They cannot be controlled locally. If we were to have local legislation fixing prices in one community, the producers could beat the law by the simple expedient of sending their merchandise to communities that do not have such restrictions.

"I am in complete agreement with President Truman's policy of attempting to solve the situation by voluntary discipline. If that does not solve the problem, then price control will be the only way out. It will be the last resort if the emergency continues."

During my incumbency I introduced a comprehensive price-control bill and repeatedly urged enactment of price-control legislation, but my pleadings fell upon deaf ears. The efforts of my colleagues who joined with me in urging effective rent-control legislation was only slightly more effective. A weak, but bettter than none at all, rent-control bill was enacted after long and arduous debate. By the dint of almost superhuman effort, a provision which would have made the entire bill unconstitutional was eliminated. I also introduced a bill to control fuel during emergencies.

FOREIGN POLICY

During my campaign I said:

"I have been preaching the establishment of a Jewish homeland in Palestine since 1921. The President and the Democratic Party favor the opening of Palestine to unrestricted Jewish immigration and colonization and the establishment there of a free and democratic Jewish commonwealth.

"We favor the majority report of the United Nations Special Committee on Palestine as the best means presently available to solve the problem. We urge the immediate implementation of the program there advanced.

"The Communist Daily Worker and its American Labor Party candidate opposing me in this campaign have attacked me as a warmonger, not because I have talked out

against their beloved Russia, but because I have dared to talk out in support of the American democratic way of life. These are my principles, and these are the principles which they find fault with:

"In order that the world may not again be drenched in blood by international outlaws and criminals we must 'join with the other united nations in the establishment of an international organization based on the principle of the sovereign equality of all peace-loving states, open to membership by all such states, large and small, for the prevention of aggression and the maintenance of international peace and security.' To 'make all necessary and effective agreements and arrangements through which the nations would maintain adequate forces to meet the needs of preventing war and of making impossible the preparation for war and which would have such forces available for joint action when necessary.

" 'Such organization must be endowed with power to employ armed forces when necessary to prevent aggression and preserve peace.

" 'We favor the maintenance of an international court of justice, of which the United States shall be a member, and the employment of diplomacy, conciliation, arbitration, and other like methods, where appropriate, in the settlement of international disputes.

" 'World peace is of transcendent importance.'

"The quotation is from the Democratic national platform of 1944. Those were my sentiments then—they are my sentiments now. President Truman and my party have reasserted them time and time again. We will deal with Russia and everyone else around the peace table. We will do all in our power to prevent war. If Russia and the Russians want communism they can have it and we will do nothing to change their minds about it, provided they keep it to and for themselves.

"By the same token we want none of their Communist ideology here and we will do all in our power to keep it out of this country.

"When Hitler and Stalin had a peace treaty the Communists and their fellow travelers in this country were most vociferous in their demands that we be isolationists and send neither food nor munitions to Britain or France. At that time the Munich appeasement was applauded and Hitler's attack upon the rest of Europe was an imperialistic war by the countries attacked.

"When Hitler ignored his peace treaty and attacked Russia this same group found that the imperialistic war was a people's war and they could not get our boys and supplies over fast enough.

"Thank God they were in time and Hitler and his murderous hordes were eliminated.

"During those days there were no insults by the Vishinskys and the Molotovs. Parenthetically I might ask: Has Litvinov, who did so much to bring about friendly relations between the United States and Russia been liquidated because he was foolish enough to think that the Russians intended to do all the amicable and peace-loving things that he preached while we were fighting together?

"There is only one way to preserve our American heritage and our American birthright, and that is to at all times be so militarily strong that no one will dare attack us. The world must know that never again will we be in a position where any aggressor nation can pull a Pearl Harbor on us.

"If that is warmongering, I am willing that my name be placed alongside of those of Franklin D. Roosevelt, Harry S. Truman, James Byrnes, George Marshall, Averell Harriman, and David Lilienthal.

"The Marshall plan to relieve the dire need and distress of a stricken world must be put into effect at the earliest possible moment.

"That, even faster than military might, will stop the Communist hordes in their tracks."

During my incumbency, I worked assiduously to enact into reality the things I preached during all my adult life.

The establishment of the free state of Israel became a reality. It has been and will continue to be aided in every respect by every freedom-loving American. Our Government will soon give Israel full and complete recognition; it will give Israel all the aid that a friendly ally is entitled to; it will soon receive a $100 million loan from our country. My efforts in connection with all thereof, which are still continuing, I prefer not to record at this time. In due time, others may see fit to tell about them.

I am proud of my vote in support of the Marshall plan, now known as the European recovery plan, and I am proud of my vote to eliminate from the House version of that bill aid to Franco Spain.

My vote in favor of selective service—the draft—was not only dictated by my conscience and my belief that it was in the best interests of peace, but it was in accordance with my pledge to my constituents during my campaign. I lived through two World Wars. My older son served overseas in World War II. My younger son is subject to the new law I supported. I feel as deeply as any the waste of money and manpower for military purposes. But just as we would not vote to disband a municipal police force, we must insist on a national and an international police force.

I fought for a fair displaced persons bill and opposed the discriminatory and unfair provisions of the bill as it was passed.

I introduced a bill to permit adopted children to enter our country free of quota restrictions.

I introduced a bill to sever all relations with Lebanon.

I introduced a bill to withhold from Britain and all other countries the equivalent of the moneys they were lending and/or giving to the Arab aggressor nations.

I introduced a bill to investigate conditions in Palestine.

I introduced a bill to exempt from penal prosecution all Americans who enlisted in the army of Israel.

I introduced a bill calling for limitation of the veto power in the United Nations.

I introduced a bill to improve the Veterans' Administration.

SUBVERSIVE ACTIVITIES

During my campaign, I said:

"I condemn the tactics of the Un-American Activities Committee in pillorying men and destroying reputations without giving the accused an opportunity to be heard."

During my incumbency, I did not hesitate to make my stand known. I actively opposed with all my energy the enactment of the Mundt-Nixon bill. At the same time, I gave no comfort to the Communists and their fellow travelers and to totalitarianists, no matter what name they used. Nevertheless, I opposed and voted against giving any funds to the Un-American Activities Committee.

MISCELLANEOUS

I could write volumes on my activities on behalf of my constituents who needed help. I will leave that story to be told by those who called upon me from time to time.

Anyone and everyone who called upon me received a respectful hearing. One thing I did not and never will permit is to allow anyone, individual or delegation of individuals, to call upon me under false colors, using high-sounding but misleading names. Whenever they do, I will expose them for what they are.

Those who desire a more detailed record of my activities will find my remarks in the CONGRESSIONAL RECORD under the following subjects on the pages indicated:

Adopted children: 9550, A4702.

Americanism: A3101, A3451, A3800, A3903.

Brotherhood: 1284, A648, A1105, A3145, A3634.

Brooklyn has a remedy: A3905.

Brooklyn adopts Breukelen: A944.

Civil rights: 2550, 5856, 5859, 5860, 5861, 5862, 6043, 6108, 6109, 6117, 6492, 9532, 10110, A1321, A1527, A1547, A1586, A3910, A4056.

Communism, first session: A4770. Second session: 6108, A1524, A1664, A1968, A1985, A2320, A3090, A3091, A3458, A3695, A3813, A3868 A4090, A4168, A4670, A4673, A4768, A4779, A4833, A4842, A4915, A4947, A5067.

Control of prices and rents, first session: 11732, A4922, A4929. Second session: 1433, 1621, 1988, 2868, 2871, 2888, 2957, 2962–2964, 2980, 8890, 9761, 9875, 9888, 10206–10207, 10241, A903, A3950, A4835, A4950.

Congressional investigations and the Un-American Activities Committee: 2413, A1547, A3391.

Displaced persons: 7874, 8860, 10110, A1105, A1529, A2724, A2938, A3391, A4903, A4960.

European Recovery Plan—the Marshall plan: 7164, 7207, A3699.

Fuel emergency: 1433.

Gag rule, first session: 11724. Second session: 9875, 9888, 10241.

Housing: 2014, 9875, 10206–10207, 10241, A3142, A3714, A3950, A4960, A5078.

Italy: 4438, A2394.

Palestine: 431, 1421, 3396, 3510, 5515, 5990, 6549, 6989, 7071, 7725, 7982, 9351, A497, A637, A795, A899, A905, A1320, A1826, A2320, A2322, A2380, A2396, A2398, A2574, A2724, A3014, A3050, A3143, A3450, A3456, A3488, A3522, A3654, A3656, A3694, A3695, A3699, A3712, A3817, A3833, A3844, A3854, A3959, A4278, A4668.

Postal workers: A2851.

Rayfiel, Hon. Leo F.: 2998.

Religious education: A3688, A4275.

Selective Service: 38, 8507, 8677, A1326.

Surplus property: 716.

Taxes, first session: 11429. Second session: 200, 716, 4079, 5749.

United Nations: 4438, 5462, A4960.

Veterans: 38, 2512, A2724, A5253.

The gentleman from Mississippi: 431, 1988, 2550, 2980, 7874, 9532, 10110, A1586, A3450, A4056.

Youth united: A4056.

YOUR CONGRESSMAN REPORTS TO HIS CONSTITUENTS

(Remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Tuesday, September 19, 1950)

Mr. MULTER. Mr. Speaker, the 81st Congress is approaching the end of its sessions after two long and difficult years of legislative work. This is a proper time to report to my constituents on some of the major problems which confronted us during the past 2 years. The people of my district are entitled to know how their Representative in Congress served their interests and that of the Nation as a whole. They will have an opportunity to pronounce judgment on my record of service on election day.

During each of my campaigns for election, I fully and fairly made known my views on all major political and economic problems. I made it crystal clear to them what they could expect of me as their Representative, how I would represent them, what I would fight for, and what I would fight against. They elected me by overwhelming majorities, in 1948 by more than 3 to 1. I am very grateful to the people of my district for this outpouring of confidence

in me. I believe I have fulfilled every promise made to them.

For the third time in succession my party—the Democratic Party—has designated me unanimously for another term in Congress. The Liberal Party also is unanimously supporting my candidacy, as it has done twice before.

Labor's League for Political Education, in its congressional scorecard issued for the guidance of American Federation of Labor members and the public generally, has given me a perfect score on 10 selected key issues in Congress, including such matters as the Taft-Hartley Act, rent control, public housing, minimum wages, antitrust laws, social security, and others.

Similarly, the Congress for Industrial Organizations—CIO—published a supplement to the CIO News where the voting record of all Members of Congress was appraised on the basis of 13 selected issues, and I was rated as having voted "right" on every issue.

The magazine, New Republic, in a special supplement containing a progress report on the 81st Congress, gave me a score of 100 percent on 15 major issues, among them the Marshall plan, reciprocal trade, broadening social security, veterans' pension plan, antipoll tax, Brannan farm plan, and others mentioned previously.

More recently, the well-known liberal organization, Americans for Democratic Action, labeled my voting record perfect on what they considered the 15 most important issues. These included some of those already mentioned by the other organizations, as well as Korean aid, FEPC, middle-income housing, point 4 aid to underdeveloped areas, the natural gas bill, health reorganization plan, Defense Production Act, and the Wood-Mundt-Nixon bill.

During the 1st and 2d sessions of the 81st Congress over 12,000 pieces of legislation were introduced, including public and private bills and various resolutions. Several hundreds of these reached the floor of the House for action. Those and many others were carefully studied and analyzed by me. I voted at all times in the best interests of the people of the United States and of my district, but never provincially and never contrary to my platform pledges.

My record in Congress is an open book. I modestly, yet proudly, present this record to my constituents and invite them to acquaint themselves with my efforts and accomplishments. I do not pretend to be infallible. Suggestions and constructive criticism will always be welcomed by me.

FOREIGN AFFAIRS

During my campaign in 1948, I expressed the following views:

"Peace and democracy at home gain when democracy abroad is healthy. The Marshall plan to rehabilitate Europe strengthens our economy and helps destroy subversive influences. Antidemocratic doctrines must be vigorously combated. We want peace without appeasement.

"Strengthen the United Nations. A strong United Nations demands a strong United States of America. Discard the veto power. Establish an international police force to prevent aggression."

In the 2 years that have passed since I stated these views communism has made serious inroads abroad, particularly in Asia, but it was stopped in Europe where countries like Italy, France, Greece, and others were threatened. Thanks to the aid given them through the Marshall plan, the march of communism in Europe was successfully contained. The United States has demonstrated to the world that she desires peace, but that she is not desirous of attaining it through appeasement of communistic efforts at enslavement of the world.

Unfortunately, the situation is different in Asia where open warfare and bloodshed are the order of the day as a result of the invasion of South Korea by the Communists of North Korea, using Russian arms and serving as a spearhead of Russian imperialism in the Far East. If we had had a stronger United Nations, if the U.N. had discarded the veto which Soviet Russia is utilizing for its own interests and to the detriment of the U.N. and world peace, if the U.N. would have had a strong international police force to deal with acts of aggression—it is very likely that the Soviet aggression in Korea would never have been risked and communism would have been stopped in its tracks in Asia as in Europe.

I have supported the Marshall plan during the past 2 years and I shall continue to support it in the future. I shall also continue my efforts to build a strong U.N., as I have done in the past. I voted for the Korean-aid bills originally, and more recently supported the bill providing additional funds for military assistance.

On the matter of war, I stated on the floor of the House of Representatives on March 7, 1950, as follows:

"The American people do not want war. I believe the Russian people do not want war either—if only they had the opportunity to speak their mind freely. But if war nevertheless engulfs this world, it will be due to the insatiable lust for power on the part of the present rulers of Soviet Russia."

On June 26, 1950, the day after the brutal and unwarranted attack by the Communists on South Korea, I supported the declaration of the U.N. Security Council condemning this aggressive act and I lauded President Truman's decision to aid the U.N. I said:

"No one can consider it a warlike act for us to carry out our obligations as a member of the United Nations to protect our weaker sisters from brutal, unprovoked aggression. No one in our time has done more than President Harry S. Truman to bring about permanent peace in every part of the world. * * * His action with reference to Korea and the Far East is further proof of his determination to maintain peace. Our country and all the peace-loving peoples of the world will be ever grateful to him for his patience until action could no longer be withheld, and for the speed and forthrightness with which he ordered our Armed Forces to the defense of democracy when no other alternative was possible."

On June 30, 1950, President Truman graciously wrote to me with reference to this subject. He said in part:

"Your assurances will be helpful indeed as we go forward with the steps necessary for the promotion of peace and stability in the world."

PRICE CONTROL

Next to the problem of war, the most immediate threat to our democratic way of life is the spiraling inflationary situation which took on sudden momentum after the outbreak of the conflict in Korea. Prices of food, clothing, and other necessities of life began to soar sky high, and hoarding once again reared its ugly head. During my campaign in 1948 I said:

"Runaway prices of food, clothing, and other necessaries make it harder and harder for you to make ends meet. American family life cannot survive without food, shelter, and clothing which the people can afford."

It would extend my report to undue proportions to cite the many instances in the past 2 years when I spoke up in Congress against high prices and in favor of effective price control and the interests of the consumer. I have appealed for an end to profiteering and for the necessary measures to stop hoarding.

More recently, when Congress was considering the Defense Production Act of 1950 to establish the necessary controls for the present emergency, I supported the establishment of such controls and urged granting the President the necessary powers to control prices, wages, rationing, credits, and commodity speculation. On August 2, 1950, I said in the House:

"If we must invoke controls, price controls, wage controls, and other controls we ought to go all out and make them enforceable."

The next day I said:

"Price and wage stabilization is intended to eliminate and prevent profiteering, manipulation and speculation, and to protect the consumer, the wage earner, and the investor from undue impairment of their living conditions."

And on August 10, shortly before the House voted on the Defense Production Act, I made a final appeal and issued a warning, as follows:

"In a few moments you are going to be called upon to stand up and be counted and have your names recorded permanently in the records of this Congress so that your children and the children who come after them may know who stood up here and said: 'Send them over to fight, but keep from them that which they need in order to be able to fight. Regiment the boys into the armed services. Regiment little lobbyless John Q. Consumer back home. But stay away from the untouchables who can pressure us with their powerful lobbies. Exempt the agricultural exploiters, the commodity-exchange manipulators, and the real estate interests. Control the little man and woman in the home and in their daily activities, but let the moneylenders and the money-changers and the gamblers run riot.'

"The time will soon come for you to be recorded; let your conscience be your guide."

RENT CONTROL

Coupled with the problem of rising prices, profiteering and protection of the consumer is the question of rent control. During the campaign in 1948, I said:

"We must continue the fight against exorbitant rents. Low-cost housing and slum clearance laws must be enacted."

I have fought consistently for an effective rent control act. I am aware of the great hardships to the people in the large metropolitan areas who are threatened by any relaxation of rent control and I raised my voice in Congress on numerous occasions to bring this matter to the attention of all legislators. Typical of my remarks on this matter are the following:

January 18, 1950:

"I think every man, no matter what his politics may be, who comes from any metropolitan community, any large municipality, must stand for an extension of rent control at this time."

March 30, 1950:

"There are still millions of families who urgently need the protection which this law (i.e. rent control) affords them, and there are still hundreds of thousands of families who have to live doubled-up because of lack of sufficient housing. * * * In view of the fact that rent has always been a basic factor in the cost of living for many millions of families, and in view of the slow but gradual increase in unemployment in many sections of the country, we should not be too hasty in suspending this means of protection which will unquestionably hurt the lower income groups very severely. I fear that if we allow the rent control law to lapse, that if we do not renew it for another year, our inaction or refusal to extend its protection to those millions of our citizenry who still need it, may lead to a chain of events which would

seriously undermine the economic stability of many areas of the country. * * * Let us not encourage economic chaos; let us not contribute to economic instability. Rent control is still a matter of emergency legislation. It is absolutely necessary."

June 13, 1950:

"Who wants this continuance of rent control? Is it, as you have been told by some of the opponents of the bill, only the left-wing or the Communists or those who think along the same lines? Six of the largest and most influential national veterans' organizations of this country came before our committee and asked that these controls be continued. The CIO and the AFL asked that these controls be continued."

After a bitter struggle, Congress voted to continue the rent control law until the end of 1950 with a provision for an additional 6-month extension for local municipalities which enact laws therefor.

The Korean war and the resulting emergency, of course, make it imperative that rent control be continued, and strengthened. It will be one of my major tasks to fight for a more stringent rent control law in the next session.

HOUSING

The enactment of housing legislation, including adequate provisions for slum clearance and low-rent housing projects, is of utmost importance. In this matter I supported President Truman and the plank in the 1948 Democratic platform which said:

"This Nation is shamed by the failure of the Republican 80th Congress to pass the vitally needed general housing legislation as recommended by the President."

Throughout the session of Congress I urged housing legislation for the benefit of low-income groups, including cooperative housing projects. When the executive board of the CIO passed a resolution on February 16, 1950, urging Congress to approve the middle-income housing bill, I had that resolution reprinted in the CONGRESSIONAL RECORD the same day so that all Members of Congress might read it. When the bill came up before the House on March 20, I described to my colleagues the cooperative housing movement in certain Western European countries as I had observed it on a mission for the House Committee on Banking and Currency. I said:

"The surest way to make a convert to capitalism and to individualism is to give a family a piece of property or an equity in it, no matter how little. Give him the opportunity to call something his own and he will fight to the death the efforts of socialism or communism to take it away."

When some Members wanted to retain certain obnoxious provisions in the housing bill, I frankly stated on March 22:

"They say those provisions are not special legislation; they do not take care of special groups. They just take care of big business, the financial fraternity of the country, the big builders. Of course, when we do anything like that we are never catering to special interests. But when you try to take care of the forgotten man who is never forgotten when it comes to taxes, the fellow in the middle-income group who is carrying the tax burden of our Government, you are told we are socialistic, communistic, collectivistic, discriminatory, everything except what it is."

LABOR, SOCIAL SECURITY, AND UNEMPLOYMENT INSURANCE

During my campaign in 1948, I said:

"The aged, the ill, and the unemployed must be cared for. A broad program affords your best protection against depression and the awful hazards of illness and disability. The gains of labor must not be impaired."

My opposition to the Taft-Hartley labor law is a matter of record. My votes against this bill and some of its rigid antilabor amendments have been duly noted by the American Federation of Labor, the Railroad Brotherhoods, the CIO, and all patriotic labor unions. I shall continue to work for the removal of its restrictions on labor unions and the laboring masses. At the same time I shall continue to work for sound labor relations during the present emergency and to keep strikes at a minimum in order to maintain production at a high rate.

I have been an ardent supporter of the Social Security Act and worked for its expansion to include 10 million additional people. The expanded act finally went into effect recently thereby substantially increasing benefit payments to many millions of our citizens. Due to the more liberal provisions of the act many who were ineligible before will now be entitled to receive social-security payments. In time, it is hoped, the act will entitle our entire adult population to the benefits of old-age and survivors' insurance when they reach the statutory age. I shall continue to work toward that goal.

In the matter of unemployment, I constantly advocated that the necessary measures be taken to prevent a rise in unemployment. Among such measures, I urged the repeal of wartime excise taxes on a large number of commodities and articles in order to stimulate production and purchasing of such articles on a larger scale. In a statement to the House Ways and Means Committee urging repeal of such taxes, I said:

"I am also fearful of the effect this will have in the near future on the employment situation, not only in the industries affected by the excise taxes where already considerable unemployment is being reported, but even in other fields."

Fortunately, at the present time our unemployment figures are among the lowest in our peacetime history. For those who unfortunately must remain on the unemployed lists I wholeheartedly favor maximum payments under unemployment insurance.

TAXES

During my campaign in 1948, I said:

"Low income earners should not pay taxes. The first $3,500 of income should be exempt."

Throughout my incumbency of office I have supported the idea of tax exemption for the low-income groups. Notwithstanding the need for higher taxation resulting from the war in Korea and our defense needs, I still believe that the burden of taxation should be taken off the shoulders of the small wage earners and placed upon the high income groups, big business, and the big corporations.

When I advocated the repeal of excise taxes, I did it primarily because it hurts the small-income people most. The Korean conflict, unfortunately, postponed the possibility of repealing the excise nuisance taxes.

I also earnestly support an excess-profits tax to stave off excessive profiteering on the part of a small group at the expense of the rest of the population. An excess-profits tax at this time would help take the burden off the small taxpayer.

I urged repeatedly that we pay for armaments and defense as we incur the expenses therefor. That means more taxes now.

I voted against adjourning the Congress until we enact an excess-profits tax. I earnestly hope we will do so before the end of the year.

In the matter of excess profits, I said:

"One need not be an economist to know that you control profits when you control prices. A primary result of price control is the limitation of profits."

CIVIL RIGHTS

During my campaign in 1948, I said:

"Safeguard freedom of opinion and speech. Sustain our traditions of justice and fair trial. Eliminate poll taxes. Abolish discrimination."

I have worked most diligently to safeguard civil rights in this country, notwithstanding the hysteria of the times and the befuddled thinking of conservative forces who are dividing our people at a time when unity is most urgent. As the leading nation of the free world we should be a model of democracy and should set an example in practicing the principles of tolerance, understanding, and the treatment of minorities in our midst. Abolition of discriminatory practices in employment, in education, in the Armed Forces, in housing, and other phases of our activity will not only safeguard our freedom here, but will help us gain many friends throughout the world for the cause of democracy.

During the term of the 81st Congress, I spoke up on numerous occasions for the maintenance of civil rights. Here are a few such examples:

January 12, 1950:

"Never before in world history was there greater need for human understanding, good will, and lasting peace than in the present postwar critical period. * * * False prophets and hatemongers in our own country spread doctrines of bigotry and hatred which serve only to undermine the unity of our people at a time when such unity is urgently needed for our very survival."

January 18, 1950:

"I hope that on Monday of next week this House will call up for final action the FEPC bill that has been receiving so much attention throughout the country. At this time I want to direct your attention to the fact that one more step in the right direction to eliminate discrimination in this Nation has been taken by the Army, pursuant to an order issued by Gen. Gordon Gray. He has issued an order which requires that Negro troops be integrated into every branch of the service. * * * Last year I introduced a bill in the House which would attempt to accomplish the same purpose in the National Guard. * * * The enactment of the FEPC law on a national scale will go a long way toward eliminating those very situations which bring about such riots and lynchings, it will be one further step in the accomplishment of true freedom, freedom in the democratic way."

The FEPC bill was finally called up in the House on February 22, 1950, and I voted for it. Although it was stymied in the Senate, I continued to urge final passage of this bill and other civil rights bills.

I urged home rule for the 900,000 disenfranchised Americans living in our Capital City of Washington.

In continuing the struggle against intolerance, on March 22, 1950, I said:

"My view is that wherever bigotry and intolerance of our fellow men is practiced, in any part of our country, it should be exposed. Every effort should be made to eliminate the cancerous growth of hatred and prejudice wherever it shows its ugly head."

When the courts of New York upheld the restrictions limiting the huge housing project of Stuyvesant Town to whites only, I advocated that the U.S. Supreme Court reverse that decision. I stated as follows:

"The effort to reverse that decision has significance which goes beyond the field of housing or even the problem of racial discrimination. Unless the decision is reversed it may set a precedent which in time may prove ominous to our whole American pattern of democratic government."

When reports reached me that segregation and discrimination are gradually and successfully being eliminated at our military bases and camps, I said on August 15, 1950:

"At a time when our democratic system is on the defensive the elimination of racial segregation in our Armed Forces is a very encouraging factor. It is the best reply to Communist hypocrisy and doubletalk. Na-

tions throughout the world cannot fail to realize that as a Nation we stand united, in peace or war. They, likewise, will realize that the rights of minority people and human rights for all are best respected and defended in countries which practice true democracy."

COMMUNISM

During my campaign in 1948, I said:

"Fight communism, but not at the expense of Americanism."

I have favored elimination of subversive and disloyal elements from Government service, but I am vigorously opposed to any punishment being meted out to any of our citizens who may have different political views. Thought control is not in the American spirit or tradition. It is the practice of dictatorships, not of democracies.

Discussing the question of democracy versus communism, I said on May 2, 1950:

"The late Franklin D. Roosevelt, at a time of national emergency, told the people of this country that the only thing we had to fear was fear itself. Should another emergency arise, the American people will not be afraid to rise to the situation. Our problem is how to avoid that emergency, how to stave off disintegration from within and destruction of our freedom from without."

On another occasion, on May 24, I brought to the attention of Congress the excellent article by David Dubinsky, president of the International Ladies' Garment Workers' Union, published in the magazine Foreign Affairs, in which he discussed the new international labor organization created earlier this year in London and the role of free labor throughout the world as a dynamic force in the struggle against communism. On another occasion, I inserted in the CONGRESSIONAL RECORD the full text of a plan by Walter Reuther, president of the United Automobile Workers Union, in which he suggested a positive peace offensive to stop Communist aggression by initiating a program of economic and social action to eliminate poverty, human insecurity, and injustice which are the sources of Communist power.

Although I have spoken out against communism on numerous occasions, I was and still am opposed to so-called control bills. I opposed the Mundt-Nixon bill when it first came up 2 years ago, I opposed it when it was revived recently as the so-called Wood bill. I said then and I still say that such bills are bad, they will do us untold harm and will not help us solve the situation.

During my 1948 campaign I frankly told the voters that I had voted against the Mundt-Nixon bill and why. I made perfectly clear that if reelected I would vote against any similar bill.

I would have been duty bound to vote against the Wood-Mundt-Nixon bill this year if it were only as bad as the Mundt-Nixon bill of 1948. As a matter of fact, it was much worse.

The company in which I find myself in opposing this bill is small, but indeed select. It includes our President, Harry S. Truman; our Attorney General, J. Howard McGrath; FBI Director J. Edgar Hoover; our Secretary of Defense, Gen. George C. Marshall; our Secretary of State, Dean Acheson; our Director of Intelligence, Gen. Walter Bedell Smith; Gen. Dwight Eisenhower; Catholic Bishop Bernard Shiel, of the Archdiocese of Chicago; Philip Murray, of the CIO; William Green, of the A.F. of L.; Walter Reuther, of the UAW; David Dubinsky, of the ILGWU; and Jacob Potofsky, of the ACWU. I have no doubt that time will prove us right.

In opposing the bill in the House of Representatives on September 20, I said:

"I bow to no man in or out of this Congress in a desire to preserve this country and its good, true—yes, divine principles of democracy. Time is too brief to call again to your attention the arguments that were raised against the Mundt-Nixon bill 2 years ago and then against the present bill a short time ago when we considered it. They are still valid against this bill."

I enumerated some of the dangerous parts of the bill. They were referred to at length by President Truman when he vetoed the bill. The bill is designed to catch votes and headlines but not spies.

As I told the Congress, the alien and sedition laws of 1798 were directed against subversives too. The reported cases, however, show that the only ones convicted and jailed under them were Republicans who opposed legislation espoused by the Federalists—the then majority party. I do not want my party prosecuting Republicans or even Dixiecrats, nor do I ever want to find Democrats in a position to be prosecuted by them—because of political or religious beliefs. Under this very bad law I can be prosecuted for urging its amendment or repeal.

I have and always will be in the forefront of every fight against totalitarianism under every guise and every name. Just as vigorously will I fight for our American principles of democracy.

ADMISSION OF DISPLACED PERSONS

During my campaign of 1948, I said: "Stop discrimination against Catholics, Protestants, and Jewish displaced persons. We want no Nazis here."

I am happy to report to my constituents that Congress finally passed a more liberal DP bill, minus most of the discriminatory clauses of the old DP Act. The number of DP's eligible to enter the United States has been substantially increased, certain preferences were established for orphans and children, while the eligibility date has been moved forward several years making many thousands of DP's eligible for admission. After 2 long years of struggle, our efforts in this matter finally were successful.

Let me add, that on March 15, 1950, I introduced a bill to provide nonquota immigration status for children coming to this country for adoption by American citizens. At a later date, I called the attention of Congress to the work being done by the International Refugee Organization which is caring for and feeding the DP's in the camps. I urged that sufficient funds be made available to this organization to help it find homes for the remaining DP's and thus finally resolve the DP question.

ISRAEL

During my campaign in 1948, I said:

"A free democratic homeland is the hope of the Jewish people. It must not be bartered away by imperialistic powers, intent only upon private gain. Extend de jure recognition. Lift the arms embargo. Grant the loan. Stop aggression."

The picture has vastly changed during these 2 years. Israel is today recognized by nearly all the nations of the world, it is a member of the United Nations, the war on its frontiers has been stopped, the United States has granted it a $100 million loan and has removed the arms embargo. Relations between Israel and the United States are most cordial and friendly, and Israel is supporting our efforts in Korea.

Earlier this year, when the Arab countries were arming at a furious pace and threatening Israel with a second round, many of us in Congress demanded that this country take steps to prevent a renewal of bloodshed and to protest against British arms shipments to the Arabs. I was among the first to warn of dire consequences unless the armament race in the Near East is ended. Beginning in February of this year and succeeding months, I spoke on the matter in the House, I contacted personally high officials in our Government, I went with congressional delegations to Secretary of State Acheson. I exerted every effort in my power to gain active American support to secure the existence of the Jewish state. Finally, on May 25 the three-power declaration was issued whereby the armament race was ended and the nations of the Near East were warned against aggressive acts.

I also spoke out against the internationalization of Jerusaleum, for peace between Israel and the Arab States, for economic assistance to Israel to help it stabilize its economy and integrate the hundreds of thousands of new immigrants entering the country. In April, when Israel celebrated the second anniversary of its independence, I organized a salute to Israel on the floor of the House and more than 40 Congressmen participated with addresses and statements of greeting to the Jewish state and its leaders. At the request of the American Zionist Council, which includes all Zionist groups in the United States, I placed in the CONGRESSIONAL RECORD a review prepared by the council of the accomplishments of Israel in the first 2 years as an independent state.

I was privileged to accompany to the White House, Mr. Benjamin G. Browdy, president of the Zionist Organization of America, on two different occasions and will participate in conferences with President Truman concerning Israel, its political and economic problems, and its close ties with the United States.

OTHER ISSUES AND EFFORTS

The issues previously referred to were among the most important ones that came before the 81st Congress. There were others, some of lesser importance from the international standpoint, but all of great significance to large segments of our population. In each such instance I took a stand fearlessly and worked assiduously to enact those ideas which I considered constructive and to oppose those which I considered detrimental. Let me enumerate just a few of these:

I introduced a bill to assist cooperative and other nonprofit organizations in the construction of housing for families of moderate income.

I urged loans to needy students to enable them to continue their education over a period of 4 years at the rate of $1,000 per year.

Time and again I brought to the attention of Congress the plight of oppressed minorities all over the world, including that of the Jews in Russia, the true situation concerning Jewish life in that unhappy country, the rise of anti-Semitism there, the refusal to allow Jews to emigrate to Israel, and the extermination of Jewish religious and cultural life there.

On several occasions I protested the revival of anti-Semitism in Germany and the deterioration of democracy there, and our failure to denazify the Germans. On May 23, 1950, I introduced a resolution asking for the appointment of a bipartisan commission to investigate American policy in Germany.

I urged immediate ratification of the Genocide Convention of the United Nations to outlaw mass murder of whole peoples as practiced by the Nazis, and as threatened to be practiced by the Communists.

I protested against the rigged and phony trials of Cardinal Mindszenty in Hungary and of Cardinal Stepinac in Yugoslavia. I repeatedly urged our State Department to remonstrate with these Governments against their incarceration.

I introduced a bill to issue a special postage stamp to honor the memory of Col. David (Mickey) Marcus, the Brooklyn hero who died in the fight for Israel's independence.

I introduced a bill to amend the Tariff Act by stabilizing import duties in order to encourage trade relations with foreign countries.

I supported and voted for the various reorganization plans submitted by President

Truman to make the executive departments of our Government more efficient.

I protested vigorously to the House Committee on Post Office against the curtailment of the postal service as false economy and urged the reestablishment of the service and introduced a bill to accomplish that purpose.

I supported the President's point 4 program to aid underdeveloped areas of the world. I spoke up for Americanism, for religious freedom and brotherhood, a helping hand to Italy, unity of Ireland, dissolution of the monopolies in order to aid small business, and many other phases of activity in American life.

In arriving at my conclusion as to how to vote on legislation I always had in mind that veterans who had answered the call of their country and their families were entitled to certain rights and privileges which must always be respected and preserved and my vote has always been cast so as to preserve their best interests.

I am not touching at this time on the numerous efforts in behalf of the many constituents who called upon me for help of one sort or another. In every instance, I did everything I could to help them. The voters of my district have been good to me in permitting me to serve them. I have tried to reciprocate in kind.

CONCLUSION

The United States and all the free people of the world are now in the midst of a world crisis. Unity of purpose is the demand of the hour. The whole world looks to this country for guidance and leadership in the days ahead to make life more secure for ourselves and our children and to bring lasting peace to a tortured mankind that has not known the meaning of real peace for many years. I have great confidence in the American people, in their loyalty to the highest ideals of mankind, in their will to uphold and maintain our democratic way of life. With God's help, we will go forward to a better day.

YOUR CONGRESSMAN REPORTS TO HIS CONSTITUENTS

(Remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Friday, July 4, 1952)

Mr. MULTER. Mr. Speaker, the 82d Congress is approaching the end of its sessions and this seems an appropriate time to report to my constituents on my service.

During the 2 years when this Congress was in session our Nation was confronted with many important problems at home and abroad. As each of these problems came up before Congress, I sought to the best of my ability to serve the interests of the Nation as a whole, as well as those of the people of my district. Ever since I first took the oath of office as a Member of Congress my guide has always been that all-embracing phrase in the preamble of the Constitution of the United States which reads:

"We, the people of the United States, in order to * * * promote the general welfare, and secure the blessings of liberty to ourselves and our posterity do ordain and establish this Constitution."

The welfare and liberty of the people, to my mind, are the two greatest principles and needs of our time.

In presenting this, my third report to my constituents, I wish to take this opportunity to express my gratefulness to the people of my district who thrice have elected and reelected me to this high office, each time by overwhelming majorities. I appreciate more than words can express this great outpouring of confidence and encouragement.

Now, for the fourth time in succession, the Democratic Party has unanimously designated me for another term of 2 years in Congress. Similarly, the Liberal Party, after reviewing my record in Congress, is supporting my candidacy for reelection, as it has done on previous occasions.

Many endorsements and commendations have come my way from leading national organizations, labor unions, civic groups, and others. Only a few of these can be mentioned in this brief space. The A.F. of L., the CIO, and the United Automobile Workers rated me as having a perfect score on selected vital issues in Congress, such as civil rights, labor laws, housing, price control, rent control, public power, control of commodity speculation, tidelands oil, foreign aid, reciprocal trade, social security and so forth. Railway Labor's Political League, the Railway Conductors, and the Seafarers International Union have endorsed my candidacy for reelection.

Letters of commendation have come voluntarily from the National Association for the Advancement of Colored People, the National Grange, National Woman's Party, Marine Corps Reserve Officers Association, American Veterans Committee, Veterans of Foreign Wars, Reserve Officers Association of the United States, American Chamber of Commerce for Trade With Italy, National Rural Electric Cooperative Association, Brotherhood of Maintenance of Way Employees, Brotherhood of Locomotive Firemen and Enginemen, National Federation of Federal Employees, American Federation of Government Employees, New York Federation of Post Office Clerks, and the National Association of Postal Supervisors.

The American Zionist Council voiced its gratitude for my efforts on behalf of Israel; the Welfare Council of New York City appreciated my help in defeating the amendment to limit the construction of public housing; and the Brooklyn chapter of the American Red Cross wrote:

"Your latest actions in our behalf merely serve to confirm our belief that you are making a valuable contribution to the well-being of all the people of Brooklyn and elsewhere by your efforts on our behalf."

Business and consumer groups likewise expressed their appreciation for my efforts and achievements in Congress. The National Association of Consumers thanked me "for your participation in the long and hard struggle during debate on the need for continuing the controls as provided in the Defense Production Act, especially those relating to price, credit, and rent controls. You are to be commended for your contribution." The Office of Price Stabilization appreciated help to that agency in its efforts on behalf of consumers, and the Small Defense Plants Administration for aid in furthering its program in behalf of small business. Other commendations were received from New York State Pharmaceutical Association, National Council of Salesmen's Organizations, Diamond Manufacturers and Importers Association, New York State Bowling Proprietors Association, and many other organizations.

FOREIGN AFFAIRS

For more than 2 years now our country, in conjunction with other members of the United Nations has been resisting Communist aggression in Korea and has resorted to all possible efforts to prevent this long, drawn-out conflict from developing into another and more destructive world conflagration. Our primary gain in Korea has been not only to stop communism in its tracks, but also to stop the march of communism elsewhere. Since the ill-fated aggression on Korea the masters of the Kremlin have made no attempts at open invasion of peaceful nations.

In Congress I have supported our foreign policy and our efforts to check Communist imperialism. We have attained a certain degree of success through such efforts as the Marshall plan and more recently through military and economic aid under our mutual security program. President Truman's point 4 program to aid underdeveloped areas is becoming more significant and is beginning to show concrete results. Many nations have been aided economically to get back on their feet. We have strengthened our ties with others, particularly in Latin America and Europe. Today, the free nations of the world are probably more united against the common enemy than ever before.

In addition to the steps mentioned, I have supported our own defense efforts so that we and our allies abroad should have the necessary weapons and be prepared to defend our people in the event of further Communist aggression. The security of this Nation is uppermost in our thinking and planning, and for this reason I wholeheartedly supported the appropriations required to meet our military and economic programs.

Specifically, I have urged that financial aid be withheld from those nations who participate in acts of aggressions; that a Joint Committee on International Economic Development be established to study the possibilities of development of backward areas; that we undertake steps to strengthen the United Nations and to seek to convert it into a world federation which would be able to preserve peace. It has always been my view that if the U.N. had been a stronger and more influential organization, the conflict in Korea could have been averted and the world would today be far advanced on the road toward genuine peace.

Other problems and issues within the sphere of foreign affairs which I supported are: Prohibiting the transfer of strategic materials to aggressor nations, extension of reciprocal-trade agreements, shipment of wheat to India to alleviate the famine in that country, contribution to the International Children's Emergency Fund, advocating the unification of Ireland, aid to the people of Italy in their efforts to preserve democracy in their country, approving the constitution of Puerto Rico granting the people of that country self-government, investigating the Katyn Forest massacre of Polish officers during the last war.

The Prime Minister of Italy presented to me an autographed picture of himself as a tribute to my efforts to help rid his land of communism.

On a number of occasions I protested the persecution of religious minorities, the violation of freedom of speech and of the press in Russia and its Communist satellites. I have directed attention to the Soviet technique of attracting minorities to its cause by pretending to aid them, only to suppress and crush them later. On April 10 of this year, I placed in the RECORD a lengthy document prepared by our Department of State showing how the Communist Government of Rumania is conducting an all-out campaign to destroy freedom.

My interventions and efforts to aid the State of Israel are a matter of record. I have not only voted for economic aid to Israel in 1951 and 1952, but I have exerted every effort within my power to establish cordial relations between Israel and the United States and to obtain this country's intercession to reach peace between Israel and the Arab States. Ever since the establishment of Israel, I have utilized the occasion of independence day to organize a "salute to Israel" on the floor of Congress in which many Members participate with appropriate addresses and greetings.

CIVIL RIGHTS

The question of safeguarding our civil liberties and reaffirming our civil rights has become one of the foremost problems of our time. Notwithstanding the hysteria of present day, I have always worked diligently in Congress for the principles of civil rights as they affect the entire population, and the minority groups in particular, such as Ne-

groes, Jews, Catholics, and so forth. I have opposed discrimination in employment and in housing; I fought against segregation in the armed services and for freedom in education.

While I am wholeheartedly in favor of eliminating subversive and disloyal individuals from public service, I am vigorously opposed to tactics which smack of thought-control, character assassination, guilt by association and other such totalitarian methods which we have come to recognize as "McCarthyism." These are not in the tradition of American democracy and, if continued, will do irreparable harm to this country, to its democratic institutions, and to the civil rights and liberties of the American people.

When Congress was considering a resolution to investigate philanthropic and educational foundations, I fought and voted against this resolution because I saw in it an attempt to censor and control the policies and objectives of these institutions. Among those to be investigated are listed the Rockefeller Foundation, Guggenheim Foundation, Carnegie Endowment, and the Rosenwald Fund, all of which have contributed greatly toward the education and improvement of the standard of living of minorities.

I have urged home rule for the disenfranchised people of Washington, statehood for Alaska and Hawaii, withholding of aid to National Guard organizations practicing discrimination, and elimination of restrictions in housing on the grounds of race, color, or creed. I have never hesitated to speak up for religious freedom, tolerance, brotherhood, and true understanding among the people of this great Nation.

PRICE CONTROL

To give my constituents a complete picture of the struggle I waged in the past 2 years to continue economic controls and check inflation would require a report several times the size of this item. As a member of the House Banking and Currency Committee—which is the committee that deals with legislation on economic controls—I was in the forefront of the struggle for price control, rent control, housing, wage stabilization, and credit control.

At all times during these lengthy conflicts both in committee and on the floor of problems and difficulties facing the average Congress, I was continually guided by the problems and difficulties facing the average American family in meeting its budget for food, shelter, clothing, and other necessities of life. That was uppermost in my mind, for it was clear that unless we adopt legislation to effectively halt soaring prices and the spiral of inflation, our entire economy would be ruined. Hardest hit of all are those of middle and low income, the workers, the professionals, and those of fixed incomes including those living on pensions.

Throughout 1951 and 1952, when the Defense Production Act was up for renewal and powerful forces sought to cripple controls or to eliminate them entirely, I spoke up in the interests of the consumer. Whenever possible, I sought to show the conspiracy against the consuming public on the part of profiteering and greedy elements. On June 12, 1951, I said:

"There is little doubt in my mind that there is a conspiracy afoot between the big packers, some of the feeders, and some of the cattlemen, to scare the consuming public into demanding a cessation of price control. As part of that conspiracy they will try to create beef shortages where actually there are none and there is no reason for any. We have more livestock today than the country has ever before produced."

In the ensuing weeks, when it became evident that the Republicans in Congress were not concerned with price control or inflation but were actually impeding every effort to establish effective controls in order to aid certain selfish interests, I stated on the House floor June 30, 1951:

"The Republican program this year as to how to control inflation starts with the promise of pay-as-you-go taxation; the action, Republican votes to defeat every item in the tax bill so you do not get enough taxes with which to pay for the expenses of Government. Next is the Republican promise to stop inflation by control of credits * * *; the action, Republican votes beat down the amendments to the Defense Production Act which seek to do that. Then they say control inflation by increased production because that will bring prices down. But prices continue to run away. So the Republican action on every vote * * * is to kill price control."

When the Republicans continued to emasculate controls through various crippling amendments, I again warned them that the consumer will not forget their action. On July 5, 1951, I said:

"If we are to have an effective control bill that is going to do any good and help save the economy of our country and beat down the forces of inflation, which all agree are just as vicious and just as bad as communism at its worst, we will have to have a control bill that will do equal justice to all with exemptions to none. We will have to put the national interest above the selfish interest. But the consumer is a small guy; he has no lobby here to come in and plead for him. We can kick him around. He speaks only on election day and you hope by election day of 1952 he will have forgotten how you mistreated him in 1951."

On occasion, when certain elements could not meet the arguments in defense of the consumers in the big cities, they resorted to name calling and threats. In defense of the good name of the people of New York, I refuted such tactics as follows—July 17, 1951:

"To those who continually make invidious reference to New York black marketeers, let me say that if their constituents were as law abiding, as cooperative, and as good citizens as the average New Yorker, we would have very little difficulty."

Finally, when it became evident that the 1951 control bill would be weak and practically ineffective, I frankly told the Members of Congress on July 19:

"I am taking this time to call the attention, not only of the Members of Congress but of the American public to this situation, so that they can wake up and know that unless this Congress wakes up we will have a Defense Production Act without any defense and without any production. We will have a control bill with no controls."

Some last minute changes were written into the bill which made it workable to some extent last year. When renewal of the act came up for consideration early this summer, a strenuous effort was made on the part of opponents of economic controls to kill the entire act or at least to eliminate price control, rent control, credit control, and other vital phases. Again and again I pleaded with the opposition not to terminate controls but to extend them for another full year. On June 19, 1952, I stated:

"The Banking and Currency Committee showed good judgment when they voted to extend the controls until June 30, 1953. We must play it safe as far as our economic stability is concerned. If the controls are extended for 12 months, and if the emergency should end in a shorter time, they can always be terminated by administrative or congressional action. On the other hand, if the emergency should still be with us a year from now, Congress would have adequate opportunity to consider further extension legislation."

I was highly dissatisfied with the final bill as adopted by Congress, I considered it an unenforcible bill with ineffective provisions. I stated then:

"I voted for the extension of the Defense Production Act most reluctantly. I do not think that it was a good bill, but I think it is better than having no controls at all. The rent-control provisions, for example, are, in my judgment, very weak. I also think that some of the price-control features, particularly the one relating to processed fruits and vegetables, are bad. The amendments affecting the wage-stabilization program are likewise far from perfect."

At every step of the way I sought to improve the act by introducing amendments and bills to aid the consumers in the struggle against soaring prices. Among the more important proposals were bills to create a select committee to study consumer interests; to protect the Nation's economy against inflationary pressures; to provide for fuel allocations and priorities during emergencies; to appoint business advisory committees; to repeal the Capehart amendments, and so forth.

RENT CONTROL AND HOUSING

As already indicated, I fought consistently for effective rent control, which is so vital to the maintenance of our standard of living for millions of Americans. The danger of any relaxation of rent control is especially great in the large metropolitan areas where a difficult situation would follow. It has always been my view, ever since I became a Member of Congress, that the fight against exorbitant rents must be continued with ample protection, however, to the landlords to assure them a fair return. I fought against every attempt to lift rent control in various areas, particularly in critical defense-housing areas. In the latter case I argued as follows on June 26 of this year.

"In these critical areas the Federal Government—not the local government—is responsible for the acute housing situation and the pressure on rents. The Federal Government has established the military installations and has directed the men to be stationed at these installations. The construction and expansion of defense production plants are the direct effect of defense orders which the Federal Government has placed. For these reasons, the Federal Government has a responsibility which it cannot evade—to provide protection to servicemen and defense workers against exorbitant rents."

Similarly, I have urged the adoption of legislation calling for slum clearance and the construction of federally assisted low-cost and middle-income housing, as well as cooperative housing projects to alleviate the urgent need for adequate housing. In support of such legislation I stated on August 14, 1951:

"Under this bill, we will have no more slums * * *. In every community that needs housing that does not have the finances to build community facilities, this bill will give private free enterprise the opportunity to create private housing. The bill will also provide the community facilities without which the housing is uninhabitable. * * * You thereby help these communities to build up in the American way, under the American standard of living, and we will have no more slums, and we will have no insanitary conditions."

The most difficult struggle encountered by the forces fighting for adequate housing was the move instigated by the real-estate lobby which attempted to cut the number of public-housing units to be constructed per year from 50,000 to a mere 5,000 units. During the debate on this question, I spoke up frequently in support of 50,000 units and also read to the Members of Congress a telegram addressed to me by the mayor of New York

describing how the proposed cut would seriously hurt the housing situation in New York. On March 19, 1952, I said:

"May I remind you that originally the law provided for the starting of not more than 135,000 units of public housing each year. Then we cut that to 75,000 units per year * * *. Last year we cut it to 50,000 units per year. Now this distinguished committee recommends that you cut it to 25,000 units per year."

Actually, however, it proved to be even worse, since an amendment was introduced on the floor of the Congress to reduce the number of units to 5,000. When that amendment came up for discussion and the vote the next day I said:

"What you are going to do if you adopt the amendment offered by the gentleman from Texas [Mr. FISHER] to cut this to 5,000 units * * * is to make worthless millions of dollars of investments of cities and States throughout the country. I tell you that you are making a very serious mistake if you do not go along with this project, at least to the limited extent of 50,000 units per year. * * * If you want to do the right thing by your constituents, if you want to do the right thing by those people who cannot help themselves, if you want to eliminate delinquency and crime among the low-income groups, give them a decent place in which to live, give them a place where they can bring up their children in some sort of decent fashion, so that they may realize the ambition of every American to attain the standard of living that we recognize as the very minimum."

LABOR AND SOCIAL SECURITY

My opposition to antilabor laws and my efforts for improved labor legislation have been duly acknowledged by the A.F. of L., the CIO, and other sections of organized labor. I look forward to determined action in the Eighty-third Congress for better labor laws and I shall give my utmost support to achieve this goal.

In the field of labor relations, I opposed the Lucas amendment which sought to abolish the Wage Stabilization Board or reduce its effectiveness by taking away from the Board its emergency labor-disputes powers assigned to it by the President. The amendment which aimed to strip the Board of its power in 1951 was rejected by Congress, but a new and more successful attempt to destroy the WSB was made this year.

What brought it on was the prolonged steel-industry dispute which sharply divided opinions on such matters as the legality of the wage-dispute functions of the WSB, the invoking of an injunction against the union, proposals to submit labor unions to the provisions of the antitrust laws, and other matters. In arguing against changing the equal tripartite structure of the WSB, I stated on the House floor on June 20:

"If you adopt the Lucas amendment as it is given to you now, when you put more public members on the Board than labor and management together, you will still have the public members controlling and giving a decision just as they did in the steel dispute case * * * The Wage Stabilization Board made the recommendation that the union-shop clause should be part of the contract. Who started this cry of 'kill the umpire'? The steel mill owners and managers who lost the decision."

Several days later, on June 25, when Congress was considering a request to the President to invoke the Taft-Hartley law in the steel dispute, I said:

"The Congress is not enacting fair and effective legislation. It is not any legislation if it adopts this amendment to the Defense Production Act by which you will send the President a letter telling him to use a law which you and I know is not going to produce steel and is not going to get the men back to work.

"For reasons of fairness, practicality, and effectiveness, the Taft-Hartley Act does not provide the answer to the present steel dispute. What is needed is authority for the Government to operate the steel mills until a settlement is reached."

In the end, Congress retained the tripartite structure of the WSB, but it took away the Board's jurisdiction over the union-shop issue and instituted other unjustifiable changes. This may result in much difficulty in settling labor disputes in the future.

Just as I worked for and voted in 1950 to broaden the Social Security Act to include 10 million additional people, so this year I wholeheartedly supported the bill to increase social security benefits. The increase goes into effect as of October 1, 1952, and every beneficiary will receive at least $5 or more additional in his monthly check. I shall continue to work toward the goal whereby the entire adult population will be entitled to such benefits upon reaching the statutory age.

Among other measures in this field I sponsored a bill to provide equal pay for equal work for women, a bill to amend the Social Security Act to increase the amount of outside earnings to $80 per month (this Congress increased the sum to $75); I supported an increase in the pension to retired railway employees and an increase in unemployment insurance benefits.

NATIONAL ECONOMY AND TAXES

During the fiscal year 1951–52 Congress appropriated about $50 billion for defense, while in the current year some $60 billion have been designated for that purpose. They are unquestionably tremendous sums. They constitute about three-fourths of our national budget. Unfortunately, we have no other recourse, since the security of our Nation comes before everything else. In order not to invite national disaster, our defenses must be strengthened and made ready for any eventuality.

This huge budget is met through taxation which serves a double purpose: Taxes help to pay the expenditures of our defense program and operations of the Government, and they also serve to keep inflation in check. There is not a Member of Congress who would not like to see the day come soon when taxes can be appreciably reduced and all controls abolished—and I am among them—but I would not like to see it done at the price of ruin to our national economy resulting from runaway inflation.

At the present time, we can only hope for equalization of the tax burden whereby that burden should be taken off the shoulders of the low-income groups and placed upon the middle and higher income groups and big business. In the past, I advocated repeal of excise taxes because they affect primarily the small wage earner; I supported an excess-profits tax directed chiefly against profiteering on the part of the greedy.

More recently, I have urged tax exemptions for members of the Armed Forces who are serving outside the United States, deductions for expenses in connection with education of children, increasing the exemption to $3,500 for heads of families and $2,500 for single persons, granting exemptions to persons living on retirement pensions and annuities, and other proposals.

In connection with strengthening the national economy, I took an active interest in aiding small business in order to keep it alive and operating during this period of our dislocated economy. In February 1951, I was appointed as a member of a Select Committee To Conduct a Study and Investigation of the Problems of Small Business. This congressional committee conducted hearings throughout the country and made a number of important recommendations to aid small business by extending to it a share of the defense work and through the establishment of the Small Defense Plants Administration to cope with this problem.

IMMIGRATION

It has always been my view that one of the major reasons for this country's growth and development was its liberal policy on immigration which enabled the homeless and the persecuted to come to these blessed shores and help to build our country. In Congress, I have always favored the continuation of such a policy. Consequently, I worked ardently for passage of the Displaced Persons Act in 1948 under which more than 300,000 DP's entered the United States. When that act was about to expire in 1951, I urged that all DP's who had filed for admission to this country before the expiration date of June 30, 1951, should be granted the opportunity to come here notwithstanding the fact that the law will have expired. This was subsequently accomplished by enactment of a 6 month extension.

It was not so simple, however, in the case of the McCarran Immigration Act which was passed by Congress this year. I did my utmost to fight this discriminatory measure, but the anti-immigration forces were too strong. When the bill was under discussion in the House, I stated on April 23:

"I do not know whether my father and mother came here because somebody gave them the exalted right or the exalted privilege to come here, but I do know that most of us would not be here today if their forebears had not had the absolute right to come here before the time that some Congress wrote into this Nation's law that provision making it only an exalted privilege. * * * If you look at the bill and try to determine where the merit or lack of merit lies, you will find there is discrimination written all through the bill."

That bill was, as is well known, approved by overwhelming majorities in both Houses of Congress, and then the President's veto of the measure was overridden to make it the law of the land. I hope that a strong effort will be made in the 83d Congress to eliminate the discriminatory and racist sections of this law.

VETERANS' AFFAIRS

In casting my votes on veterans' legislation I have always tried to preserve the best interests of the men who answered the call of their country. They and their families are entitled to certain rights and privileges which must be respected and preserved.

The most important legislative measure containing benefits to veterans to come out of Congress this year was the GI bill for veterans of the Korean conflict, who were granted medical, educational, housing, training, and other benefits similar to those extended to World War II veterans. I supported this measure, as well as other bills calling for pension and compensation benefits for disabled veterans and their dependents and pay increases to servicemen to meet the cost of living.

At the same time, I sponsored various bills of interest to veterans, such as to provide free postage for members of the Armed Forces; to amend the Housing Act of 1950 to permit veterans to use guaranteed housing loans to $7,500; to provide that pension, compensation, and retirement pay be paid during active service, such amount being deducted from active-service pay.

I joined with the entire Brooklyn congressional delegation to prevent the Veterans' Administration from removing its regional office from Brooklyn. When the same threat came up a second time during the summer of 1951, I introduced a bill to prohibit the Veterans' Administration Administrator from transferring any offices or making extensive

reductions in the Veterans' Administration staff until 60 days after giving notice to Congress.

In recognition of my services on behalf of veterans, I was given two awards by veterans' organizations, which I shall always cherish. The Raymond Lupin Memorial Post of the American Legion in Brooklyn elected me an honorary patron in 1951. The Brooklyn chapter of Disabled American Veterans presented me with a certificate of merit for outstanding accomplishments in promoting legislation for disabled veterans.

MISCELLANEOUS MATTERS

The defense of the rights of minorities in various countries where they are persecuted as such has always been of deep concern to me. On numerous occasions I brought to the attention of Congress the plight of the Jews in the Soviet Union and in the Communist satellite countries where Jewish religious and cultural life is being exterminated and Jews are not permitted to emigrate to Israel. Similarly, I have vigorously protested the resurgence of nazism in Germany and our failure to denazify the Germans. I have been as alert in protesting the plight of persecuted Catholics in various countries.

On January 30, 1951, I described to the Members of Congress the anti-Jewish policy of persecution adopted by Communist Hungary. I said:

"Anti-Semitism is rampant in Hungary, the Jews and other religious minorities are regarded with suspicion because they look to America and the West as their last hope for eventual freedom."

I have similarly urged the House Foreign Affairs Committee to appoint a bipartisan commission to investigate our failure to stamp out nazism in Germany and to eliminate anti-Semitism there. I told the committee:

"Large sections of our population today are distrustful of Germany. They fear we may be building up a new Frankenstein that may someday come back to plague us."

Not only has the violation of human rights abroad concerned me, but I am equally interested in the efforts to combat prejudice and anti-Semitism in this country. I have urged interfaith understanding and true brotherhood as a means of combating such misconduct. Rabblerousers in this country have for some time been spreading the lie that one of our Founding Fathers of this Republic, Benjamin Franklin, disliked the Jews and criticized them. The story was a forgery and an insult to the memory of this venerated American. To establish its falsity, I inserted in the CONGRESSIONAL RECORD a document showing how Franklin headed a drive to clear the debt of a Jewish synagogue in Philadelphia in 1788.

As a result of my efforts, for the first time since the establishment of the Military Academy at West Point and the Naval Academy at Annapolis, Jewish chaplains have been assigned to each Academy on a full-time basis to minister to the boys of their faith, who are in attendance there as cadets and midshipmen.

One of the projects, of which I am most proud, was my part in obtaining the consent of our great President, Harry S. Truman, to lend his name to the establishment of a village in Israel, known as Kfar Truman.

The village was dedicated to him at a dinner tendered by the Jewish National Fund to the President in Washington, D.C., on May 26, 1952, attended by outstanding personalities from every walk of life and every part of the country. The speakers on that historic occasion included the Vice President of the United States, the Ambassador of Israel, Dr. Harris J. Levine, president of the Jewish National Fund, and your humble servant. President Truman's response was beautiful and inspiring.

Other issues which were of interest to significant segments of our population were considered by the 82d Congress. Where the idea was of a constructive and beneficial nature, I worked assiduously for its enactment; where it was, in my opinion, detrimental to the interests of the Nation, I opposed it vigorously.

Time and again I urged upon Congress to increase the pay of Federal and postal employees. They are loyal and efficient workers. I opposed cutting their annual leave and sick-leave benefits. I also protested on several occasions as false economy the curtailment of the postal service and I introduced a bill to reestablish the service to its previous status.

In the realm of Government reorganization, I supported the various reorganization plans to make the executive departments more efficient, including such plans as reorganization of the Bureau of Internal Revenue, revision of our military reserves, reorganization of the Reconstruction Finance Corporation and others.

I opposed the tidelands oil bill which aimed to give away to a few States the offshore oil deposits estimated to be valued at about $40 billion. This is the property of the country as a whole and all the people should benefit from it.

In the field of health and welfare, I favored aid for local and State development of public-health units, the extension of grants to States for public assistance, and flood relief for people in the stricken areas.

Other bills which I introduced were to provide a uniform national system of automobile registration; to amend the Tariff Act by stabilizing import duties to encourage international trade relations; for negotiation of a treaty for the defense of the Mediterranean area; to establish a memorial honoring the contribution to American military and naval history by all religious faiths, and many others.

I introduced a number of private bills to aid individuals where the circumstances merited such aid. In other instances I did all possible to help those of my constituents who called upon me for assistance of one sort or another. I never failed to try to help them, even though my efforts have not always been successful.

CONCLUSION

My record in Congress is an open book, which I modestly, yet proudly, present to the people of my district. They have been kind to me in permitting me to serve them in the highest legislative Chamber of the Nation. I have tried to show here how I have fulfilled their trust in me, realizing at all times that "public office is a public trust."

The exigencies of our time are so great that we must not lessen our efforts to defend human liberty and preserve our free institutions. The free nations of the world must stand united in their common effort to uphold the highest ideals of mankind and to maintain our way of life. Our people are on the threshold of great decisions. With the help of Almighty God, we shall decide wisely and go forward to a better day of peace and tranquillity for all mankind.

SO THE TIME FOR A CHANGE ARRIVED, AND CREEPING SOCIALISM BECAME THE BIG GIVEAWAY WHILE THE LITTLE FELLOW LOST HIS SHIRT

(Remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Monday, Aug. 3, 1953)

Mr. MULTER. Mr. Speaker, this is the true story—I wish it were a fairy tale—of an America grown up—but not wiser.

If what follows sounds political, believe me it is intentionally so. After all, politics, according to all lexicographers, is the science of government and this saga deals only with government—your Government.

If it sounds partisan it is so only because the members of the opposite political faith have slanted the record that way by their actions.

If what I say hurts, it is only because the sponsors of inimical policies have failed to provide any armor against the cruelties inherent therein.

With such brief apologia, let me proceed to tell this tale of woe.

For 20 years almost every attempt by Democratic leaders and legislators to improve the conditions of our country and to establish world peace and to expand man's divine right of equal opportunity to earn a livelihood with a decent standard of living, has been ridiculed, derided and opposed by members of the Republican Party. In all those years there was little or no constructive criticism. There was much carping and bitterness as phony labels were sought to be attached to every progressive step that was taken to benefit the citizenry of our country.

Home loans, farm loans, small business assistance, housing and power, rural electrification and telephones, soil conservation and flood control, farm subsidies and fuel regution, savings programs and bank deposit insurance, development of natural resources for the benefit of all, social security and unemployment insurance, protection of the right to work, improvement of the lot of the civil servant, protection of the veteran, particularly the maimed and disabled, assistance to the orphan, the widow and the helpless, aids to health, education, and the public welfare were all labeled creeping socialism and worse.

Only in the field of foreign policy was there any semblance of bipartisan cooperation for the best interests of the country. Even there it was only agreement on principle. Despite the fact that a Democratic administration sought and obtained only the best available men, regardless of political affiliation (thus putting as many Republicans as Democrats in charge of administration) the sniping never abated.

We were told:

Time for a change—stop the monster from creeping further into the Nation's vitals—drive it out—return the country to free enterprise—stop inflation—bring prices down—produce more—pay less—get more—balance the budget—cut expenditures—reduce taxes.

Repetition had its effect. Even those who knew better, began to succumb to the never-ending stream of propaganda.

At the psychologically correct moment the knight in shining armor appeared on the scene, a truly great soldier, deservedly honored as a world hero. When he, unacquainted with the ways of politics, but in the best of faith and intentions, began to sing the same song, the melody was indeed sweet and the words most beguiling.

Logic and reason took flight. Fantasy and wishful thinking wafted many into the land of make-believe. What could we lose? Is a Republican mink coat—or is it sable—different from the Democratic one? Is it not time for a change? Few asked: A change to what or why or for whom? After all—we can always change back. Nor did they stop long enough to inquire: If the change should be for the worse, can we regain our losses?

Election day, 1952, came and with it the first change as the people willed it. A Republican President and a Republican Congress.

Eureka but not yet utopia.

Democrats, who for 20 years winced under the tongue lashing of the Republicans remembered the Biblical injunction to do unto others as you would have them do unto you.

Like good American citizens, they bowed to the will of the majority.

They promised cooperation. They announced there would be only constructive criticism, no sniping, no backbiting, no invectives.

Came January 3, 1953, and the new Congress was sworn in and organized. They listened politely but impatiently and indifferently to the outgoing President. They waited for Inauguration Day.

Came Inauguration Day, January 20, 1953, and they listened fearfully but enthusiastically to the incoming President. And again they waited.

Be not impatient. Give them time. Give them a chance.

Time passed. And they acted—both the new President and the new Congress. Things happened. Not too much and certainly, not too good.

Now as the 1st session of the 83d Congress comes to a close this fine summer day, August 3, 1953, would it be unfair if I stated the account, totaled the "do's" and the "don'ts," the "gives" and the "takes" and tried to get a balance—knowing full well that there will be little balance left for our fellow citizens.

Here goes:

Promise: A balanced budget.

Performance: More unbalanced than when the Republicans took over.

Promise: Spend less.

Performance: Spent more with an increase in future fixed charges of government.

Promise: Reduce taxes.

Performance: Increased by extending taxes due to expire.

Promise: A stabilized economy by reduction of prices and cost of living.

Performance: Higher prices to the consumer, higher costs to the home buyer, higher rents to the tenant and lower prices to the farmer.

Promise: Reduce the national debt.

Performance: An attempt to increase it, prevented by an almost solid Democratic opposition in the Senate. It passed the House with 84 percent of the Republicans voting for it and 61 percent of the Democrats opposed.

Promise: A new foreign policy. Precisely what changes we were to expect we were never told.

Performance: Absolutely no change in policy. The change in administration, however, is driving our friends and allies further and further away from us.

Promise: A new farm policy.

Performance: No change in policy. A change in administration that has antagonized the farmer who has voted 10 to 1 to continue the old policy.

Promise: A new tax program.

Performance: None presented. The only change is the reduction in individual income taxes effective January 1954, pursuant to a law enacted by the last Democratic Congress and signed by the last Democratic President. However, Mr. Taxpayer, do not spend that saving. The next session of this Republican Congress may take it away from you. They are even now threatening us with a Federal sales tax.

Promise: The Republican Party promised to keep the Taft-Hartley labor law intact. The Republican candidate for President said he recognized its inequities and promised amendment.

Performance: No change in that law.

Promise: Statehood for Hawaii and Alaska.

Performance: Nothing.

Promise: A change in our permanent immigration laws to liberalize them and remove the inequities and unfairness thereof.

Performance: No change. The temporary Refugee Immigration Act to admit 217,000 immigrants over a 3-year period was part of the Democratic program and was enacted only because of Democratic support.

Promise: To conserve the natural resources of the Nation.

Performance: Submerged oil lands given away. This was promised by the Republican candidate and he was supported by southern Democrats who campaigned for reelection on that pledge. Public power, TVA, AEC, and soil conservation programs gutted. Rubber plants ordered sold, RFC assets, including defense plants, ordered disposed of.

Promise: Encouragment and improvement of health and education programs.

Performance: Cutting the budgets for these programs.

Promise: A comprehensive civil-rights program.

Performance: Nothing.

Changes that we got even though not promised:

First. Hard money, that is, money that is harder to get.

Second. Higher interest rates on Government bonds, thus increasing the cost of Government and the burden of the taxpayer; higher rates on mortgages; higher rates on consumer's financing; higher rates on veteran's loans; higher rates on business loans; higher rates on State and municipal loans; higher rates on farmer's loans; higher rates on auto loans.

Third. Depreciation of Government bonds, some are selling as low as 92 cents on the dollar.

Fourth. Destruction of the public-housing program.

Fifth. Impairment of the morale of civil service employees by Executive orders emasculating the merit system.

Sixth. Decrease in veterans' benefits.

In sharp contrast to all of the foregoing is the conduct of the responsible Democratic Members of the Congress.

They offered bills to implement their party platform. They could get no hearings from committees controlled by the majority party.

They offered bills and amendments to bills to effectuate the President's program to the extent that it coincided with the Democratic program.

The press, time after time, referred to the passage of such bills as "Eisenhower victories." Actually they were part and parcel of the Democratic platform. They could never have been enacted without Democratic votes. In most instances there were more Democrats than Republicans voting for those measures.

Notable among these measures were, first, extension of the President's power to reorganize the executive departments—if he does not economize in that field, the responsibility is solely his; second, establishment of the Cabinet post of Health, Education, and Welfare; third, rejection of the cut in funds for REA; fourth, prevention of the weakening of civil service; fifth, rejection of cut in funds for soil conservation; sixth, restoration of funds for aid to schools; seventh, continuance of a nonpolitical Tariff Commission; eighth, extension of Reciprocal Trade Agreements Authority; ninth, prohibiting arbitrary denial of medical care to veterans; tenth, authorization and appropriation of moneys for foreign aid; eleventh, extension of the mutual-security program; twelfth, gift of wheat to starving Pakistanians; thirteenth, admission of 217,000 immigrants over 3-year period.

That is the record to date.

Even if President Eisenhower should not acknowledge that his program could never have been enacted without Democratic votes, we in the Democratic Party will continue to vote for what we believe is in the best interests of our country.

In the not too distant future, the electorate will have an opportunity to voice its approval or disapproval of the changes it got and of the changes it did not get.

Until then, we will do our duty as we see it—let the chips fall where they may.

To Secure These Rights the Fight Must Go On

(Extension of remarks of Hon. Abraham J. Multer, of New York, in the House of Representatives, Thursday, August 19, 1954)

Mr. Multer. Mr. Speaker, at the close of the first session of this Congress, on August 3, 1953, I reviewed for my constituents the accomplishments, and lack thereof, of our distinguished body. I pointed out the great divergence between the pledges and promises by the Republican Party and its presidential candidate in 1952 and their performance or lack thereof as the majority party in power in 1953.

Another legislative year has now gone by. It is time again to take a look. Perhaps not a new look, but certainly a good look, even though we know it will not look good. I intend today to reverse the usual form of stating first the facts and then the conclusion.

CONCLUSION

When the 80th Congress was dubbed the worst Congress of history, our contemporaries overlooked that worse than a "do-nothing Congress" is a Congress that does nothing but gives away the birthright of a nation.

The 83d Congress and this Republican administration have earned the right to be charged with doing nothing but giving away the people's rights and property.

The balance of this report will be devoted to documentation of the foregoing conclusion.

HUMAN RIGHTS

This is an excellent time to refresh our memories with a quotation from our Declaration of Independence of these immortal words:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their health and happiness."

Those principles have been written into our Constitution as rights accorded to our citizens, and with restrictions against any impairment by executive, judicial, or legislative action.

If they are to be changed, that change can be accomplished only by constitutional amendment.

Nevertheless, we have seen during these last 2 years, a complete disregard of those basic concepts.

Fear runs wild, and hysteria has taken over.

Laws have been enacted in violation of article I of the Constitution, prohibiting ex post facto laws and bills of attainder.

Laws and executive orders violative of the Bill of Rights, as contained in our Constitution, have been enacted and promulgated.

I have done my best to resist such utterly un-American conduct, first, because it is fundamentally wrong and second, because it strengthens our enemies and weakens our will to withstand their totalitarian philosophy.

I favor the right, under safeguard of court order or search warrant, to obtain evidence, even by wiretapping, to convict criminals. I opposed the bill to give the right to use

such evidence previously obtained without court order or search warrant.

I favor empowering the courts to require witnesses to testify in criminal proceedings by granting them immunity where otherwise some other criminal might escape trial. I oppose giving that right to Congress, because Congress is a legislative body and not a court. Congress is supposed to investigate solely for the purpose of legislating; it is not the FBI; it is not a grand jury; it is not a petty jury; it is not a judge; it is not a prosecutor; it is not a President with power to pardon. No legislative body in our entire American history has ever been blocked from legislating because a witness or group of witnesses refused to testify.

The best evidence that I am correct in that statement is that despite witnesses who have refused to testify about communism, the Congress has, nevertheless, enacted a law finding that the Communist Party is not a political party but a criminal conspiracy.

I agree with the finding, but urged that the law was a very bad one because it usurps the function of the judiciary.

The bill to outlaw the Community Party violates every principle of good government. Aside from being a bill of attainder and an ex post facto law, it denies not only free speech but free thought; it denies the right of assembly and the right of petition for redress of wrongs. It is a completely totalitarian technique.

The manner in which these bills were foisted upon the Congress was even worse. Not only was gag rule imposed by limitation of debate, but they were brought before the House without having had adequate hearings, without reports for guidance of the Members, without copies of the bills, and under rules permitting no amendments.

That is the horribly terrifying manner in which a heretofore deliberative body struck down our liberties and impaired our freedom by pushing through in the closing days of this session bills which do violence to the things for which men and women have fought and died since before Magna Carta.

I attribute these bad bills to what has come to be known as McCarthyism. Those who contend that McCarthyism has alerted the country to the danger of communism must now concede that the direct result has been the creation of an unhealthy atmosphere of fear and suspicion which may easily destroy the very vitals of good government.

LIBERALISM VERSUS CONSERVATISM

Our President has repeatedly told us that as to human values and human rights, he is liberal, but as to property and property rights, he is conservative. It sounds good. I wish it were true. I will not repeat here the many failures of President Eisenhower to perform the pledges of candidate Eisenhower. They have been previously documented. Let us today analyze what has happened under our President's leadership and thereby make apparent his and the Republican Party's fulfillment of the converse of his declared policy.

OPERATION GIVEAWAY, OR BUNDLES FOR BILLIONAIRES

The gift of the submerged-oil lands was camouflaged as a return to certain States of their property. You cannot return to a State what it never had. The U.S. Supreme Court three times ruled that these lands and rights never belonged to any State. As a matter of fact, most of them were bought with funds from the U.S. Treasury.

If Congress and the President had not given them away for the benefit of the big oil companies and not the few States involved as is claimed, the revenues from those lands would have been used to educate the children of every State of the Union.

OUR NATIONAL RESOURCES: CREEPING FAVORITISM

The Nation's resources have been the subject of a whole series of gigantic giveaways, beginning with the offshore oil bill endorsed by President Eisenhower.

Perhaps the most incredible giveaway of all, deals with atomic energy. The people of the country have spent $12 billion of their tax money in developing an atomic-energy program. The Eisenhower administration and the Republican-controlled Congress, however, chose to set the wheels in motion for giving away the rights to atomic energy to the few private power monopolies. The most fantastic Republican proposition was the Dixon-Yates contract whereby a certain private group was granted contract rights to provide power without competitive bidding; it was arbitrarily selected for the benefit, although other firms offered to do the job more cheaply. The Eisenhower administration even offered to pay all their taxes for them and guarantee them against any loss. I am proud of my vote against the atomic energy giveaway.

The efforts to dispose of our synthetic-rubber and tin-smelting plants and the attempt to wreck TVA and our entire public power program, are more of the giveaway philosophy in action.

MONEY: HARDER TO GET

I spent considerable time and effort in opposing the Republican giveaway to bankers through higher interest rates. The so-called hard-money policy actually made money harder to get. Republican bankers took over the Treasury Department and promptly proceeded to raise the interest rate to the highest level since 1933. They sold Government bonds below par value to bankers who profited immensely from unnecessarily higher interest rates. I joined with other Members of Congress in protesting this giveaway to bankers, and my remarks in the CONGRESSIONAL RECORD are quite numerous on this subject.

Not only did this hard-money policy constitute excessive profit for bankers, but it was perhaps the principal cause of the recession we have had. With interest rates excessively high, consumers and small businessmen could not borrow money. As a result, mass unemployment occurred, causing a serious recession because of a lack of consumer purchasing power to buy the products of American industry.

The Eisenhower administration was disastrously slow in taking action against this recession; indeed, we still have close to 4 million Americans unemployed, with many more in jobs at only part time. Because of our constant pounding, the administration finally reversed itself and repudiated the hard-money policy, although its evil effects are regrettably still with us.

Call me a prophet of gloom, Mr. President. But it is your Secretary of Commerce who says that the gross national production is down $9 billion from 1953 to 1954, and it is your Federal Reserve Board that says that industrial production is down $12 billion from 1953 to 1954.

VETERANS' RIGHTS

Part of the liberal Republican policies was the increase of interest rates on veterans' mortgages. This was among the very first accomplishments of this administration.

As soon as we achieved a reversal of the hard-money policy, I started a campaign to decrease the veterans' loan interest rates to what they had been.

The chairman of the Veterans' Affairs Committee, on the floor of the House, promised me such legislation would be enacted.

It has not even been reported to the Congress.

We did succeed in enacting a bill to increase veteran's pensions by 5 percent. Liberal, indeed. A monthly pension of $50 is now $52.50.

But all veterans' services—medical care, hospitalization, and the like—have been cut and cut more than 5 percent.

That was not being illiberal as to humans; it was being conservative as to money.

I have consistently supported measures to adequately compensate our Armed Forces and veterans for the sacrifices they make in the Nation's behalf. I have introduced bills providing free postage on letters to and from members of our Armed Forces, extra compensation for prisoners of the Korean war, income tax exemption for members of the Armed Forces, and various adjustments to secure equitable pensions, compensation, and retirement pay.

THE CONSUMER'S POCKETBOOK AND THE FARMERS' PLIGHT

During these 2 years of Republicanism, the cost of living has reached an alltime high, as any shopper can testify and as Government statistics prove in black and white. Coupled with this record high cost of living have been the hardships caused by the recession, so that many millions of Americans have suffered reductions in their standard of living.

Particularly pernicious has been the price of food. Consumers are forced to pay twice for their food, first in their tax bill to the Government and then in the marketplace. There is something radically wrong with the present agricultural program, as I have often said in Congress. Official reports show that food prices to the consumer have actually risen, while prices to farmers have declined.

Yet the Republican leadership has done nothing to remedy this situation. The only solution the Secretary of Agriculture offers is to reduce farmers' incomes below their present level, despite his claim that no appreciable reduction in consumer food prices will result. The proposal I have made is to try the Brannan plan for all agriculture, which candidate Eisenhower termed "moral bankruptcy," but which President Eisenhower has instituted for the wool industry.

The President and his agriculture experts pretend that a flexible price support program will reduce prices to the consumer and increase income to the farmer.

They continue in that fallacious claim even after they have proved themselves wrong.

We have never had rigid but only flexible price supports for the dairy industry.

One of the first things done by our Secretary of Agriculture, with the hearty approval of our President, was to drop price supports for this industry from 90 percent of parity to 75 percent.

Result: The farmer is getting less and the consumer is paying more.

That is not caused by any failure of the cut in prices to seep through.

I am talking about milk produced one day and sold the next day for which the farmer receives less and the consumer pays more.

How can they urge that any different result can come from products that will be stored for long periods of time?

Do not be fooled by any pretense that we will store less of the staples or basic commodities.

On the basis of the representations of the President and his Secretary of Agriculture that we will store more, this very session of Congress increased the buying, lending, and storing authority of the President and his Department of Agriculture from $6½ billion to $10 billion. That is in addition

to all the billions to be taken out of storage and not charged to the authorization.

LABOR AND UNEMPLOYMENT

One of the most important Republican pledges was amendment of the Taft-Hartley law. I favored the elimination of the Taft-Hartley Act's repressive measures against organized labor. I have always sought to promote legislation fair to labor and management.

But, as you may remember, President Eisenhower reversed himself when he refused to go along with the Secretary of Labor Durkin's program for labor legislation, which followed Candidate Eisenhower's promises. Mr. Durkin resigned. The Republican leadership did not allow Congress to pass on the bills seeking to right the wrongs of the Taft-Hartley Act.

I sponsored a number of bills in the labor field, but as usual the Republican leadership did nothing. One called for equal pay for equal work and an end to discriminatory wage practices against women. Still another case where the Republicans did nothing was the minimum wage. My bill called for an increase in the minimum wage from 75 cents to $1 an hour. Secretary of Labor Mitchell agreed there should be an increase, but President Eisenhower's Economic Report flatly opposed one.

The most serious problems in this field is that apparently the Republican Party is not concerned over the tremendous loss of earnings of the wage earners of our country. I have called attention to the millions of Americans without jobs, largely due to the administration's hard-money policy, and to the millions more earning smaller wages and working only part time.

In the present Congress, I have been a cosponsor of H.R. 9430, the Forand bill, dealing with unemployment-compensation standards. I introduced H.R. 1270 to permit an increase in earnings without loss of social security benefits. My bill, H.R. 1277, called for income-tax exemption on annuities and pensions, a principle adopted in part in the new tax law.

This administration takes credit for enactment of a broader social-security law, but soft-pedals the fact that this was a New Deal-Fair Deal measure that was supported and fought for by Democrats during all the years Republicans were resisting it as creeping socialism.

PUBLIC HEALTH AND HOUSING

I have always insisted that effective Government action must be taken to improve the national health. Proper medical care must be put within the reach of every American. It is a duty of the Government to assure that and to do it without socializing medicine.

Yet the Eisenhower budget cut cancer research 28 percent, heart disease research 33 percent, and the National Institutes of Health allotment 34 percent.

The so-called health reinsurance bill, the administration proposed, merely came to the aid of certain insurance companies, and did nothing for the health of the individual American man, woman, and child. The only public health in the bill was in its title. It made neither health nor insurance available to any citizen.

A similar situation was the Republican housing bill, which I called "a sham and a fraud upon the American people." I have long maintained a particular interest in public housing, and the CONGRESSIONAL RECORD is replete with my attempts to try to provide decent housing for all Americans. I proposed amendments to legislation to deal with FHA abuses, but Republicans joined as a unit to vote them down, as they did my efforts to prevent discrimination against minority groups and to provide low interest rates on housing loans and veterans' home loans.

However, the Republican leadership insisted on guaranteeing excessive profits for builders and lenders and blocked my efforts and those of my colleagues to write into law even the minimum number of public-housing units requested by the President.

Here too, the only public housing in the bill was in the title. I think it is outrageous that the people of this country should be denied an opportunity to live in decent shelter.

The so-called housing bill passed this year prevents any new public housing and effectually kills the program. The same bill, however, makes it easier for the bankers, mortgage lenders, and builders to get richer. It contains no real safeguards against a repetition of the FHA scandals now filling the newspapers. It does contain a provision subsidizing the mortgage lenders, guaranteeing them not only against loss, but also a profit, all at Government risk.

FOREIGN AFFAIRS: BEWITCHED, BOTHERED, AND BEWILDERED

The present world situation is one of crisis, and I have wholeheartedly supported the administration's continuation of the bipartisan policies initiated by prior Democratic administrations, including the point 4 program and foreign aid. I have urged the strengthening of our greatest potential instrument for peace, the United Nations.

Our position in world affairs, however, has worsened markedly under Republican leadership. World communism has increased, and we have lost much of the good will painstakingly built up by Democratic administrations with the non-Communist nations of the world. The present administration has cut our military strength and has foolishly tried to compensate for it by a series of transparently hypocritical slogans.

No one knows where we stand on anything. If you add up all the pronouncements made by the President, the Vice President, the Secretary of State, and assorted Republican leaders, the sum total is bluff and backtalk, threat and retreat.

If the matter were not so very serious, we could sing "Bewitched, Bothered, and Bewildered." We have learned a bitter lesson that Indochina could not be saved by the threats of Mr. Dulles and his colleagues. The situation in the Far East is bad.

The same muddled thinking is causing the situation in the Near East to worsen from day to day. This administration refuses to recognize that an enemy of a friend cannot be a friend and that you do not arm one who may use the arms against your friend.

I opposed the Bricker amendment, which would paralyze the President's right to conduct our foreign affairs.

I have supported the extension of reciprocal trade agreements and lower tariffs to aid our allies, even though the President backed down from the request he had termed "essential."

I have tried to build up friendly relations with the Latin American Republics, and with Italy, whose late Premier Alcide de Gasperi I had the pleasure of greeting on his visit here in 1951.

I have striven for peace in the Near East and the proper development of that new addition to the family of free nations, Israel.

OPERATION TAKEAWAY: GOVERNMENT EMPLOYEES

I have long felt that the Government should act as a model employer, and I have been deeply distressed by the methods of the present Republican administration as regards civil service. Aside from the reprehensible "numbers game" reflecting on many loyal civil servants, the Eisenhower administration has conducted the crudest sort of spoils system in taking away the jobs of Government employees for political reasons.

I have opposed the transfer of Government agencies from the New York and Brooklyn areas for political reasons, such as the Quartermaster Purchasing Agency and the diversion of contracts from the Brooklyn Naval Yard. I have sponsored bills to extend Federal compensation coverage to civil defense workers, for longevity step increases in the civil-service scale, to exempt compensation and pensions from income tax, to excuse Government employees from work to permit them time to vote in elections, and similar measures aimed at making the Government an employer of which every citizen can be proud.

I realize full well the inadequate salaries paid civil servants, and I have supported proposed increases. Having worked as a railway mail clerk, I know the hardships of postal employees, and on their behalf have testified before the House Committee on the Post Office and Civil Service.

It is nothing less than reprehensible to deny postal and Federal employees a 5-percent increase in their pay. From the President down, every Republican concedes that these loyal men and women are underpaid.

To deny them a pay increase unless we simultaneously provide additional revenue is a fraud and a sham. The subsidy given to business, by the Post office Department alone, exceeds the entire amount of such increase. The dividend tax exemption alone exceeds the cost of such a pitifully inadequate increase. The additional depreciation tax cut to big business is about double that cost.

Conservative policy indeed, as to wages for the underpaid and liberal, as to tax cuts for the greedy.

IMMIGRATION

The inequities of our present immigration laws make a mockery of the splendid inscription on the base of the Statue of Liberty in New York Harbor. I was happy to serve as a cosponsor with Senator Lehman and many other Members of Congress of a bill designed to rewrite completely our immigration laws and to remove every trace of bigotry therefrom.

In addition, I introduced a bill calling for 240,000 special visas during the fiscal year 1953–54, and have sponsored many private bills for the relief of my constituents and their families.

In this field, as in so many others, the fight must go on, and I am confident that someday the faults of our present immigration system will be corrected. They still remain under President Eisenhower's administration, although candidate Eisenhower pledged prompt reform.

TAXES: THE TRICKLE-DOWN BILL

Surely no part of the activities of government is more important than taxation—and it is in this field that we find the most glaring and inequitable giveaway.

Ninety-two percent of American families have good reason to be unhappy about the Republican tax bill that is now the law of the land, for they do not own any corporation stock. This Republican Congress and administration, however, have given tax benefits to the 8 percent of American families who do. In fact, the Republican program of "bundles for billionaires" especially benefits only six-tenths of 1 percent of American families, who own 80 percent of all publicly held stock.

The new Republican tax law provides benefits for stockholders, to the detriment of those Americans who earn their income through the sweat of their brow. Let us take as an example two families, each with husband, wife, and one child, and an income of $5,000. One of these two families has an income consisting entirely of wages or salary; its income tax will be $420. The other family, with income entirely from stock dividends, will pay an income tax of only $328. Thus unearned income is to be taxed less than earned income of the same size.

Of course, the tax difference increases greatly as income increases. Seventy-three and seven-tenths percent of taxpayers with incomes over $25,000 reported dividend receipts, while only 4.5 percent of taxpayers with incomes under $5,000 did so. It is primarily those with incomes of $10,000 or more per year who report dividend receipts. I might point out further that the Eisenhower administration asked for much greater benefits for stockholders, but Democrats in Congress managed to cut them down.

This Republican tax bill gives corporations, and the 20 percent of American taxpayers with incomes over $5,000, 77 percent of the total tax benefits. The 80 percent of American taxpayers with incomes less than $5,000 get only 23 percent of tax relief, thanks to Republicanism. It seems that the basis for Republican taxation is the old "trickle-down" idea, which we thought had disappeared forever; it gives the wealthy the benefit of tax relief although they need it least, in the hope that some of the benefit will trickle down to the great mass of the people. I am proud of my vote against the "trickle-down" tax bill.

I believe in giving tax relief to those who need it most. Ever since 1948 I have introduced resolutions calling for an increase in personal exemptions to $3,500 for heads of families as the first step in reducing taxes. But of course this was in conflict with the policy of the Republicans in control who insists on giving tax preference to those wealthy enough not to need it. One of my proposals, however, was partially carried into effect: An exemption will be provided for the first $1,200 of retirement income. Another of my proposals gained some ground, too; child-care allowances were provided, but much less than adequate and much less than I called for in my bill.

One further fact should be mentioned here about taxes, because Republicans are very unlikely to mention it themselves; the general 10-percent decrease in individual taxes that became effective the first of this year was passed by a Democratic Congress and signed by a Democratic President. The Republican tax bill is the one benefiting the well-to-do, and that is the giveaway I opposed.

Please understand, I am not opposed to eliminating double taxation. But I insist that inequities be remedied equally. The taxpayer earning interest on a savings account is entitled to the same relief as a taxpayer receiving dividends on stock. Furthermore, if we cannot remove all inequities because we will lose too much revenue, do not select one class as against another.

Do not increase and continue depreciation and depletion allowances at the expense of the wage earner. If we cannot save taxes for all, save taxes for him first. He spends all his earnings almost as fast he gets them. That is what makes for prosperity.

CIVIL RIGHTS AND BROTHERHOOD

Unfortunately, the Republican leadership defeated my efforts to prohibit discrimination in regard to public housing projects, and did nothing about my measures to prevent Federal aid to National Guard units practicing discrimination and to secure similar acts to guarantee civil rights for all.

I have always recognized the role of religion in life, and I have been privileged to participate in many religious and interfaith activities.

Although I recognize the separation of church and state guaranteed by our Constitution, I appreciate that the fundamental principles of civil rights are based on the brotherhood of man under the fatherhood of God.

We can legislate on these principles intelligently only if we understand them. We understand them only if we know religion.

That is why I constantly direct my colleagues' attention to the activities of all religious groups and do my utmost to stir them into action against all antireligious groups and activities.

In opposing McCarthyism and in deploring the current wave of hysteria in this country largely inspired thereby, I do not lessen my hatred of communism and all its works. My constituents may well remember the campaign of 1948 when my opponent was Lee Pressman, once described as the No. 1 Communist of the country. In that year the Communists spent a quarter of a million dollars trying to defeat me, and I was viciously attacked because of my vigorous anticommunism. I am happy to associate myself with the remarks of the Most Reverend Bernard J. Sheil, auxiliary bishop of Chicago and a leading Roman Catholic churchman and genuine anti-Communist. He said, among other things:

"I take it that a genuine anti-Communist is one who despises the court methods of the Communists. I take it he hates the Communist idea that one is guilty until proved innocent. I take it that the genuine anti-Communist is one who above all believes in the democratic procedures and is willing to stand by them, even in the face of great temptations to lose one's temper and to lose one's faith in the methods of freemen."

I am proud to stand alongside him in this vital fight for our civil liberties.

I am the only Member of any Congress who had an opponent who dared to avail himself of the privilege of running for office under the name and emblem of the Communist Party.

I am also proud of the autographed photograph given me by one of the great statesmen of the free anti-Communist world, the late Premier Alcide de Gasperi of Italy, for my efforts in behalf of Italy's fight against communism. Indeed, when I think that a certain Senator first discovered communism in 1950, 2 years after I had opposed and defeated communism in a congressional election; when I think of my votes for foreign aid to bolster the anti-Communist allies of this country and the contrast with his votes against all foreign aid; when I think of his apparent objective, the catching of headlines rather than Communists, and the demoralizing effect of his wave of fear, then I am certain that even my humble efforts have done more against communism than his ever will.

I have called attention to the McCarthyite actions of the staff of the Reece investigating committee, branding as communistic the encyclicals of two Popes of the Catholic Church. I have opposed—even when almost alone—the serious threats to our civil liberties posed by actions taken during a wave of hysteria, when some legislators abdicated their responsibilities because of fear. In my position, I have been happy to coincide with the views of J. Edgar Hoover, Chief of the FBI, and Judge Harold Medina, who presided over the trial which resulted in the conviction of the top Communists of the country.

THE FOLKS BACK HOME

It is with mixed humility and pride that I present this report. It is with humility, because I recognize my responsibility as a servant of my constituents and of the public interest. It is with pride, because I have never failed to carry out a campaign pledge, and because I have consistently striven to serve the public interest as I saw it to be.

My services have always been at the disposal of my constituents. I have never failed to try to help with their individual problems so far as I was able to do so. I joined with my colleagues in trying to keep local Federal services operating efficiently and at a maximum.

While I do not expect the electorate to agree with me at all times on all matters, at least we will make every effort to understand one another so that our respect for each other will survive our disagreement.

That is the American way.

HOBGOBLINS AND REALITIES

(Extension of remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Tuesday, Aug. 2, 1955)

Mr. MULTER. Mr. Speaker, before the start of our legislative session, the President had great misgivings about the coming months. He reprimanded the voters of the Nation because they chose to send Democrats to Congress, while the administration was of the opposing political faith. He forecast that a Republican administration would not have the support of a Democratic Congress. During the 1954 congressional campaign, he even foresaw the possibility of a cold war within Government which could destroy the Nation's unity at this crucial time.

The same kind of talk from a Democratic President would have been labeled in the one-party press either as intended to scare our people or as an insult to our intelligence. Coming from the leader of the Republican Party, that same part of our American press repeated the reckless charge as though it were unimpeachable gospel.

How disappointing it must be to them to find that the hobgoblins and the gremlins disappeared into thin air even before the 84th Congress opened.

Now that the first session of this Congress has closed, the American people are entitled to the full story.

Even though an ardent Democrat, I will not pretend that none of my Democratic colleagues made any mistakes, nor that there was no occasion when some of my Republican colleagues did vote right. I do proclaim, however, as loudly as I can, that my Democratic colleagues voted right more frequently than my Republican colleagues and conversely, that the Republicans voted wrong more frequently than the Democrats—too frequently for the good of our country.

Let us now proceed to analyze the record.

The President greatly underestimated the caliber and character of the Democratic majority. He now admits that the political responsibility of the Democratic-controlled Congress made the succeses of this session possible. The proof of Democratic leadership and support—the willingness to lay aside political antagonism and jealousies—is a part of the record.

It is with great pleasure that I review these accomplishments. In doing so, we must have in mind that what is right or wrong is not determined by who sponsors a proposal, nor by which party supports it. The determination must be based on the sole test of what is best for the greatest number of our people.

INTERNATIONAL AFFAIRS: UNITY AND STRENGTH

Nowhere is the story of cooperation and responsibility better illustrated than in the areas of foreign policy and national defense. The world situation threatens to remain a precarious one for many years to come. Although the great ideological conflicts between East and West show some indication of being eased, few are shortsighted enough to believe that the aims of international communism have changed so completely in so short a time. If these differences between East and West cannot be settled or at least compromised, the alternative is a global atomic war from which no side could emerge victorious. While urging thorough exploration of every path that might lead to world peace, the Democratic Party stood as one man in favor of keeping our guard up and our defenses strong enough to withstand a sneak attack. In our system of government

the President and his State Department must assume the leadership in the realm of international affairs. Congress responded by supporting them completely on every major issue. The President was authorized to use U.S. military forces in defending Formosa and the nearby Pescadores Islands. Executive agreements were ratified establishing a mutual-defense treaty with Nationalist China and a NATO-type defense alliance for southeast Asia.

Despite overwhelming sentiment in the Congress for it, the executive branch of our Government took no firm or realistic step toward establishing permanent peace in the Near East.

The occupation of Germany was ended so that she could be armed and brought into the European defense system. Austria was reestablished as an independent and democratic state.

To carry out our foreign policy aims, Congress authorized $3.2 billion for economic and military aid to foreign countries.

To encourage the benefits of international trade, the Reciprocal Trade Agreements Act was extended for 3 years so that the President has the full authority to continue his efforts to promote our foreign affairs. A bill simplifying our complicated and outmoded system of customs definition, classification, and rate structure was passed by the House of Representatives and awaits Senate approval in the next session of Congress.

A manpower reserve program was put into effect which provides for a trained military reserve of 3,900,000 men by 1959. Such a program, the President told us, will avoid the cost and inconvenience of a large standing Army, while at the same time providing for the national defense. It was necessary, nevertheless, to extend the selective service law for 4 more years, including the draft of doctors and dentists for 2 more years. I am far from satisfied with either of these laws, but believe they are the best compromise we could get at this time.

Atomic energy projects were authorized to the extent of $237 million for research facilities and actual production of atomic peacetime projects, as well as atomic weapons. Funds were also authorized for the expansion of existing aeronautical research, for construction of foreign military bases and housing, and for a billion-dollar Navy shipbuilding program.

The only issue on which Congress and the administration clashed was the relatively minor one involving Marine Corps manpower. Congress refused to bow to the Republican demand for a 22,000-man cut in this important military unit.

All in all, the Democratic Congress was happy to follow a foreign-policy program whose principles were enunciated by President Truman and Secretary of State Acheson several years ago. The result has been a satisfying one. American prestige has grown abroad, the cold war tensions have lessened, if only temporarily, and a period of diplomatic negotiation has been vigorously begun. Democratic support, far from being absent, has been consistently greater than the support of the President's own party. Because of this support, the United States has been able to demonstrate its strength and unity.

SOCIAL LEGISLATION FOR THE MANY AND NOT THE FEW

In domestic matters, of course, there was no comparable need for unanimity of thinking. The Democratic majority acted according to its political and economic principles and clashed with the administration where there was substantial difference. Once again, however, Mr. Eisenhower's forecast of a cold war was completely unfounded. The Democratic opposition to administration policies was as intelligent and high-minded as it was determined. There was no opposition merely for opposition's sake.

In the area of social legislation, several of the administration's proposals were extensions of earlier New Deal and Fair Deal ideas. These found enthusiastic Democratic support as far as they went—but often they did not go nearly far enough. Increased railroad retirement benefits, better FHA mortgage insurance coverage, and improved surplus property disposal to schools and hospitals were implementations of the Democratic program. Other parts of the administration program, however, proved quite inadequate.

A minimum wage proposal of 90 cents per hour, unreal at a time of high prices and general prosperity, was changed to a $1 minimum. This increase over the old 75-cents minimum will help keep industries from running away to the South and West where labor is so much cheaper, as well as preserve a decent wage for all American workers. More important, it raises the standard of living of all our citizens, nationally and not sectionally.

The administration's housing bill asked for only 35,000 public housing units and made them well-nigh impossible of construction by improper restrictions. Congress increased the low-rent provisions by 10,000 additional units and eased the requirements to enable more extensive and better balanced housing projects. Such liberalization of the law is necessitated by the acute housing shortage and the slum clearance needs of our urban centers.

To cure the unfortunate polio vaccine mixup, Congress authorized $2 million more than was asked by the President. In addition, all necessary funds are to be made available to the States to purchase enough vaccine for one-third of all the unvaccinated children, plus all expectant mothers. A more extensive and a better program was opposed by the administration as unnecessary and a step toward socialized medicine. The threat of a veto of the entire program effectually prevented the enactment of control legislation. Obviously, this administration is willing to risk black markets which may destroy the health of our people.

In appropriations for general matters of health, education, and social welfare, the Congress added more than $17 million to the Eisenhower program. The Congress felt that these were matters in which false economy was extremely dangerous. We were not willing to bear the responsibility of holding back research programs on cancer, heart disease, arthritis, and mental health so that the Federal budget might be a fraction of 1 percent lower. This, too, points up a basic difference of philosophy. The Democrats believe in being liberal with money to conserve the health of our people.

So too, an attempt to liberalize the social security laws and make the program more adequate to meet today's problems was stoutly opposed by the Republican administration. The Democratic majority in the House of Representatives overwhelmingly passed a bill to lower retirement age for women from 65 to 62, to allow disability benefits to 250,000 workers aged 50 or more, to continue disability benefits for children after age 18, and to extend coverage to the professions. Administration opposition in the Senate defeated this program there, although the need for such legislation has become more and more apparent in recent years.

Throughout the consideration of these matters, the Republicans consistently showed themselves for what they are—a party dedicated to the few rather than the many; a party which is more interested in budgetary figures than human needs; a party seeking to carry out a minimal social program at a minimal expense. Plenty of lipservice, but no votes.

BUSINESS AND TAXATION: THE LITTLE FISH IN A BIG POND

The Eisenhower administration has time and again denied that it is an administration of, by, and for big business. And yet the record clearly shows that almost all the major economic policies which seek to help the small businessman have originated among the Democratic Members of Congress and have been opposed by the Republican administration.

The Small Business Administration, an agency dedicated to the plight of small business, was extended for 2 years. The administration opposed any increase in its authorized funds. The amount of any individual loan was increased to $250,000. These loans are intended for those deserving small businessmen who cannot get help from regular bank sources. The disaster loan program and the small business participation in Government procurement were strengthened. The lending function together with the help given to small business in getting a fair share of Government procurement contracts makes SBA one of the most important agencies to have been started in recent years.

This is one of the few domestic policies, which in principle, has been consistently supported by both parties.

Bills were passed to halt the growing monopolistic practices in business. The antitrust penalty for violation of the Sherman Act was raised from $5,000 to $50,000. It was evident that $5,000 to a large corporation is merely a petty-cash transaction which was no deterrent to such a potential violator. In addition, the House passed a bill to curb the influence of bank holding companies by requiring Federal approval of new bank acquisitions by holding companies and requiring those companies to divest themselves of their nonbanking interests. This bill is designed to preserve the small independent bank as the banking unit best able to serve the interests of the small businessmen. In the area of taxes, most of the existing income, corporate and excess-profits taxes were extended for another year. The only important proposal for tax relief came from the Democratic side of the Senate and the House of Representatives. Although this concerned a mere $20 cut in personal income taxes for each taxpayer and each dependent—relief aimed at the lowest-income bracket, yet equally fair to all income brackets—the Republican administration forcefully rejected the idea and caused its defeat in the Senate after the House had given its approval.

ARMED SERVICES AND VETERANS: SOMETHING FOR SOMETHING

Thanks to Democratic support, the serviceman and veteran were not forgotten during the past few months. Those who were in the service as of January 31, 1955, were allowed to go on building up GI schooling benefits until discharged from the service. The Veterans' Administration direct-loan program was extended for another 2 years and was broadened to include home improvements as well as home purchases. Disabled veterans, including those who fought in Korea, were given the privilege of starting purchase of a special automobile before October 1956.

To help the buildup of a strong backbone of career servicemen—an essential supplement to the new military Reserve program—Congress raised the pay and created greater benefits for servicemen as an incentive to a military career. Finally, Congress decided to continue regular pay to the dependents and relatives of missing or captured men who had fought in Korea.

The feeling was strong in the Congress that our Government should do as much as it could for the men who defend our country and are called upon to make great sacrifices.

This program was both an expression of gratitude of the American citizen and a means of compensation for their sacrifices.

TRANSPORTATION: BUT NOT AT ANY COST

The pressing need to bring the Nation's transportation system up to date was apparent to the leaders of both parties. Airport construction was encouraged to the extent of $252 million in grants-in-aid to the States for 4 years.

In advocating a nationwide highway-construction program, the Eisenhower administration asked that the 10-year program be financed with special high-rate bonds. This would have involved at least $2.7 billion in unnecessary interest payments to bankers and other bondholders. The administration proposal was another unfortunate example of special-interest legislation which the Democratic majority has refused to stomach. The Democratic majority almost unanimously rejected this. They proposed in its place a system of user taxes on gasoline and tires, a plan by which those who benefited by the construction of the highways would pay their cost. Opposition to this proposal arose from many sources and the House defeated the bill even though the Senate had given its approval. The Republican opposition was almost unanimous.

FEDERAL EMPLOYEES: MORE OF THE SAME

With regard to the pay of Federal employees, the administration insisted it would approve only a straight 5 percent increase, while conceding the employees were entitled to more. The Democrats once again felt this to be bad business and false economy, having in mind how much Government workers' pay had lagged behind the cost-of-living increases and comparable wage increases among other workers throughout the country. We prevailed, though not to the full extent. Increased pay bills for more than the administration recommended were passed and approved.

THE GIVEAWAYS: HIGHER AND MORE

The minks are now sables. The 5-percenters are 10-percenters. Teapot Dome was a drop in a bucket compared to Dixon-Yates. First they gave away our oil lands. Now they are trying to give away all the rest of our natural resources.

The projects in which big business would not risk its stockholders' money are now beginning to pay back the taxpayer his investment. So the administration will now get the Government out of business by giving to big business the taxpayers' property.

To help do this our Government now uses w.o.c.'s. That is the old dollar-a-year man. He now works for us "without compensation." Big business pays him and lends him to the Government for nothing. For nothing to the taxpayer, but not for nothing to his private employer. He merely steers the Government business to his employer. He sits in on all the high-level policymaking conferences, either as the head of the department or as his consultant. Maybe he does not give his private employer any advance information. Maybe he does not write the specifications that only his private employer can bid on. Maybe I am speculating. Then why did Secretary of Commerce Weeks refuse to tell a congressional committee what his big business advisers do? Why was it necessary to employ as a top executive in the Container Division of that Department, the Washington "special representative," on the payroll as such, of the country's largest container corporation? The testimony showed this man knew nothing about the business.

The full story is being developed now and promises to be the biggest scandal of our history.

THE FARMER AND THE CONSUMER: THEY NEED EACH OTHER

I have supported the Democratic farm program because I am convinced that neither farmer nor consumer can prosper alone. They live and prosper together, or not at all.

The Eisenhower farm program will destroy our country.

Our warehouses are bursting at the seams. Some because they are overloaded. Others because this administration bought and paid for defective storage facilities.

In various parts of the country there is unemployment so serious that our people are starving while surplus commodities in Government warehouses are rotting away.

Under 20 years of Democratic administration, the farm program sustained losses of $1 billion. In less than 2½ years of Republican administration the farm program lost $2½ billion.

In 20 years under the Democrats, the maximum authorization for the program was $6¾ billion. In 2½ years under the Republicans, the Eisenhower administration increased it to $12 billion.

If you do not think cheese smells, ask Secretary Benson to explain about the millions of dollars he just handed to—no, not the farmers—to the big cheese processors.

FISCAL POLICY: I HOPE YOU CAN ADD

Candidate Eisenhower promised to balance the budget. Of course, you know he was fooling. President Eisenhower, thinking you took Candidate Eisenhower seriously, has hastened to explain that he did not say when.

But he did promise as President, that if we increased the national debt limit in 1954 to $281 billion, he would cut back the increase in 1955. In the last days of this session, he sent word to your Congress that he could not keep his promise and that we must give him another year in which to do what he said needed only 1 year to do.

Let us not be too hard on him. I think that you, too, would have trouble with that much money. I know that I would.

MY OWN PROJECTS: SOMETHING FOR THE FUTURE

Every Congressman has his own particular interests that he hopes to see enacted. Throughout the years I have been able to gain the approval of many proposals while others still await congressional approval. Without attempting to set them forth in the order of their importance, some of the proposals I hope to see enacted in the near future are: low-income housing for the aged; a complete civil-rights program; revision of the refugee relief and immigration laws; no discrimination or segregation in National Guard units; measures to keep racist and defamatory literature out of the mail; power to the President to act in health matters in case of a national emergency; strengthening of our antitrust laws to help keep the small businessman as the backbone of our free-enterprise system; income-tax deductions for all educational expenses of dependents and exemptions for servicemen serving overseas; prevention of the giveaway programs of Government rights and property; free postage to and from members of the Armed Forces; a review of all disapproved veterans' claims by the U.S. Court of Claims; a sound and just security program that will weed out the disloyal, without destroying the loyal; a system of standby economic controls for the prevention of inflation; a system of allocations and priorities of fuel for emergencies; a Department of Civil Defense within the Department of Defense, with strengthened authority; greater consideration of consumer problems by establishing a congressional committee therefor, as well as an executive department to protect the consumer; better pay for Federal employees; equal pay for equal work by women; and a code of ethics in Government for Government officials which, among other things, will prevent big business from acquiring our birthright.

CONCLUSION: RESPONSIBILITY AND INTELLIGENCE

The record of the Congress this year has been a mixed one. And this is far from a complete record. It is merely a brief summary. Some of the more important legislation that might have been enacted this year have been left until next year.

The accomplishments, nevertheless, have been solid ones—the very opposite of what the Republican leaders told the American people to expect.

The moral of this story may be simply stated: the opposition to the administration by the Democratic majority has been intelligent and responsible. Where differences have existed between administration and Congress there has been a give-and-take and compromise worthy of democratic institutions. The people of this country were not neglected by their Government in favor of partisan politics and petty jealousies. The Democrats of this country have a right to be proud of that record.

REFLECTION IS GOOD FOR THE POLITICAL SOUL

(Extension of remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Friday, July 27, 1956)

Mr. MULTER. Mr. Speaker, 4 years ago a giant hoax was perpetrated on the American people. They were promised a new approach to Government, one that truly was to represent them. In 1952, they were promised a world of peace and prosperity, lower taxes, higher wages, lower prices, and a balanced budget. The best business heads in America were to run our Government.

Two years went by, and the disillusioned American people went back to their own party, the Democratic party, by electing a Democratic Congress. The administration moaned and warned of a partisan cold war, of a stalemate within the Government. President Eisenhower cried loudest. Let us now review what happened.

Whatever good there was in the President's program had more support in every instance from the Democratic Party than from his own Republican Party. The President, himself, presently admits that the Democratic Congress produced a substantial amount of worthwhile legislation.

In 1952 the American people were fooled into believing in a program that its authors themselves did not believe in. We hope in this election year they will not fall prey to the hoax that the Elephant will again try to foist upon them.

Evaluation of the past will help us to spot the election year myths when they are presented by Republican campaigners.

THE ADMINISTRATION—ABSENTEE MANAGEMENT: WHO'S MINDING THE STORE?

We were promised a President who would be a guiding knight, an active and strong manager, a leader of our country, an expert in military affairs, and a friend of our foreign allies.

Instead we have an ailing gentleman, who had no experience in government, and who has shown no interest or desire to learn about his tasks. On several occasions he has told his press conferences about seeking the enactment of bills he had already signed into law. This disinterest or lack of knowledge cannot be attributed to ill health. Eisenhower's pleasing personality and past military achievements are no substitute for political leadership. There can be no justification for his delegating the authority and

responsibility vested by our Constitution solely in the President.

The business managers of our Nation, such as Secretary Wilson and Secretary Humphrey, may be fine in business, but they have proved they do not belong in government. The promotion of the national well-being for the benefit of the many rather than the few is foreign to their philosophy.

It is not true that what is good for General Motors is good for the country. Profits of an automobile industry are not equivalent to the welfare of a people.

Our health program should not be measured with an eye to a balanced budget. Nor has Secretary of the Treasury Humphrey earned the right to act as an adviser to our Armed Forces. Defense and national security must not be impaired by a desire for a balanced budget.

THE CONSUMER, LABOR, AND THE FARMER—THE TIGHT SQUEEZE

The one problem common to the farmer, to labor, and to all of us, is that of the consumer.

Candidate Eisenhower promised us a lower cost of living. President Eisenhower will surely disclaim responsibility for a higher cost of living.

Consumers prices are at a record high. The National Consumer Price Index rose for the fourth successive time in a year. It has reached the highest peak in 5 years. Next month another rise is expected.

The Democratic farm program is based on the knowledge that general prosperity cannot be maintained while we continue to depress the farmer. President Eisenhower vetoed our Democratic farm price support bill and then quickly raised price supports himself. Apparently his sliding scale had slid too far, for farm income is down 30 percent in the past year.

Milk prices to the consumer have continued to rise. Secretary Benson decided to raise dairy prices just when manufacturers had warehouses filled with cheese and butter bought at the lower price level. The farmer who sold his milk at the lower price then had to buy it back as high-priced butter. This apparently is the Republican idea of how to aid the dairy farmer. No wonder so many of these farm families spread oleo on their bread.

Milk prices do not worry Secretary Benson who finds that the little farmer is of no importance. Benson is more concerned with the three members of his advisory Board whose firms have been indicted for monopolistic practices. Mr. Benson is apparently fully occupied in directing the administration's ever-changing farm policy. He first opposed and then supported a soil bank; he first opposed and then approved the plowing under of crops; first opposed and then approved the idea of farm policy as a political issue.

The present administration makes many boasts as to the increase in the size of the labor force. This increase is largely a result of our ever-increasing population. Of far greater significance is the fact that at least 2,900,000 people who want jobs, cannot find them. In the past year 1 million persons have been added to our unemployed rolls. That represents a total of nearly 10 million American men, women, and children who have lost their means of support. The billion-dollar year that General Motors has just concluded does not help these people.

The Democratic Party sponsored a bill to help our unemployed learn new skills when their previous trades no longer offer employment. Retraining these people will help to relieve all of us of the burden of support. This is the type of construstive, positive legislation which brought our country to the prosperous state which it enjoyed in 1952 when Republican businessmen began to tear it down.

Candidate Eisenhower pledged himself to the amendment of the Taft-Hartley Act. President Eisenhower has consistently refused to live up to his campaign promises. Former Secretary of Labor Durkin offered the President 19 amendments, which were in accord with Candidate Eisenhower's promises. Eisenhower refused to go along with any of them. Instead he submitted to Congress a program which would toughen the Taft-Hartley Act. His Labor Secretary resigned and was replaced with another big businessman. Congress refused to go along with President Eisenhower's labor program as presented.

In an attempt to meet the increased cost of living, Congress has raised the minimum wage to $1 per hour over President Eisenhower's protest that 90 cents was adequate.

The Republican Party as represented by President Eisenhower may be a party of the people—but of and for a very few people.

BAD GOVERNMENT

During his 1952 campaign Candidate Eisenhower had much to say about corruption in government and useless personnel in government.

We said then and repeat now: no political party has a monopoly on virtue or efficiency. Every party when trusted with the privilege to govern must be ever alert to weed out the loafers, the incompetent, and the criminal.

President Eisenhower has sadly failed the people in that regard.

The executive departments, in almost every instance, are employing more people and more top executives at higher salaries than in any previous administration. The exceptions are in the so-called service departments.

The Post Office Department serving all of the American people is using fewer employees and giving the worst service we have ever experienced.

The Veterans' Administration, serving our veterans, and particularly our disabled veterans, has been reduced in force, moved around, kicked around, and made a less useful agency to those who need it most.

The Agriculture Department has been reorganized to take out of the hands of the farmers most of the things they can do best for themselves.

Misappropriating funds is the order of the day for this administration. This administration has appointed more corrupt officials than any other in our history.

Starting with Secretary Benson using Department funds to refurbish a Government lodge for his personal use, we find corruption rampant in every department.

Warehouses bursting at the seams because improperly constructed; selling millions of dollars worth of cheese to the processors and buying them back at higher prices, without the cheese ever leaving storage or changing hands; indictment of three members of Secretary Benson's Advisory Board; self-dealing for his private profit of one of his paid subordinates; loading the school lunch program with more than $400,000 worth of phony transportation charges in Illinois for the sole benefit of one of his Republican friends. There are no doubt many more such incidents which have not yet been exposed. We are just beginning to investigate the monopoly enjoyed by three companies in disposing of surplus commodities.

Under 20 years of Democratic administration the Commodity Credit Corporation never exceeded an authorization of $6¾ billion. The total lost in those 20 years from operation of the program was about $1 billion. During 3½ years, the Republicans have increased that authorization to $14 billion. The losses have increased by at least $4 billion. No small part is attributable to the increased interest rates paid to bankers, and much of it paid in violation of law.

Dixon-Yates was bad; so bad that even the Republican administration has backed down on its spurious claim of legality.

The cancellation of a Defense Department contract awarded to the Chrysler Corp., and awarding the same business to General Motors is only a small part of the wrongdoing in that Department.

The foot-in-mouth statements of Secretary Wilson is the least important of the many things that are bad in this administration.

The Small Business Committees of the Congress have devoted some part of almost every day to urging the Defense Department to follow the law and its own regulations in awarding contracts and making payments earned thereunder.

The Office of the Comptroller of the Currency and that of the Federal Deposit Insurance Corporation have also been managed in a manner adverse to the public interest.

The big banks and big holding companies have grown bigger with the aid and abetment of the Republican appointees to those agencies.

The responsibility for the Illinois bank scandal, the theft of State funds through bank manipulations, must be borne at least in part by those same Republican Federal appointees.

Internal mismanagement by those officials of their offices I hope will soon be the subject of thorough investigation.

Under the leadership of the Secretary of the Treasury and the Comptroller of the Currency attempts are being made to weaken our banking laws for the benefit of the big banks and to the detriment of the small banks and small investors. A part of that scheme was the abortive attempt to destroy the right of minority stockholders to minority representation on the directorates of national banks.

The full story about the giveaways by the Interior Department, the attempt to destroy TVA, REA, and our other public facilities and natural resources requires much more time than I can give here.

SMALL BUSINESS

Since 1953 our Government has been taken over by big business and the big banking interests of the country. The little fellow has had no representative in the Cabinet or at the top of any executive department. On the contrary, he has had as antagonist big business and the big banks, not only in the marketplace but also in every department of Government.

What is even worse, the so-called w.o.c.—the big businessman on loan to the Government, drawing no compensation from the Government, but being paid by his big business employer—has an inside track keeping big business constantly informed as to Government plans and channeling Government business away from the small businessman and to big business.

Credit restrictions are manipulated so as to dry up all sources of credit for the small businessman.

Except in times of war or emergency, w.o.c.'s should not be employed by the Government.

I have contended and will continue to urge that the Small Business Administration Act must be strengthened by eliminating the Policy Board now dominated by Secretary of the Treasury Humphrey and Secretary of Commerce Weeks. The agency must be made not only permanent, but permanently independent of the Treasury Department and the Department of Commerce.

The small businessman, displaced by slum clearance and highway construction, should be entitled to low-interest-rate loans based upon character and ability to perform, rather than bankable collateral.

The Defense Department must be directed by the Small Business Administration to dis-

card, as required by law, the old arbitrary numerical definition of a small business firm and follow a more realistic one. This will give small business a larger and more equitable share of Government contracts.

The Small Business Administration may boast that during 3 years it has approved 3,560 business loans, in an aggregate amount of $137,915,000, on account of which it disbursed $52,578,000. Compare that, however, to what this administration has done for big business in the same period through the Export-Import Bank alone, to wit, 805 loans, for a total authorized aggregate amount of almost $7,500 million, against which it disbursed over $5,171 million. The Export-Import Bank made 22 percent as many loans, with an average disbursement of over 426 times more per loan. To put it more simply, SBA's loan disbursements averaged less than $15,000 each and the Bank's more than $6,400,000 each.

While big business has made more and bigger profits than at any time in the history of our country, small business has been going into bankruptcy in greater numbers than at any time since the depression days of the early 1930's.

For years, I have led the fight to establish offices of the Small Business Administration in Alaska, Hawaii, and Puerto Rico so as to enable American citizens residing so far from the mainland to avail themselves of the privileges accorded by law to all. I personally urged the Appropriations Committee to give the agency the money for that purpose. The money was voted. I am still waiting to be informed that even one of those offices has been opened.

GIVEAWAYS: THE GOVERNMENT'S PRIVATE CHARITY

The administration in its "partnership" plan gives, and gives, and gives, and the people get nothing in return. First, it was offshore oil lands, then TVA, then natural gas. Now, any river or forest that big business wants, it can have for the asking.

The President wanted and got a Federal water storage project on the upper Colorado River. Since no big business wanted it, the President's partnership plan was forgotten. And Idaho Power Co. wanted to build a private power project at Hells Canyon, so the administration opposed the public sponsored Hells Canyon project. The administration opposed the idea of municipalities in New York State having priority purchase rights to the electric power which would issue from the Niagara River power development program.

The development of atomic energy for peace is an idea that the Democratic Party sponsors wholeheartedly. But we voted against the administration's atoms-for-peace program since it would have given a few big businesses a monopoly in the development of atomic energy for peacetime use.

Incidentally, Attorney General Brownell now has completely disavowed the Dixon-Yates contract and has accepted the view of the Democratic Party that the whole agreement was illegal.

It took New Deal reclamation programs to give us back our forests. It has taken less than 4 years of an Eisenhower administration to lose them. The administration's policy is to lease them to private industry—which flagrantly abuses them.

We have no right to expect anything else of the Department of the Interior under this administration. Its consistent policy is to put political appointees in the place of ardent careermen. It has been no accident that many of these political appointees have been anticonservationists. There is no necessity for commenting on the scandals that have evolved over the private uses that many of these appointees have made of the assets of the Department.

FEDERAL AND POSTAL EMPLOYEES

Anyone aware of the importance of all Federal and particularly the postal employees, can see no reason why they should not have many of the rights that are accorded to workers in private industry.

We have, over the objection of the administration, raised their wages, to enable them to meet the rising costs of living. This, while the President kept clamoring for increased pay for those already in the highest brackets. We have also liberalized the civil service retirement benefits.

We have not yet devised any method to stop administrative destruction of the merit system.

Nor have we been able to abolish the brazen gag order that Republican Postmaster General Summerfield has imposed on postal workers. He has forbidden them to complain about the Post Office to anyone but their superiors in the Post Office. Members of Congress and the press have become off limits to these employees. We must now write into the law, permission for these employees to complain to their Congressmen without impairing their merit standing.

The Supreme Court's decision, limiting the scope of the security program to those areas of government which can be defined as sensitive would seem to have eliminated the problem created by the unwarranted administrative security clearance procedures. The administration is now sponsoring a bill which would classify all Government positions as "sensitive." The recommendations of the Association of the Bar of the City of New York, which fundamentally agree with the decision of the Supreme Court, should be followed in this regard. No American wants subversives in our Government. We can and must provide adequate means for protecting the Government's best interests. But we must do it without needless duplication of effort and without destroying our fundamental principles of fair play and of good government.

VETERANS AND ARMED FORCES

Neither the veterans nor the Armed Forces have been forgotten by the 84th Congress. Aware of our debt, we, the Democratic Party, sponsored and supported measures to better their lot.

The veteran home-loan program has been extended, as have been the disability benefits for the veterans of World Wars I and II. Neither forgetting the youth of our Nation nor those who were their fathers, we are providing educational assistance to children of servicemen who died in World War II and in Korea. We have extended the Missing Persons Act authorizing continued pay for service personnel missing or captured in Korea.

To maintain a strong armed force, we have extended the draft law to 1957. To provide greater incentive for career personnel—a necessary essential in our defense program—we have placed all military personnel under our social security program, and have increased the benefit payments to survivors of servicemen and veterans. We have also provided for medical care for the dependents of members of our Armed Forces. We have raised the pay of our 6-month trainees under the Reserve program as well as the pay of the Armed Forces in order to attract and keep better men in the service.

SOCIAL LEGISLATION—THE UNBALANCED SCALE

Social legislation is not a partisan matter to the Democratic Party. The welfare of the Nation is more important than party politics. We, of the Democratic Party, were happy to note that much of the welfare legislation of the administration was an extension of New and Fair Deal plans. These acts and others of a similar nature were supported wholeheartedly by the Democrats.

Over the administration's protests we succeeded in amending the Social Security Act by lowering the retirement age for women to 62 and permitting the disabled to become eligible for full benefits at the age of 50. Democratically supported and New Deal initiated, and administration sponsored, the benefits under the Railroad Retirement Act, and the Longshoremen's and Harbor Workers' Compensation Act were increased.

National disaster insurance for the victims of flood and hurricane disasters was established.

We have extended the Federal school milk program to include child care centers, nursery schools, settlement houses, summer camps and other similar nonprofit associations.

I sponsored a Federal Scholarship Act. Worthy students who desire a college education or postgraduate work, would be enabled to apply for these loans to aid them through school. This is no giveaway, since the students will repay these loans when their education has been completed. Such a program has been found feasible in prior years. It should never have been abandoned.

We have also authorized $378 million in Federal aid for school construction, in areas which have become overcrowded by increased governmental activity.

Little need be said of the failure of the school-aid bill. Due to a shameful coalition of a minority of the members of my own party and of a majority of the Republicans, this much-needed bill was defeated.

In matters of national health and medical research we went beyond what the administration requested. The Oveta Hobby attitude, of health being a strictly private affair, did not reoccur during this session. Ninety million dollars have been set aside for medical research of crippling and killing diseases, for extended hospital construction and for training nurses and health specialists. Four million dollars have been set aside for a Dental Research Institute.

The housing bill authorizes a public housing program of only 35,000 units a year for 2 years. The Democratic majority in the House felt that this was an unrealistic attempt to remedy the housing shortage. Administrative opposition proved too strong and we were compelled to settle for less than is needed. We did succeed in liberalizing the terms of Federal mortgages; for financing home improvements, for financing single-family home purchases, and for financing rental dwellings. We also liberalized, not enough, but somewhat, the Federal mortgage terms for elderly people and for urban renewal projects.

The administration sponsored a civil rights bill which was quite innocuous. It provided for things which the President now has the right to accomplish without any new laws. Once again a self-interested coalition of a few Democrats and a great many Republicans thwarted this measure. That action will no doubt be President Eisenhower's excuse to do nothing about the matter.

We did not enact the health insurance program of the President since it would have done nothing except help some insurance companies. It would have done nothing for the individuals who need medical and hospital assistance or insurance to pay therefor.

Throughout this program, the unbalanced scale continued to dominate the administration's thinking. No matter who sponsored the legislation, the Democratic Party approach was: If it was for the benefit of the people as a whole, we supported the bill. This cannot be said of the Republican Party. Their narrow interests and petty insights have not yet revealed to them the importance of the broadest approach for the benefit of the greatest number.

INTERNATIONAL AFFAIRS—PERILOUS PATHS

Under our system of government, the President must assume the leadership in the realm of international affairs. He must

make the policy in the first instance. His State Department should be his spokesman. Congress may respond by approving appropriations or by senatorial action on proposed treaties.

The path of peace is always difficult. The Democratic Party believes it can only be maintained by an unequivocal but honorable approach to foreign affairs. To find a permanent peace, we must be vigilant and alert, honest with ourselves and with our allies, and firm with our potential enemies.

The ideological conflict between the East and West continues. The Communist countries have changed their outward demands, but they have not changed their aims of world domination. This administration has made no attempt to move forward in this field. It has mumbled and fumbled, it has bluffed and rebuffed, it has bleated and retreated.

The Democratic Party has supported President Eisenhower in his attempts to find a road to peace. We have supported his foreign-aid program authorizing $3.9 billion to be used for military, economic, and technical assistance to our friends and allies during the next year. Although the President asked for more, his aids have admitted that they cannot spend in the next year the funds now appropriated for those purposes.

The removal of U.S. troops from Japan is imminent and will permit her, as our ally, to regain her true place in the world of nations. The House passed a resolution asking that Japan be admitted to the United Nations.

I have been continually opposed to the Near East policies of President Eisenhower and Secretary of State Dulles. Their blindness, if not stupidity, has helped raise Egypt's Nasser to a position in which he threatens the peace of the world.

Our demand for arms for Israel has been ignored. Instead of firmly insisting upon a cessation of hostility, Dulles has encouraged Arab fighting. We demanded that Dulles and Eisenhower protest against blocking the Suez Canal to Israeli and Greek ships. My question is still unanswered: "What will the United States do when American ships are barred?"

The antisemitic boycott by the Arab States has been approved by a delinquent administration. It has excluded American soldiers and American civilian employees of the Jewish faith from American bases in Saudi Arabia.

PROTECTING THE INTEGRITY OF UNITED STATES CITIZENSHIP

From the very earliest days of the establishment of our Nation, we have insisted that American citizens, wherever they may be and wherever they may go, must be treated as such regardless of race, color, or religion. We have a long history of having come to the aid of American citizens wherever their rights have been threatened, impaired, or impeded.

This administration has sadly failed the American people and has repeatedly and constantly backed away from that fundamental principle of American freedom.

The protection of the integrity of U.S. citizenship and of the proper rights of U.S. citizens to lawful trade and travel and other activities abroad, is a basic principle of U.S. sovereignty. It is a primary principle of our Nation that there shall be no distinction among U.S. citizens based upon individual religious affiliations.

Any attempts by foreign nations to create such distinction among our citizens in the granting of personal or commercial access, or any other rights otherwise available to U.S. citizens, is inconsistent with and contrary to our principles. Any such distinction directed against U.S. citizens is incompatible with the relations that should exist among friendly nations.

We should insist that in all negotiations between the United States and any foreign state that every reasonable effort should be made to maintain these principles. We should carry on no negotiations and engage in no conventions, agreements, or treaties with any foreign nation that does not recognize these principles or violates them.

These principles have been so firmly embedded in our tradition that up to 1952 no political party found it necessary to restate them in a political platform.

In 1952, however, the Republicans inserted these words in their platform, to wit:

"We shall see to it that no treaty or agreement with other countries deprives our citizens of the rights guaranteed them by the Federal Constitution."

That should have been a warning signal. We had no such treaties or agreements then and have none now. No prior administration, Republican or Democratic, ever permitted the rights of American citizens to be impaired by any foreign country.

This administration, however, has permitted the Arab States to disregard, ignore, and even trample upon the rights of American citizens in travel and trade. They prohibit Americans from traveling into, through, or over these nations because of religion. On the same basis they refuse to allow Americans to trade with their own citizens.

This administration has ignominiously permitted a foreign nation to violate a treaty obligation and acquiesced in that country, Saudi Arabia, banning American citizens from an American base on the sole ground of religion.

CIVIL DEFENSE

To aid our civilian defense program Congress has increased the appropriation for construction of aircraft control and warning systems.

Testimony adduced before congressional committees established that our so-called civilian defense is utterly worthless and completely valueless in the event of an atomic bomb attack. Every penny presently being spent by the so-called Department of Civilian Defense is wasted.

Nevertheless, this administration would do nothing to improve this horrible and horrifying situation.

CONCLUSION

The record of the 84th Congress speaks well for our country. It could have been better. I am sure it would have been better, if we had had a Democratic president.

The levelheaded approach of a Democratic Congress under a Republican President produced meritorious legislation. We did not enact all that legislation that should have been passed. What was accomplished, in the main, is a record that the Democratic Party can be proud of. Even though we worked under an unsympathetic administration, the national interest was our first thought at all times. I am proud to have had the privilege to serve in the responsible 84th Congress.

DOUBLETALK

(Speech of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Friday, August 30, 1957)

Mr. MULTER. Mr. Speaker, this has been a most unusual legislative year. It started with much promise. The 1956 election had returned the people's hero to the Presidency with an unheard of popular vote.

At the same time, they showed their confidence in the Democratic Party by continuing it in control of both Houses of Congress.

Obviously, the American people agreed that control of the 84th Congress by the Democrats under a Republican President was indeed good for our country.

With the 1st session of the 85th Congress behind us, I believe we can demonstrate that the country would have been better off under a Democratic President. I, for one, am certain we would have had more real leadership and much less doubletalk.

Under our system of government we have a right to look to our President for leadership. Our Constitution requires him to send an annual message to Congress on the state of the Union. Traditionally, our Presidents have interpreted that to mean that they are required to submit a legislative program to the Congress.

Never before in our history have we experienced such a lack of leadership by the President, coupled with so much doubletalk.

Absenteeism is bad enough, of and in itself, in high places. Vacillation and indecision are much, much worse. I will concede that few persons reading the President's messages to the Congress can disagree with the fine, high-principled generalities contained therein. But, by the same token, his campaign speeches in 1952 and again in 1956 were in the same vein.

But what are the specifics? What about the implementation of these fine principles?

Some of the President's supporters, even some of the members of his Cabinet, have been brash enough to label his campaign addresses as merely campaign promises. But his messages to the Congress were not campaign speeches.

It is all well and good for our Republican friends to say, "Oh, this is a Democratic Congress, the Democrats are in control. They can pass any legislation they want to."

Such statements, too, are mere doubletalk. The hard, practical facts of political life are that, in a Congress where the majority party does not have an overwhelming majority in both Houses, neither party can pass legislation without the cooperation of at least some members of the other party.

Wise congressional leadership avoids bringing to the floor of the Congress legislation that the leadership knows will be opposed by enough members of the opposition party to defeat the bills.

In all those spheres of activity where our party platforms are in agreement, the President should have been in a position to deliver enough Republican votes to offset the defections in Democratic ranks, so as to give the people of the country a working majority in the Congress.

Permit me now to document my case with some specifics.

PARTY PLATFORMS AGREE, BUT THE PRESIDENT IGNORES THEM

Both parties agree that the minimum wage laws should have wider application; that distressed labor areas require Government aid; that the Taft-Hartley law requires amendment; that all Federal employees and, more particularly, the postal employees, are entitled to increased compensation. In most of these instances the President talked gently and fairly but in generalities. As to the Federal employees and postal employees he spoke specifically. He said they were underpaid. He said they were entitled to increased wages.

In none of these instances, except as to the increase of salaries for Government employees, were we able to enact any legislation, because the President and his appointed officers in the executive departments not only refused to help but actually opposed congressional action.

As to the increases of salaries for Government employees, the President signed the bill which gave those in the highest brackets big increases and more pay.

As to the little fellows, the civil-service employees, the career employees, the post office workers, he sent word to us that if we dared so legislate he would veto the bills. Unfortunately, we couldn't get the bills to him in time to override a veto. As of today—

the last day of this session—it seems certain that the President will veto these bills which do only what he said was fair and just; that is, to give to the little fellow, the civil-service worker and the post-office employee, a cost-of-living increase.

BIG BUSINESS GETS BIGGER AND SMALL BUSINESS GOES TO THE WALL

Other spheres of activity where we got the same kind of doubletalk involved monopolies, trusts, and big business. The mergers continue. Big business gets bigger. Their profits grow. The small businessman goes into bankruptcy. The big businessman gets more and bigger tax cuts by way of fast write-offs and obsolescence and depletion allowances and Government giveaways, and the little fellow gets the tax bills.

The President is still advocating a natural gas bill. One day he advocated an amendment to that bill, to protect the consumer, and the next day he said he would take the bill without the amendment.

He opposes the development of public power and tries to give the natural resources of the country to the big utilities. By his appointment to various Government agencies and commissions, he does all within his power to destroy TVA, rural electrification, and the other important Government agencies.

HUMAN RIGHTS ARE FORGOTTEN

He says he is for statehood for Alaska and Hawaii but will not lift a finger to bring that about. He says he is for liberalization of our immigration laws and, instead of trying to liberalize them, he condones the action of his State Department and his Attorney General in keeping out immigrants clearly entitled to entry into this country under existing law.

The civil rights muddle in the Congress was as much his doing as that of anyone else. He did not know from press conference to press conference what was in the bill labeled "the Eisenhower bill." It is surprising that we got a bill at all under the circumstances. Time will demonstrate, in my opinion, that the bill will accomplish very little except to give him and some of his supporters an excuse for new campaign doubletalk. And all the time, the demagogs will continue to rabble-rouse.

He talked big about Federal aid to education. When it came to a showdown in the House, the bill was lost on a very close vote. It could have been won if the President had made three telephone calls. He could have telephoned one of his erstwhile campaign supporters who left the Democratic Party to urge the people to reelect Mr. Eisenhower and who was absent on the day this important bill was defeated. The other two calls could surely have changed two opposition votes into two votes for the bill. These were not just two votes of Republican Members of the House. These two men are the President's leaders of his party in the House. The three Members of the House referred to, Mr. Speaker, go unnamed as a matter of traditional congressional courtesy. The record vote discloses who they are.

FOREIGN AFFAIRS CONTINUE TO BE BUNGLED AFFAIRS

The muddle in foreign affairs is the direct responsibility of the President and his Secretary of State. Those matters of maladministration have no direct bearing upon the legislative function of the Congress. I therefore make no further mention of them here, particularly since that subject alone would require much more time than I can devote today, and my remarks pertain merely to the legislative program.

Those who are interested may read my statements before the House Foreign Affairs Committee and on the floor of the House on this vital subject.

Suffice it to say, I foretold precisely what to expect with reference to the Middle East, including the recent events in Egypt and Syria. Although I did not pretend to set forth any timetable, the sequence of events was exactly as I predicted.

The so-called Eisenhower doctrine is preventing the spread of communism and sovietism exactly nowhere.

THE HIGH COST OF EVERYTHING

The increase of interest rates on Government and private debt is the direct responsibility of the President and his Secretary of the Treasury. They have increased the cost of living of every man, woman, and child in the country by increasing the expense of operation of every business enterprise in the country.

The increase in cost of Government is staggering. At the same time, while telling us that the people should save more money and spend less, the President and his Secretary of the Treasury keep the interest rates on Government savings bonds under other interest rates, destroying the incentive of our citizens to save.

He insists that mortgage interest rates be raised and because Congress refuses to increase the interest rates on veterans' mortgages, he threatens to veto the extension of the GI mortgage bill.

I, and many of our colleagues, have been urging that the veterans are entitled to direct loans from the Government. This would not be using Government money but would be using their own life-insurance funds.

Banks, trust companies, life-insurance companies, pension funds, all invest their money in real-estate mortgages. But some shortsighted people urge that the veterans' life-insurance funds should be invested only in low-interest Government bonds instead of in 4-percent veterans' mortgages.

We could not prevail upon our colleagues to go that far. The bill we sent to the President, which he now threatens to veto, merely extends existing law, permitting veterans to get mortgages in those areas of the country where FHA is not operating and for reasons mainly of convenience cannot or will not operate.

The President glibly talks about controlling inflation and urges voluntary restraint by labor and business to keep costs down.

Then he ridicules labor's promise to forgo wage increases if big business will lower prices.

At the same time, he permits price increases in all Government restaurants serving the very employees whose wages he will not increase. He allows their rents and those of all others in FHA houses to be increased, thus setting the example for increased rents by all landlords.

That is not doubletalk; it is doubledealing.

SOME HOPE FOR SMALL BUSINESS

The House passed a Small Business Administration Act to make that agency permanent and to make it more effective in serving the small-business community of our Nation. Despite the fact that the President has not talked out in favor of this bill, we hope that in the next session of Congress, the Senate will pass the House version of that bill.

By that time, too, I hope we will have a good bill ready to give the small businessmen some sorely needed tax relief.

FUNNY FIGURES MAKE PHONY BUDGETS

The worst example of doubletalk on the part of the administration, however, came with reference to the budget and the request for appropriations for defense, for foreign aid, and for operation of the Government.

In this field, too, no one knew where the President or his appointees stood from one day to the next. All sorts of ridiculous claims were submitted to the Congress for exaggerated sums. Probing by alert members of the Appropriations Committees showed how farcical some of these claims were.

Despite the disclosure of tremendous waste of money and property during the last 5 years, heads of the departments, aided and abetted by the President, came forth again urging more money than they needed and more money than they could spend.

After the money was appropriated and the bills approved into law by the President, he then directed the heads of various departments not to spend the sums appropriated.

I will refer to only two of the many instances of this heinous maladministration.

The U.S. Public Health Service has indicated its need for funds to prevent a yellow fever epidemic threatening the United States. The money was appropriated. The bill was signed. The Budget Bureau, under the direction of the President, has directed the department not to expend those moneys, the sole purpose of which was to control the disease.

This is the Government that is conservative where property is concerned and liberal where human values are concerned. That is not my language. That is the modern Republicanism of President Eisenhower.

One more instance of the same kind. After the appropriation for the Defense Department had been approved into law by signature of the President, he then directed that the money not be spent. Mind you, this is the very appropriation request, which when cut by the Congress, was declared by the President to be insufficient for our national security. Now he says to his Department heads that they may not spend as much money as was appropriated.

Practically all of the Members of Congress from Metropolitan New York attended a conference with Navy Department officials, urging them not to release skilled career employees. It was admitted that if these men were discharged their skills and services would probably be forever lost to the Government. It was further conceded that the full sum necessary to keep these men employed for the next year had been appropriated and that the men were being dismissed solely in order to come within the President's directive to spend less money than had been appropriated. The question of national defense and security was subordinated to the demand to save a few paltry dollars.

WASTE AND CORRUPTION

Congressional committees continue to uncover waste and corruption in every department of Government. At another time. I will discourse at length upon this subject, which continues to be ignored by our President, except on those occasions when he awards a medal or a certificate of merit to the head of the department whose misconduct is exposed.

All of these facts are borne out by the record.

HAD ENOUGH?

(Speech of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Saturday, August 23, 1958)

Mr. MULTER. Mr. Speaker, please pardon my partisan pride in saying that as surely as the 80th Congress has gone down into history as the do-nothing Congress, so will the 85th Congress be remembered as one with the greatest accomplishment under the most adverse conditions.

With no constructive leadership in the White House or from any of our President's appointees, the Congress could have sat on its hands. Instead, it worked harder to establish a good record of accomplishment.

Ignoring the campaign threats of the Republican Party and its titular leader, by dint of resolute, intelligent, and responsible legislating we put to shame the prophecies of a

cold war between the White House and the Congress.

We proved once again that the Democratic Party, by and large, is the spokesman, yes, the protector of the people of our country, serving them so as to accomplish the greatest good for the greatest number.

I have placed in the RECORD the speeches I made at the end of the 84th Congress on July 27, 1956, and at the end of the 1st session of this, the 85th Congress, on August 30, 1957. I suggest that they make good reading as an introduction to these remarks. I will borrow some of the titles I used then and bring the facts up to date.

THE CONSUMER, LABOR, AND THE FARMER: THE TIGHT SQUEEZE

The last year saw the laws of economics repealed by the facts of life.

In the midst of a most depressing recession with between 7 and 8 million persons unemployed, the cost of living continued to soar.

As much as 7 percent of our total civilian labor force could find no employment. That is, 7 percent of those who were ready, willing, and able to work, were unemployed. In 5½ years of Republican maladministration, the cost of living rose by 9 percent, almost 3 percent in the last year alone. In 1958, the average American family is paying $406 more per year for the necessities of life than in 1953.

Why? Because the big businessmen in control of the executive departments of Government, appointed by our President, tightened the money supply, made money harder to get, raised interest rates, increased rents on properties built with Government subsidies, gave away our surplus commodities or permitted them to be stolen by friends of big business appointees, squandered our money in boondoggles and refused to spend it for defense, national security, health, and education.

The unthinking may readily say: The Democrats were in control of the Congress and could have stopped all of that.

My answer is twofold: First, let the people in the next election give the Democratic Party a substantial majority in both Houses, enough to override Presidential vetoes, and we will do a real job. Secondly, all the reactionaries and all the conservatives are not in the Republican Party. I am sorry to say that some of them are in the Democratic Party too. If the President were really the leader he should be, he could have been able to get enough liberal Republicans to make up for the defections in the Democratic ranks.

Suffice it to say, in almost every instance a majority of the Democrats were found voting for what was best for our country and a majority of the Republicans voted the other way.

For instance, we could not get enough Republicans to join us in voting for a good housing bill, or for a community-facilities bill or a mining bill, or for scholarships for college students, or for higher minimum wages, or for aid for school construction, or for giving our surplus-food commodities to our needy, who are on relief, or for reform of our labor laws. Most of these measures were lost by a few votes on the floor or in committee. The President never raised a finger to help get these bills enacted. We did get enacted a bill to aid depressed areas. The rumor mill indicates the President intends to veto it.

HUMAN RIGHTS ARE FORGOTTEN

Of course all of this fits the pattern of modern Republicanism enunciated by the President and mouthed by his supporters. Remember it? "Liberal where human rights are concerned and conservative as to money matters."

None will deny that most of these bills would cost money. At the same time, no sensible person will dare challenge the statement that all of these bills vitally affect every human being in our country and all of their rights and privileges.

When talking of human beings and relieving their distress, we must not overlook the fact that we passed laws permitting some 30,000 Hungarian refugees to remain here and also permitting persons illegally here since 1940 to apply for permission to remain.

CIVIL RIGHTS

We can give our Republican friends credit for helping to get enacted a bill to guarantee our citizens the right to vote.

Up to this minute, I have not yet heard of a single case instituted under that law by our President's Republican Attorney General.

The same law calls for a commission to be appointed by our President to impartially study and advise the President on conditions that may deprive citizens of the equal protection of the law because of race, color, or religion. Draw your own conclusions from the fact that one of the President's appointees to that Commission contributed $500 to the campaign chest to elect to the U.S. Senate an avowed segregationist.

I refrain from any comment about the Little Rock fiasco.

SMALL BUSINESS

Big business and big bank mergers continue unabated.

There have been no big business failures.

Bankruptcies nevertheless are at a record high—yes, higher even than in the depression of the 1930's. They are 129 percent higher than in 1952, the last year of the Truman administration.

To the credit of our Republican colleagues, most of them joined us in supporting several measures to help small business.

These bills enacted into law were:

First. Making the Small Business Administration a permanent agency of Government and increasing the amount it may lend to any one small business concern.

Second. Establishing in the Small Business Administration a new division for aiding small business concerns to get long-term risk and equity capital, and

Third. Giving to small business some long overdue tax relief.

INTERNATIONAL AFFAIRS—PERILOUS PATHS—FOREIGN AFFAIRS CONTINUE TO BE BUNGLED AFFAIRS

The titles borrowed from my prior speeches tell the story.

American citizens abroad continue to be abused, affronted, jailed, and even murdered in cold blood.

Our State Department looks the other way.

In fact, the standing joke abroad is—the more degrading an act a foreign country can commit against our country, the more money it can get from us on the double quick.

Unfortunately, we still have no foreign policy other than to stumble from brink to brink and from crisis to crisis. Further comment is withheld lest I give comfort to our enemies.

Fortunately, there is a good Lord above who protects us. I pray He will never turn His back on us, no matter how sorely we try Him.

BAD GOVERNMENT—WASTE AND CORRUPTION

Add to my previous itemizations just a few more: vicuna coats, hotel bills, traveling expenses, "borrowed" rugs, non-interest-bearing loans, valuable franchises to the favored few, Government contracts to friends, tax arrears settled, abated, or remitted for those who know the right people, and so on ad nauseam.

"Businesslike methods": Remember Candidate Ike's promise? Listen to just one of the many "businesslike" deals. The Department of Agriculture sold surplus rice to private traders at $40 a ton. They sold the rice back to ICA, another U.S. Government agency, for $59.50 a ton, without even moving it. A neat little profit of $150,000. I will not ask who got what lest I be told it was only a rice cooky.

PROMISE AND PERFORMANCE

It will take much too long to list all of the breaches of promise that are attributable to our Republican friends in high places. I give you just a few that are typical.

Promise: Leadership.

Performance: The general will be found far to the rear.

Promise: A cold war with Congress.

Performance: A Congress that produced a maximum of good legislation with a minimum of friction.

Promise: Increased prosperity.

Performance: A bad recession.

Promise: A lower cost of living.

Performance: A higher cost of living.

Promise: Full employment.

Performance: Distressful unemployment.

Promise: A balanced budget.

Performance: A $12 billion deficit.

Promise: Reduce the Nation's debt limit.

Performance: Increased it by $10 billion.

Promise: Get our boys home from Korea.

Performance: Put them in Lebanon, and I dare not predict where next.

Promise: Honesty in government.

Performance: My deep respect for our American institutions prevents me from labeling that one.

CONCLUSION

Remember the Republican slogan, "Had enough?" I will be watching for the democratic answer on election day. I intentionally spell "democratic" with a small "d."

FIGURES—OF PRINCIPAL AND OF INTEREST—OF SPEECH AND OF PRINCIPLE—AND OF INTEREST

(Extension of remarks of Hon. ABRAHAM J. MULTER, of New York, in the House of Representatives, Monday, September 14, 1959)

Mr. MULTER. Mr. Speaker, the dropping of your gavel coincident with your pronouncement that this 1st session of the 86th Congress has ended will surely come in a matter of moments. I therefore ask your indulgence, while I recount briefly our congressional activities.

We have done much in which we can take pride as Americans and as Democrats.

There is still much to be done. Most of that we will do in the second session of this Congress, which will start on January 6, 1960. But in a never-ending fast-moving world, new problems will always beset us. Instead of delving into the future, a most uncertain task at best, I will dwell on the immediate past.

We have enacted into law some 400 laws of general national and international interest. Of that number, about 100 can be labeled of major importance. Merely to list all of these would take much more time than is now available. I, therefore, will refer only to the most important.

SPENDING

We appropriated more than $39 billion for national security and defense; that is almost 60 percent of the total sum appropriated for the fiscal year for all purposes. This is $20 million less than the President asked for.

The total sum appropriated for all purposes, including what Republicans invidiously refer to as back-door financing, was $79,428,598,352, more than $2½ billion less than the President requested.

It can never be sufficiently emphasized that the Congress can merely authorize expenditures and appropriate the money therefor. Only the President and his appointees, under his direction and control, can spend the money. Surely we, the Congress, can refuse to authorize or appropriate. But even after

we do both only the Executive—the President—can spend. Under our form of government there is but one spender—the President. Repeatedly, the incumbent now in the White House has ignored congressional intent and directive. He has refused to spend money as directed, spent it contrary to congressional directives and even spread out and canceled out contracts authorized and let.

Let us never forget that when our Republican friends and campaigners start calling names, the only spender, reckless or otherwise, in our National Government, is the titular head of the Republican Party, President Eisenhower. By doubling the cost of operation of his own office, he has set the spendthrift example which all his appointees seek to imitate.

While on the subject of spending, let me remind you that a major part of the cost of Government is the interest we pay on U.S. obligations. This administration without the help of Congress and over our vigorous protests has run up that cost from 1953 to date by more than 100 percent. Starting with short-term interest rates of under 2 percent and long-term rates of not more than 2½ percent, President Eisenhower has approved our paying 4¾ percent and assents to the threat of his Secretary of the Treasury that we may yet pay 6 percent. The President and his big-moneyed friends are demanding that the Congress eliminate the limit on the interest rate on long-term bonds so that he can, and I quote the President, "demonstrate responsibility in the management of our Federal debt."

Responsibility, indeed. He may have forgotten but we cannot forget that this is the same fiscal genius who in two political campaigns—1952 and 1956—promised to reduce the national debt. Three times since his first promise, at his request we increased the debt limit. This year by $2 billion to $285 billion permanently and to $295 billion temporarily until 1960.

I am proud that this Congress increased the interest rate payable on savings bonds and refused to increase it on long-term bonds. I have been introducing a bill to accomplish that in each of the last four Congresses. The administration has at long last seen the light and gone along with me.

Note the difference between savings bonds, the E- and H-bonds, and other Government securities. The savings bonds are anti-inflationary because they tend to immobilize savings. Other securities produce money that flows into the money stream to pay bills for construction, experimentation, material, services, and the like.

Savings bonds traditionally, until 1953, paid an interest rate higher than savings and thrift accounts. Our people are not so stupid as to keep their savings in bonds at minimum rates, when they can keep them in institutions paying maximum rates, all guaranteed by U.S. Government agencies.

I suppose it is human nature to take care of one's friends. So let us not be too hard on Ike and his big-business, big-moneyed friends, who say let the devil take care of the masses, the wage-earners and little businessmen and his E- and H-savings bonds. Be sure these big business operators in Government will take care of their friends with more and more profits and higher and higher interest rates. They will continue to complain about being in the 90-percent tax bracket, to try to make us forget that the little fellows pay 90 percent of the gross tax collection.

Before I leave the fiscal affairs of our Nation I wish to comment on the scare campaign the Republicans are engaging in about inflation.

The one thing they learned from President Roosevelt was "there is nothing to fear except fear itself." The difference is that he tried to teach us to be unafraid. They are using that concept in reverse, to scare us into ignoring the facts of life.

If they can cry inflation loud enough and long enough, we may look away from administered prices that ignore the law of supply and demand. We may not learn that the worst kind of inflation comes from administered prices coupled with unconscionable interest rates. The very people who are demanding that we cut Government expenses are the same ones who are pushing prices up, demanding higher interest rates and tax cuts, allowances, and exemptions, and all to balance the budget.

In 1958, the banks and moneylenders of the country had their best year in our history in gross receipts and in net profits—both before and after taxes. Nineteen hundred and fifty-nine will be even better.

The same is true of corporation profits. Eight hundred and eight leading corporations showed a 56-percent increase in profits this year over the same period for 1958—$6,915,729,000 as against $4,438,065,000, or $2,477,644,000 more net profits after taxes. More than half of these did better than that average. Four hundred and twenty-eight of these corporations improved their corporate profits by more than 75 percent in the second quarter of 1959 as against the same quarter in 1958.

These 808 companies are the very ones paying for full-page ads to frighten us out of our skins because of inflation they created and as a result of which they made these profits.

BANKING LAWS

In the financial field, we also enacted bills that increased our subscriptions to the International Monetary Fund and the International Bank for Reconstruction and Development—the World Bank—to set up a new Inter-American Bank for Central and South America similar to the World Bank, some modernization of the National Banking and Federal Reserve Acts, restrictions on holding companies in the savings and loan association field, and the first complete revision in 25 years of the Federal Credit Union Act. I was most pleased that the credit union bill was enacted in almost the exact form in which I had introduced it.

FOREIGN AID

The mutual security authorization and appropriation bills were a fine example of the operation of our Government in true bipartisan spirit, with both parties in Congress and the President moving forward in the best interests of our country and of world peace.

What irked me, however, was that in his messages to us asking for legislation in the international field the President indicated we had enough money for loans and grants abroad, for housing abroad, for highways abroad, for reclamation and community facility projects abroad, for schools and education and health programs abroad, in short for almost everything anyone could ask for abroad. But the domestic scene was different. From his veto messages it became apparent he thought we did not have enough money for any of these things needed so badly at home; not even enough for loans to our cities and States.

My position on these matters was and is quite simple—I am for all of these things for foreign friends. I have always voted for them. But I have and always will vote for them for our people at home as long as we need them.

If the time is here or ever comes that we do not have enough for both, we must first take care of our own and use the surplus, if any, to take care of those abroad.

This is not a matter of charity begins at home. This is fiscal responsibility as to taxpayers' money. I can apportion my personal funds, charitywise as I please. I have no right to do so with taxpayers' funds.

RULE BY VETO

Incidentally, it is well to note that although we overrode a Presidential veto only once, each of the other votes by which we failed to override demonstrated that the overwhelming majority of the people and their representatives were against the President. The Constitution requires a two-thirds vote to make a bill law against a Presidential veto. In neither House does the Democratic Party control a two-thirds vote. In the Senate there are 35 Republicans and 65 Democrats. In the House there are 153 Republicans, 283 Democrats, and 1 vacancy. We failed to override vetoes by from one to six votes on important measures, thus permitting one-third of either House plus one to six votes to thwart the will of a vast majority of the people's representatives.

VETERANS' AFFAIRS

Veterans' affairs were given considerable attention. We extended their direct loan program, although in my opinion not sufficiently nor in the right direction. Among other things we should not have increased their interest rates. At the urging of this administration, these rates have now been pushed up by 32 percent since 1953. We wrote a new Veterans' Pension Act and extended veterans' preferences and entitlements. Still pending is much needed legislation for a civilian pardons board to review sentences imposed upon members of the armed services.

MISCELLANEOUS

Business has been helped by amendments to the antitrust laws, the Small Business Administration Act and the Small Business Investment Company Act. Much more needs to be done in these fields.

Increased benefits to retired employees, extended temporary unemployment compensation, changes in our immigration laws, the extension of the Draft Act, establishment of a National Space Agency, aid to Federal airports and a TVA self-financing act are among our creditable accomplishments.

HOUSING

Two vetoes of the housing bills were further demonstration of smoke screens blown up to camouflage real issues. The third housing bill, which the President approved, is just as inflationary as the two he vetoed. The only real difference in substance is that the final approved version omits $50 million in loans for college classrooms. The President admits we need the classrooms but contends that in the $8 billion housing loan guarantee program, which he approved, a $50 million loan program is inflationary. He had his way—a Pyrrhic victory, if ever there was one. No one will ever be able to assess the loss to the Nation and the world if only one potential genius is denied a college education because these loans are postponed to an election year.

CIVIL RIGHTS

Hawaii became a State, thus establishing another beacon light along the path of true democracy and affirming the divinely inspired sentiments of our Founding Fathers that "all men are created equal" and "are endowed by their Creator with certain unalienable rights" and that "governments are instituted among men, deriving their just powers from the governed."

Our citizens in the District of Columbia have not fared as well. Five times in the last 10 years, the Senate has passed a bill granting home rule to the District. Not once during that time has the House District Committee reported a bill. Not once in that period, until I filed a discharge petition, to bring a home rule bill before the House, did the House District Committee even conduct any hearings. Congressional courtesy dictates that I do not characterize

those hearings. Suffice it to say, that if some members of that committee and of the Rules Committee have their way, no bill will reach the floor in this Congress.

A home rule bill will be acted upon by this Congress only if 219 Members sign my discharge petition. Up to this time 104 Democrats and 16 Republicans or a total of 120 Members have signed it.

Home rule for the District of Columbia is pledged by both party platforms. The public is fast learning that we are getting a lot of double talk from our Republican friends. No one expects southern Republicans or southern Democrats to support home rule for the Nation's Capital. That eliminates about 120 Members, 111 Democrats, and 9 Republicans. Four hundred and thirty-six less 120 leaves 316. One hundred and fifty-three Republicans less 9 southern Republicans leaves a net balance of 144. Two hundred eighty-three Democrats less 111 southern Democrats leaves a net balance of 172. One hundred four of the 172 Democrats have already signed the discharge petition. Only 16 of the 144 Republicans have signed it. That is a terrible indictment of the Republican Party. I am certain that if the Republicans will sign that petition in the same ratio as the Democrats have, in the first 2 weeks of January 1960, enough additional Democrats will sign the petition to bring the bill to the floor.

THE LABOR BILL

One other important piece of legislation that was enacted has been hailed as the labor reform bill. Time will prove, in my opinion, that this was the worst piece of anti-industrial-city and anti-labor legislation ever enacted by any Congress.

I impugn no Member's motives, good faith, or integrity. I trust that those who voted for that bill will credit as much to me and the 200 colleagues whom I joined in voting against that bill. It ill behooves any citizen, capitalist, union leader, businessman, or wage earner to pretend to be so omniscient as to have the right to accuse anyone on either side of a vote of 229 to 201 of having voted except in accordance with what his conscience dictated was best for our country. If as few as 13 Members voted the other way, the bill would have been defeated by a tie vote of 215 to 215, with the Speaker casting the deciding negative vote. If the four absentees had been present and voted nay—since they were not paired, I do not say they would have so voted—it would have required only a switch of 11 votes to defeat the bill.

No one will dare say that there is any Member of this House, regardless of how he or she voted on this bill, who would not vote to eliminate racketeering and crime not merely from union activities but from every sphere of activity on the American and even on the world scene.

The same must be said about legislation that would make unions more responsible and more responsive to the needs and desires of their members. Again that must also be said of legislation that would protect business as well as the public against illegal or improper activities of unions.

This bill was represented as accomplishing those ends. I will concede, for the sake of argument only, that that was the purpose of the bill.

I am convinced, however, it does not and will not accomplish those ends. To the extent that it tends to, I am afraid it does so by means that the courts will condemn. There are now more than enough laws on our statute books to arrest, indict, and convict every criminal, in and out of unions, whether the crime is perjury, embezzlement, forgery, fraud, bribery, theft, assault, murder, or conspiracy to commit any of these crimes or merely the attempt to do so. On that score we do not need more laws but better enforcement of those we do have.

To the extent that this bill may make criminal that which heretofore was legal, though perhaps immoral, under our Constitution, the law must be prospective and not retroactive in its effect.

It follows, therefore, that it will oust from unions, on account of past conduct, no one, no matter how bad and no matter what his name.

Despite all of the foregoing, I could have brought myself to vote for the bill if it had not been for its other many bad features. I believe they far outweighed all the good sought to be accomplished.

In voting on all bills I try to keep in mind our fundamental law, the Constitution, and particularly that portion of it known the world over as the Bill of Rights. I will never vote for any piece of legislation, no matter how well intentioned, which does not square with it. If it violates the Bill of Rights, I cannot support it. That Bill of Rights must forever remain inviolate. If we chip away even the slightest part thereof we begin to destroy it.

This bill, in my opinion, oversteps the bounds of propriety; it makes second-class citizens of unionists and workingmen who might desire to join unions; it denies them rights guaranteed to them by our Constitution.

Furthermore, this bill can be used to entice business out of our industrial centers and into labor surplus parts of the country. It is not sectionalism that prompts me to take this position. It is part of the free enterprise competitive system for business to move to the place where it can operate most profitably.

However, the best interests of our country, of the whole country, demand that no part of the country be permitted to entice businessmen to come there because of the promise or intimation that by moving there they will have cheap labor, sweatshop conditions, or nonunion shops. This misnamed labor reform bill practically guarantees to every unionized business firm that it can freely move to nonunion States and be forever free from unionization. To me that means destroying unions and enslaving the working men and women of our country. I am all for raising the standards of our citizens to the highest prevailing. I am opposed to lowering those standards to the lowest prevailing.

A PERSONAL NOTE

Permit me at this time to inject a rather personal note. During this session, I was incapacitated by illness, from which, thank God, I have recovered. For a long time I was out of Washington and for an even longer period prevented from giving full time to my congressional duties. But everything in this world has its compensating balances. My misfortune brought me the good that comes from learning how much our colleagues are genuinely concerned about each other. They extended to me a spirit of fellowship and camaraderie close to kinship. It crossed district and State lines as well as party lines and religious and color lines The assistance and offers of aid to me, and more particularly to my staff, were immeasurable. I am forever in their debt. I am, indeed, grateful. Some say only in America can it happen. I say only in America it does happen.
